

# MOHAMED SATHAK A J COLLEGE OF ENGINEERING

(Approved by AICTE, New Delhi and affiliated to Anna University, Chennai)

Siruseri IT Park, Egattur, Chennai - 603 103

## 2.2.1

S.No	Content	Page no.
1.	Bridge Course – Time Table	02-04
2.	Bridge Course – Course Content	05-10
3.	Bridge Course – Attendance	11-13
4.	Industry Visit : <ul style="list-style-type: none"><li>• Requisition Letter to Industry</li><li>• Approve Letter from Industry</li><li>• Student Attendance</li><li>• Consent Letter from Parent</li><li>• Photo</li><li>• Report</li></ul>	14-39
5.	Guest Lecture/Workshop/Seminar	40-65
6.	Slow Learners- EPC Schedule, Mentor Book	66-72
7.	Name List for Slow Learners	73-76
8.	Advanced Learners- Co-Curricular & Extra Curricular Activities	77-87
9.	Course File-Content	88-91
10.	Competitive Exam.	92-93
11.	Student Paper Publication	94-102
12.	Additional Library Card	103

MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING, CHENNAI – 603103

DEPARTMENT OF SCIENCE AND HUMANITIES

BRIDGE COURSE SYLLABUS

ENGLISH

**UNIT- I**

Self introduction- Informal - Just a minute - One minute presentation- Technical Topic - One minute presentation-Non Technical Topic - Picture Interpretation - Picture Interpretation and presentation.

**UNIT- II**

Role play Formal - Role play Informal - Listening to speech of famous personality - Listening to unknown passage and answer - Listening to Ted Talk - Pronunciation practice- Vowels and consonants - Pronunciation practice- Tones, Stress and pause.

**UNIT – III**

Interpretation of story - Interpretation of poem - Reading newspaper - Reading unknown passages - Reading tongue twisters.

**UNIT – IV**

Movie review - Guess the meaning from context - Interpretation of Charts/Pictures - Dictation-Word building - Sentence formation-Homophones/Homonyms.

**UNIT –V**

Rearrange words and sentences - Letter writing-Informal - Letter writing-Formal - Story writing – Speaking Test – Writing Test.

**Total : 20 Periods**

*K. Saipriya*  
(MS. SAIPRIYA)

AP/ English

*DV. Bala Krishnan*  
DV. BALA KRISHNAN

Chennai-603 103.

MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING, CHENNAI – 603103

DEPARTMENT OF SCIENCE AND HUMANITIES

BRIDGE COURSE SYLLABUS

ENGINEERING MATHEMATICS- I

**UNIT 1: Differential Calculus**

Representation of functions – Limit of a functions- Continuity- Derivatives – Differentiation rules- Maxima and minima of functions of one variable.

**UNIT 2: Functions of Several Variables**

Partial differentiation- Homogeneous functions and Euler's theorem- Total derivative- Change of variables-Jacobians-Partial differentiation of implicit functions- Taylor's series for functions of two variables- Maxima and Minima of functions of two variables – Lagrange's Method of undetermined multipliers.

**UNIT 3: Integral Calculus**

Definite and indefinite integrals-Substitution rule – Techniques of integration- Integration by parts, Trigonometric integrals, Trigonometric Substitutions, integration of rational functions by partial fraction, Integration of irrational functions- Improper integrals.

**UNIT 4: Multiple Integrals**

Double integrals- change of order of integration – Double integrals in polar coordinates- Area enclosed by plane curves- Triple integrals – Volume of solids- Change of variables in double and triple integral.

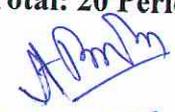

**UNIT 5: Differential Equations**

Higher order linear differential equations with constant coefficients- Method of variation of parameters- Homogenous equation of Euler's and Legendre's type-System of simultaneous linear differential equations with constant coefficients – Method of undetermined coefficients.

Total: 20 Periods

  
(MS. SUDHA)  
AP/ maths

  
PRINCIPAL

MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING, CHENNAI – 603103

DEPARTMENT OF SCIENCE AND HUMANITIES

BRIDGE COURSE SYLLABUS

ENGINEERING PHYSICS

**UNIT I - PROPERTIES OF MATTER**

Elasticity – Stress, strain and its uses - factors affecting elastic modulus - tensile strength – torsional stress – twisting couple - torsion pendulum - bending of beams - bending moment.

**UNIT II WAVES AND FIBER OPTICS**

Oscillatory motion – forced and damped oscillations - progressive waves. Lasers- Population inversion - Active medium-Resonant cavity-Types of LASER-Optics Fiber-Principle of fiber optic communication-Total internal reflection-Acceptance angle-Numerical aperture-Types of optical fiber-Fiber optic sensors.

**UNIT III THERMAL PHYSICS**

Temperature-Heat-Evaporation, Boiling and Melting-Expansion of solids and liquids-Transfer of thermal energy or heat energy-Conduction-Convection-Radiation-Thermal conductivity-Method of determine thermal conductivity-Thermal insulation-Properties of the thermal insulating materials-Heat exchanger Principle of Refrigeration-Oven.

**UNIT IV QUANTUM PHYSICS**

Features of quantum physics-State planks hypothesis-Planck's law of radiation-Compton Effect-Matter waves and its Properties-De-Broglie hypothesis-Tunneling effect-Tunneling microscope-Application of quantum theory.

**UNIT V CRYSTAL PHYSICS**

Crystalline materials-Amorphous materials-Single crystal-Poly-crystal-Lattice-Unit cell-Crystal systems-Coordination number-Packing factor -Miller indices -Crystal growth-Solidification and Crystallization Melt Growth-Solution Growth-Crystal imperfection (or) defect-Point defect-Line defect.

(MS. SHOBANA)  
AP/Physics

PRINCIPAL  
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING  
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park  
Chennai-603 103.

Total : 20 Periods

DR. ABALA KRISHNAN  
HOD- SBH

**MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING, CHENNAI – 603103**

**DEPARTMENT OF SCIENCE AND HUMANITIES**

**BRIDGE COURSE SYLLABUS**

**ENGINEERING CHEMISTRY**

**UNIT-I POLYMER CHEMISTRY**

Polymer-monomer - degree of polymerisation -classification of polymers-plastics-glass transition temperature [T<sub>g</sub>]-Molecular mass(M<sub>n</sub>,M<sub>w</sub>,M<sub>v</sub>)-Types of polymerization

**UNIT-II THERMODYNAMICS**

Terminologies-Types of system-properties of system-Process and their types-Internal energy enthalpy-Entropy-Helmholtz free energy-Gibbs free energy

**UNIT-III PHOTOCHEMISTRY AND SPECTROSCOPY**

Photochemical process -photo physical process-Laws of photochemistry-Quantum efficiency Jablonski diagram-Spectroscopy-spectrum-types of spectroscopy-UV-Visible spectroscopy-IR spectroscopy

**UNIT-IV PHASE RULE AND ALLOYS**

Phase-Component-Degree of freedom-one component system-two component system Condensed system-congruent and incongruent melting point -Alloys-Heat treatment.

**UNIT-V NANOCHEMISTRY**

Terminologies-synthesis of nano materials-properties of nano particles-application of nano particles.

  
DV. BALA KRISHNAN  
HOD - S & H

Chennai-603 103.

MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING, CHENNAI – 603103

DEPARTMENT OF SCIENCE AND HUMANITIES

BRIDGE COURSE SYLLABUS

PYTHON PROGRAMMING

### UNIT I

Introduction to Algorithms, Building Blocks of Algorithms, Pseudocode and Flowcharts, Programming Language, Arithmetic Problem Solving, Simple Strategies for Developing Algorithms.

### UNIT II DATA TYPES, EXPRESSIONS, STATEMENTS

Comments-Identifiers-Keywords-Variables and Assignment-Expressions and Statements, Indentation, Data types –Data Type Conversions-Input and Output Statements, Operators Precedence-Basics of Functions, Parameters and Arguments.

### UNIT III CONTROL FLOW, FUNCTIONS

If statement, If-else Statement, if-elif-else Statement, While loop, For loop, Break Statement, Continue Statement, Pass Statement-Keyword Arguments, Default Arguments, Global and Local Variables, Function Composition, Recursion.

### UNIT IV LISTS, TUPLES

Introduction to Lists, Basic List Operations, Built-in List Functions, List Methods-Introduction to Tuples, Basic Tuples Operations, Built-in Tuple Functions-List Comprehensions, Set Comprehensions.

### UNIT V MODULES

Creation of modules, Import Statement, From Import Statement, Using Python Packages, Namespace.

BRIDGE COURSE SYLLABUS

ANIMATION & GAMING

**UNIT-I**

The Basics of Scratch - First Project Basics - Adding Interactivity - Math Concepts - Ask and join blocks – Logic - Adding Sound - Costumes and Background Changes.

**UNIT- II**

Classroom Management - Scratch Accounts - Algorithms & copying in Scratch - Bounce Game - Fruit Catcher Game.

**UNIT-III**

Jumping Game in Scratch - Car Race Game - Create a story using scratch - A Clock On Scratch.

REPORT ON INDUSTRIAL VISIT

Department of Information Technology

Name of the Industry	Sathish Dhawan Space Centre (ISRO-Sriharikota)
Date of Visit	06-08-2019
Contact Person	Mr.Vishwanatha Sharma
Target Audience and No of Students Participated	Students & 24
<b>Brief note about the Visit / Curriculum gap addressed :</b> We went for an Industrial visit to Sathish Dhawan Space Centre (ISRO-Sriharikota) They presented a video session about overview of ISRO and its organization. Visited Data Transmission Laboratory and Communication Systems.	
<b>Benefit and Knowledge Gained :</b> Learned about how Data Transmission take place.	
<b>Relevance with Academic :</b> Students Learned about basic concepts like data trasmission and long distance communication in space research.	

Supporting Document Required :

INDUSTRIAL VISIT – FEEDBACK

COMPANY NAME: BSNL

PLACE: Maraimalai Nagar

DATE: 31.7.2018

TIME SLOT: 10:30AM to 1:00 PM

YEAR/SEMESTER: II/III

Total No. of Students participated: 7

Faculty accompanied: Mr.M.Mohideen AbdulKader, AP/CSE.

Feedback:

BSNL RTTC (Regional Telecom Training Centre) are one of the best training centers of BSNL (Bharat Sanchar Nigam Limited), imparting training on Telecommunications, ICT & Skill development. Demo on latest telecom equipments was given by the experts of RTTC. Optical Fiber cable and its components and functionalities were well explained to the students. Last but not the least we visited the museum, where olden day's equipments were placed.

Overall Feedback: Good and useful visit.

REPORT ON INDUSTRIAL VISIT

Department of Information Technology

Name of the Industry	National Atmospheric Research Laboratory
Date of Visit	15-02-2019
Contact Person	Dr.V.Ravi Kiran
Target Audience and No of Students Participated	Students & 24
<b>Brief note about the Visit / Curriculum gap addressed :</b> We went for an Industrial visit to National Atmospheric Research Laboratory (NARL), Gadanki, Andhra Pradesh. They presented a video session about overview of NARL and its organization. Visited Raleigh Doppler Lidar and Lidar Laboratory.	
<b>Benefit and Knowledge Gained :</b> Learned about data storage, and how NARL send and receive data.	
<b>Relevance with Academic :</b> Students Learned about High Performance Computers (HPC) and its applications in Atmospheric research.

INDUSTRIAL VISIT – FEEDBACK

COMPANY NAME : National Atmospheric Research Laboratory(NARL)  
DATE OF VISIT : 15.2.2019  
PLACE :Gadanki, Andra Pradesh  
TIME SLOT : 11:00 AM – 12:30 PM  
YEAR : II, III & IV Year  
TOTAL NO. OF STUDENTS : 24  
FACULTY ACCOMPANIED : Mrs.V.Subapriya,AP/IT & Mr.M.Ahsan Shariff ,AP/IT

We went for an Industrial visit to National Atmospheric Research Laboratory(NARL), Gadanki, Andra Pradesh.

**General Observation:**

- They presented a video session about overview of NARL and its origination.
- Visited Raleigh Doppler Lidar and Radar laboratory.

**IT Perspectives:**

- Visited vast data storage laboratory, from where datas are send for ISRO-SHAR.
- Explained in detail about High Performance Computers (HPC) and its applications in Atmospheric research.
- Explained the operations of Data tier, Clusters and Storage area networks.
- Shared knowledge about getting jobs at NARL.

Session was really helpful for the students.

Respected Sir,

**SUB: Industrial Visit- Reg.**

We have arranged one day Industrial visit on National Atmospheric Research Laboratory, Tirupathi for II, III and IV Year Students of strength 29 on 15-02-2019 – Friday.

I kindly request you to approve this Industry visit and sanction the amount of Rs 3,100/-. Also I request you to arrange the transport facility on that day for the below given address. Please do the needful.

The details are below,

No. of students = 29\*100 = 2900

No. of faculty = 2\*100 = 200

TOTAL: Rs.3,100/-

Schedule: Entry fee 2500  
Grand Total: 5600

Departure from college: 5.30 am

Session 1: 10.30 am to 12.00 noon

Departure from organization: 2.00 pm

**Organization Address:**

Department of Space  
Government of India  
National Atmospheric Research Laboratory,  
Gadanki – 517 112,  
India.

**Write-up on Event**  
(to publish in the college website)

The workshop started with 60 participants from different institutions on 21.12.2020 at 10.00 am with a welcome address and introduction of chief guest Mr.D.Weslin, HOD/Associate Prof, Department of IT at Siruseri. Chief guest was introduced by Ms. Reshma Farhin AP/CSE,MSAJCE.

The first day 21.12.2020 (Monday) session was handled by the guest speaker Dr.Ben Sujitha, Professor, Jeppiar College of Engg, Chennai. The speaker elaborated in detail about, **Computer Architecture**. During the session she explained various concepts in Computer Architecture to make the participants understand clearly. In the discussion time with the participants, she answered all the questions patiently up to the participants' satisfaction.

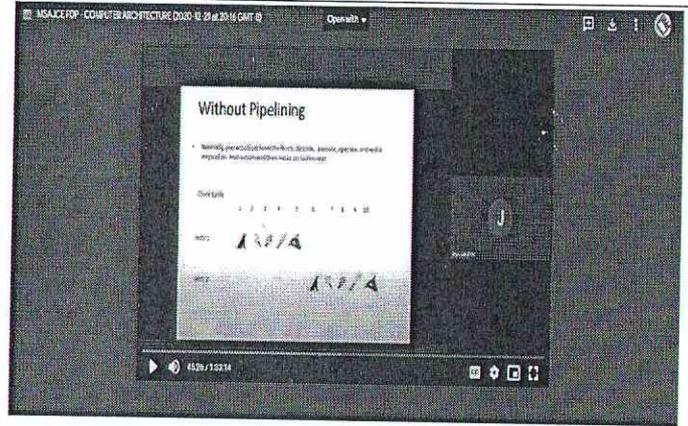

The second day 22.12.2020(Tuesday) session was handled by the guest speaker . Mrs.C.Jeya Lakshmi, Assistant Professor, Mohamed Sathak Engineering College,kilakarai .She explained in detail about hazard and pipelining concepts. During the discussion session, she meticulously elaborated in detail for the participants.

PRINCIPAL

**Abstract:** In recent years, Lung Cancer has become a serious disease that threatens the health and mind of human. Efficient predictive modeling is required for medical researchers and practitioners. This study proposes a lung cancer prediction model based on naïve Bayes which aims at analyzing some readily available indicators (age, smoking, alcohol consumption, chest pain, etc.) effects on lung cancer and discovering some rules on given data. The method can significantly reduce the risk of disease through digging out a clear and understandable model for lung cancer from a medical database. Naive Bayes classifiers are a family of simple probabilistic classifiers based on applying Bayes' theorem with strong (naive) independence assumptions between the features. The validation of results at Chennai Port Hospital shows that the naïve Bayes algorithm can greatly reduce the problem and it can effectively predict the impact of these readily available indicators on the risk of lung cancer. Additionally, we get a better prediction accuracy using naïve Bayes than the support vector machine algorithm, logistic regression and random forest.

**Keywords:** prediction model; naïve Bayes; Lung Cancer

## 1. Introduction

Machine learning is a field of computer science that gives computer systems the ability to "learn" (i.e. progressively improve performance on a specific task) with data, without being explicitly programmed. machine learning explores the study and construction of algorithms that can learn from and make predictions on data— such algorithms overcome following strictly static program instructions by making data-driven predictions or decisions, through building a model from sample inputs. Machine learning is employed in a range of computing tasks where designing and programming explicit algorithms with good performance is difficult or infeasible.

RStudio is a free and open-source integrated development environment (IDE) for R, a programming language for statistical computing and graphics. RStudio is available in two editions: RStudio Desktop, where the program is run locally as a regular desktop application; and RStudio Server, which allows accessing RStudio using a web browser while it is running on a remote Linux server. Prepackaged distributions of RStudio Desktop are available for Windows, macOS, and Linux.

RStudio is available in open source and commercial editions and runs on the desktop (Windows, macOS, and Linux) or in a browser connected to RStudio Server or RStudio Server Pro. Further Rstudio allows us to perform predictive analysis using machine learning algorithms.

## 2. Problem Definition

Modern medicine generates a great deal of information stored in medical database. In today's world, every individual is facing growing health issues which need to be cured quickly. With continually increasing lung cancer in patients due to high intake of tobacco and puff, predicting the cancer in patients at an early stage is the huge issue for the clinicians to make decisions. Since it is considered as a taboo in some countries people fear to come forward to diagnose the disease, the best place to find occurrence of disease is by

applying machine learning concept to create the predictive model by using the data collected in the hospital regarding the patients affected by lung cancer to predict lung cancer.

## 3. Existing System

In the existing system, the model is created for the prediction of Lung Cancer. It is based on the basis of Support Vector Machine Algorithm. The model is established on the CT images.

### Drawbacks

- The existing model requires scans images of the patients to detect the presence of cancer in patients.
- 77% of accuracy is achieved in this model.
- The model is trained with only 12 CT scans in which 6 of them are cancer affected patients and rest are non-affected.

## 4. Proposed System

### 4.1 Dataset Description

Dataset used in this study is more precise and accurate in order to improve the predictive accuracy of data mining algorithms. Attributes for symptom is used to diagnosis of disease are to be handled efficiently to obtain the optimal outcome from the data mining process. The attribute such as Age, Gender, Yellow Finger, Anxiety, Peer Pressure, Chronic Disease, Fatigue, Allergy, Alcohol Consumption, Smoking, chest pain, coughing of blood, shortness of breath, wheezing, swallowing difficulty are taken to consider for predicting the lung cancer. Rstudio implements algorithms for data pre-processing, feature reduction, classification such as Naive Bayes, Random Forest, Support Vector Machines, K-Nearest-Neighbours are also implemented. The performances of these algorithms for lung cancer disease are analyzed using confusion matrix.

**Abstract :** Being widely adopted by worldwide service providers, the MPLS technology to connect geographically separated customer sites becomes important in reliability. It is used to implement VPNs to connect the customer networks i.e., Inter-provider VPN network. In this paper we first briefly describe VPN switch are behind the scope of secure private MPLS connections such as several VPN deployments emerged from the sudden growth of requirements. We then discuss about the requirements of inter connections from customer end to service provider in one's perspective. We then propose and discuss the methods used for deployment options from service providers point of view. In this paper, we present an novel method of communication among branches or partner branches of an organization each of them situated at distinct geographical areas with absence of the same ISP in every area. We came up with an idea of designing an Inter provider network i.e., connecting multiple ISPs with the private network mechanism which provides global reachability. It deals with the security issues confidently and provides there placement of Internet in private / public organizations.

**Index Terms** — *MPLS Technology, VPN, Inter-provider network, VPN deployments, distinct geographical areas, absence of the same ISP, replacement of Internet, private / public organizations.*

## 1. INTRODUCTION

The Internet has proven that multiple separately managed networks can be built and interconnected in such a way that end users can send and receive traffic without having to be aware of the underlying fact that multiple providers may be involved in transporting their traffic. While the Internet model has demonstrated success in multiple providers working together, for the model uses a very basic set of requirements only. Given a set of fundamental rules agreed on by all providers, network destinations and associated metrics can be shared. Providers monitor and maintain their own autonomous systems (ASs) and peering points, and can forward Internet traffic they receive toward intended destinations reach able through alternate providers.

MPLS is enabling a new generation of advanced services, such as network-based layer 3 (L3) and layer2 (L2) virtual private networks (VPNs), and voice over IP (VoIP) over MPLS and MPLS VPNs. Now that these new features are deployed in each individual provider's network, the need to inter connect the networks of multiple providers to provide end-to-end advanced services becomes urgent, as no single provider has a footprint large enough to satisfy all customer needs. Furthermore, the availability of inter-provider quality of service (QoS) capability. All these services are very different in nature than simple Internet traffic delivery. New business models, new technologies, and new processes need to be developed, and a higher level of cooperation among providers is needed to meet service demands.

Unlike Internet services, currently there are no common rules and procedures among providers for MPLS interconnections. Each connection between providers is customized to suit the specific needs of the involved providers. This adhoc nature requires tremendous effort to establish business models, processes, ordering, billing, interconnection technologies, security agreements, monitoring and troubleshooting processes, QoS and class of service (CoS) definitions, and service level agreement (SLA) implementation. While cooperation between providers solves some issues, other issues, such as end-to-end QoS, still present consider able challenges part of the initial effort to move closer to common solutions and practices, with the best interests of providers and end users in mind.

So far there are many ISPs (Internet Service Providers) providing MPLS VPN network connections, VPN only connections, Internet oriented MPLS connections based on layers i.e., L2VPNs & L3VPNs. Also the Inter provider connection (Multiple ISPs) through Internet based VPNs using MPLS in the background, are in exercise currently. This paper's main theme is that we can incorporate the different ISPs to implement competition over customer sites by providing ip address scheme with the agreement of each provider.

## 5. ASBR-to-ASBR approach using MP-eBGP method

In this method, ASBRs use traditional IPv4 routing to integrate VPNs across two adjacent service providers. In this method, the ASBRs use MP-eBGP (Multi-Protocol-Exterior Border Gateway Protocol) to peer with each other to exchange VPNv4 (version4) routes between autonomous systems[2]. This is called the ASBR-to-ASBR approach, also known as MP-eBGP for VPNv4 exchange. This approach there for reduces the need to have per-VPN configuration on the ASBRs as in the back-to-back VRF method and there for allows VPNv4 prefixes to be carried across multiple service providers.

Nonetheless, to allow the VPNv4 prefixes transportation, the link between the autonomous systems must support the exchange of MPLS packets because the VPNv4 updates are encapsulated in MPLS packets when they traverse an Autonomous system and thus need to be capsulated when going across the ASs. The MP-eBGP session between directly connected interfaces on the ASBRs enables the interfaces to forward label packets [2].

Some important characteristics to keep in mind when using this method:

- No requirement of LDP or IGP (Interior Gateway protocol) to be able don't the interface connecting the two ASBRs.
- BGP default Route-target filter need not to be configured on an ASBR that does not have any VRFs configured. The command ensures that the ASBR accepts the BGP VPNv4 prefixes from other Provider Edge Routers inside the AS [2].

To maintain an end to end LSP path from customer site of one ISP too their ISP customer site ,MPLS is enabled between the ASBRs. Routers in the network with ASBR-ASBR onfiguration are configured with the following:

- 1) The provider edge routers on AS 65001 and AS 65002 are configured with MPLS using LDP protocol and also designed with bgp configuration.
- 2) Route reflectors which are used by each ISP are updated with IP ranges using BGP protocol.
- 3) Border routers (ASBRs) are configured with MP-eBGP protocol.

## 6. RESULTS AND DISCUSSION

Significant reduction in latency is observed with the simulation of the design in ASBR-to-ASBR Approach using MP-eBGP Method.

The inter-connection between routers are made successfully using OSPF (as IGP protocol) and iBGP protocols within both ISPs and MPLS is enabled.

### 7. CONCLUSION AND FUTURE ENHANCEMENT

As the proposed system brings the precinct of inter connection of ISP-ISP, it has the significance of private IP range. We are assigning the private ip addresses to all the channeled routers and hosts toward the data. Although most of the companies in the countries work through Internet with their host computers access, it is formidable that their data is open to public. The risks associated with the Internet are advertised everyday by the trade and main stream media. For corporations the risks are even more and apparent. Stolen or deleted corporate data adversely affect people's livelihoods, cost the company money. If it's a small company then it could put it out of business. Since the Internet is a public network you always risk having someone access any system you connect to it. So this proposal of a private network comes with a complete no exposure of public domain yields the ease of having no doubt about the protection of information dealt between the inter-branches. More over this design of network also provides very low latency and there by high speed performance since the overload caused by the exchange of overheads in the system of Internet is totally reduced and acts as a leased connection to the branches from the organization. This method also helps the providers / operators to enhance their revenue value if they form their own suitable agreements each other because of high probability of Internet services exhausts or becomes almost non-trustable in the future. In this paper has the facility to be employed in IPv6 addressing also which is to be deployed in the fourth coming years which will enable higher degree of addressing and auto-configuration mechanism.
