

MOHAMED SATHAK
A.J. COLLEGE OF ENGINEERING

An Autonomous Institution

Department of Computer Science and Engineering

Curriculum and Syllabus (I - IV Semester) 2024 - 2025

[Approved by AICTE, New Delhi | Affiliated to Anna University, Chennai |
Recognised by UGC 12(B) & 2(f) Act | An ISO 9001:2015 Certified |
NAAC Accredited with 'A' Grade | NBA – Mechanical]

34, Rajiv Gandhi Salai (OMR) Siruseri IT Park, Chennai - 603 103

MOHAMED SATHAK A J COLLEGE OF ENGINEERING
Chennai – 603103

REGULATIONS 2024
(CHOICE BASED CREDIT SYSTEM)

B.E – COMPUTER SCIENCE AND ENGINEERING

I. PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Technical Proficiency and Innovation

Graduates will possess strong technical knowledge and skills in **Computer Science Engineering**, enabling them to solve complex problems, design and implement, innovative and sustainable solutions for Industry and Society.

PEO2: Professional and Ethical Leadership

Graduates will achieve successful careers and contribute towards technological advancements in terms of leadership, ethical responsibility, effective communication, and teamwork.

PEO3: Lifelong Learning and Societal Contribution

Graduates will engage in lifelong learning to be updated with cutting edge technology and apply their skills to address global challenges thus promoting socio economic development.

II. PROGRAM OUTCOMES (POs)

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

III. PROGRAM SPECIFIC OUTCOMES (PSOs)

Graduates will be able to

PSO1: Design and implement sustainable solutions in **Computer Science Engineering** domain by using innovation, technical knowledge acquired, modern hardware and software tools.

PSO2: Adapt and excel in **Computer Science Engineering** domain through continual learning, higher education, research and use of new technology for societal and industry needs.

PSO3: Contribute in leadership roles to create new opportunities and ensuring adherence of economic, environmental and ethical standards.

Mandatory Course[#]								
A		Personality and Character Development Activity: (Universal Human Value - II)						MC
B		NSS / NCC / NSO / YRC / Club Activity : Phase 1*						MC*
*	The student may opt any one. They have to complete the respective Phase II and Phase III. It is a mandatory course to get the degree certificate after completing 4 years as per the norms of UGC, AICTE & Anna University. If any student did not complete the course after completing it only degree certificate is awarded.							
#	Activities are conducted exclusively for two week apart from the academic activity							

SEMESTER III

S.No	Subject Code	Subject	L	T	P	Contact Periods	Credits	Category
1	24MA301	Discrete Mathematics	3	0	0	3	3	ESC
2	24CS303	Java Programming	3	0	0	3	3	PCC
3	24CS302	Data Structures	3	0	0	3	3	PCC
4	24EC312	Digital System Design	2	1	2	5	4	PCC
5	24CS301	Computer Organization and Architecture	3	0	0	3	3	PCC
6	24CS321	Data Structures Lab	0	0	4	4	2	PCC

9	24GE311	Universal Human Values and Ethics	1	0	2	3	2	HSMC
10		Language Elective - I	0	0	2	2	0	MC
11	24MC321	NSS / NSO / YRC - Level II	0	0	2	2	0	MC
Total						35	24	

Language Elective (Non-Credit Mandatory Course): Student can select any one and submit the certificate

1. Advanced English Communication-Level I and Level II–Certified by Cambridge University Press & Assessment
2. Hindi - Level I (Parichaya) and Level II (Prathmic) Certified by Dakshina Bharat Hindi Prachar Shaba
3. Japanese – Level N5 and N4 Certified by JLPT / NPTEL / SWAYAM
4. German – Level A1 and A2 Certified by Goethe / NPTEL / SWAYAM
5. French - Level A1 and A2 Certified by Goethe / NPTEL / SWAYAM

SEMESTER IV

S.No	Subject Code	Subject	L	T	P	Contact Periods	Credits	Category
1	24CS402	Design and Analysis of Algorithms	3	0	0	3	3	PCC
2	24CS403	Database Management Systems	3	0	0	3	3	PCC
3	24CS411	Operating Systems	3	0	2	5	4	PCC
4	24MA411	Probability and Statistics	2	1	2	5	4	BSC
5	24AD411	Foundations of Data Science	3	0	2	5	4	PCC
6	24CH411	Environmental Studies and Sustainable Development	2	0	2	4	3	BSC
7	24GE421	Startup and Entrepreneurship	1	0	2	3	2	HSMC
8	24CS421	Database Management Systems Lab	0	0	4	4	2	PCC
9		Language Elective - Level I*	0	0	2	2	0	MC
10		Audit Course - II	0	0	2	2	0	MC
Total						36	25	

Audit Course-II (Non-Credit Mandatory Course): Student can select any one of the following and Complete the same to get the degree certificate

1. Disaster Management
2. Industrial Safety
3. Gender Sensitisation

HERITAGE OF TAMILS

(Common to all branches)

Course Code	24TA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

Course Objectives:

1. To familiarize about the importance of Tamil Language and its literature
2. To teach about the heritage of Tamil from art and sculpture
3. To teach about the culture of Tamil from Folk music and martial arts
4. To impart knowledge on thinai concepts
5. To provide insight on the contribution of Tamil in freedom struggle and Indian culture

Unit: I LANGUAGE AND LITERATURE

3

Language Families in India - Dravidian Languages – Tamil as a Classical Language - Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature - Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: II HERITAGE - ROCK ART PAINTINGS TO MODERN ART – SCULPTURE

3

Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: III FOLK AND MARTIAL ARTS

3

Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: IV THINAI CONCEPT OF TAMILS

3

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: V CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE

3

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books.

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

Total

15

Pedagogical Methods:

- | |
|---|
| Unit 1: Sol Vilayattu |
| Unit 2: Drawing |
| Unit 3: Theme based activities (Folk and Dance) |
| Unit 4: Essay & Poetry Writing (Thinai) |
| Unit 5: Try to learn about basic Siddha Vaithiyam |

Course Outcomes:

After successful completion of this course, the students will be able to

- | |
|---|
| CO1: Explain the salient features of Tamil language and its literature. |
| CO2: Discuss about the heritage of Tamil exhibited by various forms of art and sculpture. |
| CO3: Describe Tamil heritage displayed by folk music and martial arts |
| CO4: Discuss and describe the features of five Thinais in Tamil. |
| CO5: Describe the contribution of Tamil in freedom struggle and Indian culture. |

தமிழர் மரபு
(Common to all branches)

Course Code	24TA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

Course Objectives:

1. தாய்மொழியின் நிகரற்ற தொன்மையை விளக்குவது
2. பழம் தமிழரின் துறை சார்ந்த ஓவியங்கள் மற்றும் சிற்பங்கள் நவீன கலைகள் குறித்து விளக்குவது
3. வியக்க வைக்கும் பழந்தமிழரின் கலைகள், இசை மற்றும் வீரவிளையாட்டுகள் பற்றி தெரியப்படுத்துவது
4. தமிழர்களின் திணைக் கோட்பாடுகளை பற்றி விளக்குவது
5. தமிழரின் தன்னிகரற்ற ஈடுபாடு - சித்த மருத்துவம் மற்றும் விடுதலைப் போராட்டம் பற்றி விளக்குவது

அலகு - I மொழி மற்றும் இலக்கியம்

3

இந்திய மொழிக் குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துக்கள் - தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம் ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு - II மரபு பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை சிற்பக் கலை

3

நடுகல் முதல் நவீன சிற்பங்கள் வரை - ஐம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள் பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் நாட்டுப்புறத் தெய்வங்கள் - குமரிமுனையில் திருவள்ளூர் சிலை - இசைக் கருவிகள் மிருதங்கம் - பறை வீணை யாழ் நாதஸ்வரம் தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு - III நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள்

3

தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் விளையாட்டுகள்.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு - IV தமிழர்களின் திணைக் கோட்பாடுகள்

3

தமிழகத்தின் தாவரங்களும், விலங்குகளும் - தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் - தமிழர்கள் போற்றிய அறக்கோட்பாடு - சங்ககாலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும் - சங்ககால நகரங்களும் துறை முகங்களும் - சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி - கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி

Teaching-Learning Process Pedagogy: Lecture, PPT**RBT Level:** L1, L2, L3**அலகு - V இந்திய தேசிய இயக்கம் மற்றும் இந்திய**

3

பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு

இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு - இந்தியாவின் பிறப்பகுதிகளில் தமிழ்ப் பண்பாட்டின் தாக்கம் - ச்யமரியாதை இயக்கம் இந்திய மருத்துவத்தில் சித்த மருத்துவத்தின் பங்கு - கல்வெட்டுகள், கையெழுத்துப்படிக்கல்கள்-தமிழ்ப் புத்தகங்களின் அச்ச வரலாறு

Teaching-Learning Process Pedagogy: Lecture, PPT**RBT Level:** L1, L2, L3**Total****15****Pedagogical Methods:**

- Unit 1: Sol Vilayattu
- Unit 2: Drawing
- Unit 3: Theme based activities (Folk and Dance)
- Unit 4: Essay & Poetry Writing (Thinai)
- Unit 5: Try to learn about basic Siddha Vaithiyam

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: தமிழ் மொழி மற்றும் அதன் இலக்கியத்தின் முக்கிய அம்சங்களை விளக்குவார்கள்.
- CO2: கலை மற்றும் சிற்பத்தின் பல்வேறு வடிவங்களால் காட்சிப்படுத்தப்பட்ட தமிழின் பாரம்பரியத்தைப் பற்றி விவாதிப்பார்கள்
- CO3: நாட்டுப்புற இசை மற்றும் தற்காப்பு கலைகளால் காட்டப்படும் தமிழ் பாரம்பரியத்தை விளக்குவார்கள்
- CO4: தமிழில் ஐந்து திணைகளின் அம்சங்களைப் பற்றி விளக்குவார்கள்.
- CO5: சுதந்திரப் போராட்டத்திலும் இந்திய கலாச்சாரத்திலும் தமிழின் பங்களிப்பை விவரிப்பார்கள்.

Text Books:

- T1: தமிழக வரலாறு - மக்களும் பண்பாடும் - கே. கே. பிள்ளை (வெளியீடு: தமிழ்நாடு பாடநூல் மற்றும் கல்வியியல் பணிகள் கழகம்.)
- T2: கணினித் தமிழ் - முனைவர் இல.சுந்தரம் (விகடன் பிரசுரம்)

TECHNICAL COMMUNICATION -I (Common to all branches)

Course Code	24EN101	Course Type	Theory
Teaching Periods/Week (L: T:P)	3:0:0	Credits	3
Total Teaching Periods	45	IAT + ESE Marks	40 + 60
Teaching Department	English		

Course Objectives:

1. To facilitate students to develop their comprehension skills.
2. To equip the students to improve their receptive skills.
3. To equip learners with better vocabulary and enhance their writing skills.
4. To aid students to speak effectively in all kinds of communicative contexts.
5. To improve the learners' basic proficiency in workplace communication.

Unit: I DEVELOPING COMPREHENSION SKILLS 9

Listening: Introduction to Informational listening **Reading:** Short Narratives and Skimming Passages. **Speaking** Introducing Oneself, Narrating a Story / Incident. **Writing:** Sequential Writing (Jumbled Sentences), Process/Product Description **Grammar:** Parts of Speech -Verbs – Main & Auxiliary-Pronouns **Vocabulary:** Misleading words- Spell check - Homonyms & homophones.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: II LISTENING AND EXTENDED READING 9

Listening: Listening for Comprehension-Gap Filling **Reading:** News reading-Scanning Passages – Reading Longer Texts- Cloze Reading **Speaking:** Importance of speaking skill - Short Conversation-Public Speaking Do's & Don'ts **Writing:** Note Making, Note Taking - Paragraph Writing - Types of Paragraph - Compare and Contrast **Grammar:** Tenses – Form, Function and Meaning - Basic Sentence structure-Articles **Vocabulary:** One-Word Substitutes, Phrasal Verbs – Cause and Effect expressions

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: III INTRODUCTION TO FORMAL WRITING 9

Listening: Listening to Lectures and Taking Notes **Reading:** Reading on Visual Content **Speaking:** One-Minute Talk **Writing:** Informal Letter Writing , Email Writing, Data Interpretation-Pie chart, Bar chart **Grammar:** Tenses, Active Voice, Passive Voice, Impersonal-Preposition **Vocabulary:** Guessing the meaning from context, Cloze Exercise - Word power.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: IV ENHANCING SPEAKING ABILITY 9

Listening: Listening to Speeches **Reading:** Speed Reading **Speaking:** Just a Minute **Writing:** Instructions, Formal letter writing, Data Interpretation-Flow chart, Table **Grammar:** 'Wh' Questions / Yes or No Questions, Question Tag, Imperatives **Vocabulary:** Synonyms, Antonyms, Different forms of same words.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: V EXTENSIVE LANGUAGES FOR WORKPLACE**9**

Listening: Extensive Listening -Audio scripts – Listening to Conversation **Reading:** Extensive reading (Jigsaw Reading, Short Stories, Novels) - Introduction to Technical Article **Speaking:** Short Presentations on Technical Topics -Tips for Doing Presentation **Writing:** Recommendations, Essay Writing **Grammar:** Collocation, Concord -Compound words **Vocabulary:** Informal Vocabulary and Formal Substitutes

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT

RBT Level: L1, L2, L3

Total**45****Pedagogical Methods:**

Unit 1: Speaking task
Unit 2: Reading task
Unit 3: Speaking task
Unit 4: Reading task
Unit 5: Speaking task

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Apply comprehension skills and interpret different contents.
CO2: Read and comprehend various texts and audiovisual contents
CO3: Infer data from graphs and charts and communicate it in varied contexts.
CO4: Participate in diverse speaking situations.
CO5: Present, discuss and coordinate with peers in workplace using language skills.

MATRICES AND CALCULUS

(Common to All Branches)

Course Code	24MA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	3:1:0	Credits	4
Total Teaching Periods	60	IAT + ESE Marks	40 + 60
Teaching Department	Mathematics		

Course Objectives:

1. To impart knowledge on the concepts of matrix algebra techniques needed for practical applications.
2. To familiarize the students with differential calculus.
3. To familiarize students with single integrals and multiple integrals.
4. To illustrate the simple applications of vector calculus.
5. To make the students to understand the concept of analytic function.
6. To introduce the basic concepts of complex integration.

Unit: I MATRICES

12

Eigenvalues and Eigenvectors of a real matrix – Properties of Eigenvalues and Eigenvectors – Statement and applications of Cayley-Hamilton Theorem – Diagonalization of matrices by orthogonal transformation – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos
RBT Level: L1 - L3

Unit: II DIFFERENTIAL CALCULUS

12

Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation rules (sum, product, quotient, chain rules) - Implicit differentiation - Logarithmic differentiation - Applications: Maxima and Minima of functions of one variable.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos
RBT Level: L1 - L3

Unit: III INTEGRAL CALCULUS & MULTIPLE INTEGRAL

12

Definite and Indefinite integrals - Substitution rule - Techniques of Integration: Integration by parts - Double integrals - Double integral in polar coordinates - Area-enclosed by plane curves – Triple integrals – Volume of solids.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1 - L3

Unit: IV VECTOR CALCULUS

12

Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green's, Gauss divergence and Stoke's theorems.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos
RBT Level: L1 - L3

Unit: V ANALYTIC FUNCTIONS AND COMPLEX INTEGRATION**12**

Analytic functions –Necessary and sufficient conditions for analyticity -Construction of analytic function -Conformal mapping – Mapping by functions $w=z+c$, cz , $1/z$ -Bilinear Transformation, Line integral - Cauchy's integral theorem – Cauchy's integral formula – Taylor's and Laurent's series

Teaching-Learning Process Pedagogy: Lecture, PPT**RBT Level:** L1 - L3**Total****60****Pedagogical Methods:**

- | |
|---|
| Unit 1: To Explore the applications of matrices in real-world scenarios. |
| Unit 2: Use differential equations to model the rate of change of pollutant concentration over time and space. |
| Unit 3: Apply integral calculus to optimize production levels, pricing strategies, and economic decision- making. |
| Unit 4: Apply concepts of gradient, divergence, and curl in various coordinate systems to analyze vector fields. |
| Unit 5: Use Python to visualize complex functions in the complex plane., Example: $w= 1/z^2$ |

Course Outcomes:

After successful completion of this course, the students will be able to

- | |
|--|
| CO1: Use the matrix algebra methods to diagonalize a given matrix and identify the special properties of matrices. |
| CO2: Demonstrate different differentiation techniques and find maxima and minima of a given function. |
| CO3: Find area enclosed by plane curves and volume of solids using integration techniques. |
| CO4: Apply the concepts of gradient, curl and divergence across various disciplines. |
| CO5: Utilize the concepts of analytic functions and construct analytic functions. |
| CO6: Apply the basic concepts of complex integration to solve complex integrals. Expand a given function into Taylor's Series and Laurent's Series |

PROGRAMMING IN C

(Common to CSE / IT / AIDS / CSBS / CSCS / AIML / EEE / ECE)

Course Code	24CS111	Course Type	Integrated
Teaching Periods/Week (L:T:P)	2:0:4	Credits	4
Total Teaching Periods	90	IAT + ESE Marks	50 + 50
Teaching Department	Computer Science and Engineering		

Course Objectives: To equip the students with the knowledge in

1. C programs using fundamental programming structures.
2. C programs utilizing arrays and strings.
3. Applications of C using functions and pointers.
4. Advanced features of the C programming language, including structures and unions.
5. File operations in C

Unit: I INTRODUCTION AND BASICS OF C PROGRAMMING 6

Introduction - Structured programming - Problem solving techniques: Algorithms, Flowcharts, Pseudo code - Structure of a C program - Compiling and executing a C program - Data types and Variables – operators and expressions – Input and output functions -Control Structures: decision making and looping statements

Teaching-Learning Process Pedagogy: Chalk and Talk
RBT Level: L1, L2, L3, L4

Unit: II ARRAYS AND STRINGS 6

Arrays: One dimensional array: declaration, initialization and operations - Two & Multi-dimensional arrays. Strings: Strings vs Character arrays - String operations – String Functions – Arrays of Strings

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1, L2, L3, L4

Unit: III FUNCTIONS AND POINTERS 6

Need for Modular programming - Functions: declaration and definition – Function call - Call by value - Call by reference - Recursive functions - Pointers: Introduction - Pointers to primitive data types – Arrays and pointers - Array of pointers - Storage classes - Dynamic Memory Allocation

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1, L2, L3, L4

Unit: IV STRUCTURES AND UNIONS 6

Structures: Need, declaration, Accessing Structure elements – Nested structures - Arrays of structures – Self-referential structures – Pointers to structures - Unions: declaration and accessing

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1, L2, L3, L4

Files: Introduction, Types of file processing – Sequential and Random Access - Read /Write of binary and text files. - Preprocessor directives – Command line arguments

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Total

30

Pedagogical Methods:

- Unit 1: To draw a flowchart and a write algorithm for the following problems
i) sum of two numbers ii) largest among three numbers
- Unit 2: Perform basic operations on arrays
i) Find the largest element in the array ii) Calculate the sum of all elements in the matrix
- Unit 3: Program for swapping two integers using call by value and call by reference
- Unit 4: Create a student information system,
i) Declare a structure Student with members: name, age and Roll number.
ii) To calculate the GPA and CGPA from the student's marks
- Unit 5: Programs for file operations

Practical Exercises:**60**

1. Programs for demonstrating the use of different types of operators like arithmetic, logical, relational, and ternary operators (Sequential structures)
 - a) To find the area of a triangle
 - b) To Convert temperatures from Celsius to Fahrenheit or vice versa using the appropriate formula
2. Write a C program to demonstrate the use of “scanf” and “printf” statements to “read” and “print” values of variables of different data types.
3. Programs using decision making statements like ‘if’, ‘else if’, ‘switch’, conditional and unconditional ‘goto’ (Selective structures)
 - a) To find the Largest among three numbers
 - b) To print day of the week by giving a integer using switch Statement
 - c) To find Roman number of a given number
4. Programs for demonstrating repetitive control statements like ‘for’, ‘while’, and ‘do-while’ (Iterative structures):
 - a) Check whether the given number is Armstrong or not.
 - b) To find the Sum of squares of first n numbers.
 - c) To Check the given number is prime or not.
 - d) To print the Multiplication table
 - e) To convert the Octal number to decimal number.
5. Implement the following programs in C using one-dimensional array
 - a) To Calculate the sum and average of elements
 - b) To Find the min and max values of the given set of numbers
 - c) To Reverse the elements
 - d) To arrange the given set of number by using Bubble sort
 - e) To find the given number from the list of elements by using Linear Search.
6. Write a C program using two-dimensional arrays for a) Matric Addition b) Matrix Multiplication

7. Programs to demonstrate modular programming concepts using user-defined functions
 - a) Swapping two integers using call by value and call by reference
 - b) Create a recursive function to calculate the factorial of a number and for binary search
8. Implement various character and string operations with and without using built-in functions in C.
 - a) Find length of a string
 - b) String Concatenation
 - c) To Check whether the given string is Palindrome or not
9. Write a C program using pointers for the following:
 - a) Swapping two numbers
 - b) Greatest and the smallest among three numbers
 - c) Reverse of a string
 - d) Linear searching in array
10. Programs to illustrate the use of user-defined data types using Structures:
 - a) Employee Payroll
 - b) Student information system
11. Write a C program to implement various file operations listed below:
 - a) Copy the contents from one file to another file
 - b) Merging two files
12. Programs to demonstrate the use of pre-processor directives and command line arguments for the following:
 - a) Finding area of circle and area of a square using #define
 - b) Simple arithmetic operations using #include
 - c) Program that accepts two file names as command-line arguments and copy the contents from one file to another file.

System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Systems with Linux Operating System with GNU Compiler / Windows with Turbo C compiler	30

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Develop simple applications in C using basic constructs
- CO2: Design and implement applications using arrays and strings
- CO3: Create applications in C using functions and pointers
- CO4: Utilize advanced features of the C programming with structures and unions
- CO5: Develop applications using file operations in C

COMPUTATIONAL THINKING

(Common to CSE / IT / AIDS / CSBS / CSCS / AIML / EEE / ECE)

Course Code	24CS112	Course Type	Integrated
Teaching Periods/Week (L: T:P)	1:0:2	Credits	2
Total Teaching Periods	45	IAT + ESE Marks	50 + 50
Teaching Department	Computer Science and Engineering		

Course Objectives: To Equip the students with the Knowledge in

1. Problems in a way that enables a computer to solve them.
2. Organising and analysing data using logical approaches.
3. Developing solutions through algorithmic thinking.
4. Identifying, analysing, and implementing possible solutions to achieve the most efficient and effective combination of steps and resources.
5. Generalising and transferring the problem-solving process to a wide variety of problems.

Unit: I INTRODUCTION TO COMPUTATIONAL THINKING 1+4

Understanding the concepts: Decomposition, pattern recognition/data representation, generalization, abstraction, and algorithms, Representation, automation, Analysis, visualization. Logical thinking - reasoning

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1, L2, L3, L4

Unit: II UNDERSTANDING DATA 2+6

Performing analytics on numeric data using any spreadsheet software and representing the data using charts, histograms, scatter plots, graphs etc. Understanding patterns in data sequences, puzzles, and nonograms. Data Encryption – ciphering sentences and Compression.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Unit: III DECOMPOSITION AND PATTERN RECOGNITION 3+8

The divide and Conquer, pattern recognition, Algorithmic thinking - creating oral algorithms for everyday tasks – visualizing algorithms through sequence of steps, pseudocode, flow charts, selection, iteration, functions, procedures and parameters.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Unit: IV ABSTRACTIONS AND SCRATCH 3+6

Understanding Abstraction Object Description, Abstraction and Modeling, Objects and Objects based modeling -Repair, Reuse, Recycle, Scratch / equivalent - Motion, events, control

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Unit: V FILES AND PREPROCESSOR UNDERSTANDING COMPLEXITY 6+6

Understanding complexity, sorting algorithms, search algorithms, AI and Turing Test, FSA (Finite State Automata), Debugging, Enhancing the clarity of a program - documentation, style, idioms, Automation and Simulation, generalizing a solution.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Total 45

Pedagogical Methods:

Unit 1: Explore algorithm design by creating oral algorithms.
Unit 2: Decompose a complex problem into discrete steps and Design a simple algorithm for solving the problem
Unit 3: Programming implementation
Unit 4: Develop algorithms for sorting and determine the complexity of the algorithm and how it scales as the number of items to sort increases
Unit 5: External Learning: Study the best practices of documentation, style, idioms, etc that are used to ensure the code can be understood and maintained over a long period.

Practical Exercises:

MODULE I: Algorithmic thinking - creating oral algorithms for everyday tasks - Data abstraction and representation - Abstraction and translation of everyday data for use on a computer.
MODULE II: Decomposing a complex problem - Strategies for decomposition and algorithm design - Divide and conquer - Simple program implementations.
MODULE III: Overall data representation, abstraction, analysis and algorithm design. Program implementations.
MODULE IV: Measuring the complexity of an algorithm - sorting algorithms - the notion of unsolvable problems. Programming illustrations.
MODULE V: Enhancing the clarity of a program - documentation, style, idioms.

System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Formulate problems for effective computer-based solutions.
CO2: Systematically organize and analyse data.
CO3: Develop solutions using algorithmic approaches.
CO4: Identify, evaluate, and implement optimal solutions by efficiently utilizing steps and resources.
CO5: Apply and adapt the problem-solving process across diverse scenarios.

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING

(Common to CSE / IT / CSBS / AIDS / AIML / CSCS)

Course Code:	24EE111	Course Type:	Integrated
Teaching Periods/Week (L: T:P):	3:0:2	Credits:	4
Total Teaching Periods:	75	IAT + ESE Marks:	50 + 50
Teaching Department:	Electrical and Electronics Engineering		

Course Objectives:

1. To introduce the basics of electric circuits and its analysis
2. To impart knowledge in the working principles and application of electrical machines
3. To familiarize various types of semiconductor devices and its characteristics
4. To introduce the functional blocks of instruments and working principle of sensors
5. To introduce the working of Biomedical Instruments

UNIT I ELECTRICAL CIRCUITS 9

DC Circuits: Circuit Components: Conductor, Resistor, Inductor, Capacitor – Ohm's Law – Kirchhoff's Laws –Independent and Dependent Sources – Simple problems- Nodal Analysis, Mesh analysis with Independent sources only (Steady state)

Introduction to AC Circuits and Parameters: Waveforms, Average value, RMS Value, Instantaneous power, real power, reactive power and apparent power, power factor –Measurement of power by two wattmeter method

Teaching-Learning Process Pedagogy: Lectures, PPT, NPTEL

RBT Level: L1, L2, L3, L4

UNIT II ELECTRICAL MACHINES 9

Construction, Working principle and characteristics - DC Separately and Self Excited Generators, EMF equation, Types and Applications. Working Principle of DC motors, Torque Equation, Types and Applications. Construction, working principle and Applications of Transformer, Three phase Alternator, Synchronous motor and Three Phase Induction Motor.

Teaching-Learning Process Pedagogy: Lectures, PPT, NPTEL

RBT Level: L1, L2, L3, L4

UNIT III BASICS OF ELECTRONICS 9

Semiconductor materials – Types- Intrinsic and Extrinsic Semiconductor - P-N Junction Diode - Zener Diode – BJT - MOSFET - Principle of operation and VI Characteristics - Display devices – LED - Solar Cell

Teaching-Learning Process Pedagogy: Lectures, PPT, NPTEL

RBT Level: L1, L2, L3, L4

UNIT IV SENSORS AND TRANSDUCERS 9

Functional elements of an instrument – Standards and Calibration - Measurement of Pressure – Torque – Displacement – Velocity – Vibration – Acceleration – Temperature – Flow -- Measurement of Liquid Level – Humidity - Sound.

Teaching-Learning Process Pedagogy: Lectures & PPT

RBT Level: L1, L2, L3, L4

UNIT V BIOMEDICAL INSTRUMENTATION**9**

Cardio Vascular system – Pressure pulses in Cardiac Chamber – ECG – Interpretation of ECG - EEG – EMG – Blood Pressure Measurement – Pathological test – CT scan – MRI Scan.

Teaching-Learning Process Pedagogy: Lectures, PPT, NPTEL

RBT Level: L1, L2, L3, L4

Total**45****Pedagogical Methods:**

Unit 1: Tutorials on Kirchhoff's Law
Unit 2: Recent development in dc machines
Unit 3: Measure the resistance, inductance, and capacitance using a multi-meter.
Unit 4: Review on electronic sensors
Unit 5: Review on interpretation of ECG

Practical Exercises:**30**

- 1) Verification Kirchhoff's Law.
- 2) Study of RL, RC and RLC circuits.
- 3) Measurements of nonelectrical Parameters-Pressure, Displacement, Temperature and Flow.
- 4) Characteristics of PN junction Diode and Zener Diode
- 5) Characteristics of BJT.
- 6) Measurement of Power by two wattmeter method.
- 7) Series Resonant circuit.
- 8) Energy Audit.
- 9) Study of components and Equipment.
- 10) Study of biomedical instruments.

Equipment required

Sl. No.	Description of Equipment	Required numbers (for batch of 30 students)
1	Regulated Power Supply: 0 – 15 V D.C	10 nos
2	Function Generator (1 MHz)	10 nos
3	Oscilloscope (20 MHz)	10 nos
4	Digital Storage Oscilloscope (20 MHz)	1 no
5	AC/DC - Voltmeters	10 nos.
6	Ammeters	10 nos.
7	Multi-meters	5 nos.
8	UPF Watt meters	5 nos.
9	Decade Resistance Box, Decade Inductance Box, Decade Capacitance Box	6 nos each
10	Circuit Connection Boards	10 nos.
11	Pressure, Displacement, Temperature and Flow measurement kit	2 nos each
12	Necessary quantities of PN Junction diode, Zener diode and BJT	Adequate quantity
13	Necessary Quantities of connecting wires, Resistors, Inductors, Capacitors of various capacities.	Adequate quantity
14	Necessary quantities of biomedical sensors	Adequate quantity

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Compute the electrical parameters of simple electric circuits with AC and DC Supply
- CO2: Explain the working principle of DC and AC Machines
- CO3: Describe the working and characteristics of semiconductor devices
- CO4: Discuss the working principle of various sensors and transducers
- CO5: Summarise the instruments used for measuring biomedical parameters

BASIC CIVIL AND MECHANICAL ENGINEERING

(Common to CSE, IT, AIDS, CSBS, AIML, CSE-CYS, ECE, ACT, VLSI and EEE)

Course Code	24GE101	Course Type	Theory
Teaching Periods/Week (L: T:P)	3:0:0	Credits	3
Total Teaching Periods	45	IAT + ESE Marks	40+60
Teaching Department	Civil Engineering and Mechanical Engineering		

Course Objectives: To Equip the students with the knowledge in

1. Types of civil structures, civil engineering materials, and civil construction.
2. Different types of building plans, foundations, and infrastructures.
3. Parts of IC engines, pumps, and their working principles.
4. Components of the power plant and a detailed explanation of their working principles.
5. Parts of the Refrigeration & Air-conditioning system and their working principles and applications.
6. Additive manufacturing processes and their applications.

Unit: I INTRODUCTION OF CIVIL ENGINEERING AND CONSTRUCTION MATERIALS

9

Civil Engineering – Specialized sub-disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation, and Water Resources Engineering Types of buildings: Residential buildings, Industrial buildings.

Civil Engineering Materials: Bricks – Stones – Sand – Cement – Concrete – Steel – Timber – Modern Materials, Thermal and Acoustic Insulating Materials, Decorative Panels, Water Proofing Materials. Modern uses of Gypsum, Pre-fabricated Building components (brief discussion only)

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

Unit: II BUILDING COMPONENTS AND INFRASTRUCTURE

9

Building plans – Setting out of a Building – Foundations: Types of foundations – Brick masonry – Stone Masonry – Beams – Columns – Lintels – Roofing – Flooring – Plastering. Types of Bridges and Dams – Water Supply Network – Introduction to Highways and Railways – Introduction to Green Buildings - Stress prediction by AIML.

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

Unit: III INTERNAL COMBUSTION ENGINES

9

Internal combustion engines as an automobile power plant – Working principle of Petrol and Diesel Engines – Four stroke and two stroke cycles – Comparison of four stroke and two-stroke engines - Concept of hybrid engines - Electric Vehicles – Components, Accessories, and working of electric vehicles.

Teaching-Learning Process Pedagogy: Lecture, PPT, Youtube Videos

RBT Level: L1, L2, L3

Unit: IV POWER PLANTS, REFRIGERATION AND AIR CONDITIONING SYSTEM 9

Classification of Power Plants- Working principle of steam, Gas, Diesel, Hydroelectric, and Nuclear Power plants- Internal combustion engines as automobile power plants. Principle of vapour compression and absorption system – Layout of typical domestic refrigerator–Window and Split type room Air conditioner.

Teaching-Learning Process Pedagogy: Lecture, PPT, YouTube Videos

RBT Level: L1, L2, L3

Unit: V ADDITIVE MANUFACTURING 9

Additive Manufacturing Overview – VAT Photopolymerisation - Material Jetting - Binder Jetting - Material Extrusion - Powder Bed Fusion - Sheet Lamination - Directed Energy Deposition – Merits Demerits and its Applications.

Teaching-Learning Process Pedagogy: Lecture, PPT, YouTube Videos

RBT Level: L1, L2, L3

Total 45

Pedagogical Methods:

- | |
|---|
| Unit 1: Poster presentation - Civil Engineering Materials |
| Unit 2: Seminar – Types of Bridges and Dams |
| Unit 3: Seminar on Components of IC Engines |
| Unit 4: Role Play – Vapour Compression Refrigeration System |
| Unit 5: Model Making |

Course Outcomes:

After successful completion of this course, the students will be able to

- | |
|--|
| CO1: Explain the types of civil structures, civil engineering materials, civil construction. |
| CO2: Discuss about the different types of building plans, foundations, and infrastructures. |
| CO3: Explain the components of IC engines, pumps, and their working principles. |
| CO4: Describe the parts of the power plant and a detailed explanation of their working principles. |
| CO5: Summarize the parts and working principle of refrigeration & air-conditioning system |
| CO5: Discuss the additive manufacturing processes and their applications |

Text Books:

ENGLISH FOR ENHANCING SELF COMPETENCE

(Common to all branches)

Course Code:	24EN121	Course Type:	Practical
Teaching Periods/Week (L:T:P):	0:0:2	Credits:	1
Total Teaching Periods:	30	IAT + ESE:	60 + 40
Teaching Department:	English		

Course Objectives:

1. To articulate and learn various social behaviors and etiquette.
2. To develop writing and speaking skills for professional requirements.
3. To acquire techniques of fundamental communication skills.

Unit: I PERSONALITY TRAITS 6

Self-Introduction, Ways to Identify Self (SWOT Analysis- Johari Window), Concepts of Self-Management and Self-Motivation, Self-Assessment.

Teaching-Learning Process Pedagogy: Lecture Method, PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: II COMMUNICATION SKILLS 6

Effective Communication Skills, Interpersonal & Social Skills

Teaching-Learning Process Pedagogy: PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: III SOCIAL BEHAVIOUR 6

Time Management, Personal Grooming, Making Small Talk, Inter-Cross-Cultural Communication, Professional Presentation Techniques.

Teaching-Learning Process Pedagogy: Lecture Method, PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: IV CULTURAL ETIQUETTE 6

Formal Presentation, Sensitivity towards multi-cultural work spaces, Presentation skills –Formal Presentation - Just a minute

Teaching-Learning Process Pedagogy: PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: V JOB-RELATED COMMUNICATION 6

Resume & Cover Letter, Formal E-mails, Framing Requests, Greetings, Salutations, Close, Interview-Types-Interview Questions-Techniques, Introduction to Interviews-FAQ's

Teaching-Learning Process Pedagogy: Lecture Method, PPT, YouTube videos

RBT Level: L1, L2, L3

Total 30

System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system	30
3.	Hot Potatoes / Globalina	30

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: To listen to and comprehend general as well as complex academic information

CO2: To speak fluently and accurately in formal and informal communicative contexts

CO3: To express their opinions effectively in both formal and informal discussions.

CO-PO & PSO Mapping:

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

IT ESSENTIAL SKILLS (Common to all branches)

Course Code	24IT121	Course Type	Practical
Teaching Periods/Week (L: T:P)	0:0:2	Credits	1
Total Teaching Periods	30	IAT + ESE Marks	60 + 40
Teaching Department	Information Technology		

Course Objectives: To equip students with the knowledge in:

1. PC components, diagnose and resolve common issues to maintain optimal performance.
2. PowerPoint and Word for crafting compelling presentations and professional documents with advanced formatting, multimedia integration, and design techniques.
3. Spreadsheets for the creation, management, and analysis of data across various tasks.
4. Use of ChatGPT for prompt engineering, creative writing, and language translation to enhance communication and content creation.
5. HTML and CSS to design and build well-structured, visually appealing, and interactive web pages.

Practical Exercises **30**

PC Hardware & Software Installation **6**

Task 1: Identify the peripherals of a computer, components in a CPU and its functions. Draw the block diagram of the CPU along with the configuration of each peripheral and submit to your instructor.

Task 2: Every student should disassemble and assemble the PC back to working condition. Lab instructors should verify the work and follow it up with a Viva. Also students need to go through the video which shows the process of assembling a PC. A video would be given as part of the course content.

Task 3: Every student should individually install MS windows on the personal computer. Lab instructor should verify the installation and follow it up with a Viva.

Task 4: Every student should install Linux on the computer. This computer should have windows installed. The system should be configured as dual boot (VMWare) with both Windows and Linux. Lab instructors should verify the installation and follow it up with a Viva

Task 5: Every student should install BOSS on the computer. The system should be configured as dual boot (VMWare) with both Windows and BOSS. Lab instructors should verify the installation and follow it up with a Viva

WORD **6**

Word Orientation: The mentor needs to give an overview of Microsoft (MS) office or equivalent (FOSS) tool word: Importance of MS office or equivalent (FOSS) tool Word as word Processors, Details of the three tasks and features that would be covered in each, using word – Accessing, overview of toolbars, saving files, Using help and resources, rulers, format painter in word.

Task 1: Using Word to create a project certificate. Features to be covered: - Formatting Fonts in word, Drop Cap in word, Applying Text effects, Using Character Spacing, Borders and Colors, Inserting Header and Footer, Using Date and Time option in Word.

Task 2: Creating project abstract Features to be covered: -Formatting Styles, Inserting table, Bullets and Numbering, Changing Text Direction, Cell alignment, Footnote, Hyperlink, Symbols, Spell Check, Track Changes.

Task 3: Creating a Newsletter: Features to be covered: - Table of Content, Newspaper columns, Images from files and clipart, drawing toolbar and Word Art, Formatting Images, Textboxes, Paragraphs and Mail Merge in word.

EXCEL

6

Excel Orientation: The mentor needs to tell the importance of MS office or equivalent (FOSS) tool Excel as a Spreadsheet tool, give the details of the four tasks and features that would be covered in each. Using Excel – Accessing, overview of toolbars, saving excel files, Using help and resources.

Task 1: Creating a Scheduler - Features to be covered: Gridlines, Format Cells, Summation, auto fill, Formatting Text

Task 2: Calculating GPA -. Features to be covered: - Cell Referencing, Formulae in excel – average, std. deviation, Charts, Renaming and Inserting worksheets, Hyper linking, Count function, Ex: Prompt: "You are a knowledgeable AI. Please answer the following question: What is the capital of France?"

Ex: Prompt: "In a world where gravity suddenly stopped working, people started floating upwards. Write a story about how society adapted to this new reality."

Ex: Prompt: "Translate the following English sentence to French: 'Hello, how are you doing today?'"

Task 3: Split cells, freeze panes, group and outline, Sorting, Boolean and logical operators, Conditional formatting

POWER POINT

4

Task 1: Students will be working on basic power point utilities and tools which help them create basic power point presentations. PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint.

Task 2: Interactive presentations - Hyperlinks, Inserting –Images, Clip Art, Audio, Video, Objects, Tables and Charts

Task 3: Master Layouts (slide, template, and notes), Types of views (basic, presentation, slide slotter, notes etc.), and Inserting – Background, textures, Design Templates, Hidden slides.

AI TOOLS –Chat GPT

4

Task 1: Prompt Engineering: Experiment with different types of prompts to see how the model responds. Try asking questions, starting conversations, or even providing incomplete sentences to see how the model completes them.

Task 2: Creative Writing: Use the model as a writing assistant. Provide the beginning of a story or a description of a scene, and let the model generate the rest of the content. This can be a fun way to brainstorm creative ideas.

Task 3: Language Translation: Experiment with translation tasks by providing a sentence in one language and asking the model to translate it into another language. Compare the output to see how accurate and fluent the translations are.

Ex: Prompt: "Translate the following English sentence to French: 'Hello, how are you doing today?'"

HTML & CSS Orientation: The mentor needs to tell the importance of HTML tags as a design tool, give the details of the three tasks and features that would be covered in each. Using HTML – Formatting, List, Header, Table, insert image Using help and resources.

Task 1: Create a simple webpage with a title, header, paragraph, and footer for institution.

Task 2: Create a form with fields for name, email, password, and a submit button Include radio buttons, checkboxes, and a dropdown menu.

Task 3: Create and Apply an External CSS to an HTML Document for your profile.

System Requirement

Sl. No.	Description of Equipment	Required numbers (for batch of 30 students)
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Office tools – Word processor, Spread sheet, Presentation tool	30
3.	AI TOOLS: Chat GPT	30
4.	Mozilla Firefox / Chrome / Microsoft Edge, Notepad ++	30

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Identify the components of a PC and troubleshoot PC malfunctions.

CO2: Develop essential skills in PowerPoint and Word to create engaging presentations and professional documents with advanced formatting, multimedia integration, and layout techniques.

CO3: Acquire the ability to create, manage, and analyze data using spreadsheets for various tasks.

CO4: Attain knowledge in using Chat GPT for prompt engineering, creative writing, and language translation, enhancing interaction and content generation capabilities.

CO5: Build foundational skills in HTML and CSS to create structured, styled, and interactive web pages

ELECTRICAL AND ELECTRONICS WORKSHOP PRACTICE

(Common to all branches)

Course Code	24GE221	Course Type	Practical
Teaching Periods/Week (L:T:P)	0:0:2	Credits	1
Total Teaching Periods	30	IAT + ESE Marks	60 +40
Teaching Department	Electrical and Electronics Engineering		

Course Objectives:

1. To equip students with a comprehensive understanding of electronic equipment and practical soldering skills.
2. To develop students' proficiency in making electrical wiring connections using appropriate techniques and perform energy audit.
3. To provide students with practical exposure in installation and maintenance of household electrical appliances.

PRACTICAL

30

1. Study of components - R, L, C, Diode, Transistor and IC's.
2. Study of equipment's – RPS, Function Generator, CRO, Multimeter, Ammeter, Voltmeter, Wattmeter and Energy meter.
3. Measurement of voltage, current, frequency, time period for sine, square and triangular waves.
4. Soldering practice and breadboard practice.
5. Study of wires and cables.
6. Basic switchboard wiring with lamp, fan and three pin socket.
7. Fluorescent Lamp Wiring and Staircase Wiring.
8. Residential House wiring using Switches, Fuse, Indicator, Lamp and Energy meter.
9. Measurement of Energy and Earth Resistance.
10. Energy Audit.
11. Installation and Maintenance of Electrical Appliances –I Iron box, Emergency Lamp, Fan regulator.
12. Installation and Maintenance of Electrical Appliances –II Water heater, Stabilizer and UPS.

List of Equipment:

S.No	Name of the Equipment	Quantity
1	Single phase house wiring setup (Fuse, Lamp, Socket, Switch, PVC Pipe, Lamp Holder, Energy Meter)	2
2	Staircase wiring setup (Lamp, Two-way Switch, Socket, Switch, PVC Pipe, Lamp Holder)	2
3	Fluorescent lamp wiring setup (Fluorescent Lamp, Socket, Switch, PVC Pipe, Fluorescent Lamp Holder, Choke, Starter)	2
4	Water heater (1500W, 230V)	2
5	Stabilizer (500W, 160 – 290V)	2
6	UPS (600 VA)	2
7	Fan regulator	2
8	Iron box setup	2
9	Emergency lamp setup	2
10	Soldering Iron, Lead	15
11	Multi meter (0-600V, 10A)	15

12	Continuity tester	2
13	Resistors	Adequate Number
14	Capacitors	Adequate Number
15	Diodes	Adequate Number
16	Transistors	Adequate Number
17	Inductors	Adequate Number
18	IC's	Adequate Number
19	RPS (0-30V)	5
20	Function Generator (0-1MHz)	5
21	CRO (20MHz)	5
22	Ammeter (0-10A) MI	10
23	Voltmeter (0-300V) MI	10
24	Wattmeter (300V,10A, UPF)	5
25	Energy meter (single phase, two wire, (5-30A)/240V, 50Hz)	5
26	Wires, Cables	Adequate Number
27	Clamp meter (0-1000A), (0-750V)	2
28	Megger (500V, 100Mohms)	1

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1:** Identify various electronic components and assemble simple electronic circuits using soldering.
CO2: Make wiring connections for household and conduct energy audit.
CO3: Install and maintain household electrical appliances.

CO-PO & PSO Mapping:

PRODUCT TINKERING LAB
(Common to all)

Course Code	24GE122	Course Type	Practical
Teaching Periods/Week (L: T:P)	0:0:2	Credits	1
Total Teaching Periods	30	IAT + ESE Marks	60 + 40
Teaching Department	Civil Engineering and Mechanical Engineering		

Course Objectives: To equip the students with

1. Hands-on experience in Mechanical Equipments.
2. Design of simple components using computer-aided design.
3. Basic concept of 3D Printing.
4. Hands-on training on basic plumbing works

Practical Exercises

30

1. Exercise on the usage of a hand-drilling machine
2. Demonstration of Centrifugal pumps.
3. Demonstration of two-wheeler and four-wheeler maintenance and repairs,
4. 3D Modelling of a single component.
5. Exercise on CAD Data Exchange and Generation of .stl files.
6. Identification of a product for Additive Manufacturing and its AM process plan
7. Printing of identified product on an available AM machine.
8. Demonstration on how to change the Tap fittings.
9. Preparing plumbing line sketches.
10. Connecting various basic pipe fittings like valves, taps, coupling, unions, reducers, elbows, and other components that are commonly used in households.
11. Laying pipe connection to the suction and delivery side of a pump
12. Connecting pipes of different materials: Metal, plastic, and flexible pipes used in household appliances.

Equipment required

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	Hand Drilling Machine	5 nos.
2.	Centrifugal pump Assembly	1 no.
3.	Two-Wheeler (Four Stroke Petrol Engine)	1 no.
4.	Four-Wheeler (Four Stroke Diesel Engine)	1 no.
5.	Pipe Vice	5 nos.
6.	Die Holder with Die set	5 nos.
7	Valves, Taps, Coupling, Unions, Reducers, and Elbows (Metal and Plastics)	5 nos. each
8	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	5 Nos
9	3D Printer	2 Nos

Course Outcomes:

After successful completion of this course, the students will be able to

CO1:	Perform the basic maintenance and servicing of mechanical equipments.
CO2:	Design simple components using computer-aided design.
CO3:	Develop a 3D component using additive manufacturing.
CO4:	Sketch and perform the plumping for the house's different connections.

TAMILS AND TECHNOLOGY

(Common to all branches)

Course Code	24TA201	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

Course Objectives:

1. To familiarize about the Pottery, Weaving Technology in sangam age.
2. To teach about the Construction Technology of Ancient Tamils
3. To impart knowledge of ship building and manufacturing Technologies in ancient Tamil culture.
4. To teach about main features of ancient Tamils Agriculture, Agro-Processing and irrigation technology
5. To provide insight about the Tamil Software Development.

Unit: I WEAVING AND CERAMIC TECHNOLOGY 3

Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: II DESIGN AND CONSTRUCTION TECHNOLOGY 3

Designing and Structural construction House & Designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple)- Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: III MANUFACTURING TECHNOLOGY 3

Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel -Copper and gold Coins as source of history - Minting of Coins – Beads making-industries Stone beads -Glass beads - Terracotta beads - Shell beads/ bone beads - Archeological evidences - Gem stone types described in Silappathikaram.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: IV AGRICULTURE AND IRRIGATION TECHNOLOGY 3

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoempu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries – Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

Unit: V SCIENTIFIC TAMIL & TAMIL COMPUTING**3**

Development of Scientific Tamil - Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

Total**15****Pedagogical Methods:**

- Unit 1: Clay Modal Task
- Unit 2: Sculptures and Heritage Symbols Drawing task
- Unit 3: Group Discussion
- Unit 4: Debate about Ancient Irrigation Technology
- Unit 5: Thorough analysis of Scientific Tamil

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Describe the weaving technology and pottery making in sangam age
- CO2: Explain the construction technologies used in ancient times
- CO3: Discuss the technologies used by ancient Tamils in minting coins, ship, metallurgical areas.
- CO4: Describe the methods used in our ancient Tamils agriculture and irrigation technologies
- CO5: Summarize the development of scientific Tamil and Tamil computing

தமிழரும் தொழில்நுட்பமும்

(Common to all branches)

Course Code	24TA201	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

Course Objectives:

1. பழந்தமிழரின் பாணை மற்றும் நெசவுத் தொழில் நுட்பம் குறித்து விளக்குவது
2. பண்டைய தமிழர்களின் கட்டுமான தொழில்நுட்பம் பற்றி தெரியப்படுத்துவது
3. பண்டைய நாட்களில் கப்பல் கட்டுதல் மற்றும் உற்பத்தி தொழில்நுட்பங்கள் பற்றிய அறிவை வழங்குதல்.
4. பண்டைய தமிழர்களின் விவசாயம் மற்றும் நீர்ப்பாசனத் தொழில்நுட்பத்தின் முக்கிய அம்சங்களைப் பற்றி கற்பித்தல்
5. தமிழ் மென்பொருள் மேம்பாடு பற்றிய நுண்ணறிவை வழங்குதல்.

அலகு 1 நெசவு மற்றும் பாணைத் தொழில்நுட்பம்

3

சங்க காலத்தில் நெசவுத் தொழில் - பாணைத் தொழில்நுட்பமும் - கருப்பு சிவப்பு பாண்டங்கள் - பாண்டங்களில் கீறல் குறியீடுகள்

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு - II வடிவமைப்பு மற்றும் கட்டிடத் தொழில்நுட்பம்

3

சங்க காலத்தில் வடிவமைப்பு மற்றும் கட்டுமானங்கள் & சங்க காலத்தில் வீட்டுப் பொருட்களில் வடிவமைப்பு - சங்க காலத்தில் கட்டுமான பொருட்களும் நடுகல்லும் சிலப்பதிகாரத்தில் மேடை அமைப்பு பற்றிய விவரங்கள் - மாமல்லபுரச் சிற்பங்களும், கோவில்களும் - சோழர் காலத்துப் பெருங்கோயில்கள் மற்றும் பிற வழிபாட்டுத்தலங்கள் - நாயக்கர் காலக் கோயில்கள் - மாதிரி கட்டமைப்புகள் பற்றி அறிதல், மதுரை மீனாட்சி அம்மன் ஆலயம் மற்றும் திருமலை நாயக்கர் மஹால் - செட்டிநாட்டு வீடுகள் - பிரிட்டிஷ் காலத்தில் சென்னையில் இந்தோ - சாரோசோனிக் கட்டிடக் கலை

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு - III உற்பத்தித் தொழில் நுட்பம்

3

கப்பல் கட்டும் கலை - உலோகவியல் - இரும்புத் தொழிற்சாலை - இரும்பை உருக்குதல், எ..கு - வரலாற்றுச் சான்றுகளாக செம்பு மற்றும் தங்க நாணயங்கள் - நாணயங்கள் அச்சடித்தல் - மணி உருவாகும் தொழிற்சாலைகள் - கல்மணிகள், கண்ணாடி மணிகள், - சுடுமண் மணிகள் - சங்கு மணிகள் - எலும்புத்துண்டுகள் - தொல்லியல் சான்றுகள் - சிலப்பதிகாரத்தில் மணிகளின் வகைகள்.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1, L2, L3

அலகு – IV வேளாண்மை மற்றும் நீர்பாசனத் தொழில் நுட்பம் 3

அணை, ஏரி, குளங்கள், மதகு - சோழர்காலக்கு முழித் தூம்பின் முக்கியத்துவம் - கால்நடை பராமரிப்பு - கால்நடைக்களுக்காக வடிவமைக்கப்பட்ட கிணறுகள் - வேளாண்மை மற்றும் வேளாண்மைச் சார்ந்த செயல்பாடுகள் - கடல்சார் அறிவு - மீன்வளம் - முத்து மற்றும் முத்துக்குளித்தல் - பெருங்கடல் குறித்த பண்டைய அறிவு - அறிவுசார் சமூகம்.

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

அலகு – V அறிவியல் தமிழ் மற்றும் கணித்தமிழ் 3

அறிவியல் தமிழின் வளர்ச்சி - கணித்தமிழ் வளர்ச்சி - தமிழ் நூல்களை மின்பதிப்பு செய்தல் - தமிழ் மென்பொருட்கள் உருவாக்கம் - தமிழ் இணையக் கல்விக்கழகம் - தமிழ் மின் நூலகம் - இணையத்தில் தமிழ் அகராதிகள் - சொற்குவைத் திட்டம்.

Teaching-Learning Process Pedagogy: Lecture, PPT

RBT Level: L1, L2, L3

Total 15

Pedagogical Methods:

- Unit 1: Clay Modal Task
- Unit 2: Sculptures and Heritage Symbols Drawing task
- Unit 3: Group Discussion
- Unit 4: Debate about Ancient Irrigation Technology
- Unit 5: Thorough analysis of Scientific Tamil

Course Outcomes:

இந்த பாடத்திட்டத்தை வெற்றிகரமாக முடித்த பிறகு, மாணவர்களால்

- CO1: சங்க காலத்தில் நெசவுத் தொழில்நுட்பம் மற்றும் மட்பாண்டங்கள் செய்தல் ஆகியவற்றை விவரிக்க முடியும்
- CO2: பண்டைய காலத்தில் பயன்படுத்தப்பட்ட கட்டுமான தொழில்நுட்பங்களை பற்றி விளக்க முடியும்
- CO3: பண்டைய தமிழர்களின் மணிகள், கப்பல்கள், உலோகவியல் பகுதிகளில் பயன்படுத்தப்பட்ட தொழில்நுட்பங்களைப் பற்றி விவாதிக்க முடியும்.
- CO4: பண்டைய தமிழர்களின் விவசாயம் மற்றும் நீர்ப்பாசன தொழில்நுட்பங்களில் பயன்படுத்தப்பட்ட முறைகளை விவரிக்க முடியும்
- CO5: அறிவியல் தமிழ் மற்றும் தமிழ் கணிப்பொறியின் வளர்ச்சியை கூற முடியும்

Unit: V PRESENTATION SKILLS**9**

Listening: Listening – Types **Reading:** Short Stories-Role Play **Speaking:** Paired Presentation
Writing: Checklists, Data Interpretation- Picture, Chart, Graphs, Minutes of the meeting-Memos-Notices
Grammar: Error Correction, Punctuation **Vocabulary:** Numerical Adjectives, Relative Clause ,
Conjunction

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2, L3

Total**45****Pedagogical Methods:**

Unit 1: Speaking task
Unit 2: Reading task
Unit 3: Speaking task
Unit 4: Speaking task
Unit 5: Speaking task

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Communicate using appropriate vocabulary in different situations.
CO2: Use the acquired language skills to comprehend various types of language contents.
CO3: Evaluate different texts and write effective technical content.
CO4: Use appropriate sentence structures to convey thoughts in varied contexts.
CO5: Express the concepts and ideas in a skillful manner

TRANSFORMS AND NUMERICAL METHODS

(Common to - CSE, IT, AIDS, CSBS, AIML, CYB, EEE, CIVIL, MECH)

Course Code	24MA201	Course Type	Theory
Teaching Periods/Week (L: T:P)	3:1:0	Credits	4
Total Teaching Periods	60	IAT + ESE Marks	40 + 60
Teaching Department	Mathematics		

Course Objectives:

1. To introduce the concepts of Laplace transforms and inverse Laplace transforms.
2. To familiarize the concepts of Z-transform and its properties.
3. To illustrate the application of transforms in solving differential equations.
4. To explain Numerical methods for handling ordinary differential equations.
5. To acquaint the students with the knowledge of numerical techniques for interpolation, differentiation and integration.

Unit: I LAPLACE TRANSFORMS 12

Laplace transforms – Sufficient condition for existence – Transform of elementary functions – Basic properties – Transforms of derivatives and integrals of functions – Derivatives and integrals of transforms – Transforms of unit step function and impulse functions – Transform of periodic functions. Inverse Laplace transform – Convolution theorem (Statement only). Solution of linear ordinary differential equation of second order with constant coefficients and first order simultaneous equations with constant coefficients using Laplace transform

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1 - L3

Unit: II Z – TRANSFORMS 12

Z-transforms – Elementary properties – Inverse Z-transforms – partial fractions method – residues method – Convolution theorem. Solution of first and second order difference equations with constant coefficients using Z-transform.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos
RBT Level: L1 - L3

Unit: III SOLUTION OF DIFFERENTIAL EQUATIONS 12

Higher order linear differential equations with constant coefficients - Method of variation of parameters – Homogenous equation of Euler’s and Legendre’s type – System of simultaneous linear differential equations with constant coefficients.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos
RBT Level: L1 - L3

Unit: IV SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS 12

Solution of algebraic and transcendental equations by Newton Raphson method - Solution of linear system of equations – Gauss elimination method – Gauss Jordan method – Gauss Seidel Iterative method– Eigenvalues of a matrix by Power method.

Teaching-Learning Process Pedagogy: Lecture, PPT
RBT Level: L1 - L3

Unit: V NUMERICAL DIFFERENTIATION AND INTEGRATION**12**

Lagrange's and Newton's divided difference interpolations – Newton's forward and backward difference interpolation – Approximation of derivatives using interpolation polynomials – Numerical single and double integrations using Trapezoidal and Simpson's 1/3 rules.

Teaching-Learning Process Pedagogy: Lecture, NPTEL Videos

RBT Level: L1 - L3

Total**60****Pedagogical Methods:**

Unit 1: Apply Laplace transforms to a real-world problem

Unit 2: Apply Z-transform in real-world problem

Unit 3: Present a real-world problem involving differential equations with solution.

Unit 4: Analyze the significance of eigenvalues and eigenvectors in the context of the applications

Unit 5: Visualizing the numerical differentiation and integration problem in real time applications.

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Apply Laplace transform, and inverse Laplace transform to solve linear ordinary differential equation and first order simultaneous equations with constant coefficients.

CO2: Apply Z- transform and its properties to solve difference equations.

CO3: Solve a variety of differential equation.

CO4: Compute the solutions to algebraic, transcendental equations and systems of linear equations using numerical techniques.

CO5: Apply numerical method techniques to differentiate and integrate a given function.

ENGINEERING PHYSICS (Common to all branches)

Course Code	24PY111	Course Type	Integrated
Teaching Periods/Week (L: T:P)	3:0:2	Credits	4
Total Teaching Periods	75	IAT + ESE Marks	50+50
Teaching Department	Physics		

Course Objectives:

1. To impart knowledge on physical properties of materials and inculcate interest in students in observing facts experimentally.
2. To teach various types of oscillations.
3. To teach the acoustic properties and its applications.
4. To equip the students with understanding the importance of thermal physics and its applications
5. To impart the basics of optics, lasers, and their applications.
6. To introduce the importance and applications of quantum mechanics.

Unit: I **MECHANICS OF MATERIALS** 9

Rigid Body - Centre of mass - Rotational Energy - Moment of inertia (M.I) - Moment of Inertia for uniform objects with various geometrical shapes. Elasticity - Hooke's law - Poisson's ratio - stress-strain diagram for ductile and brittle materials - uses- Bending of beams - Cantilever - supported beams - uniform and non-uniform bending - Young's modulus determination - I shaped girders -Twisting couple

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2, L3

Unit: II **OSCILLATIONS AND ACOUSTICS** 9

Simple harmonic motion – Torsional pendulum – Damped oscillations – Shock Absorber – Forced oscillations and Resonance – Applications of resonance.- Waves and Energy Transport – Sound waves – Intensity level – Standing Waves – Doppler effect and its applications – reverberation – Sabine's Reverberation formula- Speed of blood flow. Ultrasound – applications – Echolocation and Medical Imaging.

Teaching-Learning Process Pedagogy: Lecture Method, NPTEL

RBT Level: L1, L2, L3

Unit: III **THERMAL PHYSICS** 9

Transfer of heat energy – thermal expansion of solids and liquids – expansion joints – bimetallic strips – thermal conduction, convection and radiation – heat conduction in solids – thermal conductivity – Forbe's and Lee's disc method: theory and experiment – conduction through compound media (series and parallel) – thermal insulation -applications: heat exchangers, refrigerators, ovens and solar water heaters.

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2, L3

Unit: IV OPTICS AND LASERS**9**

Interference – Thin film interference – Air wedge – Applications – Interferometers – Michelson Interferometer – Polarization – polarizers – Laser – characteristics – Spontaneous and Stimulated emission- population- inversion – Metastable states – optical feedback – Nd-YAG laser, CO2 laser, Semiconductor laser – Industrial and medical applications – Optical Fibers – Total internal reflection – Numerical aperture and acceptance angle – Fiber optic communication – Fiber sensors – Fiber lasers.

Teaching-Learning Process Pedagogy: Lecture Method, NPTEL

RBT Level: L1, L2, L3

Unit: V QUANTUM PHYSICS**9**

Black body radiation (Qualitative) – Planck’s hypothesis – Einstein’s theory of Radiation – Matter waves – de Broglie hypothesis – Electron microscope – Uncertainty Principle – The Schrodinger Wave equation (time-independent and time-dependent) – Physical significance of wave function – Normalization – Particle in an infinite potential well-particle in a three-dimensional box – Degenerate energy states – Barrier penetration and quantum, tunneling – Tunneling microscope.

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2

Total**45****Pedagogical Methods:**

- Unit 1: Models- Based on Moment of Inertia, cantilever and center of mass
- Unit 2: Case Studies – Based on the intensity of different animals, birds, and mammals.
- Unit 3: Chart – Based on the difference between Forbes and Lee’s disc apparatus
- Unit 4: Presentation- Application of Laser and different types of Lasers
- Unit 5: Problems Assignment – problems DeBroglie, Schrodinger

PRACTICAL (Any seven experiments)**30**

1. Torsional Pendulum-Determination of rigidity modulus of wire and moment of inertia of the disc
2. Non-uniform bending -Determination of Young’s modulus of the material of the beam.
3. Uniform bending–Determination of Young’s modulus of the material of the beam.
4. Lee’s Disc Experiment - Determination of thermal conductivity of bad conductors.
5. Laser-Determination of the wavelength of the laser using grating - Determination of the width of the groove of the compact disc using laser. - Estimation of laser parameters
6. Optical fibre -Determination of Numerical Aperture and acceptance angle
7. Simple harmonic oscillations of cantilever
8. Air wedge - Determination of thickness of a thin sheet/wire
9. Ultrasonic interferometer – determination of the velocity of sound and compressibility of liquids.
10. Melde’s string experiment

Equipments required

S.No	Name of the Equipment and Accessories	Required numbers for batch of 30 students
1	Torsional Pendulum Kit	5
2	Simple harmonic oscillations of cantilever	5
3	Travelling Microscope (Non-Uniform / Uniform)	5
4	He-Ne/Diode laser (red), Grating	5
5	Air Wedge Apparatus	5
6	Diode laser (green or red), fiber optic Kit	5
7	Ultrasonic interferometer apparatus with high-frequency wave generator	5
8	Lee's Disc Apparatus	2
9	Vernier Calliper, Screw Gauge	5
10	Melde's String Kit	1

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Explain the mechanical properties of materials like brittle and ductile.
- CO2: Discuss different types of oscillation and its applications.
- CO3: Summarize the acoustic properties and its applications.
- CO4: Discuss the thermal properties of materials and their applications.
- CO5: Summarize the principle of operation, characteristics, and application of laser and optics.
- CO6: Explain the concepts of quantum physics and its applications.

ENGINEERING CHEMISTRY (Common to all branches)

Course Code	24CH101	Course Type	Integrated
Teaching Periods/Week (L:T:P)	3:0:0	Credits	3
Total Teaching Periods	75	IAT + ESE Marks	50 + 50
Teaching Department	Chemistry		

Course Objectives:

1. To impart knowledge on treatment of water for potable and industrial purposes.
2. To introduce the basic concepts and applications of phase rule and composites.
3. To explain the applications of energy sources and storage devices.
4. To facilitate the understanding of different types of fuels, their properties and combustion characteristics.
5. To acquaint the students with the basics of nanomaterials, their properties, and applications.

Unit: I WATER TECHNOLOGY

9

Sources and impurities in Water, Water quality parameters and its significance (color, odour, turbidity, PH, hardness, alkalinity, TDS, COD and BOD, flouride and arsenic). Municipal water treatment: primary treatment and disinfection (UV, Ozonation, break–point chlorination). Desalination of brackish water: Reverse Osmosis. Boiler troubles: Scale and sludge, Boiler corrosion, Caustic embrittlement, Priming & foaming. Treatment of boiler feed water: Internal treatment/conditioning (phosphate, colloidal, sodium aluminate and calgon conditioning) and External treatment – Ion exchange demineralization and zeolite process.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT & Demonstration
RBT Level: L1, L2, L3

Unit: II PHASE RULE AND COMPOSITE MATERIALS

9

Phase rule: Introduction, definition of terms with examples. One component system: water system– Reduced phase rule; Construction of a simple eutectic phase diagram – Thermal analysis; Two component system: Lead–silver system, application: Pattinson process. Composites: Introduction: Definition & Need for composites; Constituents: Matrix materials, and Reinforcement. Classification of Matrix materials, properties, and its applications: Metal matrix composites (MMC), Ceramic matrix composites and Polymer matrix composites. Types of Reinforcement, properties, and its applications: fiber, particulates, flakes, and whiskers. Properties and applications of: Hybrid composites – definition and examples.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: III ENERGY SOURCES AND STORAGE DEVICES

9

Energy sources: Nuclear fission and nuclear fusion. Nuclear energy: Light water nuclear power plant and breeder reactor. Solar energy: Principle, working and applications of solar cells; Recent developments in solar cell materials. Wind energy – Geothermal energy. Storage devices: Batteries – types of batteries – primary battery (dry cell), secondary battery (lead acid battery, lithium–ion–battery), fuel cells – H₂ –O₂ fuel cell, microbial-fuel cell, and super capacitors. E-Vehicle

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1, L2, L3

Unit: IV FUELS AND COMBUSTION**9**

Fuels: Introduction and Classification. Coal and coke: Analysis of coal (proximate and ultimate), Carbonization, Manufacture of metallurgical coke (Otto Hoffmann method). Petroleum and Diesel: Manufacture of synthetic petrol (Bergius process), Knocking, octane number, cetane number; Power alcohol and biodiesel. Gaseous fuels – Natural gas, CNG and LPG.

Combustion of fuels: Introduction: Calorific value – higher and lower calorific values, Theoretical calculation of calorific value; Ignition temperature: spontaneous ignition temperature, Explosive range; Flue gas analysis – ORSAT Method. CO₂ emission and carbon footprint.

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2, L3

Unit: V NANOMATERIALS**9**

Introduction–Distinction between molecules, nanomaterials, and bulk materials; Size–dependent properties of nanomaterials: optical, electrical, mechanical, and magnetic properties; Types of nanomaterials: Definition, properties and uses of – nanoparticle, nanocluster, nanorod, nanowire and nanotube. Synthesis of nanomaterials: sol–gel, solvo thermal, laser ablation, chemical vapour deposition, electrochemical deposition and electro spinning. Applications of nanomaterials in medicine, agriculture, energy, electronics, and catalysis.

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1, L2, L3

Total**45****Pedagogical Methods:**

- | |
|---|
| Unit 1: Model Making – Municipal Water treatment |
| Unit 2: Poster Presentation – Composite Materials |
| Unit 3: Pick one and Talk More |
| Unit 4: Problems – Theoretical Calculation of Calorific Value |
| Unit 5: Seminar on Applications of Nanomaterials |

PRACTICAL (Any seven experiments)**30**

1. Preparation of Na₂CO₃ as a primary standard and estimation of acidity of a water sample using the primary standard
2. Determination of types and amount of alkalinity in water sample.
3. Determination of total, temporary & permanent hardness of water by EDTA method.
4. Determination of DO content of water sample by Winkler's method.
5. Determination of chloride content of water sample by Argentometric method.
6. Estimation of copper content of the given solution by Iodometry.
7. Determination of strength of given hydrochloric acid using pH meter.
8. Determination of strength of acids in a mixture of acids using conductivity meter.
9. Conductometric titration of barium chloride against sodium sulphate (precipitation titration)
10. Estimation of iron content of the given solution using potentiometer.

Equipment required

S.No	Description of Equipment	Required Numbers for Batch of 30 students
1	pH Meter	15
2	Conductivity Meter	15
3	Potentiometer	15
4	Electronic balance (Four Digit)	1
5	Hot Plate with Magnetic Stirrer	1
6	Hot Air Oven	1
7	Muffle Furnace	1
8	Burette, Pipette, Conical Flask & Other glassware.	30

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Summarize the water quality parameters and explain various methods to produce soft water for industrial and potable use.
- CO2: Apply the knowledge of phase rule and composites for material selection requirements.
- CO3: Discuss various energy resources, storage devices and their uses in household and industrial applications.
- CO4: Differentiate various types of fuels based on their state, characteristics and calorific value for Engineering processes and applications.
- CO5: Differentiate the nano and bulk materials, their synthesis and its applications in various fields.

PYTHON PROGRAMMING

(Common to CSE, IT, CSBS, AIDS, AIML, CSCS, CE, EEE, ECE, MECH, VLSI and ACT)

Course Code	24CS211	Course Type	Integrated
Teaching Periods/Week (L: T:P)	2:0:4	Credits	4
Total Teaching Periods	90	IAT + ESE Marks	50 + 50
Teaching Department	Computer Science and Engineering		

Course Objectives: To equip students with the knowledge in

1. Fundamentals of algorithmic problem solving.
2. Python conditionals and loops to solve problems
3. String manipulation, control flow, and functions in Python.
4. Python data structures, including lists, tuples, and dictionaries, for complex data representation.
5. Various file operations using Python.

Unit: I COMPUTATIONAL THINKING AND PROBLEM SOLVING 6

Fundamentals of Computing– Identification of Computational Problems Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flowchart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion)

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3,L4

Unit: II DATATYPES, EXPRESSIONS, STATEMENTS 6

Python interpreter and interactive mode, debugging; values and types: int, float, Boolean, string and list; variables, expressions, statements, tuple assignment, precedence of operators, comments

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Unit: III CONTROL FLOW, FUNCTIONS, STRINGS 6

Conditionals: Boolean values and operators, conditional (if), alternative (if else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as array

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3, L4

Unit: IV LISTS, TUPLES, DICTIONARIES 6

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3,L4

Unit: V FILES, MODULES and PACKAGES**6**

Files and exceptions: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Multithreading, Thread Life Cycle, Creating Thread - Python Libraries – NumPy and Pandas

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1, L2, L3,L4

Total**30****Pedagogical Methods:**

Unit 1:	Developing Pseudocodes and flowcharts for real life activities such as railway ticket booking, admission process to undergraduate course, academic schedules during a semester etc.
Unit 2:	Developing algorithms for basic mathematical expressions using arithmetic operations: Swapping two numbers, circulate the values of n variables, distance between two points.
Unit 3:	Implementation of a simple calculator
Unit 4:	Implementing python program using lists, tuples, sets for the following scenario: Student Examination Report
Unit 5:	Developing modules using Python to handle files and apply various operations on files like word count, copy file etc.

Practical Exercises:**60**

1. Implement simple python programs using interactive and script mode.
2. Develop python programs using id() , type() and range() functions.
3. Implement various control statements in python.
4. Develop python programs to perform various string operations like concatenation, slicing, and indexing.
5. Demonstrate string functions using python.
6. Develop python programs to perform operations on a list
7. Develop programs to work with Tuples
8. Create programs to solve problems using various data structures in python.
9. Implement python programs using modules and packages.
10. Case study: Data science with Numpy, Pandas

System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Python 3.10 or later, Anaconda Distribution	30

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Analyze problems and devise algorithmic solutions using pseudocode and flowcharts
- CO2: Implement Python conditionals effectively to control program flow.
- CO3: Design and implement reusable functions to modularize code and improve maintainability
- CO4: Employ lists, tuples, and dictionaries to store and manipulate data effectively.
- CO5: Apply Python's file handling techniques to interact with files.

ENGINEERING VISUALIZATION

(Common to all branches)

Course Code	24GE121	Course Type	Integrated
Teaching Periods/Week (L:T:P)	1:0:4	Credits	3
Total Teaching Periods	75	IAT + ESE Marks	60 + 40
Teaching Department	Mechanical Engineering		

Course Objectives: To Equip the students with the knowledge in

1. BIS conventions and specifications for engineering drawing and constructing the conic curves, involutes, and cycloids
2. Projections of lines and planes.
3. Orthographic projection of solids and sections of solids.
4. Projection of sectioned solids and Development of surfaces
5. Isometric projections of simple solids.

Unit: I PLANE CURVES

3+12

Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of Ellipse, Parabola & Hyperbola using eccentricity method – Construction of Cycloid – Construction of Involute of circle, Square and polygons – Tangent and Normal to the above curves.

Practical component: AutoCAD – Solid modeling tool - Basics.

Teaching-Learning Process Pedagogy: Lecture, PPT, NPTEL
RBT Level: L1-L4

Unit: II PROJECTION OF POINTS, LINES AND PLANE SURFACE

3+12

Orthographic projection - First angle projection –Principal planes - Projection of points – Projection of Lines (Only First angle projection) inclined to both principal planes – Determination of true length and true inclinations by rotating line method – Projection of planes (Circle and polygons) inclined both principal planes by rotating object method.

Practical component: AutoCAD – Lines and Plane.

Teaching-Learning Process Pedagogy: Lecture, PPT, NPTEL
RBT Level: L1-L4

Unit: III PROJECTION OF SOLIDS

3+12

Projection of simple solids like prisms, pyramids, cones and cylinders, and truncated solids when the axis is inclined to one of the principal planes and parallel to the other by rotating object method.

Practical component: AutoCAD – Projection of simple solids

Teaching-Learning Process Pedagogy: Lecture, PPT, NPTEL
RBT Level: L1-L4

Unit: IV PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES

3+12

Sectioning of solids in the simple vertical position when the cutting plane is inclined to one of the principal planes and perpendicular to the other – Obtaining the true shape of the section. Development of the lateral surfaces of simple sectioned solids – Prisms, Pyramid, Cylinder, and Cone.

Practical component: AutoCAD – Section of simple solids and surfaces

Teaching-Learning Process Pedagogy: Lecture Method, PPT, NPTEL
RBT Level: L1, L2, L3, L4

Unit: V ISOMETRIC PROJECTIONS**3+12**

Principles of isometric projection – isometric scale - Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones – combination of two solid objects in simple vertical positions.

Practical component: AutoCAD – Isometric projections of simple solids and truncated solids

Teaching-Learning Process Pedagogy: Lecture Method, PPT, NPTEL

RBT Level: L1,L2,L3,L4

2.	Windows 8 or higher operating system	30
3.	Auto-CAD	30

Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Use BIS conventions and specifications for engineering drawing and constructing the conic curves, involutes, and cycloid
- CO2: Solve practical problems involving the projection of lines and Planes.
- CO3: Sketch the orthographic projection of simple solids.
- CO4: Draw the Sectional view of solids and development of simple surfaces.
- CO5: Sketch the isometric projections of simple solids.

ENGLISH FOR PROFESSIONAL COMPETENCE

(Common to all branches)

Course Code	24EN221	Course Type	Practical
Teaching Periods/Week (L: T:P)	0:0:2	Credits	1
Total Teaching Periods	30	IAT + ESE Marks	60 + 40
Teaching Department	English		

Course Objectives:

1. To enhance employability and career skills.
2. To develop confidence and provide adequate soft skills required for work place.
3. To inculcate professional and corporate skills to compete with workplace challenges.

Unit: I RECEPTIVE SKILLS

6

Listening – Comprehensive Listening – Watching the news – Listening to a peer giving presentation – Critical Listening – Watching a televised debate – Reading – Extensive Reading – One- act Plays – Intensive Reading – Articles, Blog posts on topics like science and technology, arts, etc.

Teaching-Learning Process Pedagogy: PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: II PRODUCTIVE SKILLS

6

Speaking – Demonstrative Speaking – Process description through visual aids – Persuasive Speaking – Writing – Descriptive Writing - Subjective Writing – Autobiography, Opinion Essay – Describing a Product or Mechanisms and interpretations.

Teaching-Learning Process Pedagogy: PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: III ENGLISH FOR COMPETITIVE EXAMS

6

Verbal aptitude- Close test- Error correction- Homonyms and homophones- Spelling British and American words-word order.

Teaching-Learning Process Pedagogy: PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: IV CORPORATE SKILLS

6

Critical Thinking and Problem Solving – Brainstorming, Q & A Discussion – Team work and Collaboration – Activities like Office Debates, Group discussion – Professionalism and Strong Work Ethics –Soft Skills, Teamwork, Adaptability, Empathy and Growth Mind set.

Teaching-Learning Process Pedagogy: Lecture Method, PPT, YouTube videos

RBT Level: L1, L2, L3

Unit: V PROJECT WORK

6

Project Writing- Methodology- Bibliography- Reference- Presentation Techniques- Mini Project

Teaching-Learning Process Pedagogy: Lecture Method, PPT, YouTube videos

RBT Level: L1, L2, L3

ENGINEERING MATHEMATICS LABORATORY
(Common to CSE, IT, AIDS, CSBS, CYS, AIML, EEE, MECH, CIVIL)

Course Code:	24MA221	Course Type:	Practical
Teaching Periods/Week (L:T:P):	0:0:2	Credits:	1
Total Teaching Periods:	30	IAT + ESE Marks:	60 + 40
Teaching Department:	Mathematics		

Course Objectives:

1. To demonstrate basic and advanced matrix operations using Sci Lab.
2. To demonstrate basic and advanced differentiation and integration techniques using Sci Lab.
3. To demonstrate transforms and to solve ordinary differential equations using various numerical methods in Sci Lab.

PRACTICAL

30

1. Introduction to SCI LAB through matrices and general syntax.
2. Finding the Eigenvalues and Eigenvectors.
3. Plotting the graph of a quadratic form.
4. Evaluating area using double integral.
5. Evaluating Volume using Triple Integral
6. Evaluating gradient, directional derivative, divergent and curl
7. Finding the Laplace transform and its inverse of a given function.
8. Expand F(s) into linear fraction by partial fraction method by using Laplace Transform
9. Expand F(s) into linear fraction by partial fraction method by using Z-Transform
10. Finding the convolution between two functions using Laplace transform and Z-transform
11. Finding the real roots of algebraic and transcendental equations using Newton Raphson method.
12. Finding the largest Eigenvalue by power method.
13. Solving system of linear equations using Gauss Seidel Method.
14. Finding approximately the missing value using Lagrange interpolation.
15. Evaluating line integrals by trapezoidal rule and Simpson's rule.

System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Scilab 6.0 or later	30

Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Solve complex problems involving matrices using Sci lab.

CO2: Utilize Sci lab to solve integration and differentiation problems.

CO3: Apply Sci lab to calculate transforms and verify the solutions of ordinary differential equations in numerical methods.

DISCRETE MATHEMATICS

Course Code	24MA301	Course Type		THEORY	
Course Offered to	Common to ISE				
Total Teaching Periods	45	L:T:P	3:0:0	Credits	3
Handled by	Mathematics	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic Mathematics Knowledge and Fundamental Logical Reasoning Skills.

Course Objectives: To Impart the knowledge of

1. Propositional logic, predicates, and proof techniques for constructing valid mathematical arguments.
2. Combinatorial techniques such as counting principles, permutations, combinations, recurrence relations, and generating functions.
3. Graph theory concepts including connectivity and isomorphism for modeling network-related problems.
4. Algebraic structures including semigroups, monoids, groups, subgroups, and homomorphisms.
5. Lattices, posets, and Boolean algebra for representing and analyzing ordered and logical structures.

Unit: I LOGIC AND PREDICATES

9

Propositional logic - Propositional equivalences - Predicates and quantifiers - Nested quantifiers - Rules of inference - Introduction to proofs - Proof methods and strategy.

Teaching-Learning Process Pedagogy: Chalk and Talk
RBT Level: L1-L3

Unit: II COMBINATORICS

9

Mathematical induction - Strong induction and well ordering the basics of counting - The pigeonhole principle - Permutations and combinations - Recurrence relations - Solving linear recurrence relations - Generating functions - Inclusion and exclusion principle and its applications.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1-L3

Unit: III GRAPHS AND ITS APPLICATIONS

9

Graphs and graph models - Graph terminology and special types of graphs - Matrix representation of graphs and graph isomorphism - Connectivity - Euler and Hamilton paths.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1-L3

Unit: IV ALGEBRAIC STRUCTURES 9

Algebraic systems - Semi groups and monoids - Groups - Subgroups - Homomorphism's - Normal subgroup and cosets - Lagrange's theorem.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1-L3

Unit: V LATTICES AND BOOLEAN ALGEBRA 9

Partial ordering - Posets -Hasse diagram- Lattices as posets - Properties of lattices - Lattices as algebraic systems - Sub lattices - Direct product and homomorphism.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1-L3

Total 45

Suggested activities: Class test, Case study, MCQ, Assignment/ Explanation and report submission, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

CO1: Verify the validity of mathematical arguments using propositional and predicate logic rules.

CO2: Apply permutations, combinations, and recurrence relations to solve complex combinatorial problems.

CO3: Represent and solve real-world connectivity problems using graph theory and matrix representations.

CO4: Identify and categorize algebraic systems like groups and monoids based on their fundamental properties.

CO5: Construct Hasse diagrams and simplify Boolean expressions using lattice theory principles.

JAVA PROGRAMMING

Course Code	24CS303	Course Type		THEORY	
Course Offered to	Common to ISE				
Total Teaching Periods	45	L:T:P	3:0:0	Credits	3
Handled by	CSE	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic knowledge of programming and computer fundamentals.

Course Objectives: To Impart the knowledge of

1. Object-Oriented Programming principles and core Java features to design and develop modular, structured, and reusable applications..
2. Inheritance, packages, interfaces and polymorphism for developing well-structured Java applications..
3. Exception handling and multithreading techniques for developing reliable and efficient Java applications.
4. Java I/O streams, generics, and string handling mechanisms for developing flexible and efficient applications.
5. Developing interactive GUI applications using JavaFX.

Unit: I INTRODUCTION TO OOP AND JAVA 9

Overview of OOP–Object oriented programming paradigm–Features of Object-Oriented Programming–Java Buzzwords - Overview of Java – Data Types, Variables and Arrays –Operators – Control Statements – Programming Structures in Java – Defining classes in Java –Constructors-Methods -Access specifiers - Static members- Java Doc comments

Teaching-Learning Process Pedagogy: Chalk and Talk
RBT Level: L1-L3

Unit: II INHERITANCE, PACKAGES AND INTERFACES 9

Overloading Methods – Objects as Parameters – Returning Objects –Static, Nested and Inner Classes. Inheritance: Basics– Types of Inheritance -Super keyword -Method Overriding – Dynamic Method Dispatch –Abstract Classes – final with Inheritance. Packages and Interfaces: Packages –Packages and Member Access –Importing Packages – Interfaces.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBT Level: L1-L3

Unit: III EXCEPTION HANDLING AND MULTITHREADING 9

Exception Handling basics – Multiple catch Clauses – Nested try Statements – Java’s Built-in Exceptions – User defined Exception. Multithreaded Programming: Java Thread Model–Creating a Thread and Multiple Threads – Priorities – Synchronization – Inter Thread Communication-Suspending –Resuming, and Stopping Threads – Multithreading. Wrappers – Auto boxing.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Unit: IV I/O, GENERICS, STRING HANDLING **9**

I/O Basics – Reading and Writing Console I/O – Reading and Writing Files. Generics: Generic Programming – Generic classes – Generic Methods – Bounded Types – Restrictions and Limitations. Strings: Basic String class, methods and String Buffer Class.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Unit: V JAVAFX EVENT HANDLING, CONTROLS AND COMPONENTS **9**

JAVAFX Events and Controls: Event Basics – Handling Key and Mouse Events. Controls: Checkbox, Toggle Button – Radio Buttons – List View – Combo Box – Choice Box – Text Controls – Scroll Pane. Layouts – Flow Pane – HBox and VBox – Border Pane – Stack Pane – Grid Pane. Menus– Basics – Menu – Menu bars – Menu Item.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Total **45**

Suggested Activities: Code Debug Challenge, Puzzle Activity, Code Tracing Worksheet, Case study, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Apply object-oriented programming concepts and basic Java constructs to solve simple programming problems
- CO2: Develop Java programs using inheritance, packages, interfaces, and polymorphism concepts.
- CO3: Implement exception handling and multithreading mechanisms in Java applications.
- CO4: Develop Java applications using I/O streams, generics, and string handling techniques.
- CO5: Design and develop GUI-based applications using JavaFX event handling and controls.

DATA STRUCTURES

Course Code	24CS302	Course Type		THEORY	
Course Offered to	CSE, AIDS & AIML				
Total Teaching Periods	45	L:T:P	3:0:0	Credits	3
Handled by	CSE	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic Knowledge of arrays, pointers, structures and Logical thinking skills in any one Programming subjects.

Course Objectives: To Impart the knowledge of

1. Fundamental concepts of data structures, algorithms, asymptotic analysis, and abstract data types.
2. Linear and non-linear data structures and their implementation techniques.
3. Sorting and searching algorithms and their performance considerations in terms of time and space complexity.
4. Designing efficient solutions for real-world problems using appropriate data structures.
5. Advanced search trees and their applications in efficient data management and problem solving.

Unit: I LINEAR DATA STRUCTURES

9

Introduction to Data Structures & Algorithms – Asymptotic notations – ADT – Array – List – Linked List – Singly Linked List – Doubly Linked List – Circular List – Elementary Operations – Stack – Queue – Array Implementation – Linked List Implementation – Applications.

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1-L3

Unit: II NON-LINEAR DATA STRUCTURES

9

Tree – Binary Tree – Properties – Representation – Binary Search Tree – Operation – Traversal – Threaded Binary Tree – Heap – Priority Queue implementation with Heap – Graph – Terminologies – Representation – BFS – DFS – Connected Components – Minimum Spanning Tree.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L3

Unit: III SORTING

9

Insertion Sort – Heap Sort – Merge Sort – Quick Sort – Counting Sort – External Sorting – Multiway Merge Sort.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L3

Unit: IV SEARCHING**9**

Linear Search – Binary Search – Hash Function – Separate Chaining – Linear Probing – Quadratic Probing – Double Hashing – Rehashing.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Unit: V SEARCH STRUCTURES**9**

Balanced Tree – AVL Tree – Red Black Tree – Multi-way Search Tree – B-Tree – Binary Tree – Multi-way Tree – Suffix tree.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Total**45**

Suggested Activities: Code Debug Challenge, Puzzle Activity, Code Tracing Worksheet, Binary Search Game, Case study, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain and apply fundamental concepts of data structures and abstract data types.
- CO2: Implement linear and non-linear data structures and perform their operations
- CO3: Compare sorting and searching algorithms based on time and space complexity.
- CO4: Apply hashing techniques and collision resolution methods for efficient data retrieval.
- CO5: Design efficient solutions for real-world problems using appropriate data structures and advanced search structures.

DIGITAL SYSTEM DESIGN

Course Code	24EC312	Course Type		INTEGRATED	
Course Offered to	Common to ISE, ECE & EEE				
Total Teaching Periods	75	L:T:P	2:1:2	Credits	4
Handled by	ECE	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite: Basic knowledge of mathematics, digital electronics, and programming concepts.

Course Objectives: To impart the knowledge of

1. Number systems, Boolean algebra, and basic digital logic design using Verilog HDL
2. Realization of logic circuits using different logic families (TTL, CMOS) and Verilog HDL modeling..
3. Design and operation of combinational and sequential digital circuits.
4. Design and operation of registers, counters, and synchronous sequential machines
5. Finite state machines (FSM), minimization and asynchronous circuit design techniques.

Unit: I DIGITAL LOGIC DESIGN AND VERILOG HDL FUNDAMENTALS 11+4

Number Systems: Number systems - Complements of Numbers - Codes- Weighted and Non-weighted codes and its Properties - Parity check code and Hamming code.

Boolean algebra: Basic Theorems and Properties, Switching Functions- Canonical and Standard Form, Algebraic Simplification, Digital Logic Gates, EX-OR gates, Universal Gates, Multilevel NAND/NOR realizations. **Verilog HDL** – Structural Modeling – Data flow modeling – Behavioral Modelling.

PRACTICALS:

1. Simulation of basic gates, Universal gates and Multi level NAND / NOR realization using HDL.
2. Simulation of Boolean equation using gates.

Teaching-Learning Process Pedagogy: Lecture, NPTEL/YouTube videos, Peer Learning, Tutorials
RBT Level: L1-L4

Unit: II PHASE RULE AND COMPOSITE MATERIAL BOOLEAN 8+2 **FUNCTION MINIMIZATION AND LOGIC FAMILY REALIZATIONS**

Minimization of Boolean functions: Karnaugh Map Method - Up to five Variables, Don't Care Map Entries.

Realization of Logic Gates Using Diodes & Transistors: AND, OR and NOT Gates using Diodes and Transistors, DCTL, RTL, DTL, TTL, CML and CMOS Logic Families and its Comparison, standard TTL NAND Gate-Analysis & characteristics, TTL open collector O/Ps, Tristate TTL, MOS & CMOS open drain and tri-state outputs interfacing- TTL driving CMOS & CMOS driving TTL.

PRACTICALS:

1. Characteristics of TTL and CMOS logic families.

Teaching-Learning Pedagogy: Lecture, NPTEL videos, Peer Learning, Tutorials
Process **RBT Level:** L1-L4

Unit: III COMBINATIONAL AND SEQUENTIAL LOGIC CIRCUITS **10+8**

Combinational Logic Circuits: Adders, Subtractors, Comparators, Multiplexers, De-multiplexers, Encoders, Decoders and Code converters, Hazards and Hazard Free Relations.

Sequential Circuits Fundamentals: Basic Architectural Distinctions between Combinational and Sequential circuits, SR Latch, Flip Flops: SR, JK, JK Master Slave, D and T Type Flip Flops, Excitation Table of all Flip Flops, Timing and Triggering Consideration, Conversion from one type of Flip-Flop to another.

PRACTICALS:

1. Design and Simulation of Shift Register
2. Design and Simulation of Synchronous and Asynchronous Counters
3. Design and Simulation of Sequence Detector and Parity Bit generator.
4. Design and Simulation of Modulo N Counter

Teaching-Learning Pedagogy: Lecture, NPTEL videos, Peer Learning, Tutorials
Process **RBT Level:** L1-L4

Unit: IV REGISTERS, COUNTERS, AND SEQUENTIAL MACHINE DESIGN **12+8**

Registers and Counters: Shift Registers – Left, Right and Bidirectional Shift Registers, Applications of Shift Registers - Design and Operation of Ring and Twisted Ring Counter, Operation of Asynchronous and Synchronous Counters.

Sequential Machines: Finite State Machines, Synthesis of Synchronous Sequential Circuits- Serial Binary Adder, Sequence Detector, Parity-bit Generator, Synchronous Modulo N –Counters.

PRACTICALS:

1. Design and Simulation of Shift Register
2. Design and Simulation of Synchronous and Asynchronous Counters
3. Design and Simulation of Sequence Detector and Parity Bit generator.
4. Design and Simulation of Modulo N Counter

Teaching-Learning Pedagogy: Lecture, NPTEL videos, Peer Learning, Tutorials, Case studies
Process **RBT Level:** L1-L4

Unit: V FINITE STATE MACHINES AND ASYNCHRONOUS CIRCUIT DESIGN 10+2

Finite state machine: capabilities and limitations, Mealy and Moore models, State equivalence and machine minimization, simplification of incompletely specified machines, Merger graphs. Asynchronous design-modes of operation, Hazards, synthesis of SIC fundamental mode circuits, synthesis of burst mode circuits. Introduction to ASM Charts.

PRACTICALS:

1. Design and Simulation of Mealy and Moore models

Teaching-Learning Pedagogy: Lecture, NPTEL videos, Peer Learning, Tutorials, Case studies

Process RBT Level: L1-L4

Total

75

Suggested activities : Review of GATE questions, Case study, Mini Project.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

CO1: Develop and simulate basic digital circuits using HDL effectively

CO2: Analyze the optimizing Boolean functions and implementing circuits using TTL, CMOS, and other logic families.

CO3: Design and analyze circuits like adders, multiplexers, and flip-flops for practical applications

CO4: Implement and simulate shift registers, counters, and sequence detection circuits.

CO5: Design, simplify, and simulate Mealy/Moore models and asynchronous circuits

COMPUTER ORGANIZATION AND ARCHITECTURE

Course Code	24CS301	Course Type		THEORY	
Course Offered to	CSE, IT, AIML & CSCS				
Total Teaching Periods	45	L:T:P	3:0:0	Credits	3
Handled by	CSE	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic knowledge of Computer Fundamentals and Engineering Mathematics.

Course Objectives: To Impart the knowledge of

1. Basic computer organization, including components, instructions, and addressing modes.
2. Arithmetic operations in computers, including integer and floating-point calculations.
3. Processor design, pipelining, and handling hazards and exceptions..
4. Instruction-level parallelism and modern multicore processor techniques..
5. Memory hierarchy, caches, virtual memory, and input/output systems for better performance..

Unit: I OVERVIEW & INSTRUCTIONS

9

Eight ideas – Components of a computer system – Technology – Performance – Power wall – Uniprocessors to multiprocessors; Instructions – operations and operands – representing instructions– Logical operations – control operations – Addressing and addressing modes.

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1-L3

Unit: II ARITHMETIC OPERATIONS

9

Integer arithmetic – Binary Parallel adder – Carry Look– ahead Adder – Carry save adder – Binary multiplier – Booth’s multiplier – Bit– pair recoding – Binary division. Floating point arithmetic– Representation – Arithmetic operations on floating point numbers – Parallelism and computer arithmetic.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L3

Unit: III PROCESSOR AND CONTROL UNIT

9

Basic MIPS implementation – Building data path – Control Implementation scheme – Pipelining – Pipelined data path and control – Handling Data hazards & Control hazards – Exceptions.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L3

Unit: IV PARALLELISM**9**

Instruction-level-parallelism – Advanced ILP – Dynamic branch prediction – Correlating predictors – Tournament predictors. Dynamic scheduling – Tomasulo’s algorithm – Speculation. Multiple issue processors – Static and dynamic. Limitations of ILP – Multithreading – SMT and CMP Architectures – The Multicore era.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Unit: V MEMORY AND I/O SYSTEMS**9**

Need for a hierarchical memory system – The basics of caches – Measuring and improving cache performance. Virtual memory – Paging and segmentation – TLB – Implementing protection with virtual memory. Associative memories, Introduction to virtual machines. Storage and I/O – Dependability, reliability and availability –Types of storage. Connecting processors, memory and I/O devices – Interfacing I/O devices to the processor, memory and the operating system, Interrupts, DMA, RAID.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L3

Total**45**

Suggested Activities: Puzzle Activity, Case study, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Analyze instruction set architectures and addressing modes to evaluate the performance of various computer system components.
- CO2: Perform high speed computer arithmetic using advanced algorithms for integer and floating-point multiplication and division.
- CO3: Design pipelined MIPS processors by constructing data paths and implementing schemes to resolve data and control hazards.
- CO4: Maximize instruction level parallelism using dynamic scheduling, branch prediction, and multicore architectures like SMIT and CMP.
- CO5: Configure hierarchical memory systems and I/O protocols including cache optimization, virtual memory, and RAID configurations.

DATA STRUCTURES LAB

Course Code	24CS321	Course Type		PRACTICAL	
Course Offered to	CSE, AIDS & AIML				
Total Teaching Periods	30	L:T:P	0:0:4	Credits	2
Handled by	CSE	Assessment Methods		IAT	ESE
				60 Marks	40 Marks

Prerequisite: Basic knowledge of problem-solving techniques and algorithms.

Course Objectives: To impart knowledge of

1. Linear and non-linear data structures like arrays, stacks, queues, linked lists, and trees.
2. Linked lists including singly, doubly, and circular linked lists.
3. Trees and binary search trees along with operations, traversals, and balancing techniques like AVL and Red-Black trees..
4. Sorting and searching algorithms and their applications in problem solving.
5. Graphs and hashing techniques, including BFS, DFS, MST algorithms, and collision resolution strategies.

PRACTICALS:

1. Implement basic operations (Insert, Delete, Search, Traverse) on an array as an ADT
2. Implement a singly linked and doubly linked list with its operations
3. Implement a circular linked list
4. Implement a stack using arrays with push and pop operations.
5. Implement a stack using linked list.
6. Application – Convert infix expression to postfix using stack.
7. Implement a queue using arrays.
8. Implement a queue using linked list.
9. Implement a circular queue.
10. Create a Binary Tree and perform basic operations like insertion and deletion.
11. Display properties of a binary tree (height, number of nodes, leaf nodes, etc.).
12. Implement a Binary Search Tree with operations: insert, delete, search.
13. Find minimum and maximum element in BST.
14. Implement BST traversal methods:
15. Implement a Min Heap and Max Heap with its operations.
16. Implement Breadth-First Search (BFS) traversal.
17. Implement Depth-First Search (DFS) traversal.
18. Implement Kruskal's and Prim's Algorithm for MST.
19. Implement the Insertion Sort algorithm.
20. Implement Heap Sort using Max Heap.
21. Implement Merge Sort (Recursive).
22. Implement Merge Sort (Iterative / Bottom-Up approach).
23. Implement Quick Sort using the first element as pivot.
24. Implement Counting Sort for non-negative integers.
25. Test counting sort with duplicate and uniform values.

26. Implement Linear Search on an unsorted array.
27. Implement Binary Search on a sorted array.
28. Implement a basic Hash Function (e.g., key % table size).
29. Write a program to insert, search, and delete keys using quadratic probing in a hash table.
30. Create a binary tree and perform in order traversal, Preorder traversal, Post order traversal.
31. Implement an AVL Tree with:
 - Insert operation
 - Rotations (LL, RR, LR, RL)
32. Implement Red-Black Tree insertion with: Color flipping and rotations.

Total

30

Suggested Activities: Code Debug Challenge, Puzzle Activity, Code Tracing Worksheet, Binary Search Game, Mini project/ content beyond syllabus.

Evaluation Methods: Performance in Suggested and day to day Activities, Model practical and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain and apply fundamental concepts of data structures and abstract data types.
- CO2: Implement linear data structures such as arrays, linked lists, stacks, and queues.
- CO3: Design and implement non-linear data structures including trees, heaps, and graphs.
- CO4: Analyse and compare sorting and searching algorithms based on their efficiency.
- CO5: Select and apply appropriate search structures such as AVL trees, Red-Black trees, and B-Trees for specific applications

JAVA PROGRAMMING LAB

Course Code	24CS322	Course Type		PRACTICAL	
Course Offered to	Common to ISE				
Total Teaching Periods	30	L:T:P	0:0:4	Credits	2
Handled by	CSE	Assessment Methods		IAT	ESE
				60 Marks	40 Marks

Prerequisite: Basic knowledge of programming concepts and problem-solving skills.

Course Objectives: To enhance knowledge of

- 1 Basic Java programming concepts including operators, arrays, control structures, classes, and objects.
- 2 Object-oriented programming principles such as constructors, method overloading, inheritance, polymorphism, abstraction, and interfaces.
- 3 Advanced Java features including packages, exception handling, multithreading, wrapper classes, and generics.
- 4 File handling and string processing techniques using Java I/O streams and string classes
- 5 Developing simple graphical user interfaces using JavaFX controls and event handling.

PRACTICALS:

1. Create a Java program to perform arithmetic operations using operators.
2. Write a java program using Arrays and Control Structures
3. Define a class `Student` with attributes and methods, create objects, and display details.
4. Write a program to demonstrate method overloading with different parameter lists.
5. Implement a program to demonstrate passing arguments to methods and returning values.
6. Create a class with both instance and static members and show their usage.
7. Develop a Java class that includes constructors (default and parameterized) and create multiple objects.
8. Develop a program with static variables and methods to calculate interest or employee salary.
9. Create a program with static block to initialize static data before object creation.
10. Write a program to demonstrate method overloading using different types and numbers of parameters
11. Find the sum of given two complex numbers using object as parameter and return as an object.
12. Develop a program to demonstrate single inheritance using a Person and Employee class.
13. Write a program to implement multilevel inheritance and display member access from derived classes.
14. Implement a program to demonstrate the use of the super keyword to call superclass constructors and methods.
15. Create a Java program for method overriding, showing runtime polymorphism using base and derived class objects.
16. Create an abstract class Shape with abstract methods and implement it in child classes like Circle, Rectangle.

17. Create a user-defined package, include classes in it, and access them from another package using import.
18. Create a program with **multiple interfaces** and implement them in a single class.
19. Write a Java program to divide two numbers. Handle Arithmetic Exception for division by zero using try-catch-finally.
20. Accept two numbers from the user and perform division. Add array access logic. Handle Arithmetic Exception, Array Index Out of Bounds Exception, and Input Mismatch Exception.
21. Write a java program that implements a multi-threaded application that has three threads. First thread generates a random integer every 1 second and if the value is even, the second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of the cube of the number.
22. Create a program to convert primitive types to wrapper objects and vice versa.
23. Create a Java program to **write a string to a text file** and then **read the contents** of the file back.
24. Implement a program to copy the contents of one file to another, displaying each line as it is written.
25. Write a Java program to count the number of words and characters in a text file.
26. Write a Java program to demonstrate wrapper classes and methods in Generic Programming
27. Create a program to check whether a given string is a palindrome using String methods.
28. Implement a Java program to concatenate and reverse strings using String Buffer or StringBuilder.
29. Design a User Information Form using JavaFX Controls and Events.

Total

30

Suggested Activities: Code Debug Challenge, Puzzle Activity, Code Tracing Worksheet, Mini Project / Content beyond Syllabus

Evaluation Methods: Performance in Suggested and day to day Activities, Model practical and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Apply object-oriented programming concepts and basic Java constructs to solve simple programming problems.
- CO2: Develop Java programs using inheritance, packages, interfaces, and polymorphism concepts.
- CO3: Implement exception handling and multithreading mechanisms in Java applications.
- CO4: Develop Java applications using I/O streams, generics, and string handling techniques.
- CO5: Design and develop GUI-based applications using JavaFX event handling and controls.

INNOVATION AND DESIGN THINKING

Course Code	24ES321	Course Type		INTEGRATED	
Course Offered to	Common to all				
Total Teaching Periods	45	L:T:P	1:0:2	Credits	2
Handled by	Training & Placement	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite : Basic problem-solving and creative thinking skills.

Course Objectives: To enhance knowledge on

1. The principles and stages of **Design Thinking** for identifying and solving real-world problems.
2. Empathetic research methods to understand user needs through observation, interviews, and fieldwork.
3. Problem definition techniques and framing design challenges using user insights.
4. Creative ideation methods to generate and evaluate innovative solutions.
5. Prototyping, testing, and presenting solutions effectively through project demonstrations and presentations.

Module: I THE DESIGNER'S MINDSET & PROBLEM SCOPING

9

Objective: Cultivate a growth mindset and launch the real-world project.

1. Introduction to Design Thinking: From Problem to Solution.
2. Fixed vs. Growth Mindset for Innovators (Toolkit: Mindset Reflection Worksheet).
3. Launching the Capstone Project: Team Formation & Problem Context Selection (Local Panchayat, NGO, Small Industry, Campus Community).
4. Project Planning & Introduction to Field Research (Toolkit: Project Brief Canvas).

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1- L4

Module: II EMPATHISE — DEEP USER UNDERSTANDING

9

Objective: Learn and apply empathetic methods in a real-world context.

1. The Art of Empathy and User-Centricity.
2. Planning Field Research (Toolkit: Research Plan Template).
3. Conducting Empathetic Interviews & Observations (Toolkit: Interview Guide, Observation Log).
4. FIELDWORK: Students conduct research in their chosen context. (Video recording of key interactions is encouraged).
5. Synthesising Data: Finding Insights (Toolkit: Empathy Map Canvas).
6. Visualising the User Experience (Toolkit: Journey Map Template).

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1- L4

Module: III DEFINE — FRAMING THE CORE PROBLEM

9

Objective: Synthesise research findings into a powerful and focused problem statement.

1. From Insights to User Needs.
2. Creating User Personas (Toolkit: Persona Canvas).
3. Unpacking the Problem Root Cause (Toolkit: 5 Whys Worksheet).
4. Crafting a Point-of-View (POV) (Toolkit: POV Statement Template).
5. Framing the Design Challenge (Toolkit: "How Might We..." Questions)

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Module: IV IDEATE — GENERATING CREATIVE SOLUTIONS

9

Objective: Generate a wide range of innovative solutions and select the most promising one.

1. Principles of Divergent and Convergent Thinking.
2. Brainstorming for Quantity and Creativity (Toolkit: Brainstorming Rules).
3. Structured Ideation Techniques (Toolkit: SCAMPER, Crazy 8s).
4. Clustering and Evaluating Ideas (Toolkit: Affinity Clustering).
5. Selecting the Winning Idea (Toolkit: Feasibility-Impact Matrix).

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Module: V PROTOTYPE & TEST — LEARNING BY MAKING

9

Objective: Build tangible representations of the idea and learn from user feedback.

1. The Purpose of Prototyping: To Learn, Not to Perfect.
2. Building Low-Fidelity Prototypes (Toolkit: Paper Prototyping, Storyboarding).
3. Planning and Conducting User Tests (Toolkit: User Test Script).
4. Gathering and Interpreting Feedback (Toolkit: Feedback Capture Grid).
5. The Iteration Cycle: Using feedback to refine the solution.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT

RBT Level: L1-L3

Module: VI INTEGRATE & PITCH — FROM IDEA TO IMPACT

Objective: Prepare for implementation and communicate the solution persuasively.

1. Storytelling for Innovation: Crafting a Compelling Narrative.
2. Building a Persuasive Pitch (Toolkit: Pitch Deck Structure).
3. Ethical, Societal, and Sustainability Check (Toolkit: Ethics & Sustainability Checklist).
4. Introduction to Scalability and Intellectual Property (Overview only).
5. Capstone Project Consolidation & Presentation Rehearsal.

Assessment Framework :

a) Formative Assessments (Continuous)

1. Field Research & Deliverable: 20 Marks

- A documented research report including Empathy Maps, Journey Maps, and supporting evidence (e.g., key quotes, photos, short video clips).
- Focus: Depth of user understanding, quality of research, and synthesis of insights.

2. Ideation & Concept Selection Assessment : 20 Marks

- Deliverable: An "Ideation Logbook" showing the breadth of ideas generated (using SCAMPER, Crazy 8s, etc.) and a rationale for the final selected concept using the Feasibility-Impact Matrix.
- Focus: Creativity, diversity of ideas, and logical selection process.

b) Summative Assessment (End-of-Term)

3. Capstone Project Portfolio & Viva Voce : 60 Marks

This is the core of the course evaluation, assessing the end-to-end project.

- **Comprehensive Project Portfolio - 30 Marks:** A single document walking through the entire process for the team's real-world problem—from initial research and POV to final prototype and iteration plan.
- **Final Pitch Presentation & Demo - 20 Marks:** A compelling live presentation (10-12 mins per team) of their solution, including a demo of their prototype and their proposed implementation plan.
- **Viva Voce - 10 Marks:** A brief individual interview to assess personal contribution, understanding of the process, and ability to reflect on the learning journey.

Total

45

Suggested Activities : Case Study, Quiz, Coding Task, Group Task, Coding Challenge

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the principles of design thinking and identify real-world problems using a designer's mindset.
- CO2: Apply empathy-based research methods to collect user insights through interviews, observations, and field studies.
- CO3: Analyze research findings and formulate clear problem statements using design thinking tools.
- CO4: Generate and evaluate innovative ideas using structured ideation techniques to select feasible solutions.
- CO5: Develop prototypes, test solutions with users, and present innovative solutions through demonstrations and project presentations.

UNIVERSAL HUMAN VALUES AND ETHICS

Course Code	24GE311		Course Type	INTEGRATED	
Course Offered to	Common to All				
Total Teaching Periods	45	L:T:P	1:0:2	Credits	2
Handled by	MECH	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite: Basic awareness of human values, ethical behavior, and social responsibility.

Course Objectives: To enhance knowledge of

1. Universal human values and develop the ability for self-exploration and right understanding.
2. Harmony within the human being, including the relationship between the self ('I') and the body.
3. Harmony in family and society through values such as trust, respect, justice, and cooperation.
4. Harmony in nature and existence, promoting sustainable and responsible living.
5. Applying human values and ethical principles in professional life for socially responsible and environmentally conscious decision-making.

Unit: I INTRODUCTION

3+6

Purpose and motivation for the course, recapitulation from Universal Human Values-I, Self-Exploration – Its content and process; 'Natural acceptance' and Experiential Validation- as the process for self-exploration Continuous Happiness and Prosperity- A look at basic Human Aspirations Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario, Method to fulfil the above human aspirations: understanding and living in harmony at various levels.

PRACTICALS:

- Include sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co-existence) rather than as arbitrariness in choice based on liking-disliking

PS-1: Introduce yourself in detail. What are the goals in your life? How do you set your goals in your life? How do you differentiate between right and wrong? What have been your achievements and shortcomings in your life? Observe and analyze them.

PS-2: Now-a-days, there is a lot of voice about many techno-genic maladies such as energy and natural resource depletion, environmental pollution, global warming, ozone depletion, deforestation, soil degradation, etc. — all these seem to be man-made problems threatening the survival of life on Earth — What is the root cause of these maladies & what is the way out in your opinion?

On the other hand, there is rapidly growing danger because of nuclear proliferation, arms race, terrorism, criminalization of politics, large scale corruption, scams, breakdown of relationships,

generation gap, depression & suicidal attempts, etc — what do you think, is the root cause of these threats to human happiness and peace — what could be the way out in your opinion?

PS 3: Observe that each one of us has Natural Acceptance, based on which one can verify right or not right for him. Verify this in case of

- What is Naturally Acceptable to you in relationship- Feeling of respect or disrespect?
- What is Naturally Acceptable to you — to nurture or to exploit others?
- Is your living the same as your natural acceptance or different?

Teaching-Learning Process **Pedagogy:** Lecture, PPT

RBT Level: L1 – L4

Unit: II HARMONY IN THE HUMAN BEING

3+6

Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’, Understanding the needs of Self (‘I’) and ‘Body’ - happiness and physical facility, Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer), Understanding the characteristics and activities of ‘I’ and harmony in ‘I’, Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure Sanyam and Health.

PRACTICALS :

- Include sessions to discuss the role others have played in making material goods available to me. Identifying from one’s own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease.

PS-4: List down all your desires. Observe whether the desire is related to Self (I) or Body. If it appears to be related to both, see which part of it is related to Self (I) and which part is related to Body.

PS-5:

- Observe that any physical facility you use, follows the given sequence with time: Necessary and tasteful unnecessary and tasteful unnecessary and tasteless intolerable.
- In contrast, observe that any feeling in you is either naturally acceptable or not acceptable at all. If naturally acceptable, you want it continuously and if not acceptable, you do not want it any moment!

PS-6:

- Chalk out programs to ensure that you are responsible to your body- for free nurturing, protection and right utilization of the body.
- Find out the plants and shrubs growing in and around your campus and residence. Find out their use for curing different diseases. If not, what initiative has been taken by you to implant the shrubs?

Teaching-Learning Process **Pedagogy:** Lecture, PPT

RBT Level: L1 – L4

Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship, Understanding the meaning of Trust; Difference between intention and competence, Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship, Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and coexistence as comprehensive Human Goals, Visualizing a universal harmonious order in society, Undivided Society, Universal Order- from family to world family.

PRACTICALS :

- Include sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students' lives

PS 7: Form small groups in the class and in that group initiate dialogue and ask the eight questions related to trust. The eight questions are:

1. Do I want to make myself happy?
2. Do I want to make the other happy?
3. Does the other want to make him happy?
4. Does the other want to make me happy?
 - What is the answer?
 - Intention (Natural Acceptance)
1. Am I able to make myself always happy?
2. Am I able to make the other always happy?
3. Is the other able to make him always happy?
4. Is the other able to make me always happy?
 - What is the answer?
 - Competence

PS 8:

- Observe on how many occasions you are respecting your related ones (by doing the right evaluation) and on how many occasions you are disrespecting by way of under-evaluation, over-evaluation or otherwise evaluation.
- Also observe whether your feeling of respect is based on treating the other as yourself or on differentiations based on body, physical facilities or beliefs.

PS 9:

- Write a note in the form of story, poem, skit, essay, narration, dialogue to educate a child. Evaluate it in a group.
- Develop three chapters to introduce 'social science- its need, scope and content in the primary education of children

Teaching-Learning Process **Pedagogy:** Lecture, PPT

RBT Level: L1 – L4

Unit: IV HARMONY IN THE NATURE AND EXISTENCE

3+6

Understanding the harmony in the Nature, Interconnectedness and mutual fulfilment among the four orders of nature- recyclability and self-regulation in nature, Understanding Existence as Coexistence of mutually interacting units in all- pervasive space, Holistic perception of harmony at all levels of existence.

PRACTICALS :

- Include sessions to discuss human being as cause of imbalance in nature (film “Home” can be used), pollution, depletion of resources and role of technology etc.

PS 10: List down units (things) around you. Classify them in four orders. Observe and explain the mutual fulfilment of each unit with other orders.

PS 11:

- Make a chart for the whole existence. List down different courses of studies and relate them to different units or levels in the existence.
- Choose any one subject being taught today. Evaluate it and suggest suitable modifications to make it appropriate and holistic.

Teaching-Learning Process **Pedagogy:** Lecture, PPT

RBT Level: L1 – L4

Unit: V IMPLICATIONS OF HARMONY ON PROFESSIONAL ETHICS

3+6

Natural acceptance of human values, Definitiveness of Ethical Human Conduct, Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order, Competence in professional ethics:

- a. Ability to utilize the professional competence for augmenting universal human order.
- b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems.
- c. Ability to identify and develop appropriate technologies and management patterns for above production systems.

Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order:

- a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers.
- b. At the level of society: as mutually enriching institutions and organizations, Sum up.

PRACTICALS :

Include Exercises and Case Studies will be taken up in Sessions E.g. To discuss the conduct as an engineer or scientist etc

DESIGN AND ANALYSIS OF ALGORITHMS

Course Code	24CS402	Course Type		INTEGRATED	
Course Offered to	CSE, AIDS & AIML				
Total Teaching Periods	75	L:T:P	3:0:2	Credits	4
Handled by	CSE	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite: Basic knowledge of data structures and discrete mathematics concepts

Course Objectives: To enhance knowledge of

1. Fundamental concepts of algorithm design and analysis including asymptotic notations, recurrences, and complexity analysis.
2. Divide and conquer strategies for designing and analyzing efficient algorithms for sorting, searching, and selection problems.
3. Dynamic programming and greedy techniques for solving optimization problems.
4. Develop familiarity with various string-matching algorithms.
5. NP-completeness, computational complexity, and approximation algorithms for solving difficult optimization problems.

Unit: I **FUNDAMENTALS**

9+6

Introduction – Asymptotic Notations – Recurrences – Substitution Method – Recurrence Tree Method – Master Method – Probabilistic Analysis and Randomized Algorithms – Best, Worst and Average Case Analysis of Linear Search, Binary Search and Insertion Sort.

PRACTICALS:

1. Write a program to perform operation count for a given pseudo code
2. Write a program to perform Bubble sort for any given list of numbers.
3. Write a program to perform Insertion sort for any given list of numbers.
4. Write a Program to perform Binary Search for a given set of integer values recursively and non-recursively

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1- L4

Unit: II **DIVIDE & CONQUER STRATEGY**

9+6

Maximum Subarray – Strassen’s Matrix Multiplication – Analysis of Quick Sort, Merge Sort – Quick Sort Randomized Version – Sorting in Linear Time – Lower Bounds for Sorting – Selection in Expected Linear Time – Selection in Worst Case Linear Time.

PRACTICALS:

1. Write a program to perform Quick Sort for the given list of integer values.
2. Write a program to find Maximum and Minimum of the given set of integer values.
3. Write a Program to perform Merge Sort on the given two lists of integer values.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Unit: III DYNAMIC PROGRAMMING AND GREEDY STRATEGIES

9+6

Elements of Dynamic Programming – Rod cutting – Matrix Chain Multiplication – Longest Common Subsequence – Elements of Greedy Strategy – Huffman Code – Single source shortest path.

PRACTICALS:

1. A rod of length n inches and a table of prices that contains prices of all pieces of size smaller than n , determine the maximum value obtainable by cutting up the rod and selling the pieces.
2. A sequence of matrices, find the most efficient way to multiply these matrices together. The problem is not to perform the multiplications but merely to decide the sequence of the multiplications.
3. Any given two sequences, find the length and content of their longest common subsequence (not necessarily contiguous).
4. Given n activities with their start and finish times. Select the maximum number of activities that can be performed by a single person, assuming that a person can only work on a single activity at a time. (using Greedy).
5. Given a set of characters and their frequencies, construct the Huffman tree and determine the Huffman codes for each character.
6. Given a graph and a source vertex, find the shortest path from the source to all other vertices in the graph using Dijkstra's algorithm.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Unit: IV OTHER DESIGN STRATEGIES AND STRING MATCHING

9+6

Backtracking: N-Queens – Branch & Bound: Travelling Salesperson – String Matching: Naïve, Knuth-Morris-Pratt (KMP)

PRACTICALS:

1. Place N queens on an $N \times N$ chessboard so that no two queens threaten each other. This means no two queens can be in the same row, column, or diagonal.
2. Given a list of cities and the distances between each pair of cities, find the shortest possible route that visits each city exactly once and returns to the origin city using a Branch and Bound approach.
3. Implement the naive pattern matching algorithm to find all occurrences of a pattern P in a given text T .
4. Implement the KMP algorithm for pattern matching. Preprocess the pattern to generate the longest prefix suffix (LPS) array and use it to find matches efficiently.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Unit: V NP PROBLEMS**9+6**

NP– Completeness – Polynomial Time Verification – Theory of Reducibility – Circuit Satisfiability – NP – Completeness Proofs – NP Complete Problems: Vertex Cover, Hamiltonian Cycle and Traveling Salesman Problems – Approximation Algorithms – Approximation Algorithms to Vertex – Cover and Traveling Salesman Problems.

PRACTICALS:

1. Given an undirected graph and an integer k , check whether the graph has a vertex cover of size k or less.
2. Implement backtracking-based solution to check the existence of a Hamiltonian cycle in a graph.
3. Implement the greedy algorithm for set cover and evaluate the performance ratio.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1- L4

Total

75

Suggested Activities: Group Task, Code Comparison, Mini Project, Role Play, Case study, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Fundamentals of algorithm analysis including asymptotic notations, recurrence relations, and complexity analysis.
- CO2: Apply divide and conquer strategies to design and analyze efficient algorithms for sorting, searching, and selection problems.
- CO3: Apply dynamic programming and greedy techniques to solve optimization problems.
- CO4: Analyze and implement algorithm design strategies such as backtracking, branch and bound, and string matching algorithms.
- CO5: NP-completeness concepts and analyze approximation algorithms for solving computationally hard problems.

Text Books:

- T1: Thomas H Cormen, Charles E. Leiserson, Ronald L. Rivest, Clifford Stein, “Introduction to Algorithms”, Third Edition, Prentice Hall of India, 2009.

DATABASE MANAGEMENT SYSTEMS

Course Code	24CS403	Course Type		THEORY	
Course Offered to	CSE				
Total Teaching Periods	45	L:T:P	3:0:0	Credits	3
Handled by	CSE	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic knowledge of Programming Concepts and Data Structures.

Course Objectives: To enhance knowledge of

1. Fundamental database concepts, database architectures, and data modeling using ER diagrams.
2. Relational database concepts, relational algebra, and SQL for data definition, manipulation, and querying.
3. Relational database design techniques including functional dependencies and normalization..
4. Transaction management, concurrency control, and database recovery mechanisms..
5. Query processing, indexing techniques, and advanced database concepts such as spatial, temporal, and NoSQL databases.

Unit: I INTRODUCTION TO DATABASE SYSTEMS 9

Introduction to Databases– File System Vs Database System – Data Models – Schemas and Instances – DBMS Architecture – Centralized – Client Server – Database Applications– ER Models – ER to Relational Mapping.

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1-L4

Unit: II RELATIONAL MODELS 9

Relational Model – Constraints – Keys – Dependencies – Relational Algebra – Unary, Binary, Set and Extended Relational Algebra operations – SQL– Data Definition – Data Manipulation and Retrieval Queries – Nested Queries – Joins – Views– Cursors – Procedures – Functions – Triggers – Embedded and Dynamic SQL.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L4

Unit: III RELATIONAL DATABASE DESIGN 9

Database Design – Functional Dependencies – Normalization – 1 NF – 2 NF – 3 NF – BCNF – Multivalued Dependency (4 NF) – Join Dependency (PJNF)

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L4

Unit: IV TRANSACTIONS AND RECOVERY **9**

Transaction processing concepts – Need for concurrency control and recovery– ACID Properties – Recoverability – Serializability – Concurrency Control – Two phase locking Techniques – Timestamp based protocol – Graph based protocol – Deadlock handling – Log based recovery – Two Phase Commit Protocol.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L4

Unit: V QUERY PROCESSING AND ADVANCED DATABASES **9**

Indexing and Hashing Techniques – Query Processing and Optimization – Sorting and Joins – Database Tuning – Introduction to Spatial and Temporal Databases – OO Databases – No SQL

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1-L4

Total **45**

Suggested Activities: Case Study, Group Role Play, SQL Puzzle, Quiz, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Model an application’s data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- CO2: Formulate solutions to a broad range of query problems using relational algebra/ SQL
- CO3: Apply normalization theory to normalize the relations in RDBMS to avoid redundancy and anomalies.
- CO4: Manage concurrent transactions and their consequences, and analyze the use of triggers, functions, and procedures in a realistic database application
- CO5: Implement the database storage structures and access techniques

OPERATING SYSTEMS

Course Code	24CS411	Course Type		INTEGRATED	
Course Offered to	CSE				
Total Teaching Periods	75	L:T:P	3:0:2	Credits	4
Handled by	CSE	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite: Basic knowledge of Operating System concepts such as processes and memory management.

Course Objectives: To impart the knowledge of

1. File system concepts, file access methods, and directory structures in operating systems.
2. File allocation methods and free space management techniques used in secondary storage.
3. Mass storage structure and disk scheduling algorithms for efficient storage management.
4. Implementing and analyzing file system mechanisms such as allocation methods, free space management, and disk scheduling through practical simulations.
5. File protection mechanisms and access control in operating systems.

Unit: I INTRODUCTION

9+6

Introduction to Operating Systems – Operating System Operations – Resource Management – Operating System Services – Virtualization – User and Operating System Interface – System Calls – Operating System Structures – Building and Booting an Operating System.

PRACTICALS:

1. Basic UNIX commands.
2. Shell programming.
3. Grep, sed and awk.
4. Learn to write a make file and to use gdb.

Teaching-Learning Process Pedagogy: Chalk and Talk
RBTLLevel:L1-L4

Unit: II PROCESSES AND THREADS

9+6

Process Concept – Process Scheduling – Operations on Processes – Interprocess Communication – IPC in Shared– Memory Systems – IPC in Message– Passing Systems – Examples of IPC Systems – Threads – Overview – Multithreading models – Pthreads.

PRACTICALS:

1. File system related system calls. (Learn to create, open, read, write, seek into, close files; open, read, write, search, close directories).
2. Process management – Fork, Exec (Learn to create a new process and to overlay an executable binary image on an existing process).
3. Inter– process communication using pipes, Message Queues and shared memory.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT
RBTLLevel:L1-L4

Unit: III PROCESS MANAGEMENT AND SYNCHRONIZATION**9+6**

Basic Concepts of CPU Scheduling – Scheduling Criteria – Scheduling Algorithms – The Critical-Section Problem – Peterson’s Solution – Synchronization Hardware – Mutex Locks – Semaphores – Classic Problems of Synchronization – Monitors – Deadlocks – Prevention – Avoidance – Detection – Recovery.

PRACTICALS:

1. CPU scheduling algorithms.
2. Synchronization problems using semaphores.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT**RBTLLevel:**L1-L4**Unit: IV MEMORY MANAGEMENT****9+6**

Contiguous Memory Allocation – Paging – Structure of the Page Table – Segmentation – Swapping – Example Architectures – Demand Paging – Page Replacement – Allocation of Frames – Thrashing.

PRACTICALS:

1. Introduction to xv6 – download, build, run kernel in QEMU + gdb
2. Implement First Fit, Best Fit, and Worst Fit allocation algorithms.
3. Simulate Paging and calculate logical → physical address translation.
4. Implement Page Replacement algorithms (FIFO, LRU, Optimal).

Teaching-Learning Process Pedagogy :Chalk and Talk, PPT**RBTLLevel:**L1-L4**Unit: V STORAGE MANAGEMENT****9+6**

File Concept – Access Methods – Directory Structure – Protection – Directory Implementation – Allocation Methods – Free- Space Management – Mass- Storage Structure – HDD Scheduling.

PRACTICALS:

1. Study and analyze xv6 file system implementation (fs.c, fs.h, bio.c, log.c).
2. Implement simulation of file allocation methods (Contiguous, Linked, Indexed).
3. Simulate free-space management techniques (Bitmap, Linked list).
4. Implement disk scheduling algorithms (FCFS, SSTF, SCAN, C-SCAN).
5. Create and test file system protection mechanisms (file permissions simulation).

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT**RBTLLevel:**L1-L4**Total****75**

Suggested Activities : Case Study, Group Role Play, SQL Puzzle, Quiz, Code Debug Challenge, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: **Explain** the fundamental structures, services, and system calls of an operating system, and **demonstrate** proficiency in UNIX shell environment tools including Grep, Sed, and Gdb.
- CO2: **Analyze** various CPU scheduling algorithms and **apply** synchronization primitives like Mutex, Semaphores, and Monitors to solve the critical section problem.
- CO3: **Evaluate** deadlock scenarios in a multi-process environment and **implement** strategies for deadlock prevention, avoidance (Banker’s Algorithm), and recovery.
- CO4: **Compare** memory management schemes such as paging and segmentation, and **calculate** logical-to-physical address translations while implementing page replacement policies.
- CO5: **Design and simulate** file allocation methods and disk scheduling algorithms, and **examine** the architectural implementation of file systems within the xv6 kernel.

1 – “Low”, 2 – “Medium”, 3 – “High”, – “No correlations”														

Teaching-Learning Process **Pedagogy: Lecture, PPT**
RBT Level: L1-L3

Unit 3 **RANDOM VARIABLES AND DISTRIBUTIONS** **15**

Random Variables: Discrete and continuous random variables — Moments — Moment generating functions -Standard Distributions — Discrete: Binomial, Poisson and Geometric distribution – Continuous: Uniform, Exponential and Normal distribution.

PRACTICALS:

1. Compute the PMF of a Binomial, Geometric and Poisson Distributions.
2. Compute and plot the PDF of a Uniform, Exponential and Normal Distributions.
3. Compute the mean and variance of a Binomial, Geometric and Poisson Distributions.

Teaching-Learning Process **Pedagogy: Lecture, PPT**
RBT Level: L1-L3

Unit 4 **TWO-DIMENSIONAL RANDOM VARIABLES** **15**

Joint distributions —JPMF and JPDF- Marginal and conditional distributions — Covariance — Correlation coefficient and regression.

PRACTICALS:

1. Find the marginal distribution from joint distributions.
2. Compute conditional probability distributions.
3. Compute the covariance and correlation coefficient.

Teaching-Learning Process **Pedagogy: Lecture, PPT**
RBT Level: L1-L3

Unit 5 **QUEUEING MODELS** **15**

Markovian queues — Birth and death processes — Single and multiple server queueing models — Little's formula — Queues with finite waiting rooms — Queues with impatient customers: Balking and reneing.

PRACTICALS:

1. Compute the performance measures of an M/M/1 queueing system and calculate queue length and waiting time for a single-server queue.
2. Compute utilization of a multi-server queueing system and compute blocking probability for a finite-capacity queue.
3. Compute effective service rate with reneing and compare arrival and service rates under balking and reneing.

Teaching-Learning Process **Pedagogy: Lecture, NPTEL Videos**
RBT Level: L1-L3

Total **45**

Suggested Activities : Lectures & Problem Solving, Tutorials & Assignments, Sci Lab Practical Sessions, Case Studies / Mini Projects, NPTEL Videos and Seminars, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Apply hypothesis testing techniques for means, variances and attributes.
- CO2: Analyze experimental data using appropriate design of experiments methods.
- CO3: Identify suitable random variables and probability distributions and compute their characteristics.
- CO4: Determine joint, marginal and conditional distributions and analyze correlation and regression.
- CO5: Model and evaluate queueing systems and compute performance measures using Scilab.

FOUNDATIONS OF DATA SCIENCE					
Course Code	24AD411	Course Type		INTEGRATED	
Course Offered to	CSE & IT				
Total Teaching Periods	75	L:T:P	3:0:2	Credits	4
Handled by	AIDS	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite : Basic knowledge of statistics and Python programming.

Course Objectives: To build knowledge of

1. The fundamental concepts, processes, and applications of data science and data mining.
2. Descriptive statistical techniques used to summarize and interpret different types of data.
3. Methods for analyzing relationships between variables using correlation and regression techniques.
4. Python libraries such as NumPy and Pandas for data manipulation, data analysis, and data wrangling.
5. Data visualization techniques using tools such as Matplotlib and Seaborn for effective presentation of data insights.

Unit: I INTRODUCTION

9+6

Data Science: Benefits and uses – facets of data - Data Science Process: Overview – Defining research goals – Retrieving data – Data preparation - Exploratory Data analysis – build the model–presenting findings and building applications - Data Mining - Data Warehousing – Basic Statistical descriptions of Data.

PRACTICALS:

1. Download, install and explore the features of NumPy, SciPy, Jupyter, Statsmodels and Pandas packages.
2. Working with NumPy arrays
3. Working with Pandas data frames

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1-L4

Unit: II DESCRIBING DATA

9+6

Types of Data - Types of Variables -Describing Data with Tables and Graphs –Describing Data with Averages - Describing Variability - Normal Distributions and Standard (z) Scores.

PRACTICALS:

(Use a public dataset (e.g., **Titanic**, **Iris**, or **Customer Sales Data**))

1. Create the following dataset with fields:
Student_ID, Age, Gender, Marks, Grade, Feedback_Rating (1 to 5), identify:
2. Load the Titanic dataset and:
 - Create a **frequency table** for the class and sex columns.
 - Generate a **bar chart** showing the number of survivors by gender.
3. For the Titanic dataset, calculate: The **mean, median, mode** of age and fare.
4. Using the fare column:

- Calculate **range, variance, and standard deviation**.
- Explain whether the data is **highly dispersed** or **tightly packed**.

5. Write the coding to Plot the **distribution** of the agecolumn, Calculate and display **Z-scores** for the first 10 entries and Identify how many values fall within ± 1 , ± 2 standard deviations.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L4

Unit: III DESCRIBING RELATIONSHIPS

9+6

Correlation –Scatter plots –correlation coefficient for quantitative data –computational formula for correlation coefficient – Regression –regression line –least squares regression line – Standard error of estimate – interpretation of r^2 –multiple regression equations –regression towards the mean.

PRACTICALS:

1. Use the Iris or Titanic dataset. Plot a scatter plot between two numerical variables and visually comment on the relationship
2. Use the diabetes data set from UCI and Pima Indians Diabetes data set for performing the following:
 - a. Univariate analysis: Frequency, Mean, Median, Mode, Variance, Standard Deviation, Skewness and Kurtosis.
 - b. Bivariate analysis: Linear and logistic regression modeling
 - c. Multiple Regression analysis d. Also compare the results of the above analysis for the two data sets.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L4

Unit: IV PYTHON LIBRARIES FOR DATA WRANGLING

9+6

Basics of NumPy, arrays –aggregations –computations on arrays –comparisons, masks, Boolean logic – fancy indexing – structured arrays – Data manipulation with Pandas – data indexing and selection – operating on data – missing data – Hierarchical indexing – combining datasets –aggregation and grouping – pivot tables.

PRACTICALS:

1. Create a 4×4 NumPy array filled with values from 0 to 15.
 - Reshape it into 2D, transpose it, and flatten it.
 - Compute sum along rows and columns.
2. Given a 5×5 matrix of random integers between 10 and 100:
 - Find the max, min, mean, std, and median.
 - Normalize each element:
3. Create a 1D array of 20 random integers between 1 and 100.
 - Filter elements greater than 50.
 - Replace all even numbers with -1.
4. Create an array of squares from 1^2 to 20^2 .
 - Use fancy indexing to extract all prime-indexed elements.
5. Create a structured NumPy array for 50 students with fields:
 (Name:str, Age:int, Score:float)
 - Sort by score and print top 3 students.

6. Load the Titanic dataset from Seaborn.
 - Display top 10 records.
 - Set 'class' and 'sex' as hierarchical index.
7. Check for missing values in all columns.
 - Fill missing `age` with median value.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L4

Unit: V **DATA VISUALIZATION** **9+6**

Importing Matplotlib – Line plots – Scatter plots – visualizing errors – density and contour plots – Histograms – legends – colors – subplots – text and annotation – customization – three-dimensional plotting - Geographic Data with Basemap - Visualization with Seaborn.

PRACTICALS:

1. Apply and explore various plotting functions on UCI data sets.
 - a. Normal curves
 - b. Density and contour plots
 - c. Correlation and scatter plots
 - d. Histograms
 - e. Three-dimensional plotting
2. Visualizing Geographic Data with Base map

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT
RBT Level: L1-L4

Total **75**

Suggested Activities: Group Discussion, Concept Mapping, Case Study, Quiz, Creative Task, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the Data Science process, data types, and basic statistical descriptions
- CO2: Apply descriptive statistics and probability concepts to analyze datasets.
- CO3: Perform correlation and regression analysis to examine relationships between variables
- CO4: Use Python libraries (NumPy, Pandas, SciPy, Stats models) for data manipulation and wrangling
- CO5: Create effective visualizations using Matplotlib, Seaborn, and geographic plotting tools to communicate insights

ENVIRONMENTAL STUDIES AND SUSTAINABLE DEVELOPMENT

Course Code	24CH411	Course Type		INTEGRATED	
Course Offered to	CSE, IT, CSBS & CSCS				
Total Teaching Periods	45	L:T:P	2:0:2	Credits	3
Handled by	CHEMISTRY	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite : Basic knowledge of environmental studies

Course Objectives: To enhance the knowledge of

1. Basic concepts and importance of sustainability and Sustainable Development Goals (SDGs).
2. Environmental sustainability issues such as climate change, pollution, and resource conservation..
3. Social and economic aspects of sustainability including CSR and sustainable development
4. Sustainable practices in information technology and e-waste management.
5. Tools and practices for sustainability such as green buildings and environmental management systems.

Unit: I INTRODUCTION

9

Principles and Historical perspectives, Importance and need for Sustainability in Engineering and Technology, impact and implications. United Nations Sustainability Development Goals (SDG), UN summit- Rio & outcome, Sustainability and development indicators.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT & Demonstration

RBT Level: Theory: L1-L4

Unit: II ENVIRONMENTAL SUSTAINABILITY

9

Climate change, Biodiversity loss, Pollution and Waste Management, Renewable vs, Non-Renewable resources, Water and Energy Conservation, Sustainable Agriculture and Forestry. National and International Policies, Environmental Regulations and Compliance, Ecological Footprint Analysis.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT

RBT Level: L1-L4

Unit: III SOCIAL & ECONOMIC SUSTAINABILITY

9

Equity and Justice, Community Development, Smart cities and Sustainable infrastructure, Cultural heritage and Sustainability, Ethical considerations in Sustainable Development. Triple bottom line approach, Sustainable Economic Growth, Corporate Social Responsibility (CSR), Green marketing and Sustainable product design; Circular Economy and Waste Minimization, Green Accounting and Sustainability Reporting.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L4

Unit: IV SUSTAINABILITY

9

Sustainable Software: What, Why and How – Social and Individual Sustainability in SE – Choosing energy– efficient programming languages. Types and sources of e– waste – Environmental and health impacts of e– waste – E– waste regulations and policies – Techniques for recycling IT equipment – Safe disposal methods – E– waste stream management – Concepts of circular economy – Role of IT in promoting circular economy.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: Theory: L1-L4

Unit: V SUSTAINABILITY PRACTICES

9

Suggested Practices not limited to

1. Energy efficiency – how to save energy (energy efficient equipment, energy saving behaviour).
2. Chemical use and storage – the choice of chemicals being procured, the safe disposal of leftover chemicals, the impact of chemicals on the environment and long– term health impacts on humans.
3. Green building, green building materials, green building certification and rating: green rating for integrated habitat assessment (GRIHA), leadership in energy and environmental design (LEED)
4. Tools for Sustainability – Environmental Management System (EMS), ISO14000, life cycle assessment (LCA)
5. Ecological footprint assessment using the Global Footprint Network spreadsheet calculator
6. National/Sub national Status of Sustainable Development Goals.
7. Develop a campus sustainability plan and prototype, integrating sustainable IT practices and energy– efficient solutions.
8. Develop AI– driven solutions for efficient water management, demonstrating the role of IT in smart environmental monitoring.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: Theory: L1-L4

Total

45

Suggested Activities: Code Debug Challenge, Puzzle Activity, Case study, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

CO1: Explain sustainability concepts, SDGs, and development indicators.

CO2: Analyze environmental issues and evaluate conservation methods.

CO3: Assess social and economic sustainability practices including CSR and circular economy.

CO4: Apply sustainable software practices and e-waste management techniques.

CO5: Develop sustainability plans using tools such as LCA, EMS, and ecological footprint assessment.

START-UP AND ENTREPRENEURSHIP

Course Code	24GE421	Course Type		INTEGRATED	
Course Offered to	CSE, IT,AIDS, CSBS, & AIML				
Total Teaching Periods	45	L:T:P	1:0:2	Credits	2
Handled by	MECH	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite : Basic knowledge of business concepts and management principles.

Course Objectives: To provide knowledge of

1. Entrepreneurship concepts, entrepreneurial mindset, characteristics of entrepreneurs, and factors influencing the emergence of entrepreneurship.
2. Business idea generation, opportunity recognition, feasibility analysis, and preparation of business plans for new ventures.
3. Funding sources, financial institutions, and entrepreneurship development programs supporting small and medium enterprises in India.
4. The role of government initiatives and support systems for promoting women entrepreneurship and addressing challenges faced by women entrepreneurs.
5. Start-up creation, business incubation processes, legal compliance, and entrepreneurial leadership for establishing and managing start-ups.

UNIT: I INTRODUCTION TO ENTREPRENEURSHIP

Entrepreneurship - Concept, knowledge and skills requirement - Characteristics of successful entrepreneurs - Entrepreneurship process - Factors impacting emergence of entrepreneurship - Differences between Entrepreneur and Intrapreneur - Understanding individual entrepreneurial mindset and personality - Recent trends in Entrepreneurship.

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1- L4

UNIT : II IDEATION AND OPPORTUNITY ANALYSIS

9

Starting the New Venture - Generating business idea – Sources of new ideas & methods of generating ideas - Opportunity recognition - Feasibility study - Market feasibility, technical/operational feasibility - Financial feasibility - Drawing business plan - Preparing project report - Presenting business plan to investors.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1- L4

UNIT: III FUNDING AND FINANCIAL ASPECTS 9

Sources of finance - Various sources of Finance available - Long term sources - Short term sources - Institutional Finance – Commercial Banks, SFC's in India - NBFC's in India - their way of financing in India for small and medium business - Entrepreneurship development programs in India - The entrepreneurial journey- Institutions in aid of entrepreneurship development.

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1- L4

UNIT: IV WOMEN ENTREPRENEURSHIP 9

Women Entrepreneurship - Entrepreneurship Development and Government - Role of Central Government and State Government in promoting women Entrepreneurship - Introduction to various incentives, subsidies and grants – Export- oriented Units - Fiscal and Tax concessions available - Women entrepreneurship - Role and importance - Growth of women entrepreneurship in India - Issues & Challenges - Entrepreneurial motivations

Teaching-Learning Process Pedagogy: Chalk and Talk, PPT

RBT Level: L1- L4

UNIT: V START – UP AND BUSINESS INCUBATION 9

Fundamentals of Business Incubation - Principles and good practices of business incubation- Process of business incubation and the business incubator and how they operate and influence the Type/benefits of incubators - Corporate/educational / institutional incubators - Broader business incubation environment - Pre- Incubation and Post - Incubation process - Idea lab, Business plan structure - Value proposition – Legal, ethical and managerial aspects –Start-up compliance (GST, ROC filing, labor law) – Entrepreneurial leadership and team building.

Teaching-Learning Process Pedagogy: Lecture Method, PPT

RBT Level: L1-L3

Total 45

Suggested activities: Business Model Canvass workshop, Guest lecture by Entrepreneur / Start up founder Visit to Start up to Incubations, Pitching Event / Mini Shark tank Simulation Team based business plan competition

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the concepts of entrepreneurship, entrepreneurial mindset, and factors influencing entrepreneurial development.
- CO2: Apply idea generation and opportunity analysis techniques to identify feasible business ventures..
- CO3: Identify appropriate funding sources and financial support systems available for entrepreneurs.
- CO4: Explain the role of government initiatives and analyze opportunities and challenges in women entrepreneurship.
- CO5: Illustrate the start-up development process including incubation, legal compliance, and entrepreneurial leadership.

DATABASE MANAGEMENT SYSTEMS LAB

Course Code	24CS421	Course Type		PRACTICAL	
Course Offered to	CSE				
Total Teaching Periods	30	L:T:P	0:0:4	Credits	2
Handled by	CSE	Assessment Methods		IAT	ESE
				60 Marks	40 Marks

Prerequisite : Basic knowledge of database concepts, relational model, and SQL fundamentals.

Course Objectives: To enhance knowledge of

1. Database design concepts including ER modeling and relational schema creation.
2. SQL programming techniques for data definition, manipulation, and retrieval operations.
3. Database programming concepts using PL/SQL constructs such as cursors, procedures, functions, and triggers..
4. Database normalization, transactions, and concurrency control mechanisms.
5. Advanced database concepts including indexing, query optimization, distributed transactions, and spatial databases.

PRACTICALS:

1. ER Diagram.
2. Creation of tables with appropriate integrity constraints
3. Usage of alter, drop commands
4. Data Insertion, updation, and deletion with tables
5. Data retrieval using
 - Simple SQL
 - Nested Queries
6. Cursors
7. PL/SQL: Functions, Procedures and Triggers
8. Aggregation operators– Grouping and ordering
9. Create View tables
10. Given a relation with partial and transitive dependencies, perform step-by-step normalization up to 3NF. Write SQL to implement each normalized form.
11. Given a relation R (StudentID, CourseID, InstructorName) with the following **functional dependencies**:
 - StudentID → CourseID
 - CourseID → InstructorName
12. Perform the following tasks:
 - **Identify all candidate keys** of the relation.
 - **Determine the highest normal form** that the relation satisfies.
 - If the relation is **not in BCNF**, decompose it into **BCNF** using **lossless decomposition**.
 - Implement the resulting relations using **SQL DDL** statements.

13. Write an SQL script to demonstrate the **ACID properties** of transactions. Perform a bank transaction involving debit and credit operations. Ensure that the transaction is either fully completed or rolled back in case of an error.
14. Design a program to determine whether a given transaction schedule is **conflict serializable**. Build the **precedence graph** and check for cycles.
15. Simulate the **Two-Phase Locking (2PL)** protocol for two or more transactions accessing shared data items. Show the growing and shrinking phases of each transaction and ensure that the final schedule is serializable.
16. Simulate the **Two-Phase Commit Protocol** for a distributed database system involving one coordinator and two participants. Implement the PREPARE and COMMIT/ABORT phases.
17. Create a table `Employee (EmpID, Name, Department, Salary)`. Create:
 - A **clustered index** on `EmpID`
 - A **non-clustered index** on `Department`
 - A **hash-based lookup simulation** for `EmpID`
18. Demonstrate how indexing improves query performance using `EXPLAIN` (MySQL/PostgreSQL). Given multiple SQL queries using `JOIN`, `WHERE`, and `ORDER BY`, analyze and compare their execution plans using the database's `EXPLAIN` or `ANALYZE` features. Rewrite queries for better performance. Compare query cost and runtime before and after optimization.
19. Simulate **nested loop join** and **sort-merge join** algorithms on two relations:
 - `Student (SID, Name)`
 - `Enrollment (SID, CourseID)`
 Implement join logic manually in code or using SQL procedures.
20. Using **PostGIS** (PostgreSQL), create a table `Locations (Name, Latitude, Longitude)` and execute spatial queries like
 - Find all locations within 5 km of a given point.
 - Calculate the distance between two cities.
 Introduce spatial functions like `ST_DWithin ()`, `ST_Distance ()`.
21. Create a table `Employee (EmpID, Name, Salary, StartDate, End Date)` to track **salary history** over time. Write SQL queries to:
 - Retrieve employee salary at a specific point in time.
 - Retrieve salary history for a period.

Total

30

Suggested Activities: Code Debug Challenge, Puzzle Activity, Code Tracing Worksheet.

Evaluation Methods: Performance in Suggested activities, Model practical and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Model an application's data requirements using conceptual modeling tools like ER diagrams and design database schemas based on the conceptual model.
- CO2: Formulate solutions to a broad range of query problems using relational algebra/ SQL
- CO3: Apply normalization theory to normalize the relations in RDBMS to avoid redundancy and anomalies.
- CO4: Manage concurrent transactions and their consequences, and analyze the use of triggers, functions, and procedures in a realistic database application.
- CO5: Understand database storage structures and access techniques

DISASTER MANAGEMENT

Course Code	24AE401	Course Type		THEORY	
Course Offered to	Common to All				
Total Teaching Periods	30	L:T:P	2:0:0	Credits	0
Handled by	MECH	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic awareness of environmental and disaster-related issues.

Course Objectives: To provide knowledge of

1. The fundamental concepts of disasters, hazards, vulnerability, resilience, and risk.
2. Different types of disasters and their social, economic, environmental, and health impacts.
3. Disaster risk reduction strategies and the roles of institutions at local, state, and national levels.
4. The relationship between disasters, development activities, and climate change.
5. Disaster management practices using case studies, hazard assessment, and GIS-based technologies.

Unit: I INTRODUCTION TO DISASTERS 6

Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc - Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability - Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don'ts during various types of Disasters.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: II APPROACHES TO DISASTER RISK REDUCTION (DRR) 6

Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions / Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processes and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: III INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT 6

Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India - Relevance of indigenous knowledge, appropriate technology and local resources.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: IV DISASTER RISK MANAGEMENT IN INDIA 6

Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy - Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: V DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES 6
AND FIELD WORKS

Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Total 30

Suggested Activities : Case Study, Quiz, Assignment topics, Class Presentation

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the concepts of ethical management, managerial ethics, professional ethics, and social responsibility.
- CO2: Analyze ethical decision-making processes and apply ethical principles in crisis management situations.
- CO3: Evaluate stakeholder relationships and sustainability issues in ethical management. (L2, L3)
- CO4: Analyze individual variables such as ethical awareness, judgment, courage, and emotions in managerial decision-making.
- CO5: Apply ethical management techniques and skills to resolve dilemmas and promote an ethical organizational culture.

INDUSTRIAL SAFETY

Course Code	24AU402	Course Type		THEORY	
Course Offered to	Common to All				
Total Teaching Periods	30	L:T:P	2:0:0	Credits	-
Handled by	MECH	Assessment Methods		IAT	ESE
				40 Marks	60 Marks

Prerequisite : Basic knowledge of engineering workshop practices and mechanical equipment.

Course Objectives: To provide knowledge of

1. Industrial safety practices, accident causes, hazard control measures, fire prevention methods, and safety regulations in industrial environments.
2. Maintenance engineering concepts, functions of maintenance departments, types of maintenance, and maintenance cost considerations.
3. Wear and corrosion mechanisms and their prevention using suitable lubrication and protection techniques.
4. Systematic fault tracing methods and diagnostic procedures used in mechanical and electrical equipment.
5. Periodic inspection and preventive maintenance procedures for machine tools, pumps, compressors, motors, and DG sets.

Unit: I INDUSTRIAL SAFETY 6

Accident, causes, types, results and control, mechanical and electrical hazards, types, causes and preventive steps/procedure, describe salient points of factories act 1948 for health and safety, wash rooms, drinking water layouts, light, cleanliness, fire, guarding, pressure vessels, etc., Safety color codes. Fire prevention and firefighting, equipment and methods.

Teaching-Learning Process Pedagogy: Lecture Method, PPT
RBT Level: L1-L3

Unit: II MAINTENANCE ENGINEERING 6

Definition and aim of maintenance engineering, Primary and secondary functions and responsibility of maintenance department, Types of maintenance, Types and applications of tools used for maintenance, Maintenance cost & its relation with replacement economy, Service life of equipment.

Teaching-Learning Process Pedagogy: Lecture Method, PPT
RBT Level: L1-L3

Unit: III WEAR AND CORROSION AND THEIR PREVENTION 6

Wear- types, causes, effects, wear reduction methods, lubricants-types and applications, Lubrication methods, general sketch, working and applications, i. Screw down grease cup, ii. Pressure grease gun, iii. Splash lubrication, iv. Gravity lubrication, v. Wick feed lubrication vi. Side feed lubrication, vii. Ring lubrication, Definition, principle and factors affecting the corrosion. Types of corrosion, corrosion prevention methods.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: IV FAULT TRACING

6

Fault tracing-concept and importance, decision tree concept, need and applications, sequence of fault-finding activities, show as decision tree, draw decision tree for problems in machine tools, hydraulic, pneumatic, automotive, thermal and electrical equipment's like, i. Any one machine tool, ii. Pump iii. Air compressor, iv. Internal combustion engine, v. Boiler, vi. Electrical motors, Types of faults in machine tools and their general causes.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Unit: V PERIODIC AND PREVENTIVE MAINTENANCE

6

Periodic inspection-concept and need, degreasing, cleaning and repairing schemes, overhauling of mechanical components, overhauling of electrical motor, common troubles and remedies of electric motor, repair complexities and its use, definition, need, steps and advantages of preventive maintenance. Steps/procedure for periodic and preventive maintenance of: i. Machine tools, ii. Pumps, iii. Air compressors, iv. Diesel generating (DG) sets, Program and schedule of preventive maintenance of mechanical and electrical equipment, Advantages of preventive maintenance. Repair cycle concept and importance.

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT
RBT Level: L1-L3

Total

30

Suggested Activities: Case Study, Quiz, Assignment topics, Class Presentation, Review of GATE questions.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain industrial safety concepts, accident causes, hazards, fire prevention methods, and relevant provisions of the Factories Act, 1948.
- CO2: Describe maintenance engineering principles, types of maintenance, tools used, and cost-replacement analysis.
- CO3: Analyze wear and corrosion mechanisms and recommend suitable prevention and lubrication methods.
- CO4: Apply fault tracing techniques using decision tree methods for mechanical, hydraulic, pneumatic, thermal, and electrical systems.
- CO5: Develop periodic and preventive maintenance plans for industrial equipment and evaluate their effectiveness.

GENDER SENSITIZATION

Course Code	24AU403	Course Type		THEORY	
Course Offered to	Common ton All				
Total Teaching Periods	30	L:T:P	2:0:0	Credits	2
Handled by	MECH	Assessment Methods		IAT	ESE
				50 Marks	50 Marks

Prerequisite : Basic awareness of societal values, ethics, and human relationships.

Course Objectives: To provide knowledge of

1. Fundamental concepts of gender studies, gender identity, gender roles, and the social construction of gender in society.
2. Gender relations in society, including patriarchy, intersectionality, and gender representation in education, media, and professional environments.
3. Gender issues and challenges in workplaces and industries, particularly in science, technology, and engineering sectors.
4. Legal provisions, constitutional rights, and policy frameworks that promote gender equality and protect individuals from discrimination and harassment.
5. Inclusive practices, ethical responsibilities, and leadership approaches that support gender diversity and equality in engineering and professional spaces.

Module: I INTRODUCTION TO GENDER STUDIES

- Sex and Gender: Conceptual differences
- Gender identity and gender expression
- Social construction of gender
- Gender roles and stereotypes
- Gender and culture
- Overview of global equality principles promoted by the United Nations

Teaching-Learning Process Pedagogy: Chalk and Talk

RBT Level: L1- L4

Module: II GENDER AND SOCIETY

6

- Patriarchy and power structures
- Intersectionality (caste, class, disability, race)
- Gender representation in media
- Gender and education
- Women in STEM fields
- Gender bias in academic institutions
- Case studies from engineering education environments.

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Module: III GENDER IN WORKPLACE & INDUSTRY

6

- Gender diversity in corporate environments
- Equal opportunity and pay equity
- Gender bias in recruitment and promotion
- Workplace harassment and prevention
- Role of the International Labour Organization in promoting workplace equality
- Inclusive team building in engineering organizations

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

MODULE: IV LEGAL & POLICY FRAMEWORK

6

- Constitutional provisions for equality
- Prevention of Sexual Harassment (POSH) guidelines
- Rights of LGBTQ+ individuals
- Institutional grievance redressal mechanisms
- Regulatory framework guidance from the University Grants Commission (where applicable)
- Students should understand institutional compliance standards aligned with bodies such as the University Grants Commission (if applicable in Indian context).

Teaching-Learning Process **Pedagogy:** Chalk and Talk, PPT

RBT Level: L1- L4

Module: V BUILDING INCLUSIVE ENGINEERING SPACES

6

- Gender-sensitive communication
- Ethical responsibility of engineers
- Creating inclusive campus culture organizations
- Discussion on how inclusive teams improve innovation in tech companies like Google and Microsoft.
- Leadership and ally ship
- Diversity and innovation,
- Case studies from global technology

Teaching-Learning Process **Pedagogy:** Lecture Method, PPT

RBT Level: L1,L2,L3

Total

30

Suggested activities : Case studies, Group discussions, Role play exercises; Industry case analysis, assignments.

Evaluation Methods: Performance in Suggested activities, IAT and End Semester Examinations.

Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the concepts of sex, gender, gender identity, gender roles, and the social construction of gender.
- CO2: Analyze gender issues in society, including patriarchy, intersectionality, and gender representation in education and media.
- CO3: Examine gender challenges and biases in workplaces, particularly in engineering and technology sectors.
- CO4: Explain legal provisions, institutional policies, and regulatory frameworks that support gender equality and protection.
- CO5: Apply inclusive practices and ethical principles to promote gender-sensitive communication and inclusive professional environments.

Text Books:

- T1: Gender in Engineering: Interdisciplinary Approaches, Routledge Publications
- T2: Gender Issues in Science and Technology, Allied Publishers.
- T3: Gender: Ideas, Interactions, Institutions, W.W. Norton & Company
