Artificial Intelligence of Machine Learning

Google Cloud

07/19/2019  
Sulthan Mahaideen N.K

Has successfully completed the online, non-credit Specialization

## Machine Learning with TensorFlow on Google Cloud Platform

This two-course online specialization teaches course participants how to write distributed machine learning models that scale in TensorFlow, scale out the training of these models, and offer high performance predictions. Also featured is the conversion of raw data to features in a way that allows ML to learn important characteristics from the data and bring human insight to bear on problems. It also teaches how to incorporate the right mix of knowledge of the theory to solve specific types of ML problems. Course participants experimented with end-to-end ML, starting from building an ML-focused strategy and progressing to model training, optimization, and productionization with hands-on labs using Google Cloud Platform.
