

**MOHAMED SATHAK**  
**A.J. COLLEGE OF ENGINEERING**

**An Autonomous Institution**

# **Department of Electrical and Electronics Engineering**

## **Curriculum and Syllabus (I - IV Semester) 2024 - 2025**

[ Approved by AICTE, New Delhi | Affiliated to Anna University, Chennai |  
Recognised by UGC 12(B) & 2(f) Act | An ISO 9001:2015 Certified |  
NAAC Accredited with 'A' Grade | NBA – Mechanical ]

**34, Rajiv Gandhi Salai (OMR) Siruseri IT Park, Chennai - 603 103**

**MOHAMED SATHAK A J COLLEGE OF ENGINEERING**  
**Chennai – 603103**

**REGULATIONS 2024**  
**(CHOICE BASED CREDIT SYSTEM)**

**B. E. ELECTRICAL AND ELECTRONICS ENGINEERING**

**I. PROGRAM EDUCATIONAL OBJECTIVES (PEOs)**

**PEO1: Technical Proficiency and Innovation**

Graduates will possess strong technical knowledge and skills in **Electrical and Electronics Engineering**, enabling them to solve complex problems, design and implement, innovative and sustainable solutions for Industry and Society.

**PEO2: Professional and Ethical Leadership**

Graduates will achieve successful careers and contribute towards technological advancements in terms of leadership, ethical responsibility, effective communication, and teamwork.

**PEO3: Lifelong Learning and Societal Contribution**

Graduates will engage in lifelong learning to be updated with cutting edge technology and apply their skills to address global challenges thus promoting socio economic development.

**II. PROGRAM OUTCOMES (POs)**

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one’s own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

### III. PROGRAM SPECIFIC OUTCOMES (PSOs)

Graduates will be able to

PSO1: Design and implement sustainable solutions in **Electrical and Electronics** domain by using innovation, technical knowledge acquired, modern hardware and software tools.

PSO2: Adapt and excel in **Electrical and Electronics** domain through continual learning, higher education, research and use of new technology for societal and industry needs.

PSO3: Contribute in leadership roles to create new opportunities and ensuring adherence of economic, environmental and ethical standards.

## HERITAGE OF TAMILS

(Common to all branches)

Course Code	24TA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

### Course Objectives:

1. To familiarize about the importance of Tamil Language and its literature
2. To teach about the heritage of Tamil from art and sculpture
3. To teach about the culture of Tamil from Folk music and martial arts
4. To impart knowledge on thinai concepts
5. To provide insight on the contribution of Tamil in freedom struggle and Indian culture

### Unit: I LANGUAGE AND LITERATURE

3

Language Families in India - Dravidian Languages – Tamil as a Classical Language - Classical Literature in Tamil – Secular Nature of Sangam Literature – Distributive Justice in Sangam Literature - Management Principles in Thirukural - Tamil Epics and Impact of Buddhism & Jainism in Tamil Land - Bakthi Literature Azhwars and Nayanmars - Forms of minor Poetry - Development of Modern literature in Tamil - Contribution of Bharathiyar and Bharathidhasan.

**Teaching-Learning Process** Pedagogy: Lecture, PPT  
RBT Level: L1, L2, L3

### Unit: II HERITAGE - ROCK ART PAINTINGS TO MODERN ART – SCULPTURE

3

Hero stone to modern sculpture - Bronze icons - Tribes and their handicrafts - Art of temple car making - - Massive Terracotta sculptures, Village deities, Thiruvalluvar Statue at Kanyakumari, Making of musical instruments - Mridhangam, Parai, Veenai, Yazh and Nadhaswaram - Role of Temples in Social and Economic Life of Tamils.

**Teaching-Learning Process** Pedagogy: Lecture, PPT  
RBT Level: L1, L2, L3

### Unit: III FOLK AND MARTIAL ARTS

3

Therukoothu, Karagattam, Villu Pattu, Kaniyan Koothu, Oyillattam, Leatherpuppetry, Silambattam, Valari, Tiger dance - Sports and Games of Tamils.

**Teaching-Learning Process** Pedagogy: Lecture, PPT  
RBT Level: L1, L2, L3

### Unit: IV THINAI CONCEPT OF TAMILS

3

Flora and Fauna of Tamils & Aham and Puram Concept from Tholkappiyam and Sangam Literature - Aram Concept of Tamils - Education and Literacy during Sangam Age - Ancient Cities and Ports of Sangam Age - Export and Import during Sangam Age - Overseas Conquest of Cholas.

**Teaching-Learning Process** Pedagogy: Lecture, PPT  
RBT Level: L1, L2, L3

**Unit: V CONTRIBUTION OF TAMILS TO INDIAN NATIONAL MOVEMENT AND INDIAN CULTURE**

**3**

Contribution of Tamils to Indian Freedom Struggle - The Cultural Influence of Tamils over the other parts of India – Self-Respect Movement - Role of Siddha Medicine in Indigenous Systems of Medicine – Inscriptions & Manuscripts – Print History of Tamil Books.

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

**Total**

**15**

**Pedagogical Methods:**

- |   |
|---|
| Unit 1: Sol Vilayattu                             |
| Unit 2: Drawing                                   |
| Unit 3: Theme based activities (Folk and Dance)   |
| Unit 4: Essay & Poetry Writing (Thinai)           |
| Unit 5: Try to learn about basic Siddha Vaithiyam |

**Course Outcomes:**

After successful completion of this course, the students will be able to

- |   |
|---|
| CO1: Explain the salient features of Tamil language and its literature.                   |
| CO2: Discuss about the heritage of Tamil exhibited by various forms of art and sculpture. |
| CO3: Describe Tamil heritage displayed by folk music and martial arts                     |
| CO4: Discuss and describe the features of five Thinais in Tamil.                          |
| CO5: Describe the contribution of Tamil in freedom struggle and Indian culture.           |

**தமிழர் மரபு**  
(Common to all branches)

Course Code	24TA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

**Course Objectives:**

1. தாய்மொழியின் நிகரற்ற தொன்மையை விளக்குவது
2. பழம் தமிழரின் துறை சார்ந்த ஓவியங்கள் மற்றும் சிற்பங்கள் நவீன கலைகள் குறித்து விளக்குவது
3. வியக்க வைக்கும் பழந்தமிழரின் கலைகள், இசை மற்றும் வீரவிளையாட்டுகள் பற்றி தெரியப்படுத்துவது
4. தமிழர்களின் திணைக் கோட்பாடுகளை பற்றி விளக்குவது
5. தமிழரின் தன்னிகரற்ற ஈடுபாடு - சித்த மருத்துவம் மற்றும் விடுதலைப் போராட்டம் பற்றி விளக்குவது

**அலகு - I மொழி மற்றும் இலக்கியம்**

3

இந்திய மொழிக் குடும்பங்கள் - திராவிட மொழிகள் - தமிழ் ஒரு செம்மொழி - தமிழ் செவ்விலக்கியங்கள் - சங்க இலக்கியத்தின் சமயச் சார்பற்ற தன்மை - சங்க இலக்கியத்தில் பகிர்தல் அறம் - திருக்குறளில் மேலாண்மைக் கருத்துக்கள் - தமிழ்க் காப்பியங்கள், தமிழகத்தில் சமண பௌத்த சமயங்களின் தாக்கம் - பக்தி இலக்கியம் ஆழ்வார்கள் மற்றும் நாயன்மார்கள் - சிற்றலக்கியங்கள் - தமிழில் நவீன இலக்கியத்தின் வளர்ச்சி - தமிழ் இலக்கிய வளர்ச்சியில் பாரதியார் மற்றும் பாரதிதாசன் ஆகியோரின் பங்களிப்பு.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

**அலகு - II மரபு பாறை ஓவியங்கள் முதல் நவீன ஓவியங்கள் வரை சிற்பக் கலை**

3

நடுகல் முதல் நவீன சிற்பங்கள் வரை - ஐம்பொன் சிலைகள் - பழங்குடியினர் மற்றும் அவர்கள் தயாரிக்கும் கைவினைப் பொருட்கள் பொம்மைகள் - தேர் செய்யும் கலை - சுடுமண் சிற்பங்கள் நாட்டுப்புறத் தெய்வங்கள் - குமரிமுனையில் திருவள்ளூர் சிலை - இசைக் கருவிகள் மிருதங்கம் - பறை வீணை யாழ் நாதஸ்வரம் தமிழர்களின் சமூக பொருளாதார வாழ்வில் கோவில்களின் பங்கு.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

**அலகு - III நாட்டுப்புறக் கலைகள் மற்றும் வீர விளையாட்டுகள்**

3

தெருக்கூத்து, கரகாட்டம், வில்லுப்பாட்டு, கணியான் கூத்து, ஓயிலாட்டம், தோல்பாவைக் கூத்து, சிலம்பாட்டம், வளரி, புலியாட்டம், தமிழர்களின் விளையாட்டுகள்.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

**அலகு - IV தமிழர்களின் திணைக் கோட்பாடுகள்**

3

தமிழகத்தின் தாவரங்களும், விலங்குகளும் - தொல்காப்பியம் மற்றும் சங்க இலக்கியத்தில் அகம் மற்றும் புறக் கோட்பாடுகள் - தமிழர்கள் போற்றிய அறக்கோட்பாடு - சங்ககாலத்தில் தமிழகத்தில் எழுத்தறிவும், கல்வியும் - சங்ககால நகரங்களும் துறை முகங்களும் - சங்ககாலத்தில் ஏற்றுமதி மற்றும் இறக்குமதி - கடல்கடந்த நாடுகளில் சோழர்களின் வெற்றி

**Teaching-Learning Process Pedagogy:** Lecture, PPT**RBT Level:** L1, L2, L3**அலகு - V இந்திய தேசிய இயக்கம் மற்றும் இந்திய**

3

**பண்பாட்டிற்குத் தமிழர்களின் பங்களிப்பு**

இந்திய விடுதலைப்போரில் தமிழர்களின் பங்கு - இந்தியாவின் பிறப்பகுதிகளில் தமிழ்ப் பண்பாட்டின் தாக்கம் - ச்யமரியாதை இயக்கம் இந்திய மருத்துவத்தில் சித்த மருத்துவத்தின் பங்கு - கல்வெட்டுகள், கையெழுத்துப்படிக்கல்கள்-தமிழ்ப் புத்தகங்களின் அச்ச வரலாறு

**Teaching-Learning Process Pedagogy:** Lecture, PPT**RBT Level:** L1, L2, L3**Total****15****Pedagogical Methods:**

- Unit 1: Sol Vilayattu
- Unit 2: Drawing
- Unit 3: Theme based activities (Folk and Dance)
- Unit 4: Essay & Poetry Writing (Thinai)
- Unit 5: Try to learn about basic Siddha Vaithiyam

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: தமிழ் மொழி மற்றும் அதன் இலக்கியத்தின் முக்கிய அம்சங்களை விளக்குவார்கள்.
- CO2: கலை மற்றும் சிற்பத்தின் பல்வேறு வடிவங்களால் காட்சிப்படுத்தப்பட்ட தமிழின் பாரம்பரியத்தைப் பற்றி விவாதிப்பார்கள்
- CO3: நாட்டுப்புற இசை மற்றும் தற்காப்பு கலைகளால் காட்டப்படும் தமிழ் பாரம்பரியத்தை விளக்குவார்கள்
- CO4: தமிழில் ஐந்து திணைகளின் அம்சங்களைப் பற்றி விளக்குவார்கள்.
- CO5: சுதந்திரப் போராட்டத்திலும் இந்திய கலாச்சாரத்திலும் தமிழின் பங்களிப்பை விவரிப்பார்கள்.

**Text Books:**

- T1: தமிழக வரலாறு - மக்களும் பண்பாடும் - கே. கே. பிள்ளை (வெளியீடு: தமிழ்நாடு பாடநூல் மற்றும் கல்வியியல் பணிகள் கழகம்.)
- T2: கணினித் தமிழ் - முனைவர் இல.சுந்தரம் (விகடன் பிரசுரம்)

## TECHNICAL COMMUNICATION -I

(Common to all branches)

<b>Course Code</b>	24EN101	<b>Course Type</b>	Theory
<b>Teaching Periods/Week (L: T:P)</b>	3:0:0	<b>Credits</b>	3
<b>Total Teaching Periods</b>	45	<b>IAT + ESE Marks</b>	40 + 60
<b>Teaching Department</b>	English		

### Course Objectives:

1. To facilitate students to develop their comprehension skills.
2. To equip the students to improve their receptive skills.
3. To equip learners with better vocabulary and enhance their writing skills.
4. To aid students to speak effectively in all kinds of communicative contexts.
5. To improve the learners' basic proficiency in workplace communication.

### Unit: I DEVELOPING COMPREHENSION SKILLS 9

**Listening:** Introduction to Informational listening **Reading:** Short Narratives and Skimming Passages. **Speaking** Introducing Oneself, Narrating a Story / Incident. **Writing:** Sequential Writing (Jumbled Sentences), Process/Product Description **Grammar:** Parts of Speech -Verbs – Main & Auxiliary-Pronouns **Vocabulary:** Misleading words- Spell check - Homonyms & homophones.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

### Unit: II LISTENING AND EXTENDED READING 9

**Listening:** Listening for Comprehension-Gap Filling **Reading:** News reading-Scanning Passages – Reading Longer Texts- Cloze Reading **Speaking:** Importance of speaking skill - Short Conversation-Public Speaking Do's & Don'ts **Writing:** Note Making, Note Taking - Paragraph Writing - Types of Paragraph - Compare and Contrast **Grammar:** Tenses – Form, Function and Meaning - Basic Sentence structure-Articles **Vocabulary:** One-Word Substitutes, Phrasal Verbs – Cause and Effect expressions

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

### Unit: III INTRODUCTION TO FORMAL WRITING 9

**Listening:** Listening to Lectures and Taking Notes **Reading:** Reading on Visual Content **Speaking:** One-Minute Talk **Writing:** Informal Letter Writing , Email Writing, Data Interpretation-Pie chart, Bar chart **Grammar:** Tenses, Active Voice, Passive Voice, Impersonal-Preposition **Vocabulary:** Guessing the meaning from context, Cloze Exercise - Word power.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

### Unit: IV ENHANCING SPEAKING ABILITY 9

**Listening:** Listening to Speeches **Reading:** Speed Reading **Speaking:** Just a Minute **Writing:** Instructions, Formal letter writing, Data Interpretation-Flow chart, Table **Grammar:** 'Wh' Questions / Yes or No Questions, Question Tag, Imperatives **Vocabulary:** Synonyms, Antonyms, Different forms of same words.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

**Unit: V EXTENSIVE LANGUAGES FOR WORKPLACE****9**

**Listening:** Extensive Listening -Audio scripts – Listening to Conversation **Reading:** Extensive reading (Jigsaw Reading, Short Stories, Novels) - Introduction to Technical Article **Speaking:** Short Presentations on Technical Topics -Tips for Doing Presentation **Writing:** Recommendations, Essay Writing **Grammar:** Collocation, Concord -Compound words **Vocabulary:** Informal Vocabulary and Formal Substitutes

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

**Total****45****Pedagogical Methods:**

Unit 1: Speaking task

Unit 2: Reading task

Unit 3: Speaking task

Unit 4: Reading task

Unit 5: Speaking task

**Course Outcomes:**

After successful completion of this course, the students will be able to

CO1: Apply comprehension skills and interpret different contents.

CO2: Read and comprehend various texts and audiovisual contents

CO3: Infer data from graphs and charts and communicate it in varied contexts.

CO4: Participate in diverse speaking situations.

CO5: Present, discuss and coordinate with peers in workplace using language skills.

# MATRICES AND CALCULUS

(Common to All Branches)

Course Code	24MA101	Course Type	Theory
Teaching Periods/Week (L: T:P)	3:1:0	Credits	4
Total Teaching Periods	60	IAT + ESE Marks	40 + 60
Teaching Department	Mathematics		

## Course Objectives:

1. To impart knowledge on the concepts of matrix algebra techniques needed for practical applications.
2. To familiarize the students with differential calculus.
3. To familiarize students with single integrals and multiple integrals.
4. To illustrate the simple applications of vector calculus.
5. To make the students to understand the concept of analytic function.
6. To introduce the basic concepts of complex integration.

## Unit: I MATRICES

12

Eigenvalues and Eigenvectors of a real matrix – Properties of Eigenvalues and Eigenvectors – Statement and applications of Cayley-Hamilton Theorem – Diagonalization of matrices by orthogonal transformation – Reduction of a quadratic form to canonical form by orthogonal transformation – Nature of quadratic forms.

**Teaching-Learning Process** Pedagogy: Lecture, NPTEL Videos  
**RBT Level:** L1 - L3

## Unit: II DIFFERENTIAL CALCULUS

12

Representation of functions - Limit of a function - Continuity - Derivatives - Differentiation rules (sum, product, quotient, chain rules) - Implicit differentiation - Logarithmic differentiation - Applications: Maxima and Minima of functions of one variable.

**Teaching-Learning Process** Pedagogy: Lecture, NPTEL Videos  
**RBT Level:** L1 - L3

## Unit: III INTEGRAL CALCULUS & MULTIPLE INTEGRAL

12

Definite and Indefinite integrals - Substitution rule - Techniques of Integration: Integration by parts - Double integrals - Double integral in polar coordinates - Area-enclosed by plane curves – Triple integrals – Volume of solids.

**Teaching-Learning Process** Pedagogy: Lecture, PPT  
**RBT Level:** L1 - L3

## Unit: IV VECTOR CALCULUS

12

Gradient and directional derivative – Divergence and curl - Vector identities – Irrotational and Solenoidal vector fields – Line integral over a plane curve – Surface integral - Area of a curved surface - Volume integral - Green's, Gauss divergence and Stoke's theorems.

**Teaching-Learning Process** Pedagogy: Lecture, NPTEL Videos  
**RBT Level:** L1 - L3

**Unit: V ANALYTIC FUNCTIONS AND COMPLEX INTEGRATION****12**

Analytic functions –Necessary and sufficient conditions for analyticity -Construction of analytic function -Conformal mapping – Mapping by functions  $w=z+c$ ,  $cz$ ,  $1/z$  -Bilinear Transformation, Line integral - Cauchy’s integral theorem – Cauchy’s integral formula – Taylor’s and Laurent’s series

**Teaching-Learning Process Pedagogy:** Lecture, PPT**RBT Level:** L1 - L3**Total****60****Pedagogical Methods:**

- |   |
|---|
| Unit 1: To Explore the applications of matrices in real-world scenarios.  |
| Unit 2: Use differential equations to model the rate of change of pollutant concentration over time and space.    |
| Unit 3: Apply integral calculus to optimize production levels, pricing strategies, and economic decision- making. |
| Unit 4: Apply concepts of gradient, divergence, and curl in various coordinate systems to analyze vector fields.  |
| Unit 5: Use Python to visualize complex functions in the complex plane., Example: $w= 1/z^2$                      |

**Course Outcomes:**

After successful completion of this course, the students will be able to

- |  |
|--|
| CO1: Use the matrix algebra methods to diagonalize a given matrix and identify the special properties of matrices.                                 |
| CO2: Demonstrate different differentiation techniques and find maxima and minima of a given function.  |
| CO3: Find area enclosed by plane curves and volume of solids using integration techniques.   |
| CO4: Apply the concepts of gradient, curl and divergence across various disciplines.   |
| CO5: Utilize the concepts of analytic functions and construct analytic functions.  |
| CO6: Apply the basic concepts of complex integration to solve complex integrals. Expand a given function into Taylor’s Series and Laurent’s Series |

## ENGINEERING PHYSICS (Common to all branches)

<b>Course Code</b>	24PY111	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L: T:P)</b>	3:0:2	<b>Credits</b>	4
<b>Total Teaching Periods</b>	75	<b>IAT + ESE Marks</b>	50+50
<b>Teaching Department</b>	Physics		

### Course Objectives:

1. To impart knowledge on physical properties of materials and inculcate interest in students in observing facts experimentally.
2. To teach various types of oscillations.
3. To teach the acoustic properties and its applications.
4. To equip the students with understanding the importance of thermal physics and its applications
5. To impart the basics of optics, lasers, and their applications.
6. To introduce the importance and applications of quantum mechanics.

### Unit: I      **MECHANICS OF MATERIALS** 9

Rigid Body - Centre of mass - Rotational Energy - Moment of inertia (M.I) - Moment of Inertia for uniform objects with various geometrical shapes. Elasticity - Hooke's law - Poisson's ratio - stress-strain diagram for ductile and brittle materials - uses- Bending of beams - Cantilever - supported beams - uniform and non-uniform bending - Young's modulus determination - I shaped girders -Twisting couple

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

### Unit: II      **OSCILLATIONS AND ACOUSTICS** 9

Simple harmonic motion – Torsional pendulum – Damped oscillations – Shock Absorber – Forced oscillations and Resonance – Applications of resonance.- Waves and Energy Transport – Sound waves – Intensity level – Standing Waves – Doppler effect and its applications – reverberation – Sabine's Reverberation formula- Speed of blood flow. Ultrasound – applications – Echolocation and Medical Imaging.

**Teaching-Learning Process Pedagogy:** Lecture Method, NPTEL

**RBT Level:** L1, L2, L3

### Unit: III      **THERMAL PHYSICS** 9

Transfer of heat energy – thermal expansion of solids and liquids – expansion joints – bimetallic strips – thermal conduction, convection and radiation – heat conduction in solids – thermal conductivity – Forbe's and Lee's disc method: theory and experiment – conduction through compound media (series and parallel) – thermal insulation -applications: heat exchangers, refrigerators, ovens and solar water heaters.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

**Unit: IV OPTICS AND LASERS****9**

Interference – Thin film interference – Air wedge – Applications – Interferometers – Michelson Interferometer – Polarization – polarizers – Laser – characteristics – Spontaneous and Stimulated emission- population- inversion – Metastable states – optical feedback – Nd-YAG laser, CO2 laser, Semiconductor laser – Industrial and medical applications – Optical Fibers – Total internal reflection – Numerical aperture and acceptance angle – Fiber optic communication – Fiber sensors – Fiber lasers.

**Teaching-Learning Process Pedagogy:** Lecture Method, NPTEL

**RBT Level:** L1, L2, L3

**Unit: V QUANTUM PHYSICS****9**

Black body radiation (Qualitative) – Planck’s hypothesis – Einstein’s theory of Radiation – Matter waves – de Broglie hypothesis – Electron microscope – Uncertainty Principle – The Schrodinger Wave equation (time-independent and time-dependent) – Physical significance of wave function – Normalization – Particle in an infinite potential well-particle in a three-dimensional box – Degenerate energy states – Barrier penetration and quantum, tunneling – Tunneling microscope.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2

**Total****45****Pedagogical Methods:**

- Unit 1: Models- Based on Moment of Inertia, cantilever and center of mass
- Unit 2: Case Studies – Based on the intensity of different animals, birds, and mammals.
- Unit 3: Chart – Based on the difference between Forbes and Lee’s disc apparatus
- Unit 4: Presentation- Application of Laser and different types of Lasers
- Unit 5: Problems Assignment – problems DeBroglie, Schrodinger

**PRACTICAL (Any seven experiments)****30**

1. Torsional Pendulum-Determination of rigidity modulus of wire and moment of inertia of the disc
2. Non-uniform bending -Determination of Young’s modulus of the material of the beam.
3. Uniform bending–Determination of Young’s modulus of the material of the beam.
4. Lee’s Disc Experiment - Determination of thermal conductivity of bad conductors.
5. Laser-Determination of the wavelength of the laser using grating - Determination of the width of the groove of the compact disc using laser. - Estimation of laser parameters
6. Optical fibre -Determination of Numerical Aperture and acceptance angle
7. Simple harmonic oscillations of cantilever
8. Air wedge - Determination of thickness of a thin sheet/wire
9. Ultrasonic interferometer – determination of the velocity of sound and compressibility of liquids.
10. Melde’s string experiment

## Equipments required

S.No	Name of the Equipment and Accessories	Required numbers for batch of 30 students
1	Torsional Pendulum Kit	5
2	Simple harmonic oscillations of cantilever	5
3	Travelling Microscope (Non-Uniform / Uniform)	5
4	He-Ne/Diode laser (red), Grating	5
5	Air Wedge Apparatus	5
6	Diode laser (green or red), fiber optic Kit	5
7	Ultrasonic interferometer apparatus with high-frequency wave generator	5
8	Lee's Disc Apparatus	2
9	Vernier Calliper, Screw Gauge	5
10	Melde's String Kit	1

## Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Explain the mechanical properties of materials like brittle and ductile.
- CO2: Discuss different types of oscillation and its applications.
- CO3: Summarize the acoustic properties and its applications.
- CO4: Discuss the thermal properties of materials and their applications.
- CO5: Summarize the principle of operation, characteristics, and application of laser and optics.
- CO6: Explain the concepts of quantum physics and its applications.

## ENGINEERING CHEMISTRY (Common to all branches)

<b>Course Code</b>	24CH101	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L:T:P)</b>	3:0:0	<b>Credits</b>	3
<b>Total Teaching Periods</b>	75	<b>IAT + ESE Marks</b>	50 + 50
<b>Teaching Department</b>	Chemistry		

### Course Objectives:

1. To impart knowledge on treatment of water for potable and industrial purposes.
2. To introduce the basic concepts and applications of phase rule and composites.
3. To explain the applications of energy sources and storage devices.
4. To facilitate the understanding of different types of fuels, their properties and combustion characteristics.
5. To acquaint the students with the basics of nanomaterials, their properties, and applications.

### Unit: I WATER TECHNOLOGY

9

Sources and impurities in Water, Water quality parameters and its significance (color, odour, turbidity, PH, hardness, alkalinity, TDS, COD and BOD, flouride and arsenic). Municipal water treatment: primary treatment and disinfection (UV, Ozonation, break–point chlorination). Desalination of brackish water: Reverse Osmosis. Boiler troubles: Scale and sludge, Boiler corrosion, Caustic embrittlement, Priming & foaming. Treatment of boiler feed water: Internal treatment/conditioning (phosphate, colloidal, sodium aluminate and calgon conditioning) and External treatment – Ion exchange demineralization and zeolite process.

**Teaching-Learning Process**    **Pedagogy:** Lecture Method, PPT & Demonstration  
**RBT Level:** L1, L2, L3

### Unit: II PHASE RULE AND COMPOSITE MATERIALS

9

Phase rule: Introduction, definition of terms with examples. One component system: water system– Reduced phase rule; Construction of a simple eutectic phase diagram – Thermal analysis; Two component system: Lead–silver system, application: Pattinson process. Composites: Introduction: Definition & Need for composites; Constituents: Matrix materials, and Reinforcement. Classification of Matrix materials, properties, and its applications: Metal matrix composites (MMC), Ceramic matrix composites and Polymer matrix composites. Types of Reinforcement, properties, and its applications: fiber, particulates, flakes, and whiskers. Properties and applications of: Hybrid composites – definition and examples.

**Teaching-Learning Process**    **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

### Unit: III ENERGY SOURCES AND STORAGE DEVICES

9

Energy sources: Nuclear fission and nuclear fusion. Nuclear energy: Light water nuclear power plant and breeder reactor. Solar energy: Principle, working and applications of solar cells; Recent developments in solar cell materials. Wind energy – Geothermal energy. Storage devices: Batteries – types of batteries – primary battery (dry cell), secondary battery (lead acid battery, lithium–ion–battery), fuel cells – H<sub>2</sub> –O<sub>2</sub> fuel cell, microbial-fuel cell, and super capacitors. E-Vehicle

**Teaching-Learning Process**    **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1, L2, L3

**Unit: IV FUELS AND COMBUSTION****9**

Fuels: Introduction and Classification. Coal and coke: Analysis of coal (proximate and ultimate), Carbonization, Manufacture of metallurgical coke (Otto Hoffmann method). Petroleum and Diesel: Manufacture of synthetic petrol (Bergius process), Knocking, octane number, cetane number; Power alcohol and biodiesel. Gaseous fuels – Natural gas, CNG and LPG.

Combustion of fuels: Introduction: Calorific value – higher and lower calorific values, Theoretical calculation of calorific value; Ignition temperature: spontaneous ignition temperature, Explosive range; Flue gas analysis – ORSAT Method. CO<sub>2</sub> emission and carbon footprint.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

**Unit: V NANOMATERIALS****9**

Introduction–Distinction between molecules, nanomaterials, and bulk materials; Size–dependent properties of nanomaterials: optical, electrical, mechanical, and magnetic properties; Types of nanomaterials: Definition, properties and uses of – nanoparticle, nanocluster, nanorod, nanowire and nanotube. Synthesis of nanomaterials: sol–gel, solvo thermal, laser ablation, chemical vapour deposition, electrochemical deposition and electro spinning. Applications of nanomaterials in medicine, agriculture, energy, electronics, and catalysis.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

**Total****45****Pedagogical Methods:**

- |   |
|---|
| Unit 1: Model Making – Municipal Water treatment              |
| Unit 2: Poster Presentation – Composite Materials             |
| Unit 3: Pick one and Talk More                                |
| Unit 4: Problems – Theoretical Calculation of Calorific Value |
| Unit 5: Seminar on Applications of Nanomaterials              |

**PRACTICAL (Any seven experiments)****30**

1. Preparation of Na<sub>2</sub>CO<sub>3</sub> as a primary standard and estimation of acidity of a water sample using the primary standard
2. Determination of types and amount of alkalinity in water sample.
3. Determination of total, temporary & permanent hardness of water by EDTA method.
4. Determination of DO content of water sample by Winkler's method.
5. Determination of chloride content of water sample by Argentometric method.
6. Estimation of copper content of the given solution by Iodometry.
7. Determination of strength of given hydrochloric acid using pH meter.
8. Determination of strength of acids in a mixture of acids using conductivity meter.
9. Conductometric titration of barium chloride against sodium sulphate (precipitation titration)
10. Estimation of iron content of the given solution using potentiometer.

### Equipment required

S.No	Description of Equipment	Required Numbers for Batch of 30 students
1	pH Meter	15
2	Conductivity Meter	15
3	Potentiometer	15
4	Electronic balance (Four Digit)	1
5	Hot Plate with Magnetic Stirrer	1
6	Hot Air Oven	1
7	Muffle Furnace	1
8	Burette, Pipette, Conical Flask & Other glassware.	30

### Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Summarize the water quality parameters and explain various methods to produce soft water for industrial and potable use.
- CO2: Apply the knowledge of phase rule and composites for material selection requirements.
- CO3: Discuss various energy resources, storage devices and their uses in household and industrial applications.
- CO4: Differentiate various types of fuels based on their state, characteristics and calorific value for Engineering processes and applications.
- CO5: Differentiate the nano and bulk materials, their synthesis and its applications in various fields.

# PROGRAMMING IN C

(Common to CSE / IT / AIDS / CSBS / CSCS / AIML / EEE / ECE)

<b>Course Code</b>	24CS111	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L:T:P)</b>	2:0:4	<b>Credits</b>	4
<b>Total Teaching Periods</b>	90	<b>IAT + ESE Marks</b>	50 + 50
<b>Teaching Department</b>	Computer Science and Engineering		

**Course Objectives:** To equip the students with the knowledge in

1. C programs using fundamental programming structures.
2. C programs utilizing arrays and strings.
3. Applications of C using functions and pointers.
4. Advanced features of the C programming language, including structures and unions.
5. File operations in C

## **Unit: I INTRODUCTION AND BASICS OF C PROGRAMMING 6**

Introduction - Structured programming - Problem solving techniques: Algorithms, Flowcharts, Pseudo code - Structure of a C program - Compiling and executing a C program - Data types and Variables – operators and expressions – Input and output functions -Control Structures: decision making and looping statements

**Teaching-Learning Process Pedagogy:** Chalk and Talk  
**RBT Level:** L1, L2, L3, L4

## **Unit: II ARRAYS AND STRINGS 6**

Arrays: One dimensional array: declaration, initialization and operations - Two & Multi-dimensional arrays. Strings: Strings vs Character arrays - String operations – String Functions – Arrays of Strings

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3, L4

## **Unit: III FUNCTIONS AND POINTERS 6**

Need for Modular programming - Functions: declaration and definition – Function call - Call by value - Call by reference - Recursive functions - Pointers: Introduction - Pointers to primitive data types – Arrays and pointers - Array of pointers - Storage classes - Dynamic Memory Allocation

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3, L4

## **Unit: IV STRUCTURES AND UNIONS 6**

Structures: Need, declaration, Accessing Structure elements – Nested structures - Arrays of structures – Self-referential structures – Pointers to structures - Unions: declaration and accessing

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3, L4

Files: Introduction, Types of file processing – Sequential and Random Access - Read /Write of binary and text files. - Preprocessor directives – Command line arguments

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3, L4

**Total**

**30**

**Pedagogical Methods:**

- Unit 1: To draw a flowchart and a write algorithm for the following problems  
i) sum of two numbers ii) largest among three numbers
- Unit 2: Perform basic operations on arrays  
i) Find the largest element in the array ii) Calculate the sum of all elements in the matrix
- Unit 3: Program for swapping two integers using call by value and call by reference
- Unit 4: Create a student information system,  
i) Declare a structure Student with members: name, age and Roll number.  
ii) To calculate the GPA and CGPA from the student's marks
- Unit 5: Programs for file operations

**Practical Exercises:****60**

1. Programs for demonstrating the use of different types of operators like arithmetic, logical, relational, and ternary operators (Sequential structures)
  - a) To find the area of a triangle
  - b) To Convert temperatures from Celsius to Fahrenheit or vice versa using the appropriate formula
2. Write a C program to demonstrate the use of “scanf” and “printf” statements to “read” and “print” values of variables of different data types.
3. Programs using decision making statements like ‘if’, ‘else if’, ‘switch’, conditional and unconditional ‘goto’ (Selective structures)
  - a) To find the Largest among three numbers
  - b) To print day of the week by giving a integer using switch Statement
  - c) To find Roman number of a given number
4. Programs for demonstrating repetitive control statements like ‘for’, ‘while’, and ‘do-while’ (Iterative structures):
  - a) Check whether the given number is Armstrong or not.
  - b) To find the Sum of squares of first n numbers.
  - c) To Check the given number is prime or not.
  - d) To print the Multiplication table
  - e) To convert the Octal number to decimal number.
5. Implement the following programs in C using one-dimensional array
  - a) To Calculate the sum and average of elements
  - b) To Find the min and max values of the given set of numbers
  - c) To Reverse the elements
  - d) To arrange the given set of number by using Bubble sort
  - e) To find the given number from the list of elements by using Linear Search.
6. Write a C program using two-dimensional arrays for a) Matric Addition b) Matrix Multiplication

7. Programs to demonstrate modular programming concepts using user-defined functions
  - a) Swapping two integers using call by value and call by reference
  - b) Create a recursive function to calculate the factorial of a number and for binary search
8. Implement various character and string operations with and without using built-in functions in C.
  - a) Find length of a string
  - b) String Concatenation
  - c) To Check whether the given string is Palindrome or not
9. Write a C program using pointers for the following:
  - a) Swapping two numbers
  - b) Greatest and the smallest among three numbers
  - c) Reverse of a string
  - d) Linear searching in array
10. Programs to illustrate the use of user-defined data types using Structures:
  - a) Employee Payroll
  - b) Student information system
11. Write a C program to implement various file operations listed below:
  - a) Copy the contents from one file to another file
  - b) Merging two files
12. Programs to demonstrate the use of pre-processor directives and command line arguments for the following:
  - a) Finding area of circle and area of a square using #define
  - b) Simple arithmetic operations using #include
  - c) Program that accepts two file names as command-line arguments and copy the contents from one file to another file.

### System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Systems with Linux Operating System with GNU Compiler / Windows with Turbo C compiler	30

### Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Develop simple applications in C using basic constructs
- CO2: Design and implement applications using arrays and strings
- CO3: Create applications in C using functions and pointers
- CO4: Utilize advanced features of the C programming with structures and unions
- CO5: Develop applications using file operations in C

# COMPUTATIONAL THINKING

(Common to CSE / IT / AIDS / CSBS / CSCS / AIML / EEE / ECE)

<b>Course Code</b>	24CS112	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L: T:P)</b>	1:0:2	<b>Credits</b>	2
<b>Total Teaching Periods</b>	45	<b>IAT + ESE Marks</b>	50 + 50
<b>Teaching Department</b>	Computer Science and Engineering		

**Course Objectives:** To Equip the students with the Knowledge in

1. Problems in a way that enables a computer to solve them.
2. Organising and analysing data using logical approaches.
3. Developing solutions through algorithmic thinking.
4. Identifying, analysing, and implementing possible solutions to achieve the most efficient and effective combination of steps and resources.
5. Generalising and transferring the problem-solving process to a wide variety of problems.

## **Unit: I INTRODUCTION TO COMPUTATIONAL THINKING 1+4**

Understanding the concepts: Decomposition, pattern recognition/data representation, generalization, abstraction, and algorithms, Representation, automation, Analysis, visualization. Logical thinking - reasoning

**Teaching-Learning Process Pedagogy:** Chalk and Talk

**RBT Level:** L1, L2, L3, L4

## **Unit: II UNDERSTANDING DATA 2+6**

Performing analytics on numeric data using any spreadsheet software and representing the data using charts, histograms, scatter plots, graphs etc. Understanding patterns in data sequences, puzzles, and nonograms. Data Encryption – ciphering sentences and Compression.

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3, L4

## **Unit: III DECOMPOSITION AND PATTERN RECOGNITION 3+8**

The divide and Conquer, pattern recognition, Algorithmic thinking - creating oral algorithms for everyday tasks – visualizing algorithms through sequence of steps, pseudocode, flow charts, selection, iteration, functions, procedures and parameters.

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3, L4

## **Unit: IV ABSTRACTIONS AND SCRATCH 3+6**

Understanding Abstraction Object Description, Abstraction and Modeling, Objects and Objects based modeling -Repair, Reuse, Recycle, Scratch / equivalent - Motion, events, control

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3, L4

**Unit: V FILES AND PREPROCESSOR UNDERSTANDING COMPLEXITY 6+6**

Understanding complexity, sorting algorithms, search algorithms, AI and Turing Test, FSA (Finite State Automata), Debugging, Enhancing the clarity of a program - documentation, style, idioms, Automation and Simulation, generalizing a solution.

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3, L4

**Total 45**

**Pedagogical Methods:**

Unit 1:	Explore algorithm design by creating oral algorithms.
Unit 2:	Decompose a complex problem into discrete steps and Design a simple algorithm for solving the problem
Unit 3:	Programming implementation
Unit 4:	Develop algorithms for sorting and determine the complexity of the algorithm and how it scales as the number of items to sort increases
Unit 5:	External Learning: Study the best practices of documentation, style, idioms, etc that are used to ensure the code can be understood and maintained over a long period.

**Practical Exercises:**

<b>MODULE I:</b>	Algorithmic thinking - creating oral algorithms for everyday tasks - Data abstraction and representation - Abstraction and translation of everyday data for use on a computer.
<b>MODULE II:</b>	Decomposing a complex problem - Strategies for decomposition and algorithm design - Divide and conquer - Simple program implementations.
<b>MODULE III:</b>	Overall data representation, abstraction, analysis and algorithm design. Program implementations.
<b>MODULE IV:</b>	Measuring the complexity of an algorithm - sorting algorithms - the notion of unsolvable problems. Programming illustrations.
<b>MODULE V:</b>	Enhancing the clarity of a program - documentation, style, idioms.

**System requirement**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30

**Course Outcomes:**

After successful completion of this course, the students will be able to

CO1:	Formulate problems for effective computer-based solutions.
CO2:	Systematically organize and analyse data.
CO3:	Develop solutions using algorithmic approaches.
CO4:	Identify, evaluate, and implement optimal solutions by efficiently utilizing steps and resources.
CO5:	Apply and adapt the problem-solving process across diverse scenarios.

# ENGLISH FOR ENHANCING SELF COMPETENCE

(Common to all branches)

<b>Course Code:</b>	24EN121	<b>Course Type:</b>	Practical
<b>Teaching Periods/Week (L:T:P):</b>	0:0:2	<b>Credits:</b>	1
<b>Total Teaching Periods:</b>	30	<b>IAT + ESE:</b>	60 + 40
<b>Teaching Department:</b>	English		

## Course Objectives:

1. To articulate and learn various social behaviors and etiquette.
2. To develop writing and speaking skills for professional requirements.
3. To acquire techniques of fundamental communication skills.

## Unit: I PERSONALITY TRAITS 6

Self-Introduction, Ways to Identify Self (SWOT Analysis- Johari Window), Concepts of Self-Management and Self-Motivation, Self-Assessment.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, YouTube videos

**RBT Level:** L1, L2, L3

## Unit: II COMMUNICATION SKILLS 6

Effective Communication Skills, Interpersonal & Social Skills

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** L1, L2, L3

## Unit: III SOCIAL BEHAVIOUR 6

Time Management, Personal Grooming, Making Small Talk, Inter-Cross-Cultural Communication, Professional Presentation Techniques.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, YouTube videos

**RBT Level:** L1, L2, L3

## Unit: IV CULTURAL ETIQUETTE 6

Formal Presentation, Sensitivity towards multi-cultural work spaces, Presentation skills –Formal Presentation - Just a minute

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** L1, L2, L3

## Unit: V JOB-RELATED COMMUNICATION 6

Resume & Cover Letter, Formal E-mails, Framing Requests, Greetings, Salutations, Close, Interview-Types-Interview Questions-Techniques, Introduction to Interviews-FAQ's

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, YouTube videos

**RBT Level:** L1, L2, L3

**Total 30**

## System requirement

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system	30
3.	Hot Potatoes / Globalina	30

## Course Outcomes:

After successful completion of this course, the students will be able to

**CO1:** To listen to and comprehend general as well as complex academic information

**CO2:** To speak fluently and accurately in formal and informal communicative contexts

**CO3:** To express their opinions effectively in both formal and informal discussions.

## CO-PO & PSO Mapping:

# ELECTRICAL AND ELECTRONICS WORKSHOP PRACTICE

(Common to all branches)

Course Code	24GE221	Course Type	Practical
Teaching Periods/Week (L:T:P)	0:0:2	Credits	1
Total Teaching Periods	30	IAT + ESE Marks	60 +40
Teaching Department	Electrical and Electronics Engineering		

## Course Objectives:

1. To equip students with a comprehensive understanding of electronic equipment and practical soldering skills.
2. To develop students' proficiency in making electrical wiring connections using appropriate techniques and perform energy audit.
3. To provide students with practical exposure in installation and maintenance of household electrical appliances.

## PRACTICAL

30

1. Study of components - R, L, C, Diode, Transistor and IC's.
2. Study of equipment's – RPS, Function Generator, CRO, Multimeter, Ammeter, Voltmeter, Wattmeter and Energy meter.
3. Measurement of voltage, current, frequency, time period for sine, square and triangular waves.
4. Soldering practice and breadboard practice.
5. Study of wires and cables.
6. Basic switchboard wiring with lamp, fan and three pin socket.
7. Fluorescent Lamp Wiring and Staircase Wiring.
8. Residential House wiring using Switches, Fuse, Indicator, Lamp and Energy meter.
9. Measurement of Energy and Earth Resistance.
10. Energy Audit.
11. Installation and Maintenance of Electrical Appliances –I Iron box, Emergency Lamp, Fan regulator.
12. Installation and Maintenance of Electrical Appliances –II Water heater, Stabilizer and UPS.

## List of Equipment:

S.No	Name of the Equipment	Quantity
1	Single phase house wiring setup (Fuse, Lamp, Socket, Switch, PVC Pipe, Lamp Holder, Energy Meter)	2
2	Staircase wiring setup (Lamp, Two-way Switch, Socket, Switch, PVC Pipe, Lamp Holder)	2
3	Fluorescent lamp wiring setup (Fluorescent Lamp, Socket, Switch, PVC Pipe, Fluorescent Lamp Holder, Choke, Starter)	2
4	Water heater (1500W, 230V)	2
5	Stabilizer (500W, 160 – 290V)	2
6	UPS (600 VA)	2
7	Fan regulator	2
8	Iron box setup	2
9	Emergency lamp setup	2
10	Soldering Iron, Lead	15
11	Multi meter (0-600V, 10A)	15

12	Continuity tester	2
13	Resistors	Adequate Number
14	Capacitors	Adequate Number
15	Diodes	Adequate Number
16	Transistors	Adequate Number
17	Inductors	Adequate Number
18	IC's	Adequate Number
19	RPS (0-30V)	5
20	Function Generator (0-1MHz)	5
21	CRO (20MHz)	5
22	Ammeter (0-10A) MI	10
23	Voltmeter (0-300V) MI	10
24	Wattmeter (300V,10A, UPF)	5
25	Energy meter (single phase, two wire, (5-30A)/240V, 50Hz)	5
26	Wires, Cables	Adequate Number
27	Clamp meter (0-1000A), (0-750V)	2
28	Megger (500V, 100Mohms)	1

**Course Outcomes:**

After successful completion of this course, the students will be able to

- CO1:** Identify various electronic components and assemble simple electronic circuits using soldering.  
**CO2:** Make wiring connections for household and conduct energy audit.  
**CO3:** Install and maintain household electrical appliances.

**CO-PO & PSO Mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

1 – „Low“, 2 – „Medium“, 3- „High“, „-“, – No correlations

**PRODUCT TINKERING LAB**  
(Common to all)

<b>Course Code</b>	24GE122	<b>Course Type</b>	Practical
<b>Teaching Periods/Week (L: T:P)</b>	0:0:2	<b>Credits</b>	1
<b>Total Teaching Periods</b>	30	<b>IAT + ESE Marks</b>	60 + 40
<b>Teaching Department</b>	Civil Engineering and Mechanical Engineering		

**Course Objectives:** To equip the students with

1. Hands-on experience in Mechanical Equipments.
2. Design of simple components using computer-aided design.
3. Basic concept of 3D Printing.
4. Hands-on training on basic plumbing works

**Practical Exercises**

30

1. Exercise on the usage of a hand-drilling machine
2. Demonstration of Centrifugal pumps.
3. Demonstration of two-wheeler and four-wheeler maintenance and repairs,
4. 3D Modelling of a single component.
5. Exercise on CAD Data Exchange and Generation of .stl files.
6. Identification of a product for Additive Manufacturing and its AM process plan
7. Printing of identified product on an available AM machine.
8. Demonstration on how to change the Tap fittings.
9. Preparing plumbing line sketches.
10. Connecting various basic pipe fittings like valves, taps, coupling, unions, reducers, elbows, and other components that are commonly used in households.
11. Laying pipe connection to the suction and delivery side of a pump
12. Connecting pipes of different materials: Metal, plastic, and flexible pipes used in household appliances.

**Equipment required**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	Hand Drilling Machine	5 nos.
2.	Centrifugal pump Assembly	1 no.
3.	Two-Wheeler (Four Stroke Petrol Engine)	1 no.
4.	Four-Wheeler (Four Stroke Diesel Engine)	1 no.
5.	Pipe Vice	5 nos.
6.	Die Holder with Die set	5 nos.
7	Valves, Taps, Coupling, Unions, Reducers, and Elbows (Metal and Plastics)	5 nos. each
8	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	5 Nos
9	3D Printer	2 Nos

**Course Outcomes:**

After successful completion of this course, the students will be able to

CO1:	Perform the basic maintenance and servicing of mechanical equipments.
CO2:	Design simple components using computer-aided design.
CO3:	Develop a 3D component using additive manufacturing.
CO4:	Sketch and perform the plumping for the house's different connections.

**CO-PO & PSO Mapping:**

# TAMILS AND TECHNOLOGY

(Common to all branches)

Course Code	24TA201	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

## Course Objectives:

1. To familiarize about the Pottery, Weaving Technology in sangam age.
2. To teach about the Construction Technology of Ancient Tamils
3. To impart knowledge of ship building and manufacturing Technologies in ancient Tamil culture.
4. To teach about main features of ancient Tamils Agriculture, Agro-Processing and irrigation technology
5. To provide insight about the Tamil Software Development.

## Unit: I WEAVING AND CERAMIC TECHNOLOGY 3

Weaving Industry during Sangam Age – Ceramic technology – Black and Red Ware Potteries (BRW) – Graffiti on Potteries.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

## Unit: II DESIGN AND CONSTRUCTION TECHNOLOGY 3

Designing and Structural construction House & Designs in household materials during Sangam Age - Building materials and Hero stones of Sangam age – Details of Stage Constructions in Silappathikaram - Sculptures and Temples of Mamallapuram - Great Temples of Cholas and other worship places - Temples of Nayaka Period - Type study (Madurai Meenakshi Temple)- Thirumalai Nayakar Mahal - Chetti Nadu Houses, Indo - Saracenic architecture at Madras during British Period.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

## Unit: III MANUFACTURING TECHNOLOGY 3

Art of Ship Building - Metallurgical studies - Iron industry - Iron smelting, steel -Copper and gold Coins as source of history - Minting of Coins – Beads making-industries Stone beads -Glass beads - Terracotta beads - Shell beads/ bone beads - Archeological evidences - Gem stone types described in Silappathikaram.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

## Unit: IV AGRICULTURE AND IRRIGATION TECHNOLOGY 3

Dam, Tank, ponds, Sluice, Significance of Kumizhi Thoempu of Chola Period, Animal Husbandry - Wells designed for cattle use - Agriculture and Agro Processing - Knowledge of Sea - Fisheries – Pearl - Conche diving - Ancient Knowledge of Ocean - Knowledge Specific Society.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

**Unit: V SCIENTIFIC TAMIL & TAMIL COMPUTING****3**

Development of Scientific Tamil - Tamil computing – Digitalization of Tamil Books – Development of Tamil Software – Tamil Virtual Academy – Tamil Digital Library – Online Tamil Dictionaries – Sorkuvai Project.

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

**Total****15****Pedagogical Methods:**

- Unit 1: Clay Modal Task
- Unit 2: Sculptures and Heritage Symbols Drawing task
- Unit 3: Group Discussion
- Unit 4: Debate about Ancient Irrigation Technology
- Unit 5: Thorough analysis of Scientific Tamil

**Course Outcomes:**

After successful completion of this course, the students will be able to

- CO1: Describe the weaving technology and pottery making in sangam age
- CO2: Explain the construction technologies used in ancient times
- CO3: Discuss the technologies used by ancient Tamils in minting coins, ship, metallurgical areas.
- CO4: Describe the methods used in our ancient Tamils agriculture and irrigation technologies
- CO5: Summarize the development of scientific Tamil and Tamil computing

**Text Books:**

- T1: Keeladi - ‘Sangam City Civilization on the banks of river Vaigai’ (Jointly Published by: Department of Archaeology & Tamil Nadu Text Book and Educational Services Corporation, Tamil Nadu)
- T2: Dr.K.K.Pillay “Studies in the History of India with Special Reference to Tamil Nadu”

## தமிழரும் தொழில்நுட்பமும்

(Common to all branches)

Course Code	24TA201	Course Type	Theory
Teaching Periods/Week (L: T:P)	1:0:0	Credits	1
Total Teaching Periods	15	IAT + ESE Marks	40 + 60
Teaching Department	Tamil		

### Course Objectives:

1. பழந்தமிழரின் பாணை மற்றும் நெசவுத் தொழில் நுட்பம் குறித்து விளக்குவது
2. பண்டைய தமிழர்களின் கட்டுமான தொழில்நுட்பம் பற்றி தெரியப்படுத்துவது
3. பண்டைய நாட்களில் கப்பல் கட்டுதல் மற்றும் உற்பத்தி தொழில்நுட்பங்கள் பற்றிய அறிவை வழங்குதல்.
4. பண்டைய தமிழர்களின் விவசாயம் மற்றும் நீர்ப்பாசனத் தொழில்நுட்பத்தின் முக்கிய அம்சங்களைப் பற்றி கற்பித்தல்
5. தமிழ் மென்பொருள் மேம்பாடு பற்றிய நுண்ணறிவை வழங்குதல்.

### அலகு 1 நெசவு மற்றும் பாணைத் தொழில்நுட்பம்

3

சங்க காலத்தில் நெசவுத் தொழில் - பாணைத் தொழில்நுட்பமும் - கருப்பு சிவப்பு பாண்டங்கள் - பாண்டங்களில் கீறல் குறியீடுகள்

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

### அலகு - II வடிவமைப்பு மற்றும் கட்டிடத் தொழில்நுட்பம்

3

சங்க காலத்தில் வடிவமைப்பு மற்றும் கட்டுமானங்கள் & சங்க காலத்தில் வீட்டுப் பொருட்களில் வடிவமைப்பு - சங்க காலத்தில் கட்டுமான பொருட்களும் நடுகல்லும் சிலப்பதிகாரத்தில் மேடை அமைப்பு பற்றிய விவரங்கள் - மாமல்லபுரச் சிற்பங்களும், கோவில்களும் - சோழர் காலத்துப் பெருங்கோயில்கள் மற்றும் பிற வழிபாட்டுத் தலங்கள் - நாயக்கர் காலக் கோயில்கள் - மாதிரி கட்டமைப்புகள் பற்றி அறிதல், மதுரை மீனாட்சி அம்மன் ஆலயம் மற்றும் திருமலை நாயக்கர் மஹால் - செட்டிநாட்டு வீடுகள் - பிரிட்டிஷ் காலத்தில் சென்னையில் இந்தோ - சாரோசோனிக் கட்டிடக் கலை

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

### அலகு - III உற்பத்தித் தொழில் நுட்பம்

3

கப்பல் கட்டும் கலை - உலோகவியல் - இரும்புத் தொழிற்சாலை - இரும்பை உருக்குதல், எ..கு - வரலாற்றுச் சான்றுகளாக செம்பு மற்றும் தங்க நாணயங்கள் - நாணயங்கள் அச்சடித்தல் - மணி உருவாகும் தொழிற்சாலைகள் - கல்மணிகள், கண்ணாடி மணிகள், - சுடுமண் மணிகள் - சங்கு மணிகள் - எலும்புத்துண்டுகள் - தொல்லியல் சான்றுகள் - சிலப்பதிகாரத்தில் மணிகளின் வகைகள்.

**Teaching-Learning Process Pedagogy:** Lecture, PPT  
**RBT Level:** L1, L2, L3

**அலகு – IV வேளாண்மை மற்றும் நீர்பாசனத் தொழில் நுட்பம் 3**

அணை, ஏரி, குளங்கள், மதகு - சோழர்காலக்கு முழித் தூம்பின் முக்கியத்துவம் - கால்நடை பராமரிப்பு - கால்நடைக்களுக்காக வடிவமைக்கப்பட்ட கிணறுகள் - வேளாண்மை மற்றும் வேளாண்மைச் சார்ந்த செயல்பாடுகள் - கடல்சார் அறிவு - மீன்வளம் - முத்து மற்றும் முத்துக்குளித்தல் - பெருங்கடல் குறித்த பண்டைய அறிவு - அறிவுசார் சமூகம்.

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

**அலகு – V அறிவியல் தமிழ் மற்றும் கணித்தமிழ் 3**

அறிவியல் தமிழின் வளர்ச்சி - கணித்தமிழ் வளர்ச்சி - தமிழ் நூல்களை மின்பதிப்பு செய்தல் - தமிழ் மென்பொருட்கள் உருவாக்கம் - தமிழ் இணையக் கல்விக்கழகம் - தமிழ் மின் நூலகம் - இணையத்தில் தமிழ் அகராதிகள் - சொற்குவைத் திட்டம்.

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

**Total 15**

**Pedagogical Methods:**

- Unit 1: Clay Modal Task
- Unit 2: Sculptures and Heritage Symbols Drawing task
- Unit 3: Group Discussion
- Unit 4: Debate about Ancient Irrigation Technology
- Unit 5: Thorough analysis of Scientific Tamil

**Course Outcomes:**

இந்த பாடத்திட்டத்தை வெற்றிகரமாக முடித்த பிறகு, மாணவர்களால்

- CO1: சங்க காலத்தில் நெசவுத் தொழில்நுட்பம் மற்றும் மட்பாண்டங்கள் செய்தல் ஆகியவற்றை விவரிக்க முடியும்
- CO2: பண்டைய காலத்தில் பயன்படுத்தப்பட்ட கட்டுமான தொழில்நுட்பங்களை பற்றி விளக்க முடியும்
- CO3: பண்டைய தமிழர்களின் மணிகள், கப்பல்கள், உலோகவியல் பகுதிகளில் பயன்படுத்தப்பட்ட தொழில்நுட்பங்களைப் பற்றி விவாதிக்க முடியும்.
- CO4: பண்டைய தமிழர்களின் விவசாயம் மற்றும் நீர்ப்பாசன தொழில்நுட்பங்களில் பயன்படுத்தப்பட்ட முறைகளை விவரிக்க முடியும்
- CO5: அறிவியல் தமிழ் மற்றும் தமிழ் கணிப்பொறியின் வளர்ச்சியை கூற முடியும்

**Unit: V PRESENTATION SKILLS****9**

**Listening:** Listening – Types **Reading:** Short Stories-Role Play **Speaking:** Paired Presentation  
**Writing:** Checklists, Data Interpretation- Picture, Chart, Graphs, Minutes of the meeting-Memos-Notices  
**Grammar:** Error Correction, Punctuation **Vocabulary:** Numerical Adjectives, Relative Clause ,  
 Conjunction

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1, L2, L3

**Total****45****Pedagogical Methods:**

Unit 1: Speaking task
Unit 2: Reading task
Unit 3: Speaking task
Unit 4: Speaking task
Unit 5: Speaking task

**Course Outcomes:**

After successful completion of this course, the students will be able to

CO1: Communicate using appropriate vocabulary in different situations.
CO2: Use the acquired language skills to comprehend various types of language contents.
CO3: Evaluate different texts and write effective technical content.
CO4: Use appropriate sentence structures to convey thoughts in varied contexts.
CO5: Express the concepts and ideas in a skillful manner

# TRANSFORMS AND NUMERICAL METHODS

(Common to - CSE, IT, AIDS, CSBS, AIML, CYB, EEE, CIVIL, MECH)

<b>Course Code</b>	24MA201	<b>Course Type</b>	Theory
<b>Teaching Periods/Week (L: T:P)</b>	3:1:0	<b>Credits</b>	4
<b>Total Teaching Periods</b>	60	<b>IAT + ESE Marks</b>	40 + 60
<b>Teaching Department</b>	Mathematics		

## Course Objectives:

1. To introduce the concepts of Laplace transforms and inverse Laplace transforms.
2. To familiarize the concepts of Z-transform and its properties.
3. To illustrate the application of transforms in solving differential equations.
4. To explain Numerical methods for handling ordinary differential equations.
5. To acquaint the students with the knowledge of numerical techniques for interpolation, differentiation and integration.

## Unit: I          LAPLACE TRANSFORMS 12

Laplace transforms – Sufficient condition for existence – Transform of elementary functions – Basic properties – Transforms of derivatives and integrals of functions – Derivatives and integrals of transforms – Transforms of unit step function and impulse functions – Transform of periodic functions. Inverse Laplace transform – Convolution theorem (Statement only). Solution of linear ordinary differential equation of second order with constant coefficients and first order simultaneous equations with constant coefficients using Laplace transform

**Teaching-Learning Process    Pedagogy:** Lecture, PPT  
**RBT Level:** L1 - L3

## Unit: II          Z – TRANSFORMS 12

Z-transforms – Elementary properties – Inverse Z-transforms – partial fractions method – residues method – Convolution theorem. Solution of first and second order difference equations with constant coefficients using Z-transform.

**Teaching-Learning Process    Pedagogy:** Lecture, NPTEL Videos  
**RBT Level:** L1 - L3

## Unit: III        SOLUTION OF DIFFERENTIAL EQUATIONS 12

Higher order linear differential equations with constant coefficients - Method of variation of parameters – Homogenous equation of Euler’s and Legendre’s type – System of simultaneous linear differential equations with constant coefficients.

**Teaching-Learning Process    Pedagogy:** Lecture, NPTEL Videos  
**RBT Level:** L1 - L3

## Unit: IV        SOLUTION OF EQUATIONS AND EIGENVALUE PROBLEMS 12

Solution of algebraic and transcendental equations by Newton Raphson method - Solution of linear system of equations – Gauss elimination method – Gauss Jordan method – Gauss Seidel Iterative method– Eigenvalues of a matrix by Power method.

**Teaching-Learning Process    Pedagogy:** Lecture, PPT  
**RBT Level:** L1 - L3

**Unit: V NUMERICAL DIFFERENTIATION AND INTEGRATION****12**

Lagrange's and Newton's divided difference interpolations – Newton's forward and backward difference interpolation – Approximation of derivatives using interpolation polynomials – Numerical single and double integrations using Trapezoidal and Simpson's 1/3 rules.

**Teaching-Learning Process Pedagogy:** Lecture, NPTEL Videos

**RBT Level:** L1 - L3

**Total****60****Pedagogical Methods:**

Unit 1: Apply Laplace transforms to a real-world problem

Unit 2: Apply Z-transform in real-world problem

Unit 3: Present a real-world problem involving differential equations with solution.

Unit 4: Analyze the significance of eigenvalues and eigenvectors in the context of the applications

Unit 5: Visualizing the numerical differentiation and integration problem in real time applications.

**Course Outcomes:**

After successful completion of this course, the students will be able to

CO1: Apply Laplace transform, and inverse Laplace transform to solve linear ordinary differential equation and first order simultaneous equations with constant coefficients.

CO2: Apply Z- transform and its properties to solve difference equations.

CO3: Solve a variety of differential equation.

CO4: Compute the solutions to algebraic, transcendental equations and systems of linear equations using numerical techniques.

CO5: Apply numerical method techniques to differentiate and integrate a given function.

## ELECTRIC CIRCUIT ANALYSIS

<b>Course Code</b>	24EE211	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L:T:P)</b>	3:0:2	<b>Credits</b>	4
<b>Total Teaching Periods</b>	75	<b>IAT + ESE Marks</b>	50 + 50
<b>Teaching Department</b>	Electrical and Electronics Engineering		

### Course Objectives:

1. To develop the skills of solving, simple electric circuits using fundamental network laws and theorems.
2. To impart the basic knowledge of analyzing the single phase and three phase AC electrical circuits.
3. To educate on the fundamental concepts of transient analysis of electric circuits using laplace transform.
4. To give insight on the basics of resonance and coupled circuits.
5. To impart the fundamental concepts of two-port networks using network parameters.
6. To impart the fundamental concepts of solving electric circuits using graph theory

### UNIT I DC CIRCUITS 9

Fundamentals concepts of R, L and C elements - Energy Sources - Ohm's Law -Kirchhoff 's Laws – Series and Parallel circuits – Star-delta transformation - Mesh current and Node Voltage Analysis,Theorems - Superposition, Thevenin's , Norton's , Maximum power transfer theorem, Reciprocity theorem - Simple Problems using dependent sources.

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTEL  
**RBT Level:** L1, L2, L3, L4

### UNIT II AC CIRCUITS 9

A.C Fundamentals – Average and RMS Value –Complex Impedance – Phasor diagram - Real and Reactive Power, Power Factor, Energy – Analysis of RL, RC and RLC circuits.

Introduction to three phase circuits -Phase sequence – Star / Delta Connection - Relation between Line and Phase voltages and currents in balanced and unbalanced systems - Measurement of Power using Two wattmeter method.

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTE  
**RBT Level:** L1, L2, L3, L4

### UNIT III TRANSIENT RESPONSE ANALYSIS 9

Introduction – Laplace transforms and inverse Laplace transforms- standard test signals -Transient response of RL, RC and RLC circuits using Laplace transform for Source free, Step input and Sinusoidal input – problems.

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTEL  
**RBT Level:** L1, L2, L3, L4

### UNIT IV RESONANCE AND COUPLED CIRCUITS 9

Series and parallel resonance –frequency response – Quality factor and Bandwidth – Self and mutual inductance – Coefficient of coupling – Dot rule-Analysis of coupled circuits– Single Tuned circuits.

**Teaching-Learning Process Pedagogy:** Lectures, PPT NPTEL  
**RBT Level:** L1, L2, L3, L4

**UNIT V TWO PORT NETWORKS AND GRAPH THEORY****9**

Network functions – Pole-Zero diagram – Driving point Impedance and Admittance-Transfer Impedance and Admittance –Necessary conditions of Transfer functions – Z-parameters - Y-parameters – Hybrid parameters- ABCD parameters - Conditions of Reciprocity and Symmetry in Two port parameter representation – Image and Iterative Impedance - Graph - Component of Graph - Types of Graph -Tree-CoTree - Tieset – Cutset - Matrix representation of Graph

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTEL

**RBT Level:** L1, L2, L3,L4

**Total****45****Pedagogical Methods:**

Unit 1: Problems on Series and Parallel circuits, Kirchhoff's and Ohm's Laws
Unit 2: Quiz on AC circuits
Unit 3: Role play on RL, RC and RLC loads
Unit 4: Seminar on Series and Parallel resonance
Unit 5: Charts on Two port networks

**Practical Exercises****30**

1. Experimental verification of Kirchhoff's voltage and current laws
2. Experimental verification of Thevenin's and Norton's theorem
3. Experimental verification of Superposition theorem
4. Experimental verification of Maximum Power transfer theorem
5. Experimental determination of frequency response and time constant of series RL, RC circuits
6. Experimental determination of frequency response of RLC circuits
7. Experimental determination of power in a three phase circuits
8. Design and Simulation of series and parallel resonant circuits
9. Design and Simulation of Single tuned circuits
10. Simulation and determination of Two port network parameters

**System requirement**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	Regulated Power Supply: 0 – 15 V D.C	10 nos.
2.	Function Generator (1 MHz)	10 nos.
3.	Oscilloscope (20 MHz)	10 nos.
4.	Digital Storage Oscilloscope (20 MHz)	1 no.
5.	PC with Circuit Simulation Software (min 10 Users) (e-Sim / Scilab/ Pspice / MATLAB /other Equivalent software Package)	10 nos.
6.	AC/DC - Voltmeters	10 nos.
7.	Ammeters	10 nos.
8.	Multi-meters	10 nos.
9.	Decade Resistance Box, Decade Inductance Box, Decade Capacitance Box	6 no. each
10.	Circuit Connection Boards	10 nos.
11.	Necessary Quantities of Resistors, Inductors, Capacitors of various capacities and connecting wires	As required

## Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Apply various laws and theorems to solve simple problems in electric circuits.
- CO2: Compute various parameters like real and reactive power, power factor in single phase and three phase ac circuits.
- CO3: Analyze the transient response of RL, RC and RLC circuits for step and sinusoidal input.
- CO4: Explain the basic concepts of coupled circuits and frequency response of RLC circuit.
- CO5: Describe the performance of electric circuits at its input and output ports.
- CO6: Determine the behavior and characteristics of a network using graph theory.

# PYTHON PROGRAMMING

(Common to CSE, IT, CSBS, AIDS, AIML, CSCS, CE, EEE, ECE, MECH, VLSI and ACT)

<b>Course Code</b>	24CS211	<b>Course Type</b>	Integrated
<b>Teaching Periods/Week (L: T:P)</b>	2:0:4	<b>Credits</b>	4
<b>Total Teaching Periods</b>	90	<b>IAT + ESE Marks</b>	50 + 50
<b>Teaching Department</b>	Computer Science and Engineering		

**Course Objectives:** To equip students with the knowledge in

1. Fundamentals of algorithmic problem solving.
2. Python conditionals and loops to solve problems
3. String manipulation, control flow, and functions in Python.
4. Python data structures, including lists, tuples, and dictionaries, for complex data representation.
5. Various file operations using Python.

## **Unit: I COMPUTATIONAL THINKING AND PROBLEM SOLVING 6**

Fundamentals of Computing– Identification of Computational Problems Algorithms, building blocks of algorithms (statements, state, control flow, functions), notation (pseudo code, flowchart, programming language), algorithmic problem solving, simple strategies for developing algorithms (iteration, recursion)

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3,L4

## **Unit: II DATATYPES, EXPRESSIONS, STATEMENTS 6**

Python interpreter and interactive mode, debugging; values and types: int, float, Boolean, string and list; variables, expressions, statements, tuple assignment, precedence of operators, comments

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3, L4

## **Unit: III CONTROL FLOW, FUNCTIONS, STRINGS 6**

Conditionals: Boolean values and operators, conditional (if), alternative (if else), chained conditional (if-elif-else); Iteration: state, while, for, break, continue, pass; Fruitful functions: return values, parameters, local and global scope, function composition, recursion; Strings: string slices, immutability, string functions and methods, string module; Lists as array

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3, L4

## **Unit: IV LISTS, TUPLES, DICTIONARIES 6**

Lists: list operations, list slices, list methods, list loop, mutability, aliasing, cloning lists, list parameters; Tuples: tuple assignment, tuple as return value; Dictionaries: operations and methods; advanced list processing - list comprehension

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT  
**RBT Level:** L1, L2, L3,L4

**Unit: V FILES, MODULES and PACKAGES****6**

Files and exceptions: text files, reading and writing files, format operator; command line arguments, errors and exceptions, handling exceptions, modules, packages; Multithreading, Thread Life Cycle, Creating Thread - Python Libraries – NumPy and Pandas

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1, L2, L3,L4

**Total****30****Pedagogical Methods:**

Unit 1:	Developing Pseudocodes and flowcharts for real life activities such as railway ticket booking, admission process to undergraduate course, academic schedules during a semester etc.
Unit 2:	Developing algorithms for basic mathematical expressions using arithmetic operations: Swapping two numbers, circulate the values of n variables, distance between two points.
Unit 3:	Implementation of a simple calculator
Unit 4:	Implementing python program using lists, tuples, sets for the following scenario: Student Examination Report
Unit 5:	Developing modules using Python to handle files and apply various operations on files like word count, copy file etc.

**Practical Exercises:****60**

1. Implement simple python programs using interactive and script mode.
2. Develop python programs using id() , type() and range() functions.
3. Implement various control statements in python.
4. Develop python programs to perform various string operations like concatenation, slicing, and indexing.
5. Demonstrate string functions using python.
6. Develop python programs to perform operations on a list
7. Develop programs to work with Tuples
8. Create programs to solve problems using various data structures in python.
9. Implement python programs using modules and packages.
10. Case study: Data science with Numpy, Pandas

**System requirement**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Python 3.10 or later, Anaconda Distribution	30

## Course Outcomes:

After successful completion of this course, the students will be able to

- CO1: Analyze problems and devise algorithmic solutions using pseudocode and flowcharts
- CO2: Implement Python conditionals effectively to control program flow.
- CO3: Design and implement reusable functions to modularize code and improve maintainability
- CO4: Employ lists, tuples, and dictionaries to store and manipulate data effectively.
- CO5: Apply Python's file handling techniques to interact with files.

# BASIC CIVIL AND MECHANICAL ENGINEERING

(Common to CSE, IT, AIDS, CSBS, AIML, CSE-CYS, ECE, ACT, VLSI and EEE)

<b>Course Code</b>	24GE101	<b>Course Type</b>	Theory
<b>Teaching Periods/Week (L: T:P)</b>	3:0:0	<b>Credits</b>	3
<b>Total Teaching Periods</b>	45	<b>IAT + ESE Marks</b>	40+60
<b>Teaching Department</b>	Civil Engineering and Mechanical Engineering		

**Course Objectives:** To Equip the students with the knowledge in

1. Types of civil structures, civil engineering materials, and civil construction.
2. Different types of building plans, foundations, and infrastructures.
3. Parts of IC engines, pumps, and their working principles.
4. Components of the power plant and a detailed explanation of their working principles.
5. Parts of the Refrigeration & Air-conditioning system and their working principles and applications.
6. Additive manufacturing processes and their applications.

## **Unit: I INTRODUCTION OF CIVIL ENGINEERING AND CONSTRUCTION MATERIALS**

**9**

Civil Engineering – Specialized sub-disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation, and Water Resources Engineering Types of buildings: Residential buildings, Industrial buildings.

Civil Engineering Materials: Bricks – Stones – Sand – Cement – Concrete – Steel – Timber – Modern Materials, Thermal and Acoustic Insulating Materials, Decorative Panels, Water Proofing Materials. Modern uses of Gypsum, Pre-fabricated Building components (brief discussion only)

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

## **Unit: II BUILDING COMPONENTS AND INFRASTRUCTURE**

**9**

Building plans – Setting out of a Building – Foundations: Types of foundations – Brick masonry – Stone Masonry – Beams – Columns – Lintels – Roofing – Flooring – Plastering. Types of Bridges and Dams – Water Supply Network – Introduction to Highways and Railways – Introduction to Green Buildings - Stress prediction by AIML.

**Teaching-Learning Process Pedagogy:** Lecture, PPT

**RBT Level:** L1, L2, L3

## **Unit: III INTERNAL COMBUSTION ENGINES**

**9**

Internal combustion engines as an automobile power plant – Working principle of Petrol and Diesel Engines – Four stroke and two stroke cycles – Comparison of four stroke and two-stroke engines - Concept of hybrid engines - Electric Vehicles – Components, Accessories, and working of electric vehicles.

**Teaching-Learning Process Pedagogy:** Lecture, PPT, Youtube Videos

**RBT Level:** L1, L2, L3

**Unit: IV POWER PLANTS, REFRIGERATION AND AIR CONDITIONING SYSTEM 9**

Classification of Power Plants- Working principle of steam, Gas, Diesel, Hydroelectric, and Nuclear Power plants- Internal combustion engines as automobile power plants. Principle of vapour compression and absorption system – Layout of typical domestic refrigerator–Window and Split type room Air conditioner.

**Teaching-Learning Process Pedagogy:** Lecture, PPT, YouTube Videos

**RBT Level:** L1, L2, L3

**Unit: V ADDITIVE MANUFACTURING 9**

Additive Manufacturing Overview – VAT Photopolymerisation - Material Jetting - Binder Jetting - Material Extrusion - Powder Bed Fusion - Sheet Lamination - Directed Energy Deposition – Merits Demerits and its Applications.

**Teaching-Learning Process Pedagogy:** Lecture, PPT, YouTube Videos

**RBT Level:** L1, L2, L3

**Total 45**

**Pedagogical Methods:**

- |   |
|---|
| Unit 1: Poster presentation - Civil Engineering Materials   |
| Unit 2: Seminar – Types of Bridges and Dams                 |
| Unit 3: Seminar on Components of IC Engines                 |
| Unit 4: Role Play – Vapour Compression Refrigeration System |
| Unit 5: Model Making  |

**Course Outcomes:**

After successful completion of this course, the students will be able to

- |  |
|--|
| CO1: Explain the types of civil structures, civil engineering materials, civil construction.       |
| CO2: Discuss about the different types of building plans, foundations, and infrastructures.        |
| CO3: Explain the components of IC engines, pumps, and their working principles.                    |
| CO4: Describe the parts of the power plant and a detailed explanation of their working principles. |
| CO5: Summarize the parts and working principle of refrigeration & air-conditioning system          |
| CO5: Discuss the additive manufacturing processes and their applications                           |

# ENGINEERING VISUALIZATION

(Common to all branches)

Course Code	24GE121	Course Type	Integrated
Teaching Periods/Week (L:T:P)	1:0:4	Credits	3
Total Teaching Periods	75	IAT + ESE Marks	60 + 40
Teaching Department	Mechanical Engineering		

**Course Objectives:** To Equip the students with the knowledge in

1. BIS conventions and specifications for engineering drawing and constructing the conic curves, involutes, and cycloids
2. Projections of lines and planes.
3. Orthographic projection of solids and sections of solids.
4. Projection of sectioned solids and Development of surfaces
5. Isometric projections of simple solids.

## Unit: I PLANE CURVES

3+12

Basic Geometrical constructions, Curves used in engineering practices: Conics – Construction of Ellipse, Parabola & Hyperbola using eccentricity method – Construction of Cycloid – Construction of Involute of circle, Square and polygons – Tangent and Normal to the above curves.

**Practical component:** AutoCAD – Solid modeling tool - Basics.

**Teaching-Learning Process**    **Pedagogy:** Lecture, PPT, NPTEL  
**RBT Level:** L1-L4

## Unit: II PROJECTION OF POINTS, LINES AND PLANE SURFACE

3+12

Orthographic projection - First angle projection –Principal planes - Projection of points – Projection of Lines (Only First angle projection) inclined to both principal planes – Determination of true length and true inclinations by rotating line method – Projection of planes (Circle and polygons) inclined both principal planes by rotating object method.

**Practical component:** AutoCAD – Lines and Plane.

**Teaching-Learning Process**    **Pedagogy:** Lecture, PPT, NPTEL  
**RBT Level:** L1-L4

## Unit: III PROJECTION OF SOLIDS

3+12

Projection of simple solids like prisms, pyramids, cones and cylinders, and truncated solids when the axis is inclined to one of the principal planes and parallel to the other by rotating object method.

**Practical component:** AutoCAD – Projection of simple solids

**Teaching-Learning Process**    **Pedagogy:** Lecture, PPT, NPTEL  
**RBT Level:** L1-L4

## Unit: IV PROJECTION OF SECTIONED SOLIDS AND DEVELOPMENT OF SURFACES

3+12

Sectioning of solids in the simple vertical position when the cutting plane is inclined to one of the principal planes and perpendicular to the other – Obtaining the true shape of the section. Development of the lateral surfaces of simple sectioned solids – Prisms, Pyramid, Cylinder, and Cone.

**Practical component:** AutoCAD – Section of simple solids and surfaces

**Teaching-Learning Process**    **Pedagogy:** Lecture Method, PPT, NPTEL  
**RBT Level:** L1, L2, L3, L4

**Unit: V ISOMETRIC PROJECTIONS****3+12**

Principles of isometric projection – isometric scale - Isometric projections of simple solids and truncated solids - Prisms, pyramids, cylinders, cones – combination of two solid objects in simple vertical positions.

**Practical component:** AutoCAD – Isometric projections of simple solids and truncated solids

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, NPTEL

**RBT Level:** L1,L2,L3,L4

**Total****75****System requirement**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL-based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system	30
3.	Auto-CAD	30

**Course Outcomes:**

After successful completion of this course, the students will be able to

- CO1: Use BIS conventions and specifications for engineering drawing and constructing the conic curves, involutes, and cycloid
- CO2: Solve practical problems involving the projection of lines and Planes.
- CO3: Sketch the orthographic projection of simple solids.
- CO4: Draw the Sectional view of solids and development of simple surfaces.
- CO5: Sketch the isometric projections of simple solids.

# ENGLISH FOR PROFESSIONAL COMPETENCE

(Common to all branches)

<b>Course Code</b>	24EN221	<b>Course Type</b>	Practical
<b>Teaching Periods/Week (L: T:P)</b>	0:0:2	<b>Credits</b>	1
<b>Total Teaching Periods</b>	30	<b>IAT + ESE Marks</b>	60 + 40
<b>Teaching Department</b>	English		

## Course Objectives:

1. To enhance employability and career skills.
2. To develop confidence and provide adequate soft skills required for work place.
3. To inculcate professional and corporate skills to compete with workplace challenges.

### Unit: I RECEPTIVE SKILLS

6

Listening – Comprehensive Listening – Watching the news – Listening to a peer giving presentation – Critical Listening – Watching a televised debate – Reading – Extensive Reading – One- act Plays – Intensive Reading – Articles, Blog posts on topics like science and technology, arts, etc.

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** L1, L2, L3

### Unit: II PRODUCTIVE SKILLS

6

Speaking – Demonstrative Speaking – Process description through visual aids – Persuasive Speaking – Writing – Descriptive Writing - Subjective Writing – Autobiography, Opinion Essay – Describing a Product or Mechanisms and interpretations.

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** L1, L2, L3

### Unit: III ENGLISH FOR COMPETITIVE EXAMS

6

Verbal aptitude- Close test- Error correction- Homonyms and homophones- Spelling British and American words-word order.

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** L1, L2, L3

### Unit: IV CORPORATE SKILLS

6

Critical Thinking and Problem Solving – Brainstorming, Q & A Discussion – Team work and Collaboration – Activities like Office Debates, Group discussion – Professionalism and Strong Work Ethics –Soft Skills, Teamwork, Adaptability, Empathy and Growth Mind set.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, YouTube videos

**RBT Level:** L1, L2, L3

### Unit: V PROJECT WORK

6

Project Writing- Methodology- Bibliography- Reference- Presentation Techniques- Mini Project

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT, YouTube videos

**RBT Level:** L1, L2, L3

**Total 30**

**System requirement**

Sl. No.	Description of Equipment	Required numbers for batch of 30 students
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system	30
3.	Hot Potatoes / Globalina	30

**Course Outcomes:**

After successful completion of this course, the students will be able to:

**CO1:** Interpret and respond appropriately in listening and reading contexts.

**CO2:** Express proficiently in spoken and written communication.

**CO3:** Apply acquired language skills in professional and corporate discussions.

**CO-PO & PSO Mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

**ENGINEERING MATHEMATICS LABORATORY**  
(Common to CSE, IT, AIDS, CSBS, CYS, AIML, EEE, MECH, CIVIL)

<b>Course Code:</b>	24MA221	<b>Course Type:</b>	Practical
<b>Teaching Periods/Week (L:T:P):</b>	0:0:2	<b>Credits:</b>	1
<b>Total Teaching Periods:</b>	30	<b>IAT + ESE Marks:</b>	60 + 40
<b>Teaching Department:</b>	Mathematics		

**Course Objectives:**

1. To demonstrate basic and advanced matrix operations using Sci Lab.
2. To demonstrate basic and advanced differentiation and integration techniques using Sci Lab.
3. To demonstrate transforms and to solve ordinary differential equations using various numerical methods in Sci Lab.

**PRACTICAL**

**30**

1. Introduction to SCI LAB through matrices and general syntax.
2. Finding the Eigenvalues and Eigenvectors.
3. Plotting the graph of a quadratic form.
4. Evaluating area using double integral.
5. Evaluating Volume using Triple Integral
6. Evaluating gradient, directional derivative, divergent and curl
7. Finding the Laplace transform and its inverse of a given function.
8. Expand  $F(s)$  into linear fraction by partial fraction method by using Laplace Transform
9. Expand  $F(s)$  into linear fraction by partial fraction method by using Z-Transform
10. Finding the convolution between two functions using Laplace transform and Z-transform
11. Finding the real roots of algebraic and transcendental equations using Newton Raphson method.
12. Finding the largest Eigenvalue by power method.
13. Solving system of linear equations using Gauss Seidel Method.
14. Finding approximately the missing value using Lagrange interpolation.
15. Evaluating line integrals by trapezoidal rule and Simpson's rule.

**System requirement**

<b>Sl. No.</b>	<b>Description of Equipment</b>	<b>Required numbers for batch of 30 students</b>
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17" or higher TFT Monitor, Keyboard and mouse	30
2.	Windows 8 or higher operating system / Linux Ubuntu 20 or higher	30
3.	Scilab 6.0 or later	30

**Course Outcomes:**

After successful completion of this course, the students will be able to

**CO1:** Solve complex problems involving matrices using Sci lab.

**CO2:** Utilize Sci lab to solve integration and differentiation problems.

**CO3:** Apply Sci lab to calculate transforms and verify the solutions of ordinary differential equations in numerical methods.

**CO-PO & PSO Mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PO12	PSO1	PSO2	PSO3

## IT ESSENTIAL SKILLS (Common to all branches)

<b>Course Code</b>	24IT121	<b>Course Type</b>	Practical
<b>Teaching Periods/Week (L: T:P)</b>	0:0:2	<b>Credits</b>	1
<b>Total Teaching Periods</b>	30	<b>IAT + ESE Marks</b>	60 + 40
<b>Teaching Department</b>	Information Technology		

**Course Objectives:** To equip students with the knowledge in:

1. PC components, diagnose and resolve common issues to maintain optimal performance.
2. PowerPoint and Word for crafting compelling presentations and professional documents with advanced formatting, multimedia integration, and design techniques.
3. Spreadsheets for the creation, management, and analysis of data across various tasks.
4. Use of ChatGPT for prompt engineering, creative writing, and language translation to enhance communication and content creation.
5. HTML and CSS to design and build well-structured, visually appealing, and interactive web pages.

**Practical Exercises** **30**

**PC Hardware & Software Installation** **6**

**Task 1:** Identify the peripherals of a computer, components in a CPU and its functions. Draw the block diagram of the CPU along with the configuration of each peripheral and submit to your instructor.

**Task 2:** Every student should disassemble and assemble the PC back to working condition. Lab instructors should verify the work and follow it up with a Viva. Also students need to go through the video which shows the process of assembling a PC. A video would be given as part of the course content.

**Task 3:** Every student should individually install MS windows on the personal computer. Lab instructor should verify the installation and follow it up with a Viva.

**Task 4:** Every student should install Linux on the computer. This computer should have windows installed. The system should be configured as dual boot (VMWare) with both Windows and Linux. Lab instructors should verify the installation and follow it up with a Viva

**Task 5:** Every student should install BOSS on the computer. The system should be configured as dual boot (VMWare) with both Windows and BOSS. Lab instructors should verify the installation and follow it up with a Viva

**WORD** **6**

**Word Orientation:** The mentor needs to give an overview of Microsoft (MS) office or equivalent (FOSS) tool word: Importance of MS office or equivalent (FOSS) tool Word as word Processors, Details of the three tasks and features that would be covered in each, using word – Accessing, overview of toolbars, saving files, Using help and resources, rulers, format painter in word.

**Task 1:** Using Word to create a project certificate. Features to be covered: - Formatting Fonts in word, Drop Cap in word, Applying Text effects, Using Character Spacing, Borders and Colors, Inserting Header and Footer, Using Date and Time option in Word.

**Task 2:** Creating project abstract Features to be covered: -Formatting Styles, Inserting table, Bullets and Numbering, Changing Text Direction, Cell alignment, Footnote, Hyperlink, Symbols, Spell Check, Track Changes.

**Task 3:** Creating a Newsletter: Features to be covered: - Table of Content, Newspaper columns, Images from files and clipart, drawing toolbar and Word Art, Formatting Images, Textboxes, Paragraphs and Mail Merge in word.

## EXCEL

6

**Excel Orientation:** The mentor needs to tell the importance of MS office or equivalent (FOSS) tool Excel as a Spreadsheet tool, give the details of the four tasks and features that would be covered in each. Using Excel – Accessing, overview of toolbars, saving excel files, Using help and resources.

**Task 1:** Creating a Scheduler - Features to be covered: Gridlines, Format Cells, Summation, auto fill, Formatting Text

**Task 2:** Calculating GPA -. Features to be covered: - Cell Referencing, Formulae in excel – average, std. deviation, Charts, Renaming and Inserting worksheets, Hyper linking, Count function, Ex: Prompt: "You are a knowledgeable AI. Please answer the following question: What is the capital of France?"

Ex: Prompt: "In a world where gravity suddenly stopped working, people started floating upwards. Write a story about how society adapted to this new reality."

Ex: Prompt: "Translate the following English sentence to French: 'Hello, how are you doing today?'"

**Task 3:** Split cells, freeze panes, group and outline, Sorting, Boolean and logical operators, Conditional formatting

## POWER POINT

4

**Task 1:** Students will be working on basic power point utilities and tools which help them create basic power point presentations. PPT Orientation, Slide Layouts, Inserting Text, Word Art, Formatting Text, Bullets and Numbering, Auto Shapes, Lines and Arrows in PowerPoint.

**Task 2:** Interactive presentations - Hyperlinks, Inserting –Images, Clip Art, Audio, Video, Objects, Tables and Charts

**Task 3:** Master Layouts (slide, template, and notes), Types of views (basic, presentation, slide slotter, notes etc.), and Inserting – Background, textures, Design Templates, Hidden slides.

## AI TOOLS –Chat GPT

4

**Task 1:** Prompt Engineering: Experiment with different types of prompts to see how the model responds. Try asking questions, starting conversations, or even providing incomplete sentences to see how the model completes them.

**Task 2:** Creative Writing: Use the model as a writing assistant. Provide the beginning of a story or a description of a scene, and let the model generate the rest of the content. This can be a fun way to brainstorm creative ideas.

**Task 3:** Language Translation: Experiment with translation tasks by providing a sentence in one language and asking the model to translate it into another language. Compare the output to see how accurate and fluent the translations are.

Ex: Prompt: "Translate the following English sentence to French: 'Hello, how are you doing today?'"

**HTML & CSS Orientation:** The mentor needs to tell the importance of HTML tags as a design tool, give the details of the three tasks and features that would be covered in each. Using HTML – Formatting, List, Header, Table, insert image Using help and resources.

**Task 1:** Create a simple webpage with a title, header, paragraph, and footer for institution.

**Task 2:** Create a form with fields for name, email, password, and a submit button Include radio buttons, checkboxes, and a dropdown menu.

**Task 3:** Create and Apply an External CSS to an HTML Document for your profile.

### System Requirement

Sl. No.	Description of Equipment	Required numbers (for batch of 30 students)
1.	INTEL based desktop PC with min. 4GB RAM and 500 GB HDD, 17” or higher TFT Monitor, Keyboard and mouse	30
2.	Office tools – Word processor, Spread sheet, Presentation tool	30
3.	AI TOOLS: Chat GPT	30
4.	Mozilla Firefox / Chrome / Microsoft Edge, Notepad ++	30

### Course Outcomes:

After successful completion of this course, the students will be able to

CO1: Identify the components of a PC and troubleshoot PC malfunctions.

CO2: Develop essential skills in PowerPoint and Word to create engaging presentations and professional documents with advanced formatting, multimedia integration, and layout techniques.

CO3: Acquire the ability to create, manage, and analyze data using spreadsheets for various tasks.

CO4: Attain knowledge in using Chat GPT for prompt engineering, creative writing, and language translation, enhancing interaction and content generation capabilities.

CO5: Build foundational skills in HTML and CSS to create structured, styled, and interactive web pages

## ELECTROMAGNETIC THEORY

<b>Course Code</b>	<b>24EE301</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>EEE, ECE &amp; ACT</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>2:1:0</b>	<b>Credits</b>	<b>3</b>
<b>Handled by</b>	<b>ECE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite :** Basic understanding of Engineering Mathematics (vector calculus), Physics (electricity and magnetism), and fundamentals of electrical circuits.

**Course Objectives:** To impart the knowledge of

1. Vector algebra and coordinate systems used in electromagnetic field analysis.
2. Electrostatic fields, electric potential, capacitance, and boundary value problems.
3. Magnetic field concepts, magnetic materials, and inductance in electromagnetic systems.
4. Maxwell's equations and electromagnetic wave propagation principles.
5. Electromagnetic wave behavior in different media including reflection, refraction, and transmission.

### **Unit: I          VECTOR ALGEBRA**

**9**

Electromagnetic model - Units and constants - Review of vector algebra – Rectangular - cylindrical and spherical coordinate systems - Line, surface and volume integrals - Gradient of a scalar field, Divergence of a vector field - Divergence theorem - Curl of a vector field - Stoke's theorem - Null identities - Helmholtz's theorem - Verify theorems for different path - surface and volume.

#### **PRACTICALS:**

1. Graphical Representation and interpretation of fields (using Mathematical Development Tool)
2. Computation, graphical representation and interpretation of Vector addition, subtraction, multiplication
3. Dot product and cross product in 2-D and 3-D Gradient fields Divergence fields Curl fields.

**Teaching-Learning Process      Pedagogy:** Lecture, Peer Learning.

**RBT Level:** Theory: L1,L2,L3    Practical: L4

### **Unit: II          ELECTROSTATICS**

**9**

Electric field - Coulomb's law - Gauss's law and applications - Electric potential - Conductors and Dielectrics in static electric field - Electric flux density and dielectric constant - Boundary conditions, Electrostatics boundary value problems - Capacitance - Parallel, cylindrical - spherical capacitors and two wire transmission line - Electrostatic energy and energy density - Poisson's and Laplace's equations - Uniqueness of electrostatic solutions - Current density and Ohm's law - Electromotive force and Kirchhoff's voltage law - Equation of continuity and Kirchhoff's current law

## **PRACTICALS:**

### **Computation of Electric (E) and Magnetic (H) fields (using FEM packages) Problem formulation and Concepts of Finite Element method.**

1. Simulate and plot electric field vectors from single and system of charges.
2. Computation of Electric field intensity, voltage distribution and capacitance in Parallel plate capacitor with Single dielectric, Two dielectrics, Two dielectrics with different angles of interface
3. Computation of Electric field intensity, voltage distribution and capacitance in Coaxial Cable With Single dielectric and Two dielectrics

**Teaching-Learning Process**     **Pedagogy:** Lecture, NPTEL videos.

**RBT Level:** Theory: L1,L2,L3    Practical: L4

## **Unit: III     MAGNETIC FIELD** **9**

Lorentz force equation - Ampere's law - Vector magnetic potential - Biot-Savart law and applications, - Magnetic field intensity - Calculation of magnetic field intensity for various current distributions - Magnetic circuits – Torque – force between two current carrying wires - Behaviour of magnetic materials - Boundary conditions - Faraday's law, Displacement current – Self and mutual inductance- Inductance due solenoid, toroid, coaxial cable and two wire transmission lines - magnetic energy and energy density.

### **PRACTICALS:**

1. Computation of Magnetic field intensity,
2. Computation of Force between two current carrying conductors
3. Computation of Inductance due to Circular conductor, ring, and Solenoid, coaxial cable.
- 4.

**Teaching-Learning Process**     **Pedagogy:** Lecture, PPT, YouTube videos,

**RBT Level:** Theory: L1,L2,L3    Practical: L4

## **Unit: IV     MAXWELL'S EQUATION AND TRAVELLING WAVES** **9**

Conduction and Displacement Current - Maxwell equations in Point form and integral form for free space, harmonically varying fields, steady fields and static case – Relation between circuit theory and field theory - Wave equations and solutions, Time-harmonic fields - Observing the Phenomenon of wave propagation with the aid of Maxwell's equations - Electromagnetic power flow - Poynting Theorem and Poynting vector.

**Teaching-Learning Process**     **Pedagogy:** PPT, YouTube videos

**RBT Level:** L1-L3

## **Unit: V     NANOMATERIALS** **9**

Wave Propagation in lossy dielectric – Plane wave in lossless dielectric, free space and good conductors - Characteristics of plane waves – Reflection and Refraction – Normal and Oblique incidence - Normal incidence at a plane conducting boundary, Normal incidence at a plane dielectric boundary – Total Internal reflection and Brewster angle.

**Teaching-Learning Process**     **Pedagogy:** PPT, YouTube videos

**RBT Level:** Theory: L1,L2,L3

**Suggested Activities :** Tutorials, Seminar, Quiz / MCQ (Gate related questions), Peer learning, Group discussion, case study

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations

**Course Outcomes:**

After successful completion of this course, the students should be able to

CO1: Analyze electromagnetic fields using vector operations and theorems.

CO2: Ability to solve and interpret electrostatic field, capacitance, and current continuity problems using basic laws and equations

CO3: Apply magnetic field laws and inductance concepts to analyze forces, energy, and behavior of magnetic materials

CO4: Analyze electromagnetic waves and compute power flow using Maxwell's equations

CO5: Analyze and predict electromagnetic wave behavior such as reflection, refraction, and transmission at boundaries.

# FOURIER ANALYSIS AND PARTIAL DIFFERENTIAL EQUATIONS

<b>Course Code</b>	<b>24MA311</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>MECH, CIVIL &amp; EEE</b>				
<b>Total Teaching Periods</b>	<b>75</b>	<b>L:T:P</b>	<b>2:1:2</b>	<b>Credits</b>	<b>4</b>
<b>Handled by</b>	<b>Mathematics</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite :** Basic knowledge of Calculus, including differentiation and integration.

**Course Objectives:** To impart knowledge of

1. Fourier series for representing periodic functions and determining Fourier coefficients..
2. Fourier transforms and their properties for analyzing functions and solving mathematical problems.
3. First order partial differential equations and the methods used to obtain their solutions.
4. Higher order partial differential equations and techniques for solving homogeneous and non-homogeneous equations.
5. The applications of partial differential equations in solving physical problems such as wave motion and heat conduction..

## Unit 1      **FOURIER SERIES**

**9**

Dirichlet's conditions - General Fourier series - Odd and even functions - Half range sine and cosine series - Parseval's identity - Harmonic analysis.

**PRACTICALS:**

1. Find the Fourier Series co-efficient for the given function.
2. Compute the half-range sine and cosine series for the given functions
3. Evaluate the Harmonic Analysis Using Fourier Series

**Teaching-Learning Process      Pedagogy: Lecture, NPTEL Videos**

**RBT Level: L1- L3**

## Unit 2      **FOURIER TRANSFORMS**

**9**

Statement of Fourier integral theorem - Fourier transform pair - Fourier sine and cosine transforms - Properties - Transforms of simple functions - Convolution theorem - Parseval's identity.

**PRACTICALS:**

1. Find the convolution between two functions using Fourier Transform
2. Compute the Fourier sine transform for a given function.
3. Compute the Fourier cosine transform for a given function

**Teaching-Learning Process      Pedagogy: Lecture, NPTEL Videos**

**RBT Level: L1- L3**

**Unit 3      FIRST ORDER PARTIAL DIFFERENTIAL EQUATIONS      9**

Introduction - Formation of partial differential equations by eliminating arbitrary constants and functions - Solutions of first order equations - Standard types and equations reducible to standard types - Singular solutions - Lagrange's linear equation.

**PRACTICALS:**

1. Solving first order equations in standard type.
2. Solving first order equations in reducible to standard type.
3. Solving Lagrange's Linear Equation

**Teaching-Learning Process      Pedagogy:** Lecture Method, PPT

**RBT Level:** L1- L3

**Unit 4      HIGHER ORDER PARTIAL DIFFERENTIAL EQUATIONS      9**

Linear partial differential equations of second and higher order with constant coefficients of both homogeneous and non-homogeneous types. Classification of PDE - Method of separation of variables.

**PRACTICALS:**

1. Find the general solution of second order linear partial differential equation
2. Find the general solution of higher order linear partial differential equation
3. Find the general solution of homogeneous differential equation.

**Teaching-Learning Process      Pedagogy:** Lecture Method, PPT

**RBT Level:** L1- L3

**Unit 5      APPLICATIONS OF PARTIAL DIFFERENTIAL EQUATIONS      9**

Solutions of one-dimensional wave equation - One dimensional equation of heat conduction - Steady state solution of two-dimensional equation of heat conduction (excluding insulated edges).

**PRACTICALS:**

1. Solving the One-Dimensional Wave Equation
2. Solving the One-Dimensional Heat Conduction Equation
3. Solving the Two-Dimensional Heat Conduction Equation

**Teaching-Learning Process      Pedagogy:** Lecture, NPTEL Videos

**RBT Level:** L1- L3

**Total      45**

**Suggested Activities :** Lectures & Problem Solving, Tutorials & Assignments, Sci Lab Practical Sessions, Case Studies / Mini Projects, NPTEL Videos & Seminars, Review of GATE questions

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

## Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Compute Fourier series expansions for given functions and analyze harmonic components using appropriate conditions.
- CO2: Apply Fourier transform techniques, including convolution and Parseval's identity, to solve mathematical and engineering problems.
- CO3: Form and solve **first-order partial differential equations**, including Lagrange's linear equations and reducible types.
- CO4: Solve **higher-order linear PDEs** using methods such as separation of variables and auxiliary equations.
- CO5: Model and solve **one-dimensional and two-dimensional physical systems** involving wave motion and heat conduction.

## UNIVERSAL HUMAN VALUES AND ETHICS

<b>Course Code</b>	<b>24GE311</b>		<b>Course Type</b>	<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>Common to All</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>1:0:2</b>	<b>Credits</b>	<b>2</b>
<b>Handled by</b>	<b>MECH</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite:** Basic awareness of human values, ethical behavior, and social responsibility.

**Course Objectives:** To enhance knowledge of

1. Universal human values and develop the ability for self-exploration and right understanding.
2. Harmony within the human being, including the relationship between the self ('I') and the body.
3. Harmony in family and society through values such as trust, respect, justice, and cooperation.
4. Harmony in nature and existence, promoting sustainable and responsible living.
5. Applying human values and ethical principles in professional life for socially responsible and environmentally conscious decision-making.

### **Unit: I INTRODUCTION**

**3+6**

Purpose and motivation for the course, recapitulation from Universal Human Values-I, Self-Exploration – Its content and process; 'Natural acceptance' and Experiential Validation- as the process for self-exploration Continuous Happiness and Prosperity- A look at basic Human Aspirations Right understanding, Relationship and Physical Facility- the basic requirements for fulfilment of aspirations of every human being with their correct priority Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario, Method to fulfil the above human aspirations: understanding and living in harmony at various levels.

#### **PRACTICALS:**

- Include sessions to discuss natural acceptance in human being as the innate acceptance for living with responsibility (living in relationship, harmony and co-existence) rather than as arbitrariness in choice based on liking-disliking

**PS-1:** Introduce yourself in detail. What are the goals in your life? How do you set your goals in your life? How do you differentiate between right and wrong? What have been your achievements and shortcomings in your life? Observe and analyze them.

**PS-2:** Now-a-days, there is a lot of voice about many techno-genic maladies such as energy and natural resource depletion, environmental pollution, global warming, ozone depletion, deforestation, soil degradation, etc. — all these seem to be man-made problems threatening the survival of life on Earth — What is the root cause of these maladies & what is the way out in your opinion?

On the other hand, there is rapidly growing danger because of nuclear proliferation, arms race, terrorism, criminalization of politics, large scale corruption, scams, breakdown of relationships, generation gap, depression & suicidal attempts, etc — what do you think, is the root cause of these threats to human happiness and peace — what could be the way out in your opinion?

**PS 3:** Observe that each one of us has Natural Acceptance, based on which one can verify right or not right for him. Verify this in case of

- What is Naturally Acceptable to you in relationship- Feeling of respect or disrespect?
- What is Naturally Acceptable to you — to nurture or to exploit others?
- Is your living the same as your natural acceptance or different?

**Teaching-Learning Process    Pedagogy:** Lecture, PPT

**RBT Level:** L1 – L4

## **Unit: II        HARMONY IN THE HUMAN BEING**

**3+6**

Understanding human being as a co-existence of the sentient ‘I’ and the material ‘Body’, Understanding the needs of Self (‘I’) and ‘Body’ - happiness and physical facility, Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer), Understanding the characteristics and activities of ‘I’ and harmony in ‘I’, Understanding the harmony of I with the Body: Sanyam and Health; correct appraisal of Physical needs, meaning of Prosperity in detail, Programs to ensure Sanyam and Health.

### **PRACTICALS :**

- Include sessions to discuss the role others have played in making material goods available to me. Identifying from one’s own life. Differentiate between prosperity and accumulation. Discuss program for ensuring health vs dealing with disease.

**PS-4:** List down all your desires. Observe whether the desire is related to Self (I) or Body. If it appears to be related to both, see which part of it is related to Self (I) and which part is related to Body.

**PS-5:**

- Observe that any physical facility you use, follows the given sequence with time: Necessary and tasteful        unnecessary and tasteful        unnecessary and tasteless        intolerable.
- In contrast, observe that any feeling in you is either naturally acceptable or not acceptable at all. If naturally acceptable, you want it continuously and if not acceptable, you do not want it any moment!

**PS-6:**

- Chalk out programs to ensure that you are responsible to your body- for free nurturing, protection and right utilization of the body.
- Find out the plants and shrubs growing in and around your campus and residence. Find out their use for curing different diseases. If not, what initiative has been taken by you to implant the shrubs?

**Teaching-Learning Process**     **Pedagogy:** Lecture, PPT

**RBT Level:** L1 – L4

**Unit: III     HARMONY IN THE FAMILY AND SOCIETY****3+6**

Understanding values in human-human relationship; meaning of Justice (nine universal values in relationships) and program for its fulfilment to ensure mutual happiness; Trust and Respect as the foundational values of relationship, Understanding the meaning of Trust; Difference between intention and competence, Understanding the meaning of Respect, Difference between respect and differentiation; the other salient values in relationship, Understanding the harmony in the society (society being an extension of family): Resolution, Prosperity, fearlessness (trust) and coexistence as comprehensive Human Goals, Visualizing a universal harmonious order in society, Undivided Society, Universal Order- from family to world family.

**PRACTICALS :**

- Include sessions to reflect on relationships in family, hostel and institute as extended family, real life examples, teacher-student relationship, goal of education etc. Gratitude as a universal value in relationships. Discuss with scenarios. Elicit examples from students' lives

**PS 7:** Form small groups in the class and in that group initiate dialogue and ask the eight questions related to trust. The eight questions are:

1. Do I want to make myself happy?
2. Do I want to make the other happy?
3. Does the other want to make him happy?
4. Does the other want to make me happy?
  - What is the answer?
  - Intention (Natural Acceptance)
1. Am I able to make myself always happy?
2. Am I able to make the other always happy?
3. Is the other able to make him always happy?
4. Is the other able to make me always happy?
  - What is the answer?
  - Competence

**PS 8:**

- Observe on how many occasions you are respecting your related ones (by doing the right evaluation) and on how many occasions you are disrespecting by way of under-evaluation, over-evaluation or otherwise evaluation.
- Also observe whether your feeling of respect is based on treating the other as yourself or on differentiations based on body, physical facilities or beliefs.

**PS 9:**

- Write a note in the form of story, poem, skit, essay, narration, dialogue to educate a child. Evaluate it in a group.
- Develop three chapters to introduce 'social science- its need, scope and content in the primary education of children

**Teaching-Learning Process**      **Pedagogy:** Lecture, PPT

**RBT Level:** L1 – L4

**Unit: IV      HARMONY IN THE NATURE AND EXISTENCE****3+6**

Understanding the harmony in the Nature, Interconnectedness and mutual fulfilment among the four orders of nature- recyclability and self-regulation in nature, Understanding Existence as Coexistence of mutually interacting units in all- pervasive space, Holistic perception of harmony at all levels of existence.

**PRACTICALS :**

- Include sessions to discuss human being as cause of imbalance in nature (film “Home” can be used), pollution, depletion of resources and role of technology etc.

**PS 10:** List down units (things) around you. Classify them in four orders. Observe and explain the mutual fulfillment of each unit with other orders.

**PS 11:**

- Make a chart for the whole existence. List down different courses of studies and relate them to different units or levels in the existence.
- Choose any one subject being taught today. Evaluate it and suggest suitable modifications to make it appropriate and holistic.

**Teaching-Learning Process**      **Pedagogy:** Lecture, PPT

**RBT Level:** L1 – L4

**Unit: V      IMPLICATIONS OF HARMONY ON PROFESSIONAL ETHICS**

**3+6**

Natural acceptance of human values, Definitiveness of Ethical Human Conduct, Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order, Competence in professional ethics:

- a. Ability to utilize the professional competence for augmenting universal human order.
- b. Ability to identify the scope and characteristics of people friendly and eco-friendly production systems.
- c. Ability to identify and develop appropriate technologies and management patterns for above production systems.

Case studies of typical holistic technologies, management models and production systems, Strategy for transition from the present state to Universal Human Order:

- a. At the level of individual: as socially and ecologically responsible engineers, technologists and managers.
- b. At the level of society: as mutually enriching institutions and organizations, Sum up.

**PRACTICALS :**

Include Exercises and Case Studies will be taken up in Sessions E.g. To discuss the conduct as an engineer or scientist etc

**PS 12:** Choose any two current problems of different kind in the society and suggest how they can be solved on the basis of natural acceptance of human values. Suggest steps you will take in present conditions.

**PS 13:**

- Suggest ways in which you can use your knowledge of Technology/Engineering/Management for universal human order, from your family to the world family.
- Suggest one format of humanistic constitution at the level of nation from your side.

**PS 14:** The course is going to be over now. Evaluate your state before and after the course in terms of

- Thought
- Behavior and
- Work
- Realization

Do you have any plan to participate in the transition of the society after graduating from the institute? Write a brief note on it.

**Teaching-Learning Process      Pedagogy:** Lecture, PPT

**RBT Level:** L1 – L4

**Total**

**45**

**Suggested Activities :** Group Discussion, Presentation, Quiz, Case study, Review of GATE questions.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

### Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Become more aware of themselves, and their surroundings (family, society, nature);
- CO2: Have more responsible in life, and in handling problems with sustainable solutions, while keeping human relationships and human nature in mind.
- CO3: Have better critical ability.
- CO4: Become sensitive to their commitment towards what they have understood (human values, human relationship and human society).
- CO5: Apply what they have learnt to their own self in different day-to-day settings in real life, at least a beginning would be made in this direction.

**Unit: III OPAMP AND CHARACTERISTICS****9+6**

Ideal OPAMP characteristics – AC and DC characteristics - Basic feedback concepts – properties of negative feedback – feedback topologies - Voltage-series feedback: non-inverting amplifier and voltage-shunt feedback: inverting amplifier - Frequency response of OPAMP - Basic applications: inverting, non-inverting and differential amplifier circuits, Adder, Subtractor, Differentiator and integrator circuits.

**PRACTICALS:**

1. Characteristics of Differential Amplifier, Inverting and Non Inverting amplifier.
2. Characteristics of Voltage follower, Adder and Subtractor
3. Characteristics of Differentiator and Integrator

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT**RBT Level:** L1- L4**Unit: IV APPLICATION OF OPAMPS****9+6**

Instrumentation amplifiers - First-order and Second order active filters - V to I and I to V converters - Comparators and Multi-vibrators - Waveform generators - Clippers and Clampers - Peak detector - D/A converters (Weighted resistance type and R-2R ladder type) - A/D converters (Flash type, Dual slope type, Successive Approximation types and Sigma-Delta type).

**PRACTICALS:**

1. Instrumentation amplifier.
2. Waveform generator.
3. RC Phase shift / LC Oscillator
4. A/ D and D/A Converter
5. Clipper and Clampers

**Teaching-Learning Process Pedagogy :** PPT, YouTube videos**RBTLevel:**L1-L4**Unit: V SPECIAL ICS****9+6**

555 Timer circuit: Functional block diagram, characteristics & applications – Astable and monostable multivibrator -566 Voltage Controlled Oscillator circuits - PLL Phase Locked Loop applications - Function generator circuit – Linear Voltage regulators.

**PRACTICALS:**

1. Multi-vibrator & PLL

**Teaching-Learning Process Pedagogy:** Chalk and Talk, PPT**RBTLevel:**L1-L4**Total****75**

**Suggested Activities :** Flipped classroom, Tutorials, Role Play , Quiz / MCQ (Gate related questions), Case study.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain the operation and characteristics of semiconductor devices such as PN junction diode, Zener diode, BJT, and MOSFET.
- CO2: Analyze and design small signal amplifier circuits including CE amplifier, differential amplifier, and current mirror circuits.
- CO3: Apply the concepts of operational amplifier characteristics and feedback in designing basic OPAMP circuits.
- CO4: Design and analyze OPAMP-based applications such as filters, waveform generators, converters, and comparator circuits.
- CO5: Explain and implement special IC applications including 555 timer circuits, PLL, VCO, function generators, and voltage regulators.

## DIGITAL SYSTEM DESIGN

<b>Course Code</b>	<b>24EC312</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>Common to ISE, ECE &amp; EEE</b>				
<b>Total Teaching Periods</b>	<b>75</b>	<b>L:T:P</b>	<b>2:1:2</b>	<b>Credits</b>	<b>4</b>
<b>Handled by</b>	<b>ECE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite:** Basic knowledge of mathematics, digital electronics, and programming concepts.

**Course Objectives:** To impart the knowledge of

1. Number systems, Boolean algebra, and basic digital logic design using Verilog HDL
2. Realization of logic circuits using different logic families (TTL, CMOS) and Verilog HDL modeling..
3. Design and operation of combinational and sequential digital circuits.
4. Design and operation of registers, counters, and synchronous sequential machines
5. Finite state machines (FSM), minimization and asynchronous circuit design techniques.

### **Unit: I                      DIGITAL LOGIC DESIGN AND VERILOG HDL FUNDAMENTALS                      11+4**

**Number Systems:** Number systems - Complements of Numbers - Codes- Weighted and Non-weighted codes and its Properties - Parity check code and Hamming code.

**Boolean algebra:** Basic Theorems and Properties, Switching Functions- Canonical and Standard Form, Algebraic Simplification, Digital Logic Gates, EX-OR gates, Universal Gates, Multilevel NAND/NOR realizations. **Verilog HDL** – Structural Modeling – Data flow modeling – Behavioral Modelling.

**PRACTICALS:**

1. Simulation of basic gates, Universal gates and Multi level NAND / NOR realization using HDL.
2. Simulation of Boolean equation using gates.

**Teaching-Learning Process      Pedagogy:** Lecture, NPTEL/YouTube videos, Peer Learning, Tutorials  
**RBT Level:** L1-L4

### **Unit: II                      PHASE RULE AND COMPOSITE MATERIAL BOOLEAN                      8+2** **FUNCTION MINIMIZATION AND LOGIC FAMILY REALIZATIONS**

**Minimization of Boolean functions:** Karnaugh Map Method - Up to five Variables, Don't Care Map Entries.

**Realization of Logic Gates Using Diodes & Transistors:** AND, OR and NOT Gates using Diodes and Transistors, DCTL, RTL, DTL, TTL, CML and CMOS Logic Families and its Comparison, standard TTL NAND Gate-Analysis & characteristics, TTL open collector O/Ps, Tristate TTL, MOS & CMOS open drain and tri-state outputs interfacing- TTL driving CMOS & CMOS driving TTL.

**PRACTICALS:**

1. Characteristics of TTL and CMOS logic families.

**Teaching-Learning Pedagogy:** Lecture, NPTEL videos, Peer Learning, Tutorials  
**Process** **RBT Level:** L1-L4

**Unit: III COMBINATIONAL AND SEQUENTIAL LOGIC CIRCUITS** **10+8**

**Combinational Logic Circuits:** Adders, Subtractors, Comparators, Multiplexers, De-multiplexers, Encoders, Decoders and Code converters, Hazards and Hazard Free Relations.

**Sequential Circuits Fundamentals:** Basic Architectural Distinctions between Combinational and Sequential circuits, SR Latch, Flip Flops: SR, JK, JK Master Slave, D and T Type Flip Flops, Excitation Table of all Flip Flops, Timing and Triggering Consideration, Conversion from one type of Flip-Flop to another.

**PRACTICALS:**

1. Design and Simulation of Shift Register
2. Design and Simulation of Synchronous and Asynchronous Counters
3. Design and Simulation of Sequence Detector and Parity Bit generator.
4. Design and Simulation of Modulo N Counter

**Teaching-Learning Pedagogy:** Lecture, NPTEL videos, Peer Learning, Tutorials  
**Process** **RBT Level:** L1-L4

**Unit: IV REGISTERS, COUNTERS, AND SEQUENTIAL MACHINE DESIGN** **12+8**

**Registers and Counters:** Shift Registers – Left, Right and Bidirectional Shift Registers, Applications of Shift Registers - Design and Operation of Ring and Twisted Ring Counter, Operation of Asynchronous and Synchronous Counters.

**Sequential Machines:** Finite State Machines, Synthesis of Synchronous Sequential Circuits- Serial Binary Adder, Sequence Detector, Parity-bit Generator, Synchronous Modulo N –Counters.

**PRACTICALS:**

1. Design and Simulation of Shift Register
2. Design and Simulation of Synchronous and Asynchronous Counters
3. Design and Simulation of Sequence Detector and Parity Bit generator.
4. Design and Simulation of Modulo N Counter

**Teaching-Learning Pedagogy:** Lecture, NPTEL videos, Peer Learning, Tutorials, Case studies  
**Process** **RBT Level:** L1-L4

**Unit: V FINITE STATE MACHINES AND ASYNCHRONOUS CIRCUIT DESIGN 10+2**

**Finite state machine:** capabilities and limitations, Mealy and Moore models, State equivalence and machine minimization, simplification of incompletely specified machines, Merger graphs. Asynchronous design-modes of operation, Hazards, synthesis of SIC fundamental mode circuits, synthesis of burst mode circuits. Introduction to ASM Charts.

**PRACTICALS:**

1. Design and Simulation of Mealy and Moore models

**Teaching-Learning Pedagogy:** Lecture, NPTEL videos, Peer Learning, Tutorials, Case studies

**Process RBT Level:** L1-L4

**Total**

**75**

**Suggested activities :** Review of GATE questions, Case study, Mini Project.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

CO1: Develop and simulate basic digital circuits using HDL effectively

CO2: Analyze the optimizing Boolean functions and implementing circuits using TTL, CMOS, and other logic families.

CO3: Design and analyze circuits like adders, multiplexers, and flip-flops for practical applications

CO4: Implement and simulate shift registers, counters, and sequence detection circuits.

CO5: Design, simplify, and simulate Mealy/Moore models and asynchronous circuits

## INNOVATION AND DESIGN THINKING

<b>Course Code</b>	<b>24ES321</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>Common to all</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>1:0:2</b>	<b>Credits</b>	<b>2</b>
<b>Handled by</b>	<b>Training &amp; Placement</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite :** Basic problem-solving and creative thinking skills.

**Course Objectives:** To enhance knowledge on

1. The principles and stages of **Design Thinking** for identifying and solving real-world problems.
2. Empathetic research methods to understand user needs through observation, interviews, and fieldwork.
3. Problem definition techniques and framing design challenges using user insights.
4. Creative ideation methods to generate and evaluate innovative solutions.
5. Prototyping, testing, and presenting solutions effectively through project demonstrations and presentations.

### **Module: I THE DESIGNER'S MINDSET & PROBLEM SCOPING**

**9**

Objective: Cultivate a growth mindset and launch the real-world project.

1. Introduction to Design Thinking: From Problem to Solution.
2. Fixed vs. Growth Mindset for Innovators (Toolkit: Mindset Reflection Worksheet).
3. Launching the Capstone Project: Team Formation & Problem Context Selection (Local Panchayat, NGO, Small Industry, Campus Community).
4. Project Planning & Introduction to Field Research (Toolkit: Project Brief Canvas).

**Teaching-Learning Process Pedagogy:** Chalk and Talk

**RBT Level:** L1- L4

### **Module: II EMPATHISE — DEEP USER UNDERSTANDING**

**9**

Objective: Learn and apply empathetic methods in a real-world context.

1. The Art of Empathy and User-Centricity.
2. Planning Field Research (Toolkit: Research Plan Template).
3. Conducting Empathetic Interviews & Observations (Toolkit: Interview Guide, Observation Log).
4. FIELDWORK: Students conduct research in their chosen context. (Video recording of key interactions is encouraged).
5. Synthesising Data: Finding Insights (Toolkit: Empathy Map Canvas).
6. Visualising the User Experience (Toolkit: Journey Map Template).

**Teaching-Learning Process**    **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**Module: III    DEFINE — FRAMING THE CORE PROBLEM**

**9**

Objective: Synthesise research findings into a powerful and focused problem statement.

1. From Insights to User Needs.
2. Creating User Personas (Toolkit: Persona Canvas).
3. Unpacking the Problem Root Cause (Toolkit: 5 Whys Worksheet).
4. Crafting a Point-of-View (POV) (Toolkit: POV Statement Template).
5. Framing the Design Challenge (Toolkit: "How Might We..." Questions)

**Teaching-Learning Process**    **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**Module: IV    IDEATE — GENERATING CREATIVE SOLUTIONS**

**9**

Objective: Generate a wide range of innovative solutions and select the most promising one.

1. Principles of Divergent and Convergent Thinking.
2. Brainstorming for Quantity and Creativity (Toolkit: Brainstorming Rules).
3. Structured Ideation Techniques (Toolkit: SCAMPER, Crazy 8s).
4. Clustering and Evaluating Ideas (Toolkit: Affinity Clustering).
5. Selecting the Winning Idea (Toolkit: Feasibility-Impact Matrix).

**Teaching-Learning Process**    **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**Module: V    PROTOTYPE & TEST — LEARNING BY MAKING**

**9**

Objective: Build tangible representations of the idea and learn from user feedback.

1. The Purpose of Prototyping: To Learn, Not to Perfect.
2. Building Low-Fidelity Prototypes (Toolkit: Paper Prototyping, Storyboarding).
3. Planning and Conducting User Tests (Toolkit: User Test Script).
4. Gathering and Interpreting Feedback (Toolkit: Feedback Capture Grid).
5. The Iteration Cycle: Using feedback to refine the solution.

**Teaching-Learning Process**    **Pedagogy:** Lecture Method, PPT

**RBT Level:** L1-L3

## **Module: VI INTEGRATE & PITCH — FROM IDEA TO IMPACT**

Objective: Prepare for implementation and communicate the solution persuasively.

1. Storytelling for Innovation: Crafting a Compelling Narrative.
2. Building a Persuasive Pitch (Toolkit: Pitch Deck Structure).
3. Ethical, Societal, and Sustainability Check (Toolkit: Ethics & Sustainability Checklist).
4. Introduction to Scalability and Intellectual Property (Overview only).
5. Capstone Project Consolidation & Presentation Rehearsal.

### **Assessment Framework :**

#### **a) Formative Assessments (Continuous)**

##### **1. Field Research & Deliverable: 20 Marks**

- A documented research report including Empathy Maps, Journey Maps, and supporting evidence (e.g., key quotes, photos, short video clips).
- Focus: Depth of user understanding, quality of research, and synthesis of insights.

##### **2. Ideation & Concept Selection Assessment : 20 Marks**

- Deliverable: An "Ideation Logbook" showing the breadth of ideas generated (using SCAMPER, Crazy 8s, etc.) and a rationale for the final selected concept using the Feasibility-Impact Matrix.
- Focus: Creativity, diversity of ideas, and logical selection process.

#### **b) Summative Assessment (End-of-Term)**

##### **3. Capstone Project Portfolio & Viva Voce : 60 Marks**

This is the core of the course evaluation, assessing the end-to-end project.

- **Comprehensive Project Portfolio - 30 Marks:** A single document walking through the entire process for the team's real-world problem—from initial research and POV to final prototype and iteration plan.
- **Final Pitch Presentation & Demo - 20 Marks:** A compelling live presentation (10-12 mins per team) of their solution, including a demo of their prototype and their proposed implementation plan.
- **Viva Voce - 10 Marks:** A brief individual interview to assess personal contribution, understanding of the process, and ability to reflect on the learning journey.

**Total**

**45**

**Suggested Activities :** Case Study, Quiz, Coding Task, Group Task, Coding Challenge

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

## Course Outcomes:

After successful completion of this course, the students should be able to

- CO1: Explain the principles of design thinking and identify real-world problems using a designer's mindset.
- CO2: Apply empathy-based research methods to collect user insights through interviews, observations, and field studies.
- CO3: Analyze research findings and formulate clear problem statements using design thinking tools.
- CO4: Generate and evaluate innovative ideas using structured ideation techniques to select feasible solutions.
- CO5: Develop prototypes, test solutions with users, and present innovative solutions through demonstrations and project presentations.

# CONTROL SYSTEM

<b>Course Code</b>	<b>24EE403</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>EEE</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>2:1:0</b>	<b>Credits</b>	<b>3</b>
<b>Teaching Department</b>	<b>EEE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite: Basic knowledge of mathematics and electrical/electronic circuits.**

**Course Objectives: To impart knowledge on**

1. Basic control system concepts and system modeling, including open-loop and closed-loop systems, transfer functions, and system representations.
2. The time response characteristics of control systems and the analysis of system performance using time-domain specifications.
3. Frequency response analysis and stability techniques such as Bode plot, Nyquist criterion, and Routh–Hurwitz criterion.
4. The design and implementation of controllers and compensators such as P, PI, PD, and PID controllers.
5. State variable analysis, controllability, and observability of dynamic systems.

## **Unit: I** **SYSTEMS AND THEIR REPRESENTATION** **9**

Basic elements in control systems – Open and closed loop systems – Transfer function –Modelling of mechanical and electrical systems – Analogy – Synchros – AC and DC servomotors – overall system gain – Block diagram reduction techniques – Signal flow graphs – Thermal and pneumatic system

**Teaching-Learning Process**    **Pedagogy:** Lectures, PPT, NPTEL/YouTube videos

**RBT Level:** L1- L3

## **Unit: II** **TIME RESPONSE** **9**

Type and order of the system – Types of test input – Time response of first and second order system – Time domain specifications static and dynamic Error coefficients – Steady state error – Root locus technique.

**Teaching-Learning Process**    **Pedagogy:** Lectures, PPT, NPTEL/YouTube videos

**RBT Level:** L1- L3

## **Unit: III** **FREQUENCY RESPONSE** **9**

Frequency response – Frequency domain specifications – Correlation between frequency domain and time domain specifications – Determination of closed loop response from open loop response – Stability analysis – Bode plot –Polar Plot- Routh Hurwitz criterion – Nyquist stability criterion

**Unit: III PERFORMANCE AND TESTING OF TRANSFORMER: 9**

Testing: Analysis of equivalent circuit parameters - OC and SC test -Simple problems- Polarity test - Insulation Resistance Test- Winding Resistance Measurement- Dielectric Tests- Vector Group and Test -Temperature Rise Test- Tap changing Transformers: On-Load Tap Changer Test- Sumpner's test- Simple problems- Autotransformer: Specific Tests -Efficiency and voltage regulation

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

**Unit: IV DC MACHINES 9**

Construction and components of DC Machine – Principle of operation - EMF equations– Torque equations - significance of back EMF- circuit model – Armature reaction, Armature winding, Compensating Winding, Interpoles–Methods of excitation- commutation -characteristics of DC machines- Parallel operation of DC generators- Construction and Operation of PMDC- Simple problems -Applications of DC machines

**Teaching-Learning Process Pedagogy:** Lecture , PPT  
**RBT Level:** L1- L3

**Unit: V PERFORMANCE AND TESTING OF DC MACHINES 9**

Speed control of DC motors, starting methods of DC motors-Losses and efficiency in DC machine- Condition for maximum efficiency- Testing of DC Machines: No load and load test on DC Generator- Brake test-Swinburne's test- Hopkinson's test- Simple problems- Field Test- Retardation test.

**Teaching-Learning Process Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

**Total 45**

**Suggested Activities :** Tutorial, Simulation, Solving GATE questions, Case study, Review of GATE questions.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Illustrate the concepts of magnetic circuits and electromechanical energy conversion.
- CO2: Acquire the knowledge of construction, working of single phase, three phase transformers and Auto transformer.
- CO3: Describe the performance and methods of testing of transformers
- CO4: Acquire the knowledge of construction and working principles of DC Machines.
- CO5: Analyze the performance and methods of testing of DC Machines

**Text Books:**

## MEASUREMENT AND INSTRUMENTATION

<b>Course Code</b>	<b>24EE404</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>EEE</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>3:0:0</b>	<b>Credits</b>	<b>3</b>
<b>Teaching Department</b>	<b>EEE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite :** Basic knowledge of Electrical and Electronic Engineering fundamentals .

**Course Objectives:** To enhance the knowledge of

1. Fundamental concepts of measurement systems, instruments, and their characteristics.
2. Transducers, sensors, and actuators used in engineering measurements.
3. Bridge circuits and comparative measurement techniques for accurate analysis.
4. Digital instrumentation and modern measurement systems.
5. Programmable Logic Controllers (PLC) and Virtual Instrumentation concepts.

### **Unit: I      MEASUREMENT CONCEPTS AND ANALOG INSTRUMENTS      9**

Instruments: classification, applications – Elements of a generalized measurement system - Static and dynamic characteristics - Errors in measurement -Statistical evaluation of measurement data. Classification of instruments – moving coil and moving iron meters – Induction type, dynamometer type meters – Energy meter – Mega Ohm Meter - Instrument transformers (CT & PT).

**Teaching-Learning Process      Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

### **Unit: II      TRANSDUCERS AND ACTUATORS      9**

Principles: Resistive – Inductive – Capacitive - Magnetic sensing - Piezoelectric effects – Light - Temperature based sensing, Classification of transducers – Measurement of pressure, temperature, displacement, flow, angular velocity – Digital transducers – Ultrasonic and Smart Sensors - Actuators: Principle – Classification: Pneumatic, Mechanical, Electrical, Magnetic and Thermal – applications

**Teaching-Learning Process      Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

### **Unit: III      COMPARATIVE METHODS OF MEASUREMENTS      9**

D.C potentiometers - D.C (Wheat stone, Kelvin and Kelvin Double bridge) - A.C bridges (Maxwell, Anderson and Schering bridges) - Transformer ratio bridges - Self-balancing bridges - Interference & screening – Multiple earth and earth loops – Electrostatic and electromagnetic Interference – Grounding techniques.

**Teaching-Learning Process      Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

**Unit: IV DIGITAL INSTRUMENTATION****9**

Digital Multimeter - Energy meter - Frequency meter – RMS measurement - Phase meter - SD Card and tape – Recorders - Digital plotters and printers – DSO - LED, LCD & Dot matrix display – Data Loggers – Signal conditioning circuits.

**Teaching-Learning Process**      **Pedagogy:** Lectures & PPT  
**RBT Level:** L1-L3

**Unit: V PLC AND VIRTUAL INSTRUMENTATION****9**

Evolution of PLC – Sequential and Programmable controllers – Architecture – Programming of PLC – Functional blocks – Communication Networks for PLC. Introduction to Virtual Instrumentation (VI) – Architecture – Programming – Front Panel and Block diagram – Data flow programming – G programming concepts – Control structures – Error handling – String controls – File I/O VIs and functions.

**Teaching-Learning Process**      **Pedagogy:** Lectures, PPT, NPTEL/YouTube videos  
**RBT Level:** L1- L3

**Total****45**

**Suggested activities :** Tutorials, Field Visit, case study, Review Gate Questions

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain the principles, classification, and characteristics of measurement instruments and evaluate measurement errors.
- CO2: Describe the working principles and applications of transducers and actuators in measurement systems
- CO3: Apply bridge circuits and potentiometers for accurate measurement and analyze interference effects
- CO4: Illustrate the working of digital instruments and data acquisition systems.
- CO5: Develop basic programs for PLC and demonstrate concepts of Virtual Instrumentation.

## TRANSMISSION AND DISTRIBUTION

<b>Course Code</b>	<b>24EE401</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>EEE</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>2:1:0</b>	<b>Credits</b>	<b>3</b>
<b>Handled by</b>	<b>EEE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite:** Basic knowledge of electrical circuits and electrical engineering fundamentals.

**Course Objectives:** To impart knowledge on

1. The structure and components of electric power systems including generation, transmission, and distribution.
2. The parameters of transmission lines such as resistance, inductance, capacitance, and corona effects.
3. The modelling and performance analysis of transmission lines.
4. The types and characteristics of overhead line insulators and underground cables.
5. The mechanical design of transmission lines, substations, and grounding systems..

### **Unit: I INTRODUCTION TO POWER SYSTEM**

**9**

Structure of electric power system: generation, transmission and distribution-Single line diagram with components and distribution systems- Classification of transmission lines based on type of voltage, voltage level, and length-Analysis of voltage tolerance -Advantages of higher voltage transmission-HVAC, and HVDC- Interconnection-Feeders, distributors and service mains.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT & Demonstration

**RBT Level: L1-L3**

### **Unit: II TRANSMISSION LINE PARAMETERS**

**9**

Types of Conductor - Calculation of Resistance for solid conductors- Calculation of inductance for single phase and three phase with single and double circuit lines and problems, concept of GMR & application of self and mutual GMD; skin and proximity effect- symmetrical and asymmetrical conductor configuration with and without transposition- calculation of capacitance for symmetrical and asymmetrical single and three phase with single and double line circuits and problems- corona discharge, factors affecting corona-advantages and disadvantages.

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level: L1- L3**

**Text Books:**

## STATISTICS, PROBABILITY AND LINEAR ALGEBRA

<b>Course Code</b>	<b>24MA413</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>EEE,CIVIL &amp; MECH</b>				
<b>Total Teaching Periods</b>	<b>75</b>	<b>L:T:P</b>	<b>2:1:2</b>	<b>Credits</b>	<b>4</b>
<b>Handled by</b>	<b>MATHEMATICS</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite:** Basic knowledge of probability, statistics, and matrix algebra.

**Course Objectives:** To impart knowledge on

1. Sampling distributions and hypothesis testing methods used in statistical analysis.
2. Design of experiments and analysis of variance techniques.
3. Probability theory and one-dimensional random variables with standard distributions.
4. Joint distributions, correlation, regression, and two-dimensional random variables.
5. Vector spaces, linear transformations, and eigenvalues/eigenvectors in linear algebra.

### **Unit: I      TESTING OF HYPOTHESIS**

**15**

Sampling distributions – Test for Single Mean and difference of two means (Large and small samples) – Tests for Single Variance and Equality of Variances - F -Test - Chi-square test for Goodness of fit- Test of Independent Attributes.

**PRACTICALS:**

1. Perform Z-test for single mean and difference of means.
2. Perform F-test for equality of variances.
3. Perform Chi-square goodness of fit test and test of independent attributes.

**Teaching-Learning Process      Pedagogy:** Lecture , NPTEL Videos

**RBT Level:** L1- L3

### **Unit: II      DESIGN OF EXPERIMENTS**

**15**

One-way classifications (Completely randomized design) two-way classifications (Randomized block design) and three-way classifications (Latin square design).

**PRACTICALS:**

1. Compute the treatment means and block means in randomized block design.
2. Analyze data using two-way classification by computing row and column means.
3. Compute the grand mean for data arranged in a Latin square design.

**Teaching-Learning Process      Pedagogy:** Lecture , NPTEL Videos

**RBT Level:** L1- L3

**Unit: III ONE DIMENSIONAL RANDOM VARIABLES****15**

Random Variables — Moments — Moment generating function — Discrete Random Variables: Binomial, Poisson and Geometric Distributions — Continuous Random Variables: Uniform, Exponential and Normal Distributions.

**PRACTICALS:**

1. Compute the PMF of a Binomial, Geometric and Poisson Distributions.
2. Compute and plot the PDF of a Uniform, Exponential and Normal Distributions.
3. Compute the mean and variance of a Binomial, Geometric and Poisson Distributions.

**Teaching-Learning Process**     **Pedagogy:** Lecture Method, PPT

**RBT Level:** L1- L3

**Unit: IV TWO-DIMENSIONAL RANDOM VARIABLES****15**

Joint distributions — JPMF and JPDF - Marginal and conditional distributions — Covariance — Correlation coefficient and regression.

**PRACTICALS:**

1. Find the marginal distribution from joint distributions.
2. Compute conditional probability distributions.
3. Compute the covariance and correlation.

**Teaching-Learning Process**     **Pedagogy:** Lecture Method, PPT

**RBT Level:** L1- L3

**Unit: V LINEAR ALGEBRA****15**

Vector Spaces- Subspaces- Linear Transformation – Null space, Range space - dimension theorem - Matrix and representation of Linear Transformation – Eigen values Eigen vectors of linear transformation.

**PRACTICALS:**

1. Find the image, null space and range space of a vector under a linear transformation.
2. Compute the eigenvectors corresponding to the eigenvalues of a matrix and also find its characteristic polynomial.
3. Find the matrix representation of a linear transformation and verify the Rank-Nullity Theorem for a given matrix.

**Teaching-Learning Process**     **Pedagogy:** Lecture Method, NPTEL Videos

**RBT Level:** L1- L3

**Total****75**

## Course Outcomes:

After successful completion of this course, the students should be able to

CO1: Apply sampling distributions and perform hypothesis testing for means, variances, and attributes

CO2: Analyze experimental data using CRD, RBD, and Latin Square Design.

CO3: Apply one-dimensional random variable concepts and standard probability distributions to compute statistical measures.

CO4: Evaluate joint probability distributions and analyze relationships using covariance, correlation, and regression techniques.

CO5: Apply linear algebra concepts including vector spaces, linear transformations, eigenvalues, eigenvectors, and verify the Rank–Nullity theorem using computational tools.

## IDEA TO PRODUCT

<b>Course Code</b>	<b>24PC411</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>Common to ECE, EEE, MECH &amp; CIVIL</b>				
<b>Total Teaching Periods</b>	<b>45</b>	<b>L:T:P</b>	<b>1:0:2</b>	<b>Credits</b>	<b>2</b>
<b>Handled by</b>	<b>MECH</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite:** Basic knowledge of engineering graphics and design concepts.

**Course Objectives:** To provide knowledge of

1. Global trends, product development concepts, methodologies, and product life cycle used in modern product development.
2. Rapid prototyping techniques, tools, and methods used for mechanical and electronic prototype development.
3. Industrial design principles including sketching, CAD modeling, product visualization, and reverse engineering strategies.
4. UI/UX design principles, human factors, information architecture, and design practices for digital products.
5. Application development concepts including SDLC, web and mobile technologies, databases, APIs, cloud services, and deployment of applications.

### **Module: I   BASICS OF PRODUCT DEVELOPMENT**

**6**

Global Trends Analysis and Product decision - Social Trends - Technical Trends- Economical Trends Environmental Trends - Political/Policy Trends - Introduction to Product Development Methodologies and Management - Overview of Products and Services - Types of Product Development - Overview of Product Development methodologies - Product Life Cycle – Product Development Planning and Management.

**Teaching-Learning Process   Pedagogy:** Chalk and Talk

**RBT Level:** L1- L4

### **Module: II   RAPID PROTOTYPING**

**6**

Need for prototyping - Domains in prototyping - Difference between actual manufacturing and prototyping - Rapid prototyping methods - Tools used in different domains.

**Mechanical Prototyping:** 3D Printing and classification - Laser Cutting and engraving - RD Works – Additive manufacturing.

**Electronic Prototyping:** Basics of electronic circuit design - - Working with simulation tool - simple PCB design with EDA.

**Teaching-Learning Process   Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

### **Module: III INDUSTRIAL DESIGN**

**6**

Introduction to Industrial Design - Points, lines, and planes - Sketching and concept generation - Sketch to CAD - Introduction to CAD tools - Types of 3D modeling - Basic 3D Modeling Tools - Part creation – Assembly - Product design and rendering basics – Dimensioning & Tolerance – Basics of reverse Engineering and its strategies

**Teaching-Learning Process**      **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

### **Module: IV UI / UX**

**6**

Fundamental concepts in UI & UX - Tools - Fundamentals of design principles - Psychology and Human Factors for User Interface Design - Layout and composition for Web, Mobile and Devices - Typography - Information architecture - Color theory - Design process flow, wireframes, best practices in the industry -User engagement ethics - Design alternatives

**Teaching-Learning Process**      **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

### **Module: V APP DEVELOPMENT**

**6**

SDLC - Introduction to App Development - Types of Apps - web Development -understanding Stack - Frontend - backend - Working with Databases - Introduction to API - Introduction to Cloud services - Cloud environment Setup- Reading and writing data to cloud - Embedding ML models to Apps - Deploying application

#### **Important Note :**

It is considered as a lab, observation is to be submitted every week starting from block diagram, Design, Circuit Diagram, Simulation Results, Implementation results and Analysis. Finally, a Report is to be submitted for the System Design, End Semester Exam is a Demo.

The main objective of this laboratory is to understand and apply the principles and concepts in Product Design for Innovative Product with hands on training. Each student group (not more than three) have to develop digital and physical prototype models of a new product / existing product with enhanced feature.

The fabricated models (For Mech & Civil students ) may be in the form of RP models, clay models, sheet metal models or cardboard models etc. The design and development of the product will be reviewed in two stages for awarding internal marks. The end semester examination mark will be based on the project report (Introduction; Literature survey; Methodology; Simulation; Experimentation; Analysis and Discussion; and Conclusion) and their demonstration followed by oral examination of their new product by internal examiner.

<b>S.No</b>	<b>ECE, EEE, ACT &amp; VLSI Design</b>	<b>Mech &amp; Civil</b>
1	VLSI Subsystem Design	Automotive / Aerospace
2	Embedded System Design	Medical components.
3	IoT based System Design	Industrial components
4	AI based System Design	Machining / Forming
5	Energy Innovative Design	Casting tool, fixtures, & supplementary components.
6	Power / Industrial Electronics	Consumer products

**Teaching-Learning Process Pedagogy:** Lecture Method, PPT

**RBT Level:** L1-L4

**Total**

**75**

**Suggested Activities:** Case Study, Quiz, Group Task, Review of GATE questions

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

### **Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain global trends, product development concepts, methodologies, and the product life cycle involved in product development.
- CO2: Apply rapid prototyping techniques and tools to develop mechanical and electronic prototypes.
- CO3: Develop basic industrial product designs using sketching, CAD modeling, assembly, and rendering techniques.
- CO4: Design user interfaces by applying UI/UX principles, design elements, and human-computer interaction concepts
- CO5: Develop and deploy basic applications by applying software development concepts, databases, APIs, and cloud services for product implementation

### **Text Books:**

## MICROCONTROLLER AND INTERFACING

<b>Course Code</b>	<b>24EC412</b>	<b>Course Type</b>		<b>INTEGRATED</b>	
<b>Course Offered to</b>	<b>ECE, ACT , VLSI &amp; EEE</b>				
<b>Total Teaching Periods</b>	<b>75</b>	<b>L:T:P</b>	<b>3:0:2</b>	<b>Credits</b>	<b>4</b>
<b>Handled by</b>	<b>ECE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite:** Basic understanding of digital electronics, microprocessor fundamentals, and programming in C.

### **Course Objectives: To impart the knowledge of**

1. Microcontroller architecture and programming concepts using the 8051 microcontroller.
2. PIC microcontroller architecture, peripherals, and embedded programming techniques.
3. ARM Cortex-M microcontroller architecture and programming for embedded applications
4. Interfacing techniques for sensors, actuators, and peripheral devices in embedded systems.
5. Modern embedded platforms such as Arduino and Raspberry Pi for developing IoT and real-time applications.

### **Unit: I            8051 MICROCONTROLLER**

**15**

Introduction to microcontrollers and embedded systems – 8051 architecture and block diagram – Pin configuration and functional description – Memory organization: Program memory, Data memory, SFRs – I/O ports and port programming – Timers and counters – Serial communication – Interrupts and interrupt handling – Instruction set and addressing modes – Programming 8051 using Embedded C.

#### **PRACTICALS :**

1. Programming using arithmetic, logical and bit manipulation instructions of 8051
2. Configuring and programming Timer and Interrupts in 8051 microcontrollers

**Teaching-Learning Process    Pedagogy:** Lecture, Peer Learning.

**RBT Level:** Theory: L1,L2,L3    Practical: L4

### **Unit: II            PIC MICROCONTROLLER**

**15**

Overview of PIC microcontroller family – Harvard architecture and RISC features – PIC16F/18F architecture – Memory organization and register set – I/O port programming – Timers and CCP modules – ADC and PWM – Interrupt system – PIC instruction set – Programming using Embedded C and MPLAB

#### **PRACTICALS:**

1. Simple Programming Using PIC Microcontroller (LCD interfacing, Switch interfacing, ADC interfacing)

**Teaching-Learning Process    Pedagogy:** Lecture, NPTEL videos.

**RBT Level:** Theory: L1,L2,L3    Practical: L4

### **Unit: III ARM MICROCONTROLLER ( CORTEX-M SERIES**

**15**

Introduction to ARM architecture and evolution – ARM Cortex-M0/M3/M4 overview – Register set and memory map – Exception and interrupt handling (NVIC) – GPIO programming – Timers and SysTick – Serial interfaces: UART, SPI, I2C – Power management and low-power modes – Introduction to CMSIS – Embedded C programming for ARM

#### **PRACTICALS:**

1. Simple Programming using ARM Processor
2. Interfacing LED, LCD, Switch and 4x4 Keypad with ARM processor.
3. Interfacing Sensor and Actuator with ARM processor

**Teaching-Learning Process Pedagogy:** Lecture, PPT, YouTube videos.

**RBT Level:** Theory:L1,L2,L3 Practical: L4

### **Unit: IV INTERFACING DEVICES AND PERIPHERALS**

**15**

Interfacing concepts and standards – LED, switch and relay interfacing – Seven-segment and LCD interfacing – Keypad interfacing – ADC and DAC interfacing – Sensor interfacing (temperature, proximity, IR) – Motor interfacing (DC, stepper, servo) – Communication interface devices – Case study: Embedded monitoring and control system.

#### **PRACTICAL:**

1. Temperature Control System
2. Stepper motor Control
3. DC Motor with Speed Control using PWM

Memory Interfacing

**Teaching-Learning Process Pedagogy:** PPT, YouTube videos

**RBT Level:** Theory:L1,L2,L3 Practical: L4

### **Unit: V ARDUINO AND RASPBERRY Pi**

**15**

#### **Part A: Arduino**

Arduino architecture and variants – ATMEGA vs ARM-based Arduino boards – Arduino IDE and program structure – Digital and analog I/O programming – Sensor and actuator interfacing – Serial communication and libraries

#### **Part B: Raspberry Pi**

Raspberry Pi architecture and SoC – ARM processor overview – GPIO programming – Interfacing sensors and displays – Linux OS basics – Python programming introduction – Arduino vs Raspberry Pi comparison

#### **PRACTICAL:**

1. Introduction to Arduino platform and programming
2. Introduction to Raspberry PI platform and python programming.
3. Interfacing sensors with Raspberry PI.
4. Communicate between Arduino and Raspberry PI using any wireless medium.
5. Setup a cloud platform to log the data.
6. Log Data using Raspberry PI and upload to the cloud platform

**Teaching-Learning Process**     **Pedagogy:** PPT, YouTube videos

**RBT Level:** Theory:L1,L2,L3    Practical: L4

**Total**

**75**

**Suggested Activities :** Gate questions, Tutorial, Mini project, case study

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

CO1: Explain the internal architecture and functional blocks of a microcontroller.

CO2: Develop assembly/C programs using appropriate instruction sets and addressing modes

CO3: Interface peripheral devices with microcontrollers for real-time applications.

CO4: Utilize timers, interrupts, and communication protocols in embedded systems.

CO5: Design microcontroller-based systems to solve practical engineering problems.

## ELECTRICAL MACHINES LAB-I

<b>Course Code</b>	<b>24EE421</b>	<b>Course Type</b>		<b>PRACTICAL</b>	
<b>Course Offered to</b>	<b>EEE</b>				
<b>Total Teaching Periods</b>	<b>60</b>	<b>L:T:P</b>	<b>0:0:4</b>	<b>Credits</b>	<b>2</b>
<b>Teaching Department</b>	<b>EEE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>60 Marks</b>	<b>40 Marks</b>

**Prerequisite :** Basic understanding of electrical circuits and machines.

**Course Objectives:** To impart the knowledge of

1. Operating principles and characteristics of DC machines.
2. Conducting load tests on DC motors and generators.
3. Different testing methods such as Swinburne's and Hopkinson's tests.
4. Transformer performance analysis using various tests
5. Speed control methods and loss separation techniques in electrical machines.

**PRACTICALS:**

**60**

1. Open circuit and load characteristics of self Excited DC shunt generator
2. Load characteristics of seperately Excited DC shunt generator
3. Load test on DC shunt motor and Swinburne's test
4. Load test on DC series motor
5. Load test on DC compound motor.
6. Speed control of DC shunt motor
7. Hopkinson's test
8. Load test on single-phase transformer
9. Load test on three phase transformer
10. Open circuit and short circuit tests on single phase transformer and Sumpner's test
11. Separation of no load losses in transformers

**List of Equipments:**

<b>S.No</b>	<b>Name of the Equipment</b>	<b>Quantity in Nos</b>
1	DC Shunt motor	3
2	DC Series motor	1
3	DC Compound motor	1
4	DC Shunt motor coupled with DC shunt generator	2
5	DC Shunt motor coupled with DC compound generator	1
6	Single-phase Transformer	2
7	Three Phase Transformer	1
8	Single phase and three phase Auto Transformer	Each 2
9	Rheostats 50 Ohms 5A, 1100 Ohms 1.1A	Each 2
10	Resistive load( Single and Three phase)	Each 2
11	Tachometer	2
12	Measuring Instruments (0-2A) (0-10A) Ammeter	Each 2
	Measuring Instruments (0-300V)(0-600V) Voltmeter	Each 2
	Measuring Instruments ( 600V/10A) LPF and UPF Wattmeter	Each 2

**Suggested Activities :** Puzzle Activity, Role play , Case study, Review of GATE questions

**Evaluation Methods:** Performance in Suggested day to day activities, Model practical and End Semester Examinations

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Perform open circuit and load tests on DC generators and analyze their characteristics.
- CO2: Conduct load tests on DC motors and evaluate their performance parameters.
- CO3: Apply indirect testing methods such as Swinburne’s and Hopkinson’s tests.
- CO4: Perform transformer tests (OC, SC, load, Sumpner’s) and determine efficiency and regulation.
- CO5: Analyze losses, efficiency, and speed control techniques in electrical machines.

**Text Books:**

- T1: A Textbook of Electrical Technology – Vol. II – *B. L. Theraja and A. K. Theraja*, S. Chand Publications.

## INSTRUMENTATION AND CONTROL LAB

<b>Course Code</b>	<b>24EE422</b>	<b>Course Type</b>		<b>PRACTICAL</b>	
<b>Course Offered to</b>	<b>EEE</b>				
<b>Total Teaching Periods</b>	<b>30</b>	<b>L:T:P</b>	<b>0:0:2</b>	<b>Credits</b>	<b>1</b>
<b>Handled by</b>	<b>EEE</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>60 Marks</b>	<b>40 Marks</b>

**Prerequisite:** Basic knowledge of electrical measurements, electronic circuits, and control system fundamentals.

**Course Objectives:** To impart knowledge on

1. The characteristics and calibration of electrical and non-electrical transducers..
2. Measurement techniques using resistive, inductive, and capacitive bridge circuits.
3. Signal conditioning and instrumentation amplifier design for transducer outputs..
4. Analog-to-digital and digital-to-analog conversion and interfacing techniques..
5. Process control applications using PLC, data acquisition systems, and MATLAB-based control system analysis.

### **PRACTICALS:**

**30**

1. Static and Dynamic characteristics of Electrical and Non electrical Transducers
2. Design a Resistive, Inductive and Capacitive Bridges to measure the unknown physical parameter
3. Design an instrumentation amplifier to amplify the output obtained from a transducer
4. Design A/D and D/A converters to interface the analog system with the digital platform
5. Calibration of analog instruments
6. Calibration of digital instruments
7. Study of characteristics of Optical Sensor
8. PLC programming for Process Control Applications
9. Development of GUI application for Process Control
10. Demonstration of PC based data acquisition with complete closed loop control including sensor and actuator dynamics
11. Evaluate the transfer function of DC motor
12. Construct Root locus plot of a second-order system using MATLAB
13. Experiment with Bode plot of a second-order system using MATLAB
14. Construct Nyquist plot of a second-order system using MATLAB
15. Design of PID controllers and evaluation of closed loop performance.

**List of Equipments:**

S.No	Name of the Equipment	Quantity in Nos
1	LVDT, STRAIN GAUGE	Each 1
2	Optical Sensor	2
3	Instrumentation amplifier	1
4	Resistive, Inductive and Capacitive Bridges	Each 1
5	A/D and D/A converters	Each 1
6	Ammeters and voltmeters	Each 2
7	DC shunt motor	1
8	MATLAB for simulation	

**Suggested Activities:** Puzzle Activity, Role play, Case study, Review of GATE questions.

**Evaluation Methods:** Performance in Suggested day to day activities, Model practical and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

CO1: Analyze and evaluate the performance characteristics of transducers under static and dynamic conditions.

CO2: Design and implement bridge circuits for measurement applications.

CO3: Interface analog systems with digital platforms using A/D and D/A converters and implement PC-based data acquisition systems

CO4: Calibrate and validate the accuracy of analog and digital instruments using standard procedures.

CO5: Model and analyze control systems using MATLAB, and design PID controllers to achieve desired closed-loop performance.

**CO-PO & PSO Mapping:**

CO	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	PSO1	PSO2	PSO3

## DISASTER MANAGEMENT

<b>Course Code</b>	<b>24AE401</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>Common to All</b>				
<b>Total Teaching Periods</b>	<b>30</b>	<b>L:T:P</b>	<b>2:0:0</b>	<b>Credits</b>	<b>0</b>
<b>Handled by</b>	<b>MECH</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite :** Basic awareness of environmental and disaster-related issues.

**Course Objectives:** To provide knowledge of

1. The fundamental concepts of disasters, hazards, vulnerability, resilience, and risk.
2. Different types of disasters and their social, economic, environmental, and health impacts.
3. Disaster risk reduction strategies and the roles of institutions at local, state, and national levels.
4. The relationship between disasters, development activities, and climate change.
5. Disaster management practices using case studies, hazard assessment, and GIS-based technologies.

### **Unit: I INTRODUCTION TO DISASTERS 6**

Definition: Disaster, Hazard, Vulnerability, Resilience, Risks – Disasters: Types of disasters – Earthquake, Landslide, Flood, Drought, Fire etc - Classification, Causes, Impacts including social, economic, political, environmental, health, psychosocial, etc.- Differential impacts- in terms of caste, class, gender, age, location, disability - Global trends in disasters: urban disasters, pandemics, complex emergencies, Climate change- Dos and Don'ts during various types of Disasters.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

### **Unit: II APPROACHES TO DISASTER RISK REDUCTION (DRR) 6**

Disaster cycle - Phases, Culture of safety, prevention, mitigation and preparedness community based DRR, Structural- nonstructural measures, Roles and responsibilities of- community, Panchayati Raj Institutions / Urban Local Bodies (PRIs/ULBs), States, Centre, and other stake-holders- Institutional Processes and Framework at State and Central Level- State Disaster Management Authority(SDMA) – Early Warning System – Advisories from Appropriate Agencies

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

### **Unit: III INTER-RELATIONSHIP BETWEEN DISASTERS AND DEVELOPMENT 6**

Factors affecting Vulnerabilities, differential impacts, impact of Development projects such as dams, embankments, changes in Land-use etc.- Climate Change Adaptation- IPCC Scenario and Scenarios in the context of India - Relevance of indigenous knowledge, appropriate technology and local resources.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Unit: IV      DISASTER RISK MANAGEMENT IN INDIA      6**

Hazard and Vulnerability profile of India, Components of Disaster Relief: Water, Food, Sanitation, Shelter, Health, Waste Management, Institutional arrangements (Mitigation, Response and Preparedness, Disaster Management Act and Policy - Other related policies, plans, programmes and legislation – Role of GIS and Information Technology Components in Preparedness, Risk Assessment, Response and Recovery Phases of Disaster – Disaster Damage Assessment.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Unit: V      DISASTER MANAGEMENT: APPLICATIONS AND CASE STUDIES      6**  
**AND FIELD WORKS**

Landslide Hazard Zonation: Case Studies, Earthquake Vulnerability Assessment of Buildings and Infrastructure: Case Studies, Drought Assessment: Case Studies, Coastal Flooding: Storm Surge Assessment, Floods: Fluvial and Pluvial Flooding: Case Studies; Forest Fire: Case Studies, Man Made disasters: Case Studies, Space Based Inputs for Disaster Mitigation and Management and field works related to disaster management.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Total      30**

**Suggested Activities :** Case Study, Quiz, Assignment topics, Class Presentation

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain the concepts of ethical management, managerial ethics, professional ethics, and social responsibility.
- CO2: Analyze ethical decision-making processes and apply ethical principles in crisis management situations.
- CO3: Evaluate stakeholder relationships and sustainability issues in ethical management. (L2, L3)
- CO4: Analyze individual variables such as ethical awareness, judgment, courage, and emotions in managerial decision-making.
- CO5: Apply ethical management techniques and skills to resolve dilemmas and promote an ethical organizational culture.

## INDUSTRIAL SAFETY

<b>Course Code</b>	<b>24AU402</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>Common to All</b>				
<b>Total Teaching Periods</b>	<b>30</b>	<b>L:T:P</b>	<b>2:0:0</b>	<b>Credits</b>	<b>-</b>
<b>Handled by</b>	<b>MECH</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>40 Marks</b>	<b>60 Marks</b>

**Prerequisite :** Basic knowledge of engineering workshop practices and mechanical equipment.

**Course Objectives:** To provide knowledge of

1. Industrial safety practices, accident causes, hazard control measures, fire prevention methods, and safety regulations in industrial environments.
2. Maintenance engineering concepts, functions of maintenance departments, types of maintenance, and maintenance cost considerations.
3. Wear and corrosion mechanisms and their prevention using suitable lubrication and protection techniques.
4. Systematic fault tracing methods and diagnostic procedures used in mechanical and electrical equipment.
5. Periodic inspection and preventive maintenance procedures for machine tools, pumps, compressors, motors, and DG sets.

### **Unit: I      INDUSTRIAL SAFETY 6**

Accident, causes, types, results and control, mechanical and electrical hazards, types, causes and preventive steps/procedure, describe salient points of factories act 1948 for health and safety, wash rooms, drinking water layouts, light, cleanliness, fire, guarding, pressure vessels, etc., Safety color codes. Fire prevention and firefighting, equipment and methods.

**Teaching-Learning Process      Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

### **Unit: II      MAINTENANCE ENGINEERING 6**

Definition and aim of maintenance engineering, Primary and secondary functions and responsibility of maintenance department, Types of maintenance, Types and applications of tools used for maintenance, Maintenance cost & its relation with replacement economy, Service life of equipment.

**Teaching-Learning Process      Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

### **Unit: III      WEAR AND CORROSION AND THEIR PREVENTION 6**

Wear- types, causes, effects, wear reduction methods, lubricants-types and applications, Lubrication methods, general sketch, working and applications, i. Screw down grease cup, ii. Pressure grease gun, iii. Splash lubrication, iv. Gravity lubrication, v. Wick feed lubrication vi. Side feed lubrication, vii. Ring lubrication, Definition, principle and factors affecting the corrosion. Types of corrosion, corrosion prevention methods.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Unit: IV      FAULT TRACING** **6**

Fault tracing-concept and importance, decision tree concept, need and applications, sequence of fault-finding activities, show as decision tree, draw decision tree for problems in machine tools, hydraulic, pneumatic, automotive, thermal and electrical equipment's like, i. Any one machine tool, ii. Pump iii. Air compressor, iv. Internal combustion engine, v. Boiler, vi. Electrical motors, Types of faults in machine tools and their general causes.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Unit: V      PERIODIC AND PREVENTIVE MAINTENANCE** **6**

Periodic inspection-concept and need, degreasing, cleaning and repairing schemes, overhauling of mechanical components, overhauling of electrical motor, common troubles and remedies of electric motor, repair complexities and its use, definition, need, steps and advantages of preventive maintenance. Steps/procedure for periodic and preventive maintenance of: i. Machine tools, ii. Pumps, iii. Air compressors, iv. Diesel generating (DG) sets, Program and schedule of preventive maintenance of mechanical and electrical equipment, Advantages of preventive maintenance. Repair cycle concept and importance.

**Teaching-Learning Process**      **Pedagogy:** Lecture Method, PPT  
**RBT Level:** L1-L3

**Total** **30**

**Suggested Activities:** Case Study, Quiz, Assignment topics, Class Presentation, Review of GATE questions.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain industrial safety concepts, accident causes, hazards, fire prevention methods, and relevant provisions of the Factories Act, 1948.
- CO2: Describe maintenance engineering principles, types of maintenance, tools used, and cost-replacement analysis.
- CO3: Analyze wear and corrosion mechanisms and recommend suitable prevention and lubrication methods.
- CO4: Apply fault tracing techniques using decision tree methods for mechanical, hydraulic, pneumatic, thermal, and electrical systems.
- CO5: Develop periodic and preventive maintenance plans for industrial equipment and evaluate their effectiveness.

## GENDER SENSITIZATION

<b>Course Code</b>	<b>24AU403</b>	<b>Course Type</b>		<b>THEORY</b>	
<b>Course Offered to</b>	<b>Common ton All</b>				
<b>Total Teaching Periods</b>	<b>30</b>	<b>L:T:P</b>	<b>2:0:0</b>	<b>Credits</b>	<b>2</b>
<b>Handled by</b>	<b>MECH</b>	<b>Assessment Methods</b>		<b>IAT</b>	<b>ESE</b>
				<b>50 Marks</b>	<b>50 Marks</b>

**Prerequisite :** Basic awareness of societal values, ethics, and human relationships.

**Course Objectives:** To provide knowledge of

1. Fundamental concepts of gender studies, gender identity, gender roles, and the social construction of gender in society.
2. Gender relations in society, including patriarchy, intersectionality, and gender representation in education, media, and professional environments.
3. Gender issues and challenges in workplaces and industries, particularly in science, technology, and engineering sectors.
4. Legal provisions, constitutional rights, and policy frameworks that promote gender equality and protect individuals from discrimination and harassment.
5. Inclusive practices, ethical responsibilities, and leadership approaches that support gender diversity and equality in engineering and professional spaces.

### **Module: I INTRODUCTION TO GENDER STUDIES**

- Sex and Gender: Conceptual differences
- Gender identity and gender expression
- Social construction of gender
- Gender roles and stereotypes
- Gender and culture
- Overview of global equality principles promoted by the United Nations

**Teaching-Learning Process Pedagogy:** Chalk and Talk

**RBT Level:** L1- L4

### **Module: II GENDER AND SOCIETY**

**6**

- Patriarchy and power structures
- Intersectionality (caste, class, disability, race)
- Gender representation in media
- Gender and education
- Women in STEM fields
- Gender bias in academic institutions
- Case studies from engineering education environments.

**Teaching-Learning Process**     **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**Module: III    GENDER IN WORKPLACE & INDUSTRY**

**6**

- Gender diversity in corporate environments
- Equal opportunity and pay equity
- Gender bias in recruitment and promotion
- Workplace harassment and prevention
- Role of the International Labour Organization in promoting workplace equality
- Inclusive team building in engineering organizations

**Teaching-Learning Process**     **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**MODULE: IV    LEGAL & POLICY FRAMEWORK**

**6**

- Constitutional provisions for equality
- Prevention of Sexual Harassment (POSH) guidelines
- Rights of LGBTQ+ individuals
- Institutional grievance redressal mechanisms
- Regulatory framework guidance from the University Grants Commission (where applicable)
- Students should understand institutional compliance standards aligned with bodies such as the University Grants Commission (if applicable in Indian context).

**Teaching-Learning Process**     **Pedagogy:** Chalk and Talk, PPT

**RBT Level:** L1- L4

**Module: V    BUILDING INCLUSIVE ENGINEERING SPACES**

**6**

- Gender-sensitive communication
- Ethical responsibility of engineers
- Creating inclusive campus culture organizations
- Discussion on how inclusive teams improve innovation in tech companies like Google and Microsoft.
- Leadership and ally ship
- Diversity and innovation,
- Case studies from global technology

**Teaching-Learning Process**     **Pedagogy:** Lecture Method, PPT

**RBT Level:** L1,L2,L3

**Total**

**30**

**Suggested activities :** Case studies, Group discussions, Role play exercises; Industry case analysis, assignments.

**Evaluation Methods:** Performance in Suggested activities, IAT and End Semester Examinations.

**Course Outcomes:**

After successful completion of this course, the students should be able to

- CO1: Explain the concepts of sex, gender, gender identity, gender roles, and the social construction of gender.
- CO2: Analyze gender issues in society, including patriarchy, intersectionality, and gender representation in education and media.
- CO3: Examine gender challenges and biases in workplaces, particularly in engineering and technology sectors.
- CO4: Explain legal provisions, institutional policies, and regulatory frameworks that support gender equality and protection.
- CO5: Apply inclusive practices and ethical principles to promote gender-sensitive communication and inclusive professional environments.
