| **Profile of the Chief Guest(s)** | Name of the Guest Speaker | Mr.S. Chinmay Sai |
| | Organization | QUAZR MOTORS |
| | Designation | CTO [E-POWERTRAIN] |

**Write-up on Event**

The Program Started with welcome address delivered by Mrs.B. Murugeshwari, Head-ECE. Automotive embedded systems have revolutionized the automotive industry, playing a pivotal role in enhancing safety, performance, and user experience in modern vehicles. These sophisticated systems encompass a wide range of electronic components and software that are integrated into vehicles to control various functions, making them more efficient, reliable, and user-friendly. This write-up explores the significance, components, applications, and challenges of automotive embedded systems in the context of the rapidly evolving automotive landscape.

Automotive embedded systems are the driving force behind the transformation of the automotive industry. They enhance safety, performance, and user experience while paving the way for autonomous driving. As technology continues to advance, addressing challenges like cybersecurity and regulatory compliance will be essential to ensure that these systems continue to drive innovation in the automotive world, making vehicles safer, more efficient, and more enjoyable to drive. Finally, the Vote of thanks delivered by Mr.K. Ramesh, AP/ECE MSAJCE.

**Feedback from participants**

- ✓ It was Extremely helpful and an excellent.
- ✓ Got more extra knowledge.
- ✓ This workshop will be more interesting if there is some practical demonstration.
- ✓ I highly request the organization to conduct such useful workshop in future

Respected Sir,

Sub: Regarding Honararium for Automotive Embedded Systems

With reference to above subject, Department of Electronics and Communication Engineering and SHF jointly organises Workshop on "Automotive Embedded Systems" on 25th Aug 2023. So, we are requesting you to approve the Honararium of Rs. 3000 (Three Thousand Rupees Only) to conduct the program successfully.

Thanking You.

Yours Sincerely

S. M. Mohan

| **Profile of the Chief Guest(s)** | Name of the Guest Speaker 1 | Mr.M.Surenthar |
| | Organization | Happiest Minds Technology Private Limited,Bangalore. |
| | Designation | Data Scientist |
| **Write-up on Event** | AI-integrated IoT devices can analyze data to reveal patterns and insights and adjust system operations to become more efficient. Ability to adjust on the fly. Data can be generated and analyzed to identify points of failure, which enable the system to make adjustments as needed. The Artificial Intelligence of thing(AIoT) is the combination of Artificial Intelligence technologies with the internet of things infrastructure to achieve more efficient IoT operations, improve human-machine interactions and enhance data management and analytics<br>The ability to predict maintenance, enable smart manufacturing, improve real time monitoring, and enhance decision-making are some of the key benefits of AI in the IoT.<br>As the technology matures and becomes more affordable, AIoT will find its way into numerous applications, enhancing efficiency, decision making ,customer experiences and safety. | |

| **Profile of the Chief Guest(s)** | Name of the Guest Speaker 1 | Mr.M.Surenthar |
| | Organization | Happiest Minds Technology Private Limited,Bangalore. |
| | Designation | Data Scientist |
| **Write-up on Event** | While machine learning is based on the idea that machines should be able to learn and adapt through experience, AI refers to a broader idea where machines can execute tasks "smartly." Artificial Intelligence applies machine learning, deep learning and other techniques to solve actual problems. I is everywhere, from gaming stations to maintaining complex information at work. Computer Engineers and Scientists are working hard to impart intelligent behavior in the machines making them think and respond to real-time situations. AI is transiting from just a research topic to the early stages of enterprise adoption. Tech giants like Google and Facebook have placed huge bets on Artificial Intelligence and Machine Learning and are already using it in their products. But this is just the beginning, over the next few years, we may see AI steadily glide into one product after another. | |

| | Organization | Haaris Infotech Pvt Ltd |
| | Designation | CEO |
| **Write-up on Event** | The telecom industry is at the forefront of technological innovation, and artificial intelligenc (AI) is playing a major role in this transformation. AI is being used to improve networ performance, automate customer service tasks, and develop new products and services Artificial Intelligence (AI) has been one of the most transformative technologies of the past fev decades. It has revolutionized industries across the board, from healthcare to finance, and it impact on telecommunications and the information society has been particularly significant Telecommunications and the information society are closely intertwined, with communicatio and the exchange of information being key elements of modern society.<br><br>AI is revolutionizing telecommunications, with applications ranging from network optimizatio to customer service. AI-powered chatbots and virtual assistants enhance customer experiences while machine learning algorithms help detect and prevent network outages. One of the mos important ways that AI is being used in the telecom industry is to improve networ performance. AI can be used to analyze data from network sensors to identify potentia problems before they occur. This allows telecom providers to take proactive steps to fi problems and prevent outages. | |

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

AI-powered chatbots and customer service, Network optimization and management, Predictive maintenance and fault detection, Fraud detection and prevention, AI-powered billing and revenue management, AI in Information Society, Personalized advertising and marketing, Cybersecurity and fraud prevention, Data analytics and insights & Smart Cities and the Internet of Things (IoT).

Field and service operations account for 60 to 70 percent of most telcos' operating budgets, so applying AI can offer real and rapid benefits. The industry has already faced a decade-plus of increasing cost pressure, and the returns on necessary infrastructure investments are barely outpacing the cost of capital. Now the sector must cope with the pandemic-related changes to how people work and shop, which have caused demand to surpass all expectations. At the same time, staffing telco operations functions has become increasingly difficult, with labor shortages and new coronavirus variants further complicating the process.

The telecommunication industry is gaining a huge advantage by investing in massive data recovery from various customer bases. Potential data is recovered from networks, mobile applications, customer insight, profile, technology, billing data, and services. The integration of Artificial Intelligence in telecom has helped the industry in self-optimizing networks, security, and predictive measures.

The telecom industry is leveraging the potential of AI to analyze and work out the large volume of Big Data. It helps to gain competitive and useful insight to improve business process, operations, user experience, increase sales and revenue with new improved services and products in the telecom industry. The future scope of Artificial Intelligence in the telecommunication industry is bright.

Dear Sir,
As per Call conversation we the department of Electronics and Communication Engineering is arranging a guest lecture for our third year students titled "Applications of Image Processing in Film Industry".I am sure that your lecture will enhance the students to think beyond the syllabus and will be motivating to carry out their Projects more suitable for the society.
Date and Time of Guest Lecture: 02/09/2023 & 1:40pm
We are eagerly waiting to hear your lecture.
Kindly Confirm your presence on the scheduled date to the same mail id.

Thanks,
Regards,
Mrs.B.Murugeshwari

## Report on Guest Lecture on Application of Digital Image Processing in Film Industry

| | | |
|---|---|---|
| **Department:** | ECE, CSE,IT & EEE – MSAJCE Chennai | |
| **Type of Event:** | Guest Lecture | |
| **Event Title:** | Application Of Digital Image Processing in Film Industry | |
| **Date & Time:** | 02/09/2023 & 1:40PM To 3:20PM | |
| **Venue / Mode (Platform):** | MSAJCE- Alhaj.Dr.S.M. Dasthagir Auditorium/Offline | |
| **Organizer:** | Dr.I.Manju, HoD/ECE | |
| **Coordinator(s):** | Mrs.B. Murugeshwari, AP/ECE | |
| | Mrs.S. Anusuya, AP/ECE | |
| **Details of Participants:** | Internal participants (ECE, CSE, IT&EEE Students). | |
| **Profile of the Chief Guest** | Name of the Guest Speaker | Mr.N. Gobikrishnan |
| | Organization | Spellbound VFX Animation Pvt., LTD |
| | Designation | Head of Production |
| **Write-up on Event** | Image Processing in film industry presents a detailed overview of image processing techniques that are used in practice in digital cinema. The event shows how image processing has become ubiquitous in movie-making, from shooting to exhibition. It covers all the ways in which image processing algorithms are used to enhance, restore, adapt, and convert moving images. These techniques and algorithms make the images look as good as possible while exploiting the capabilities of cameras, projectors, and displays. The speaker focuses on the ideas behind the methods, rather than proofs and derivations. The first part of the presentation focused on fundamentals of optics and color. The second part explains how cameras work and details all the image processing algorithms that are applied in-camera. With an emphasis on state-of-the-art methods that are actually used in practice, the last part describes image processing algorithms that are applied offline to solve a variety of problems. The guest speaker presented various movie clips where image processing played a vital role like Texture Mapping, De-Ageing, etc.,<br>He closed the session by discussing the scope of Image Processing. | |

## FDP COURSE CONTENTS

- MOS Transistor Principles
- Combinational Logic Circuits
- Sequential Logic Circuits and Clocking Strategies
- Interconnect, Memory Architecture and Arithmetic Circuits
- ASIC Design and Testing

## REGISTRATION DETAILS

- Registration fee is Rs. 250 per participant.
- Registration for the FDP can be done using the registration form and photocopy of the form should be uploaded online through the registration link and to the E-mail ID provided.
- The faculty members of the various institutions, research scholars, PG Scholars, participants from Government, Industry Bureaucrats / Technicians and staff of host institutions.
- Participants will be selected on first come first serve basis and Selected candidates will be intimated by E-mail.

## About the College:

The Mohamed Sathak A.J. College of Engineering (MSAJCE) established in 2001 under the aegis of Mohamed Sathak Trust, is affiliated to Anna University & approved by AICTE. The college is accredited by NAAC with A Grade. The Mohamed Sathak Trust has 46 years of excellence presence in the education sector, offering Technical, Arts and Science, Medical and Management Education. The MSAJCE was established with an objective of imparting quality education, developing ethical values and personality traits thereby molding the budding engineers into dynamic and deployable engineers. The college campus sprawling over 70 acres of the lush green environment is adjacent to SIPCOT IT Park, Siruseri Chennai and is surrounded by multinational IT industries such as TCS, CTS, Infosys, HCL, Aspire, Steria, Polaris, Hexaware Technologies, Intellect, LF Smidth etc.

Mohamed Sathak A.J. College of Engineering offers 8 UG Courses, and 2 PG Courses, viz B.E. in Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Electrical and Electronics Engineering, Mechanical Engineering, B. Tech in Information Technology, Computer Science and Business System, Artificial Intelligence and Data Science, M.E in Computer Science and Engineering & Structural Engineering.

The college provides a conducive environment for intellectual development, free-thinking, and personal growth through Self learning; Competitive based learning and Innovative learning. To support these activities 16 Technology centers with cutting edge technologies in collaboration with various industries have been established for dynamic learning opportunities and equipping them with the skills, insights, attitudes and practical experiences that are necessary to take up responsibilities in the industry and society.

## About the Department:

Electronics and Communication Engineering as the name implies deals with the use of electronics concepts and principles transfer the information from one place to other. Electronics and Communication engineering utilizes science and mathematical concepts applied to the practical problems opening new avenues to create new product to make the human lead a comfortable life. The development of ICT and its penetration has row revolutionized the new area such as health care, automation, remote sensing, advanced communication etc. This program prepares the student for both hardware and software industries such as system engineers, research and development, academicians, software Engineers, network engineers, maintenance engineers, etc.

Respected Sir,

Sub: Faculty Development Program (FDP) on VLSI and Chip Design - Reg

With reference to the above subject, we are interested to conduct the **FDP on "VLSI and Chip Design"** for Faculty members from 10.07.2023 to 14.07.2023 (5 days). This will be useful for the faculty members to clear the technical knowledge and methodology. I kindly request you to give permission to conduct the FDP.

Thanking You

Yours Sincerely

I. Manju 3/7/23

|---|---|---|
| | Name of the Guest Speaker 8 | **Dr.M.Senthil Sivakumar** |
| | Organization | Indian Institute of Information Technology Tiruchirappalli, |
| | Designation | Assistant Professor, Department of ECE, |
| **Write-up on Event** | The Program Started with welcome address delivered by Dr.I.Manju, Head – IQAC & ECE.<br>VLSI (Very Large-Scale Integration) and Chip Design are at the heart of modern electronics, powering a wide range of devices from smartphones and laptops to complex systems like autonomous vehicles and data centers. The rapid advancements in semiconductor technology demand that educators stay updated with the latest techniques and tools to impart relevant knowledge to students.<br>**Objectives of an FDP in VLSI and Chip Design:**<br>**In-Depth Understanding:** To provide participants with an in-depth understanding of VLSI and Chip Design concepts, including transistor-level design, digital and analog integrated circuits, and system-on-chip (SoC) architectures.<br>**Hands-On Experience:** To offer practical, hands-on experience with industry-standard design tools and platforms, enabling participants to work on real-world projects.<br>**Current Trends and Emerging Technologies:** To familiarize participants with the latest trends in VLSI and Chip Design, such as advanced packaging techniques, low-power design, and the integration of AI and machine learning into chip design.<br>**Curriculum Development**: To assist faculty members in developing or updating their curricula to meet industry demands and provide students with a comprehensive education in VLSI and Chip Design.<br>**Research Opportunities:** To encourage research collaborations and projects, fostering innovation in the field and enhancing the research capabilities of participating faculty members.<br>**Conclusion:**<br>An FDP in VLSI and Chip Design is essential for educators in the field of electronics engineering. It equips them with the necessary skills, knowledge, and resources to provide high-quality education to students, aligning academic programs with industry requirements, and fostering research collaborations. By participating in such programs, faculty members can contribute significantly to the growth and development of the VLSI and Chip Design industry while ensuring that the next generation of engineers is well-prepared for the challenges and opportunities in this dynamic field.<br>Finally the Vote of thanks delivered by Mr.K. Ramesh, AP/ECE - MSAJCE. |

**Feedback From Participants**

- ✓ clearly explained everything
- ✓ As a faculty helpfull to clear the technical and methodology to interact with students nice
- ✓ Very useful to trasfer the gained knowledge to students
- ✓ His presentation was good and knowledge of the topic was good
- ✓ Most interesting topics and session is very useful to gain knowledge
- ✓ Good and informative

Sub: Invitation for FDP

Respected Sir,

I am writing this letter to invite you as a speaker to our Five days online Faculty Development Programme on "VLSI and Chip Design", which is to be held from 10th to 14th July 2023. Your graceful presence will be useful to us, and we shall be grateful to you for the same. Please kindly send me your profile.

Expecting a positive response from you. Please do not hesitate to connect with us.

Please take a look at the file I've attached.( Brochure and Schedule)

Thank you.

Regards,

RAMESH K,

AP/ECE.

HI Sir,

Thank you for the invitation.

Profile :
I am VELKUMAR G N, Completed Master Degree in VLSI domain. Worked as a Project trainee in DSDO (CAIR), Bangalore for one year in the field IP Core development also Project intern at IIT-M. Currently working at Qualcomm pvt ltd in the fiend of Serdes Design and layout. 10+ year of experience in the field of Memory, GPIO, Power Management IC and Serdes Interface. In free time guiding M.E and B.E student projects and training them toward a vlsi job.

Sub: Invitation for FDP

Respected Mam,

I am writing this letter to invite you as a speaker to our Five days online Faculty Development Programme on "VLSI and Chip Design", which is to be held from 10th to 14th July 2023. Your graceful presence will be useful to us, and we shall be grateful to you for the same. Please kindly send me your profile.

Expecting a positive response from you. Please do not hesitate to connect with us.

Please take a look at the file I've attached.( Brochure and Schedule)

Thank you.

Date: 11-07-2023

From

Mr. RAMESH K,
AP / ECE,
Mohamed Sathak A.J. College of Engineering,
Chennai.

Submitted to the Chairman with a request to kindly grant Rs 7250/- to meet the expenses of FDP organized as per norms

11/07/23

To

The Principal,
Mohamed Sathak A.J. College of Engineering,
Chennai.

Respected Sir,

SUB: Requesting to provide fund for One Week Online FDP - Reg.

With reference to above subject, Department of Electronics and Communication Engineering organizes the One Week Online faculty development program on **"VLSI and Chip Design"** from 10/07/2023 to 14/07/2023. So I am requesting you to approve the fund **Rs. 22,500** (Twenty two thousand five hundred only) to conduct the program successfully.

The details are follows,

| | |
|---|---|
| Speaker Remuneration | : 9*2500 = 22,500/- |
| Total Amount collected from External Participants | : 61*250 = 15,250/- |

7250/- Balance needed

Thanking you,

Yours Sincerely,

11/7/23

[RAMESH. K]

Submitted to Principal for approval
