

MOHAMED SATHAK A J COLLEGE OF ENGINEERING

(Approved by AICTE, New Delhi and affiliated to Anna University, Chennai)

Siruseri IT Park, Egattur, Chennai - 603 103

3.3.3 Number of books and chapters in edited volumes/books published and papers published in national/ international conference proceedings per teacher during last five years

Sl. No.	Name of the Author	Title of the book	Year of publication	ISBN/ISSN number of the proceeding	Name of the publisher
1.	Dr.K.S.Srinivasan	Communication Theory	2019-2020	978-81-89638-43-6	Anuradha Publication
2.	Dr.K.S.Srinivasan	Principles of Communication Engineering	2019-2020	978-81-87721-95-6	Anuradha Publication
3.	Dr.K.S.Srinivasan	Electric Circuits and Electronic Devices	2019-2020	978-81-8472-085-3	Anuradha Publication
4.	Dr.K.S.Srinivasan	Basic Electrical and Electronics Engineering	2019-2020	978-81-8472-086-0	Anuradha Publication
5.	Dr.K.S.Srinivasan	Digital Communication	2019-2020	978-81-89638-19-1	Anuradha Publication
6.	Dr.K.S.Srinivasan	Electronic Devices	2019-2020	978-81-8472-254-3	Anuradha Publication
7.	Dr.K.S.Srinivasan	Electronic Devices and Circuits	2019-2020	978-81-8472-101-0	Anuradha Publication
8.	Dr.K.S.Srinivasan	Electronic Circuits I	2019-2020	978-81-8472-100-3	Anuradha Publication
9.	Dr.K.S.Srinivasan	Electronic Circuits II	2019-2020	978-81-89638-16-0	Anuradha Publication
10.	Dr.K.S.Srinivasan	Electronics and Microprocessors	2019-2020	978-81-89638-19-1	Anuradha Publication
11.	Dr.K.S.Srinivasan	Digital Signal Processing	2019-2020	81-87721-46-4	Anuradha Publication
12.	Dr.K.S.Srinivasan	Electric Circuit Theory	2019-2020	978-81-938894-2-8	Chess Educational Publishers
13.	Dr.K.S.Srinivasan	Electronic Devices and Circuits (As per the JNTU Syllabus)	2019-2020	978-81-89638-08-5	Anuradha Publication

COMMUNICATION THEORY

CONTENTS

CHAPTER 1

INTRODUCTION TO COMMUNICATION SYSTEMS	1.1 - 1.8
1. Introduction	1.1
2. What is communication?	1.1
3. Communication process and its components	1.1
4. Types of communication system	1.3
5. Modulation	1.6
6. Need for modulation	1.6
Review questions	1.8

CHAPTER 2

AMPLITUDE MODULATION SYSTEMS	2.1 - 2.126
1. Introduction	2.1
1.1 Amplitude modulation	2.2
1.2 Angle or exponential modulation	2.2
2. Amplitude modulation	2.3
3. AM envelope	2.3
4. AM frequency spectrum and bandwidth	2.5
5. Phasor representation of AM with carrier	2.6
6. Coefficient of modulation or modulation index	2.7
7. Degrees of modulation	2.7
8. AM power distribution	2.9
9. AM current relation and transmission efficiency	2.11
10. Modulation by several sine waves or complex information signal	2.12
11. Doubleside band suppressed carrier AM (DSB-SC-AM)	2.13
12. Single side band suppressed carrier AM (SSB - SC - AM)	2.17
13. Vestigial side band amplitude modulation (VSB - AM)	2.22
14. AM modulator circuits	2.35

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

33. AM receivers	2.99
34. Receiver parameters	2.101
35. Tuned radio frequency (TRF) receiver or straight receiver	2.103
36. Principles of superheterodyne	2.105
37. AM superheterodyne receiver	2.106
38. Double frequency conversion AM receiver	2.110
39. Frequency translation	2.111
40. Multiplexing	2.114
41. Frequency division multiplexing	2.114
Review questions	2.123

CHAPTER 3

ANGLE MODULATION SYSTEMS	3.1 - 3.58
1. Introduction	3.1
2. Frequency modulation	3.2
3. Phase modulation	3.4
4. Phase deviation and modulation index	3.5
5. Multitone modulation	3.8
6. Transmission bandwidth of FM	3.9
7. Conversion of PM to FM / frequency modulator	3.11
8. Conversion of FM to PM / phase modulators	3.12
9. Generation of narrow band FM	3.13
10. Generation of wide band FM	3.15
11. Commercial broadcast FM	3.20
12. Phasor representation of an FM and PM	3.20
13. Average power of an AM/FM wave	3.21
14. Generation of FM	3.21
15. Direct method of FM generation	3.22
15.1 Varactor diode modulator	3.22
15.2 Reactance tube modulator	3.24
16. Indirect method of FM wave generation	3.28
16.1 Armstrong method of FM generation	3.29

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

17. FM transmitters	3.33
18. Indirect method	3.34
19. Comparison of AM and FM	3.39
20. Comparison of FM and PM	3.39
21. Principle of FM detectors	3.39
22. Slope detector	3.40
23. Balanced slope detector	3.42
24. Foster Seely discriminator	3.43
25. Ratio detector	3.50
26. FM superheterodyne receiver	3.53
Review questions	3.55

CHAPTER 4

NOISE THEORY	4.1 - 4.78
1. Introduction to probability theory	4.1
2. Definitions of probability	4.1
3. Probability density functions	4.3
4. Cumulative distribution function	4.5
5. Mean values, variances and standard deviation	4.7
6. Joint cumulative distribution function	4.11
7. Joint probability density function	4.11
8. Statistical independence	4.12
9. Marginal distribution and marginal density functions	4.13
10. Basic terminology of random process	4.13
11. Joint moments	4.14
12. Correlation	4.15
13. Introduction to noise	4.21
14. External noise	4.22
15. Internal noise	4.23
16. Noise figure and noise factor	4.37
17. Noise figure of cascaded stages or Frii's formula	4.38
18. Noise figure of an amplifier	4.40

PRINCIPAL
MOHAMMED GATHAK A.J. COLLEGE OF ENGINEERING
 34, Koyambeddi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

19. Noise temperature	4.45
20. Effective or equivalent noise resistance	4.47
21. Calculation of noise figure	4.49
22. Noise figure from equivalent noise resistance	4.51
23. Experimental determination of noise figure	4.52
24. Noise equivalent bandwidth	4.54
25. Narrowband noise	4.55
Review questions	4.77

CHAPTER 5

NOISE IN LINEAR MODULATION SYSTEMS	5.1 - 5.40
1. Introduction	5.1
2. System model and parameters	5.1
3. Noise in amplitude modulated systems	5.3
4. Noise performance of DSB - SC - AM	5.9
5. Noise performance of SSB/ SC AM and VSB AM	5.10
6. Noise performance of square law detector	5.13
7. Noise Performance of FM System	5.15
8. Threshold effect in FM system	5.22
9. Threshold extension by FMFB technique	5.24
10. Threshold improvement through De-emphasis	5.27
11. Noise performance of phase modulation	5.32
12. Comparison of analog modulation systems	5.36
Review questions	5.40

CHAPTER 6

INFORMATION THEORY AND CODING	6.1 - 6.62
1. Introduction	6.1
2. Measure of information	6.1
3. Entropy or average and information rate	6.3
4. Entropy in binary case	6.5
5. Properties of entropy	6.6

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

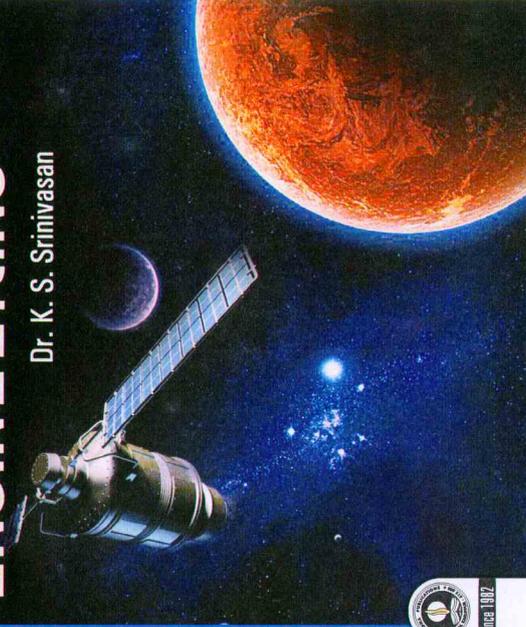

6. Joint and conditional entropy	6.7
7. Relation between different entropies	6.9
8. Entropy in continuous case	6.11
9. Source coding theorem	6.12
10. Mutual Information and channel capacity	6.14
11. Properties of mutual information	6.15
12. Continuous channels	6.17
13. Maximum entropy of continuous channel or Gaussian channel	6.20
14. Channel capacity of Gaussian channel	6.23
15. Discrete memory less channel	6.25
16. Channel coding theorem	6.34
17. Coding	6.36
18. Shannon fano-coding	6.37
19. Huffman coding	6.38
Review questions	6.62
Index	I.1 - I.2

PRINCIPLES OF COMMUNICATION ENGINEERING

CONTENTS

CHAPTER - I

AMPLITUDE MODULATION TRANSMISSION AND RECEPTION

1.1 - 1.86

1.	Introduction	1.1
2.	Amplitude modulation	1.3
3.	AM envelope	1.3
4.	AM frequency spectrum and bandwidth	1.5
5.	Phasor representation of AM with carrier	1.5
6.	Coefficient of modulation or percent modulation or modulation index	1.6
7.	Degrees of modulation	1.7
8.	AM power distribution	1.8
9.	AM current relation and efficiency	1.10
10.	Modulation by complex information signal	1.11
11.	Doubleside band suppressed carrier AM	1.12
12.	Single side band suppressed carrier AM	1.16
13.	Vestigial side band amplitude modulation	1.21
14.	Am modulator circuits	1.34
15.	Emitter modulation or low power AM	1.36
16.	Collector modulator or medium and high power AM modulator	1.38
17.	AM transmitters	1.45
18.	Broadcast AM transmitters	1.48
19.	Low level AM transmitter	1.52
20.	High level AM transmitter	1.53
21.	Comparison of AM system	1.55
22.	Quadrature amplitude modulation	1.56
23.	Principles of AM detection	1.58
24.	AM receivers	1.67
25.	Receiver parameters	1.69

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
24, Saliv Gandhi Road (OMR), Siruseri, IT Park
Tel: 044-603 183

26.	Tuned radio frequency (TRF) receiver or straight receiver	1.71
27.	Principles of superheterodyne	1.73
28.	AM superheterodyne receiver	1.74
29.	Double frequency conversion AM receiver	1.78
	Review questions	1.84

CHAPTER II

ANGLE MODULATION TRANSMISSION AND RECEPTION 2.1 - 2.54

1.	Introduction	2.1
2.	Frequency modulation	2.3
3.	Phase modulation	2.5
4.	Phase deviation and modulation index	2.5
5.	Multitone modulation	2.8
6.	Transmission bandwidth of FM	2.9
7.	Conversion of PM to FM or frequency modulator	2.11
8.	Conversion of FM to PM / phase modulators	2.12
9.	Commercial broadcast FM	2.15
10.	Phasor representation of an FM and PM	2.16
11.	Average power of an am/fm wave	2.16
12.	Generation of FM	2.17
13.	Direct method of FM generation	2.18
14.	Reactance tube modulator	2.20
15.	Indirect method of FM wave generation	2.24
16.	FM transmitters	2.28
17.	Indirect method	2.30
18.	Comparison of AM and FM	2.33
19.	Comparison of FM and PM	2.34
20.	FM detectors	2.34
21.	Balanced slope detector	2.35
22.	Foster seely discriminator	2.37
23.	Ratio detector	2.43
24.	FM superheterodyne receiver	2.46

PRINCIPAL
M. MOHAMMED SATHAK A.J. COLLEGE OF ENGINEERING
 3rd floor, Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

25. FM noise suppression	2.48
26. Threshold extension by fmb technique	2.51
Review questions	2.54

CHAPTER III

DIGITAL MODULATION TECHNIQUES 3.1 - 3.45

1. Introduction	3.1
2. BFSK	3.3
3. Binary phase shift keying	3.13
4. Quadrature PSK	3.18
5. Differential PSK	3.24
6. Performance comparison of digital modulation schemes	3.29
7. M ary FSK	3.31
8. Minimum shift keying (MSK) systems	3.32
9. Correlative coding	3.37
10. Duobinary encoding	3.37
11. Modified duobinary encoding	3.41
12. Generalized form of correlative coding	3.43
Review questions	3.44

CHAPTER IV

BASEBAND DATA TRANSMISSION 4.1 - 4.48

1. Introduction	4.1
2. Low pass sampling theorem	4.3
3. Reconstruction of message from its samples	4.6
4. Quadrature sampling bandpass signals	4.8
5. Signal distortion in sampling	4.11
6. Practical aspects of sampling	4.13
7. Discrete PAM signals	4.19
8. Mathematical analysis of pam	4.25
9. Spectrum of PAM signals	4.27

PRINCIPAL
MAHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 No. Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

10. Intersymbol interference	4.29
11. Nyquist criterion for distortion less base band binary transmission	4.32
12. Eye patterns	4.38
13. Baseband m ⁿ -ary PAM system	4.40
Review questions	4.47

CHAPTER V

SPREAD SPECTRUM AND MULTIPLE ACCESS TECHNIQUES 5.1 - 5.48

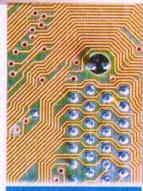

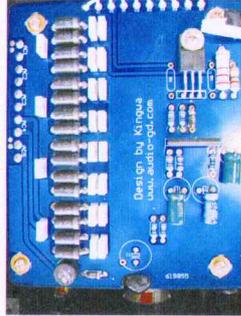

1. Introduction	5.1
2. Definitions of spread spectrum	5.1
3. Model of spread spectrum communication systems	5.5
4. Generation of pseudo noise (PN) sequence	5.6
5. Principle of direct sequence spread spectrum	5.12
6. Performance of dsss in the presence of interference	5.16
7. Direct sequence spread spectrum using BPSK system	5.19
8. Performance characteristics of DSSS system	5.23
9. Frequency hopping spread spectrum	5.27
10. Slow frequency hopping SS	5.28
11. Fast frequency hopping SS	5.30
12. Multiple access technique	5.31
13. Wireless Communication System	5.32
14. TDMA for wireless communication	5.35
15. Introduction to CDMA	5.37
16. Direct sequence CDMA (DS CDMA) system / CDMA for wireless communication systems	5.39
17. Synchronization of spread spectrum systems	5.41
18. Comparison of spread spectrum technique	5.42
19. Rake receiver	5.42
20. Source coding of space for wireless communication	5.44
Review Questions	5.48

CONTENTS

CHAPTER 1 SEMI CONDUCTORS AND RECTIFIERS	1.1-1.52
1. Introduction	1.1
2. Energy Band in Solids	1.3
3. Energy band diagram of Solids	1.4
4. Semiconductors	1.6
i. Intrinsic Semiconductors	1.6
ii. Extrinsic Semiconductors	1.7
5. Mass Action Law	1.10
6. Conduction of current in semiconductor	1.10
7. Conductivity Modulation	1.12
8. Drift Current	1.12
9. Diffusion current	1.13
10. Theory of PN Junction	1.14
11. Operation of a PN junction	1.16
(i) Forward Bias	1.16
(ii) Reverse Bias	1.17
(iii) V-I Characteristics of P-N Junction	1.18
12. Breakdown in Diodes	1.20
13. Zener Diode	1.21
14. Introduction to power supplies	1.23
15. Single Phase Half-wave Rectifier	1.25
16. Full Wave Rectifier	1.31
(a) Centre tapped type FWR	1.31
(b) Bridge rectifier	1.36
17. Diode Stacking and Swamping	1.38
18. Comparison of HWR and FWR	1.39
19. Voltage Regulators	1.39
20. Characteristics of Voltage regulators	1.41
21. Zener diode Shunt regulator	1.43
Short Questions and Answers	1.46
Review Questions	1.52
CHAPTER 2 TRANSISTORS AND AMPLIFIERS	2.1-2.76
1. Introduction	2.1
2. Operation of PNP Transistor	2.2
3. Operation of NPN Transistor	2.4
4. Transistor Circuit Configurations	2.5
5. Common Base Configuration	2.5
6. Base width modulation or Early effect	2.9
7. Common Emitter Configuration	2.10
8. Common Collector Configuration	2.13

PRINCIPAL

34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

9.	Comparison of transistor configuration	2.16
10.	Introduction to amplifier	2.17
11.	Operating Point and Load Line Analysis	2.17
12.	Transistor Biasing	2.24
13.	Base Resistor Method or Fixed bias	2.26
14.	Collector to Base Bias	2.27
15.	Self Bias (OR) Voltage Divider Bias	2.28
16.	Classification of Amplifiers	2.31
17.	Introduction to cascaded amplifiers	2.32
18.	C E Amplifier / Single stage RC coupled amplifier	2.35
19.	Introduction to power amplifiers	2.37
20.	Classification of power amplifiers	2.39
21.	Class A Power Amplifier	2.40
22.	Transformer coupled class A amplifier	2.43
23.	Push Pull Amplifiers	2.45
24.	Class B Power Amplifier	2.47
25.	Class B pushpull amplifier	2.49
26.	Class C tuned amplifier	2.51
27.	Introduction to tuned amplifier	2.53
28.	Need for Tuned amplifiers	2.53
29.	Parallel resonant or tuned circuit	2.54
30.	Series Resonant Circuit	2.56
31.	Comparison of series and parallel resonant circuit	2.57
32.	Classification of Tuned amplifiers	2.58
33.	Single tuned amplifier	2.59
34.	Double Tuned Amplifier	2.60
35.	Stagger tuned Amplifier	2.62
	Short Questions and Answers	2.63
	Solved Problems	2.69
	Review Questions	2.75

CHAPTER 3 POWER AND CONTROL ELECTRONIC DRIVES 3.1-3.64

1.	Introduction	3.1
2.	Basic construction of JFET	3.1
3.	Operation of JFET	3.3
4.	Characteristics of JFET	3.5
	a) Transfer Characteristics	3.6
	b) Drain Characteristics	3.6
5.	Comparison between FET and BJT	3.8
6.	JFET parameters	3.9
7.	Common Source Amplifier	3.12
8.	Common Drain Amplifier	3.13
9.	Common Gate Amplifier	3.14

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park

10.	Silicon Controlled Rectifier	3.15
11.	DIAC	3.21
12.	TRIAC	3.22
13.	Unijunction Transistor	3.23
14.	Introduction to feedback	3.29
15.	General structure of feedback circuit	3.29
16.	Types of feedback	3.30
17.	Performance measures of Negative Feedback Amplifiers	3.31
18.	Feedback topologies	3.38
19.	Classification of Negative Feedback amplifier	3.40
20.	Voltage Series Feedback	3.41
21.	Voltage Shunt Feedback	3.43
22.	Current Series Feedback	3.44
23.	Current Shunt Feedback	3.46
24.	Comparison of performance measures of feedback amplifier	3.48
25.	Switching characteristics of Transistor	3.48
26.	Temperature control using negative feedback	3.50
27.	Speed control of motor using negative feedback	3.51
	Short questions and answers	3.52
	Solved Problems	3.60
	Review Questions	3.64

CHAPTER 4 SIGNAL GENERATORS AND LINEAR IC'S 4.1-4.60

1.	Introduction	4.1
2.	Classification of oscillators	4.1
3.	Theory of Oscillators	4.2
4.	Selection of an oscillator	4.3
5.	Stability of an oscillator	4.3
6.	Barkhausen Criterion	4.6
7.	Frequency range of RC and LC oscillator	4.7
8.	Hartley Oscillator	4.8
9.	Colpits Oscillator	4.10
10.	Principle of RC Oscillators	4.13
11.	RC Phase shift oscillator	4.13
12.	Wein bridge Oscillator	4.15
13.	Limitations of LC and RC oscillators	4.17
14.	Crystal Oscillator	4.18
15.	Crystal Oscillator Circuit	4.19
16.	Astable Multivibrators	4.21
17.	Collector coupled Astable Multivibrator	4.22
18.	Monostable Multivibrator	4.26
19.	Bistable Multivibrator	4.27
20.	Bistable multivibrator with commutating capacitors	4.29

PRINCIPAL

 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

21.	Introduction to operational amplifier	4.32
22.	Schematic symbol and characteristics of an ideal OP amp	4.33
23.	Equivalent Circuit of an Op-Amp	4.33
24.	Open Loop Op-amp Configurations	4.35
25.	Closed Loop Op-Amp Configurations	4.38
26.	Characteristics of OP amp	4.43
27.	Operational Amplifier Parameters	4.44
28.	Summing Amplifier	4.45
29.	Scale changer or multiplier	4.47
30.	Differentiator	4.48
31.	Integrator	4.49
	Short Questions and Answers	4.50
	Review Questions	4.60

CHAPTER 5 DIGITAL ELECTRONICS 5.1 - 5.73

1.	Introduction	5.1
2.	Decimal number system	5.1
3.	Characteristics of a number system having positional value	5.1
4.	Binary Number System	5.2
5.	Octal number system	5.3
6.	Hexadecimal number system	5.4
7.	Conversion of number system	5.5
	(i) Binary to decimal conversion	5.5
	(ii) Decimal to binary conversion	5.6
	(iii) Binary to octal conversion	5.7
	(iv) Octal to binary conversion	5.7
	(v) Decimal to octal conversion	5.8
	(vi) Octal to decimal conversion	5.8
	(vii) Binary to hexadecimal conversion	5.9
	(viii) Hexadecimal to binary conversion	5.9
	(ix) Decimal to hexadecimal conversion	5.9
	(x) Hexadecimal to decimal conversion	5.10
	(xi) Binary arithmetic operations	5.11
	(xii) Hexadecimal arithmetic operations	5.12
8.	Complements in number system	5.14
9.	Logic gates	5.18
	(a) AND gate	5.18
	(b) OR gate (any or all gate)	5.19
	(c) NOT gate (Inverter)	5.20
	(d) Universal Gates	5.21
	(e) EX - OR (or) XOR gate (Exclusive -OR)	5.22
	(f) EX-NOR (or) XNOR gate (Exclusive - NOR)	5.23

10.	Conversion of gates	5.23
11.	Characteristics of digital IC's	5.24
12.	Boolean algebra	5.26
13.	Postulates of boolean algebra	5.27
14.	Boolean Algebra theorem	5.27
15.	Combinational logic circuits	5.30
16.	Half adder	5.30
17.	Full adder	5.31
18.	Binary parallel adder	5.33
19.	Half subtractor	5.33
20.	Full subtractor	5.34
21.	Sequential logic circuits	5.35
22.	Flip – flops	5.36
23.	RS flip-flop (Reset -set flip-flop)	5.36
24.	Clocked RS Flip-flop	5.37
25.	D flip-flop (Delay or Data flip-flop)	5.39
26.	JK flip-flop	5.40
27.	Master - slave J-K flip-flop	5.41
28.	T Flip-flop (Toggle flip-flop)	5.43
29.	Conversion of flip-flops	5.43
30.	Counters	5.45
31.	Asynchronous up counter (Ripple counter)	5.46
32.	Synchronous up counter	5.48
33.	Asynchronous Down counters	5.50
34.	Synchronous down counters	5.51
35.	3bit reversible synchronous counter (up/down counter)	5.52
36.	Modulus counter	5.54
37.	Ring counter	5.58
38.	Shift registers	5.59
39.	A/D Converters	5.62
40.	Introduction to digital computer	5.65
	Short Questions and Answers	5.66
	Review Questions	5.73

DIGITAL COMMUNICATION

CONTENTS

UNIT I

PULSE MODULATION	1.1 – 1.114
1. Introduction	1.1
2. Low pass sampling theorem	1.5
3. Bandpass sampling	1.12
4. Distortion due to sampling	1.15
5. Practical aspects of sampling	1.17
6. Types of pulse modulation	1.22
7. The pulse modulation system characteristics	1.25
8. Pulse amplitude modulation	1.26
9. Synchronization in PAM system	1.34
10. Pulse duration or pulse width modulation	1.35
11. Pulse Position Modulation	1.43
12. Signal to noise ratio in pulse systems	1.48
13. Cross talk in PPM	1.55
14. Time division multiplexing in PAM	1.56
15. Pulse Code Modulation	1.57
16. Synchronous time division multiplexing in PCM	1.71
17. Noise in PCM system	1.72
18. Delta Modulation	1.75
19. Noise performance of delta modulation	1.79
20. Adaptive Delta Modulation	1.82
21. Quantization noise in ADM	1.85
22. Differential Pulse Code Modulation	1.86
23. Comparison of pulse modulation	1.90
24. Linear Prediction	1.91

25. Prediction filter	1.92
26. Coding speech at low bit rates	1.93
Solved Problems	1.98
Review Questions	1.111

UNIT II

BASE BAND PULSE TRANSMISSION	2.1 - 2.56
1. Introduction	2.1
2. Intersymbol interference	2.2
3. Nyquist criterion for distortionless baseband binary transmission	2.12
4. Raised cosine channel / Practical solution	2.15
5. Matched filter	2.17
6. Optimum transmitting and receiving filters for noise immunity	2.32
7. Correlative coding	2.38
8. Duobinary signalling	2.38
9. Modified duobinary signalling	2.42
10. Generalized form of correlative coding	2.44
11. Baseband M'-ary pam system	2.45
12. Eye patterns	2.50
13. Equalization	2.53
Review Questions	2.55

UNIT III

PASSBAND DATA TRANSMISSION	3.1 - 3.74
1. Introduction	3.1
2. A model of bandpass data transmission systems	3.2
3. Gram - Schmidt orthogonalization procedure	3.3
4. Optimum coherent receiver / correlation receivers	3.9

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

5. Optimum non coherent bandpass system	3.15
6. Digital modulation techniques	3.16
7. Binary Amplitude Shift Keying or ON - OFF keying	3.17
8. Binary Frequency Shift Keying (BFSK)	3.27
9. Binary phase shift keying (BPSK)	3.40
10. Quadrature PSK	3.46
11. Differential PSK (DPSK)	3.54
12. Performance comparison of digital modulation schemes	3.59
13. M ary FSK	3.61
14. Minimum shift keying (MSK) systems	3.62
15. Synchronization techniques	3.67
16. Carrier synchronization	3.67
17. Symbol or timing synchronization	3.69
Solved Problems	3.70
Review Questions	3.72

UNIT IV

ERROR CONTROL CODING	4.1 - 4.112
1. Introduction	4.1
2. Measure of information	4.1
3. Entropy or Average and information rate	4.3
4. Entropy in binary case	4.5
5. Properties of entropy	4.6
6. Joint and conditional entropy	4.7
7. Relation between different entropies	4.9
8. Entropy in continuous case	4.11
9. Source coding theorem	4.12

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

10. Mutual information and channel capacity	4.14
11. Properties of mutual information	4.15
12. Continuous channels	4.17
13. Discrete memory less channel	4.20
14. Channel coding theorem	4.28
15. Coding	4.30
16. Error control coding	4.33
17. Block codes	4.34
18. Linear block codes	4.37
19. Hamming codes	4.45
20. Cyclic codes	4.52
21. BCH codes	4.59
22. Reed Soloman (RS) codes	4.60
23. Convolutional codes	4.61
24. Viterbi decoding algorithm	4.72
25. Sequential decoding for convolutional codes	4.75
26. Trellis coded modulation (TCM)	4.80
Solved Problems	4.86
Review Questions	4.112

UNIT V

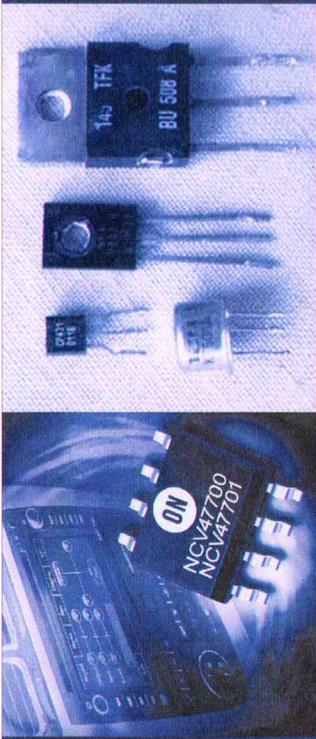

SPREAD SPECTRUM SYSTEMS	5.1 - 5.48
1. Introduction	5.1
2. Definitions of spread spectrum	5.1
3. Model of spread spectrum communication systems	5.3
4. Generation of pseudo noise sequence	5.5
5. Principle of direct sequence spread spectrum (DSSS)	5.9
6. Performance of DSSS in the presence of interference	5.13

7. Direct sequence spread spectrum using coherent BPSK system	5.16
8. Performance characteristics of DSSS system	5.20
9. Frequency Hopping Spread Spectrum	5.24
10. Slow frequency hopping systems	5.26
11. Fast frequency hopping	5.28
12. Introduction to CDMA	5.29
13. Direct Sequence CDMA (DS CDMA) system	5.30
14. Synchronization of SS systems	5.30
15. Tracking of CDMA signals	5.33
16. Synchronization of spread spectrum systems	5.35
17. Comparison of spread spectrum technique	5.36
Solved Problems	5.36
Review Questions	5.47

ELECTRONIC DEVICES

Contents

<u>UNIT - 1 : SEMICONDUCTOR DIODES</u>	<u>1.1 - 1.118</u>
1. Introduction	1.1
2. Intrinsic Semiconductors	1.13
3. Extrinsic Semiconductor	1.19
4. Charge Densities in Metal	1.24
5. Current density in Semiconductor	1.26
6. Charge densities in Extrinsic Semiconductor	1.28
7. Drift Current and Diffusion currents	1.30
8. Hall Effect	1.31
9. Continuity equation	1.34
10. Theory of PN Junction	1.37
11. Energy band diagram	1.38
12. Operation of a PN junction	1.41
13. Diode Current Equation	1.45
14. VI-Characteristics of P-N Junction	1.49
15. Temperature dependance of PN junction diode	1.51
16. Breakdown in Diodes	1.54
17. Transition and Diffusion Capacitance	1.55
18. Diode Models	1.62
19. Minority Carrier Injection	1.63
20. Charge control description	1.65
21. Switching characteristics of diode	1.66
Summary	1.69
Formulae	1.77
Objective Type Questions with Answers	1.80
Solved Problems	1.99
Short Questions and Answers	1.105
Review Questions	1.117

UNIT - 2 : BIPOLAR JUNCTION TRANSISTORS		2.1 - 2.120
1.	Introduction	2.1
2.	Potential Variation and Minority Carrier Concentrations in open circuit or unbiased Transistor and Biased Transistor	2.3
3.	Operation of PNP and NPN Transistor	2.8
4.	Current Equation of a Transistor	2.12
5.	Characteristics of CB Configuration	2.19
6.	Base width modulation or Early effect	2.22
7.	Characteristics of CE Configuration	2.24
8.	Characteristics of CC Configuration	2.28
9.	Transistor as an Amplifier	2.31
10.	Hybrid Model of Transistor	2.33
11.	Hybrid π Model of Transistor	2.72
12.	Ebers - Moll Model of Transistor	2.83
13.	Gummel Poon Model of Transistor	2.88
14.	Switching Characteristics of Transistor	2.90
15.	Transistor Ratings	2.92
16.	Multi - Emitter Transistor	2.98
	Summary	2.100
	Formulae	2.103
	Objective Type Questions with Answers	2.106
	Solved Problems	2.111
	Short Questions and Answers	2.115
	Review Questions	2.119
UNIT - 3 : FIELD EFFECT TRANSISTORS		3.1 - 3.68
1.	Introduction	3.1
2.	Construction of JFET	3.2
3.	Operation of JFET	3.4
4.	Current Equation of a JFET	3.6
5.	Characteristics of JFET	3.9
6.	MOSFETS	3.15

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

7. Current Equation of MOSFET	3.16
8. Channel Length Modulation	3.19
9. Threshold voltage of MOSFET	3.21
10. D MOSFET and Characteristics	3.23
11. E MOSFET and Characteristics	3.26
12. Equivalent Circuit Model and Parameter	3.28
13. Gate capacitance of MOSFET	3.35
14. Handling Precautions of MOSFET	3.37
15. FET as a Voltage - Variable Resistor (VVR)	3.39
16. Dual Gate MOSFET	3.40
Summary	3.42
Formulae	3.46
Objective type Questions with Answers	3.47
Solved Problems	3.52
Short questions and Answers	3.53
Review Questions	3.66
UNIT - 4 : SPECIAL SEMICONDUCTOR DEVICES	4.1 - 4.54
1. Introduction	4.1
2. Energy band diagram of Metal Semiconductor	4.2
3. Current flow in Metal Semiconductor junction	4.5
4. Semiconductor Metal junction diode	4.7
5. MESFET	4.8
6. Schottky Barrier Diode	4.11
7. Zener Diode	4.12
8. Varactor Diode	4.21
9. Tunnel Diode	4.24
10. Gallium Arsenic Devices	4.33
11. Laser Diode	4.36
Summary	4.44
Objective type Questions with Answers	4.46
Short Questions and Answers	4.48
Review Questions	4.53

PRINCIPAL

UNIT - 5 : POWER DEVICES AND DISPLAY DEVICES		5.1 - 5.76
1.	Introduction to Power Devices	5.1
2.	Silicon Controlled Rectifier (SCR)	5.1
3.	Unijunction Transistor (UJT)	5.7
4.	DIAC	5.11
5.	TRIAC	5.13
6.	Power BJT / Power Transistor	5.16
7.	Power MOSFET	5.20

ELECTRONIC DEVICES AND CIRCUITS

CONTENTS

CHAPTER - I : INTRODUCTION TO SEMICONDUCTOR	1.1 - 1.62
1. Introduction	1.1
2. Atomic Theory	1.2
3. Classification of Materials	1.8
4. Intrinsic Semiconductors	1.13
5. Extrinsic Semiconductor	1.16
5.1 N-type Semiconductor	1.16
5.2 P-type Semiconductor	1.18
6. Charge Densities in Metal	1.21
7. Current density in semiconductor	1.23
8. Charge densities in extrinsic Semiconductor	1.25
9. Drift Current and Diffusion currents	1.27
10. Hall Effect	1.28
11. Continuity equation	1.31
Summary	1.34
Formulae	1.39
Objective Type Questions	1.42
Solved Problems	1.49
Short Questions and Answers	1.56
Review Questions	1.62
CHAPTER - II : PN JUNCTION DIODE	2.1 - 2.66
1. Introduction	2.1
2. Theory of PN Junction	2.1
3. Energy band diagram of pn junction	2.3
4. Operation of a PN junction	2.6
5. Current Equation of pn junction diode	2.9
6. VI-Characteristics of P-N Junction	2.13

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

7.	Temperature dependance of PN junction diode	2.15
8.	Breakdown in Diodes	2.18
8.1	Zener Breakdown	2.18
8.2	Avalanche Breakdown	2.19
9.	Junction Capacitance	2.19
9.1	Space charge or Transition capacitance	2.19
9.2	Diffusion Capacitance	2.24
10.	Diode approximations	2.25
11.	Laser Diode	2.27
12.	Light Emitting Diode (LED)	2.35
13.	Zener Diode	2.40
	Summary	2.43
	Objective Type Questions	2.46
	Solved Problems	2.57
	Short Questions and Answers	2.60
	Review Questions	2.65

CHAPTER - III : RECTIFIER AND POWER SUPPLY **3.1 - 3.74**

1.	Introduction	3.1
2.	Half-wave Rectifier	3.5
3.	Full Wave Rectifier	3.15
4.	Comparison of HWR and FWR	3.25
5.	Introduction to Filters	3.29
6.	Input Inductor filter	3.29
6.1	HWR with input inductor filter	3.30
6.2	FWR with input Inductor filter	3.33
7.	Capacitor Filter	3.36
7.1	Half Wave Rectifier with Capacitor Filter	3.36
7.2	FWR with Capacitor Filter	3.39
8.	LC filter	3.43
9.	π Filter (or) CLC Filter (or) Capacitor Input Filter	3.48
10.	Comparison of filters	3.50

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

11. Introduction to Voltage Regulators	3.54
12. Zener Diode shunt voltage regulator	3.57
Summary	3.65
Objective type Questions	3.69
Review Questions	3.73
CHAPTER - IV : TRANSISTORS	4.1 - 4.104
1. Introduction of BJT	4.1
1.1 Symbols and Conventions	4.2
2. Potential Variation and Minority Carrier Concentrations in Open Circuit or Unbiased Transistor and Biased Transistor	4.3
3. Operation of PNP and NPN Transistor	4.8
4. Current Equation of a Transistor	4.12
5. Characteristics of CB Configuration	4.19
6. Base width modulation or Early effect	4.22
7. Characteristics of CE Configuration	4.24
8. Characteristics of CC Configuration	4.28
9. Transistor as an Amplifier	4.31
10. Introduction to FET	4.33
11. Construction of JFET	4.34
12. Operation of JFET	4.36
13. Current Equation of a JFET	4.38
14. Characteristics of JFET	4.41
15. MOSFETS	4.47
16. Current Equation of MOSFET	4.48
17. D MOSFET and Characteristics	4.51
18. E MOSFET and Characteristics	4.54
19. Equivalent Circuit Model and Parameter	4.56
20. Handling Precautions OF MOSFET	4.58
21. Comparison of MOSFET	4.59
22. FET as a Voltage - Variable Resistor (VVR)	4.60
23. Introduction to power devices	4.61

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

24. Silicon Controlled Rectifier (SCR)	4.62
25. Unijunction Transistor (UJT)	4.67
Summary	4.72
Formulae	4.78
Objective Type Questions	4.82
Solved Problems	4.88
Short Questions and Answers	4.93
Review Questions	4.103

CHAPTER - V : BIASING AND STABILIZATION **5.1 - 5.56**

1. Introduction to biasing	5.1
2. Need for Biasing	5.2
3. Operating Point and Load Line Analysis	5.3
4. Base Resistor Method or Fixed bias	5.12
5. Collector to Base Bias	5.16
6. Self Bias (or) Voltage Divider Bias	5.20
7. FET Biasing	5.28
8. Fixed bias	5.28
9. Self Bias	5.31
10. Voltage Divider Biasing	5.34
11. Bias Compensation	5.37
12. Heat Sink	5.40
13. Transistor Ratings	5.42
14. Thermal Runaway	5.44
Summary	5.47
Objective type Questions	5.49
Review Questions	5.56

CHAPTER - VI : AMPLIFIERS **6.1 - 6.100**

1. Introduction	6.1
2. Hybrid Parameters	6.2
3. Analysis of transistor amplifier using h parameters	6.5
3.1 CE configuration using hybrid equivalent circuit	6.7
3.2 CB configuration using hybrid equivalent circuit	6.9
3.3 CC configuration using hybrid model	6.10

PRINCIPAL
MUHAMMAD SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

4.	Graphical determination of Hybrid Parameters	6.13
5.	BJT amplifier	6.19
6.	Common Emitter amplifier	6.21
7.	Common Collector or Emitter follower Amplifier	6.26
8.	Common Base amplifier	6.30
9.	Common source amplifier	6.35
10.	Source follower / Common Drain Amplifier	6.39
11.	CG amplifier	6.42
12.	Introduction - frequency response of amplifiers	6.45
13.	Hybrid π Model of Transistor	6.49
14.	Miller Effect	6.55
15.	CE short circuit current gain	6.57
16.	Low frequency response of BJT amplifier	6.61
17.	High frequency analysis of BJT (CE) Amplifier	6.67
18.	Low frequency response of JFET amplifier	6.72
19.	FET amplifier at high frequency	6.77
20.	Cascaded or multistage Amplifiers	6.81
	Summary	6.86
	Objective type Questions	6.93
	Review Questions	6.99

CHAPTER - VII : MULTISTAGE AMPLIFIERS **7.1 - 7.98**

1.	Introduction	7.1
2.	Basic Differential Amplifier	7.1
3.	Differential Amplifier with Constant Current Source	7.13
4.	Differential Amplifier with Emitter Resistors for Balance	7.18
5.	Transfer Characteristics of differential Amplifier	7.21
6.	Introduction to tuned amplifiers	7.28
7.	Need for Tuned amplifiers	7.28
	7.1 Parallel Resonant or Tuned Circuit	7.29
	7.2 Series Resonant Circuit	7.33
8.	Single tuned amplifier [capacitive coupling]	7.36

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

9.	Single Tuned Inductively Coupled Amplifier	7.42
10.	Instability of Tuned Amplifier	7.46
11.	Neutralization	7.48
12.	Unilateralisation Technique	7.53
13.	Mismatching Technique	7.55
14.	Introduction to power amplifiers	7.56
15.	Class A RC Coupled Power Amplifier	7.59
16.	Transformer coupled class A amplifier or Single ended class A amplifier	7.65
17.	Thermal stability and heat sink design	7.68
18.	Push Pull Amplifiers	7.71
19.	Class B Power Amplifier	7.73
20.	Class B push pull amplifier	7.75
21.	Transformerless class B push pull amplifier	7.78
22.	Complementary Symmetry Class B Amplifier	7.79
23.	Distortions in Amplifiers	7.83
24.	Class AB amplifier	7.87
	Summary	7.89
	Objective type Questions	7.92
	Review Questions	7.98

CHAPTER - VIII : FEEDBACK AMPLIFIERS

AND OSCILLATORS

8.1 - 8.74

1.	Introduction to Feedback Amplifiers	8.1
2.	Block diagram of feedback circuit	8.2
3.	Performance measures of Negative Feedback Amplifiers	8.4
4.	Feedback topologies	8.11
5.	Input and output resistance with Feedback	8.13
6.	Voltage Series Feedback [Series - Shunt Feedback]	8.14
7.	Voltage Shunt Feedback [Shunt-Shunt Feedback]	8.17
8.	Current Series Feedback [Series - Series feedback]	8.19
9.	Current Shunt Feedback [Shunt - Series feedback]	8.21
10.	Comparison of performance measures of feedback amplifier	8.23
11.	Method of indentifying feedback topology and basic amplifier with loading effect of feedback	8.23

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

12. Introduction to oscillators	8.24
13. Method for start of oscillation	8.26
14. Stability of an oscillator	8.28
15. Barkhausen Criterion	8.30
16. Frequency range of RC and LC oscillator	8.31
17. RC Phase shift oscillator	8.32
18. Wein bridge Oscillator	8.43
19. General Form of LC Oscillator	8.47
20. Hartley Oscillator	8.49
21. Colpits Oscillator	8.51
22. Crystal Oscillator Circuit	8.54
Summary	8.57
Formulae	8.61
Objective type Questions	8.63
Solved Problems	8.69
Review Questions	8.73

ELECTRONICS CIRCUIT-I

CONTENTS

UNIT - I

TRANSISTOR BIASING		1.1 - 1.66
1.	Introduction	1.1
2.	Open circuited transistor or unbiased transistor	1.2
3.	Transistor under biased condition	1.4
4.	Transistor circuit configurations	1.7
5.	Comparison of transistor configuration	1.19
6.	Introduction to biasing	1.20
7.	Need for biasing	1.21
8.	Operating point and load line analysis	1.21
9.	Base resistor method or fixed bias	1.30
10.	Collector to base bias	1.34
11.	Self bias (or) voltage divider bias	1.38
12.	FET biasing	1.46
13.	Fixed bias	1.46
14.	Self bias	1.49
15.	Voltage divider biasing	1.52
16.	Bias compensation	1.55
17.	Heat sink	1.58
18.	Transistor ratings	1.60
19.	Thermal runaway	1.62
20.	The FET as a voltage - variable resistor (vvr)	1.65
	Review questions	1.66

M. SATHYANARAYANAN
34, Rajiv Gandhi Road (Old), Siruseri, IT Park
Chennai-603 103.

UNIT - II

MIDBAND ANALYSIS OF SMALL SIGNAL AMPLIFIERS	2.1 - 2.116
1. Introduction	2.1
2. Classification of amplifiers	2.2
3. Method of drawing small signal equivalent circuit	2.3
4. Analysis of transistor amplifier using h parameters	2.6
5. Generalised model	2.11
6. Parameters conversion	2.16
7. Small signal analysis of CE amplifier	2.31
8. Small signal analysis of common collector amplifier	2.37
9. Small signal analysis CB amplifier	2.42
10. Small signal analysis of JFET CS amplifier	2.47
11. Small signal analysis of source follower	2.51
12. Small signal analysis of CG amplifier	2.54
13. Introduction to multistage amplifier	2.57
14. RC coupled amplifier or two stage CE amplifier	2.59
15. Transformer coupled amplifier	2.67
16. Direct coupled amplifier	2.73
17. Cascode amplifier	2.77
18. Darlington amplifier	2.80
19. Boot strapped emitter follower	2.86
20. Boot strapped darlington emitter follower amplifier	2.88
21. Basic emitter coupled differential amplifier	2.90
22. Differential amplifier with constant current source	2.100
23. Differential amplifier with emitter resistors for balance	2.105
24. Transfer characteristics of differential amplifier	2.108
Review questions	2.115

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

UNIT - III

FREQUENCY RESPONSE OF AMPLIFIERS	3.1 - 3.48
1. Introduction	3.1
2. Definition of cutoff frequencies and bandwidth	3.2
3. Bode plot	3.5
4. Amplifier risetime and sag, their relation to cutoff frequencies	3.10
5. Low frequency response of BJT amplifier	3.13
6. Low frequency response of JFET amplifier	3.19
7. The hybrid - π equivalent circuit	3.23
8. Analysis of CE configuration using hybrid π equivalent circuit	3.27
9. Miller effect	3.32
10. High frequency analysis of BJT (CE) amplifier	3.34
11. High frequency analysis of FET amplifier	3.39
12. General expression for frequency response of multistage amplifiers	3.43
Review questions	3.48

UNIT - IV

LARGE SIGNAL AMPLIFIERS	4.1 - 4.48
1. Introduction	4.1
2. Classification of power amplifiers	4.3
3. Class A RC coupled power amplifier	4.4
4. Transformer coupled class A amplifier	4.10
5. Thermal stability and heat sink design	4.13
6. Push pull amplifiers	4.16
7. Class B power amplifier	4.18
8. Class B push pull amplifier	4.20
9. Transformerless class B push pull amplifier	4.23
10. Complementary symmetry class B amplifier	4.24
11. Distortions in amplifiers	4.28
12. Class AB amplifier	4.32
13. Class C power amplifier	4.34
14. Class 'D' amplifier	4.40
Review questions	4.47

PRINCIPAL

UNIT - V

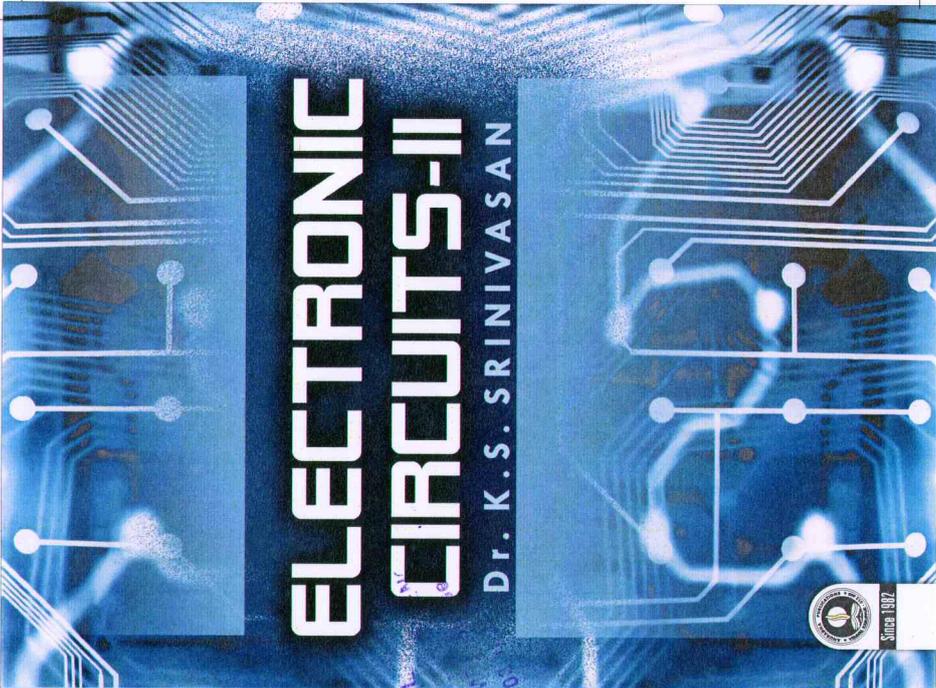

RECTIFIERS AND POWER SUPPLIES	5.1 – 5.90
1. Introduction	5.1
2. Half-wave rectifier	5.5
3. Full wave rectifier	5.15
4. Comparison of HWR and FWR	5.25
5. Filter	5.29
6. Inductor filter	5.29
7. Capacitor filter	5.36
8. LC filter	5.43
9. π filter	5.48
10. Comparison of filters	5.50
11. Electronically regulated d.c. power supplies	5.54
12. Zener diode shunt voltage regulator	5.57
13. Transistor shunt regulator	5.64
14. Transistor series regulator	5.66
15. BJT controlled voltage regulator	5.67
16. Current limiting in power supply	5.70
17. Over load or short circuit protection	5.70
18. Fold back current limiting	5.71
19. Comparison of series and shunt voltage regulator	5.72
20. Introduction to switching regulator	5.76
21. SMPS or switching regulator	5.80
22. Power control using SCR	5.83
Review questions	5.88

ELECTRONICS CIRCUITS II

CONTENTS

CHAPTER - I : FEEDBACK AMPLIFIERS		1.1 - 1.78
1.	Introduction	1.1
2.	Block diagram of feedback circuit	1.2
3.	Properties of Negative Feedback Amplifiers	1.5
4.	Feedback topologies	1.13
5.	Ideal characteristics of feedback topology	1.16
6.	Voltage Series Feedback [Series - Shunt Feedback]	1.16
7.	Voltage Shunt Feedback [Shunt Shunt Feedback]	1.18
8.	Current Series Feedback [Series - Series feedback]	1.21
9.	Current Shunt Feedback [Shunt - Series feedback]	1.23
10.	Comparison of performance measures of feedback amplifier	1.25
11.	Method of identifying feedback topology	1.26
12.	Voltage Series Feedback – Amplifier	1.27
	12.1 Emitter Follower Amplifier	1.28
	12.2 FET source follower	1.30
13.	Current Series Feedback Amplifier	1.32
	13.1 CE Amplifier with unbypassed R_E	1.33
	13.2 FET amplifier using current series feedback	1.34
14.	Voltage shunt feedback amplifier	1.36
15.	Current shunt feedback amplifier	1.38
16.	Nyquist Stability criterion	1.41
	Summary	1.43
	Formulae	1.45
	Objective type Questions	1.46
	Solved Examples	1.49
	Short Questions With Answers	1.70
	Review Questions	1.76

CHAPTER - II : OSCILLATORS

2.1 - 2.80

1. Introduction	2.1
2. Method for start of oscillation	2.3
3. Stability of an oscillator	2.5
4. Barkhausen Criterion	2.7
5. Frequency range of oscillators	2.9
6. General Form of LC Oscillator	2.9
7. Hartley Oscillator	2.11
8. Colpits Oscillator	2.14
9. Clapp Oscillator	2.17
10. Tuned Collector Oscillator	2.19
11. Principle of RC Oscillators	2.23
12. RC Phase shift oscillator [using cascaded CR (HP) Network]	2.24
13. RC phase shift oscillator using cascaded RC (LP) Network	2.28
14. RC Phase shift oscillator using JFET and Op-amplifier	2.31
15. Wein bridge Oscillator	2.34
16. Limitations of LC and RC oscillators	2.40
17. Twin T oscillator	2.40
18. Franklin oscillator	2.43
19. Armstrong oscillator	2.46
20. Quartz Crystal construction and its equivalent circuit	2.47
21. Crystal Oscillator Circuit	2.49
22. Miller Crystal Oscillator	2.52
23. Amplitude stabilization	2.53
Summary	2.53
Objective Type Questions	2.55
Solved Examples	2.58
Short Questions with Answers	2.70
Review Questions	2.79

CHAPTER - III : TUNED AMPLIFIERS**3.1 - 3.88**

1. Introduction	3.1
2. Need for Tuned amplifiers	3.1
3. Parallel resonant or tuned circuit	3.2
4. Inductor (or) coil losses	3.5
5. Unloaded and loaded Q of tank circuits	3.7
6. Classification of Tuned amplifiers	3.9
7. Single tuned amplifier [Capacitive Coupling]	3.10
8. Single Tuned Inductively Coupled Amplifier	3.16
9. Impedance matching to improve gain [Tapped Tuned Circuit]	3.20
10. Synchronously tuned amplifier	3.23
11. Double Tuned Amplifier	3.28
12. Stagger tuned Amplifier	3.34
13. IC tuned amplifier	3.37
14. Effect of Cascading tuned amplifiers	3.39
15. High Frequency Limitations of Amplifiers	3.41
16. Instability of Tuned Amplifier	3.43
17. Neutralization	3.45
18. Unilateralisation Technique	3.50
19. Mismatching Technique	3.52
20. Class B Tuned amplifier	3.54
21. Class C tuned amplifier	3.56
Objective Type Questions	3.58
Solved Examples	3.60
Short Questions with Answers	3.79
Review Questions	3.86

**CHAPTER - IV : WAVESHAPING AND
MULTIVIBRATOR CIRCUITS****4.1 - 4.144**

1. Introduction	4.1
2. High Pass RC circuit as differentiator	4.1
3. Low Pass RC circuit as integrator	4.16

**PRINCIPAL****MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING**
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

4. Lowpass RL circuit as integrator	4.30
5. High Pass RL circuit as differentiator	4.34
6. Switching characteristics of Diode	4.37
7. Switching Characteristics of Transistor	4.39
8. Speed up capacitor or High speed Transistor switch or Transistor switch with capacitive load	4.42
9. Non linear wave shaping circuit	4.42
10. Diode Clippers	4.43
11. Two Level Clipping	4.47
12. Transistor (Emitter coupled) clipper	4.48
13. Diode Comparator	4.49
14. Clamping Circuits	4.50
15. Difference between positive and negative clamping	4.54
16. Clamping circuit theorem	4.55
17. Introduction to multivibrators	4.56
18. Collector coupled Astable Multivibrator	4.59
19. Emitter coupled astable multivibrator	4.67
20. Comparison of collector coupled and emitter coupled Astable multivibrator	4.72
21. Monostable Multivibrator	4.72
22. Triggering of Monostable multivibrator	4.77
23. Bistable Multivibrator	4.79
24. Bistable multivibrator with commutating or speed up capacitors	4.82
25. Triggering of bistable multivibrator	4.85
26. Comparison of Monostable and Bistable multivibrator	4.89
27. Schmitt Trigger	4.89
28. Application of multivibrator	4.95
Summary	4.95
Objective Type Questions	4.102
Solved Examples	4.110
Short Questions with Answers	4.139
Review Questions	4.142

**CHAPTER - V : BLOCKING OSCILLATIONS
AND TIME BASE GENERATIONS**

5.1 - 5.81

1. Introduction	5.1
2. Pulse transformer	5.1
3. Introduction to time base / Sweep Generators	5.6
4. Triggered or Monostable voltage time base generator	5.10
5. UJT Saw tooth generator	5.11
6. Principle of Exponential Sweep Circuit	5.15
7. Principle of constant current charging method	5.20
8. Principles of Miller integrator circuit	5.22
9. Principle of Bootstrap	5.26
10. Miller integrator voltage sweep generator using negative current feedback	5.30
11. Bootstrap voltage sweep generator	5.32
12. Bootstrap generator using emitter follower	5.34
13. Modified or practical Bootstrap sweep generator	5.37
14. Introduction to Current Time Base Generators	5.40
15. A simple Current Sweep generator	5.43
16. Introduction to Blocking Oscillator	5.46
17. Monostable or Triggered Blocking Oscillator (Base Timing)	5.47
18. Monostable blocking oscillator with emitter timing	5.50
19. Triggering of monostable blocking oscillator	5.54
20. Frequency or pulse width control using core saturation method	5.55
21. Astable blocking oscillator – Diode controlled	5.58
22. Astable blocking oscillator (RC controlled)	5.61
23. Comparison of astable blocking oscillator	5.65
24. Applications of blocking oscillator	5.65
Summary	5.66
Objective Type Questions	5.68
Solved Examples	5.70
Short Questions with Answers	5.77
Review Questions	5.80

ELECTRONICS AND MICRO PROCESSORS

CONTENTS

UNIT 1 : SEMICONDUCTORS AND RECTIFIERS	1.1 - 1.84
1. Introduction	1.1
2. Energy band in solids	1.4
3. Intrinsic semiconductors	1.8
4. Two types of flow	1.10
5. Doping of a semiconductor	1.10
6. Extrinsic semiconductor	1.10
7. Law of electrical neutrality	1.14
8. Charge densities in extrinsic semiconductor	1.15
9. Conductivity in extrinsic semiconductor	1.15
10. Mobility and Drift current	1.18
11. Diffusion current	1.19
12. Theory of PN junction	1.24
13. Energy band diagram of an open circuit PN junction	1.25
14. Operation of a PN junction / PN junction as a rectifier	1.29
15. V-I Characteristics of PN junction	1.31
16. Diode resistance	1.33
17. Ideal diode and diode approximation	1.33
18. Breakdown mechanisms in semiconductor diodes	1.35
19. Zener diode	1.37
20. Introduction to Rectifiers	1.39
21. Half-wave rectifier	1.43
22. Full-wave rectifier	1.53
23. Comparison of HWR and FWR	1.63
24. Voltage regulators	1.67
25. Zener diode shunt voltage regulator	1.70
26. Comparison of series and shunt voltage regulator	1.76
Short questions and answers	1.77
Review questions	1.84

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

UNIT 2 : TRANSISTORS AND AMPLIFIERS	2.1 - 2.137
1. Introduction	2.1
2. Open circuited transistor or Unbiased transistor	2.2
3. Operation of PNP transistor	2.6
4. Operation of NPN transistor	2.9
5. Common base configuration	2.12
6. Common emitter configuration	2.17
7. Common collector configuration	2.21
8. Comparison of transistor configuration	2.24
9. Basic construction of JFET	2.26
10. Operation of JFET	2.28
11. Characteristics of JFET	2.30
12. Comparison between FET and BJT	2.34
13. JFET parameters	2.34
14. Comparison of small signal models of BJT and JFET	2.37
15. Comparison of N channel and P channel JFET	2.37
16. Silicon controlled rectifier	2.39
17. Unijunction Transistor (UJT)	2.45
18. TRIAC	2.49
19. DIAC	2.52
20. Introduction to Biasing	2.53
21. Need for biasing	2.54
22. Operating point and Load line analysis	2.55
23. Base resistor method or Fixed bias	2.63
24. Collector to base bias	2.67
25. Self bias (or) Voltage divider bias	2.71
26. FET biasing	2.82
27. Fixed bias	2.82
28. Self bias	2.85
29. Small signal analysis of an amplifier	2.89
30. Small signal analysis of CE amplifier	2.90

 PRINCIPAL
 MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

31. Small signal analysis of JFET CS amplifier	2.91
32. Classification of Power amplifiers	2.100
33. Transformer coupled class A amplifier or Single ended class A amplifier	2.101
34. Class B Power amplifier	2.104
35. Class C Power amplifier	2.106
36. Introduction to feedback amplifiers	2.108
37. Performance measures of negative feedback amplifiers	2.111
38. Feedback topologies	2.118
39. Classification of negative feedback amplifier	2.120
40. Voltage series feedback	2.121
41. Voltage shunt feedback	2.124
42. Current series feedback	2.126
43. Current shunt feedback	2.128
44. Comparison of performance measures of feedback amplifier	2.130
45. Switching characteristics of Transistor	2.130
46. Temperature control using negative feedback	2.132
47. Speed control of motor using negative feedback	2.133
Short questions and answers	2.134
Review questions	2.137

UNIT 3 : DIGITAL ELECTRONICS 3.1 - 3.76

1. Introduction	3.1
2. Decimal number system	3.1
3. Characteristics of a number system having positional value	3.1
4. Binary number system	3.2
5. Octal number system	3.3
6. Hexadecimal number system	3.4
7. Conversion of number system	3.5
8. Complements in number system	3.14
9. Logic gates	3.18
10. Conversion of gates	3.23

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

11. Characteristics of digital IC's	3.24
12. Boolean algebra	3.26
13. Postulates of boolean algebra	3.27
14. Boolean Algebra theorem	3.27
15. Combinational logic circuits	3.30
16. Half adder	3.30
17. Full adder	3.31
18. Binary parallel adder	3.33
19. Half subtractor	3.33
20. Full subtractor	3.34
21. Sequential logic circuits	3.35
22. Flip – flops	3.36
23. RS flip-flop	3.37
24. Clocked RS flip-flop	3.38
25. D flip-flop	3.41
26. JK flip-flop	3.42
27. Master - slave J-K flip-flop	3.44
28. T Flip-flop	3.45
29. Conversion of flip-flops	3.46
30. Counters	3.47
31. Asynchronous up counter	3.48
32. Synchronous up counter	3.50
33. Asynchronous down counters	3.52
34. Synchronous down counters	3.53
35. 3bit reversible synchronous counter	3.54
36. Modulus counter	3.56
37. Ring counter	3.60
38. Shift registers	3.61
39. A/D Converters	3.64
40. Introduction to digital computer	3.67
Short questions and answers	3.69
Review questions	3.76

UNIT 4 : 8085 MICROPROCESSOR	4.1 - 4.66
1. Introduction	4.1
2. Organisation of a microcomputer	4.1
3. 8085 Microprocessor	4.3
4. Architecture of 8085	4.9
5. Operation of 8085	4.14
6. Timing diagram	4.18
7. Instruction format of 8085	4.24
8. Addressing modes of 8085	4.26
9. Instruction set of 8085	4.28
10. Programs using microprocessor 8085	4.44
Short questions and answers	4.62
Review questions	4.65
UNIT 5 : INTERFACING AND APPLICATIONS OF MICROPROCESSOR	5.1 - 5.38
1. Introduction	5.1
2. Interfacing concepts	5.1
3. Memory and I/O interfacing	5.4
4. Programmable peripheral interface – 8255	5.9
5. Applications of Microprocessor	5.18
6. Temperature control using 8085	5.19
7. Stepper motor control using 8085	5.24
8. Traffic light control	5.29
Short questions and answers	5.35
Review questions	5.38

DIGITAL SIGNAL PROCESSING

CONTENTS

	<i>Page No.</i>
CHAPTER 1 CT AND DT SIGNALS	1.1 – 1.92
1. Introduction	1.1
2. Classification of signals	1.2
3. Standard test signals	1.8
4. Basic operations on signals	1.12
5. Fourier series	1.18
6. Fourier transform.....	1.21
7. Sampling Theorem	1.23
Solved Problems	1.29
CHAPTER 2 Z TRANSFORMS.....	2.1 - 2.76
1. Introduction	2.1
2. Unilateral z transform	2.3
3. Region of convergence	2.4
4. Properties of ROC	2.6
5. Properties of z transform.....	2.7
6. Rational z transform	2.13
7. Pole zero analysis of Z T.....	2.13
8. Pole location and time domain behaviour for casual sequences	2.14
9. Inverse z transforms.....	2.18
10. Solutions of difference equations using Z T	2.22
11. Analysis of LTI systems in z domain	2.23
12. Causality and stability of the system	2.25
13. Relation between Z T and F T.....	2.25
Solved Problems	2.26
CHAPTER 3 DISCRETE TIME SYSTEMS	3.1 – 3.82
1. Introduction	3.1
2. Interconnection of system	3.1
3. Properties of system.....	3.3

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

4.	Properties of linear convolution	3.8
5.	Properties of DTLTI system.....	3.10
6.	Classification of DTLTI system	3.15
7.	Representation of DTLTI system	3.17
8.	Impulse response of DTLTI system	3.19
9.	Frequency response of DTLTI system.....	3.20
	Solved Problems	3.24
CHAPTER 4	DISCRETE FOURIER TRANSFORM.....	4.1 – 4.84
1.	Introduction	4.1
2.	Discrete time fourier series	4.2
3.	Discrete time fourier transform (DTFT).....	4.5
4.	Properties of DTFT.....	4.6
5.	DFT as a linear transformation.....	4.14
6.	Properties of DFT	4.16
7.	Relationship between DFT and other transforms.....	4.27
8.	Sectioned convolution filtering of long data sequences	4.29
9.	Fast fourier transform	4.36
10.	Decimation in time FFT radix 2 algorithm	4.37
11.	Decimation in frequency radix 2 FFT algorithm.....	4.47
	Solved Problems	4.53
CHAPTER 5	INFINITE IMPULSE RESPONSE (IIR)	
	FILTERS.....	5.1 – 5.92
1.	Introduction to Filter	5.1
2.	Classification of filters.....	5.2
3.	Importance of digital filters.....	5.4
4.	Comparison of analog and digital filter	5.5
5.	Infinite impulse response (IIR) filters.....	5.6
6.	Analog filter system transfer function and its frequency response	5.7
7.	Butterworth filter	5.8
8.	Chebyshev filters	5.14
9.	Comparison of Butterworth filter and Chebyshev filter	5.19

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, 11 Park
Chennai-603 103.

10.	Methods to convert analog filters into digital filters	5.20
11.	Pole zero placement method	5.21
12.	Impulse invariant transformation	5.22
13.	Bilinear or Tustin transformation	5.26
14.	Comparison of bilinear transformation and impulse invariant transformation.....	5.30
15.	Frequency transformation	5.31
16.	Choice of coefficient calculation method of IIR filter.....	5.32
	Solved Problems	5.32

CHAPTER 6 FILTERS IMPULSE RESPONSE (FIR)

	FILTERS.....	6.1 – 6.112
1.	Introduction to FIR filters	6.1
2.	Properties of FIR filters	6.2
3.	Frequency response of FIR filter for 'N' is even	6.5
4.	Types of designing of FIR filters.....	6.10
5.	Design of FIR digital filter using fourier series method ...	6.10
6.	Gibb's oscillation.....	6.11
7.	Windowing techniques.....	6.11
8.	Frequency sampling method	6.21
9.	Optimal FIR filters.....	6.28
10.	Design of FIR filters	6.30
	Solved Problems	6.31

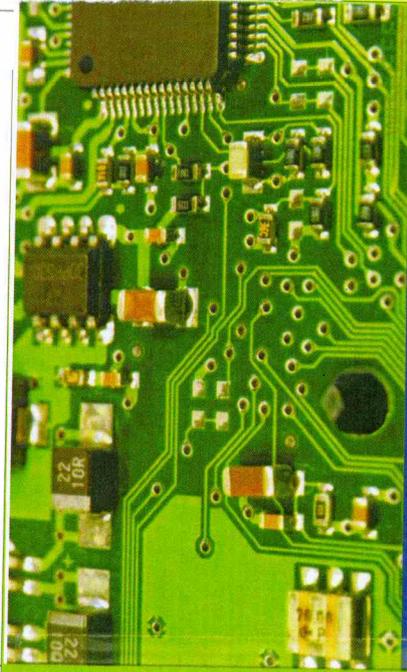

**CHAPTER 7. REALIZATION OF DIGITAL FILTERS AND
FINITE WORD LENGTH EFFECT**

	7.1 – 7.72	
1.	Introduction to realization of digital filters	7.1
2.	Realization of IIR structures	7.3
3.	Transposed form.....	7.8
4.	Cascade form.....	7.9
5.	Parallel form.....	7.11
6.	Lattice realization	7.12
7.	FIR filter structure	7.14
8.	Direct form realization.....	7.14

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Corridor
Chennai-603 103.

9.	Cascade realization of FIR system	7.15
10.	Frequency sampling structure	7.16
11.	Lattice structure of FIR system	7.19
12.	Representation of numbers.....	7.20
13.	Errors due to rounding and truncation	7.24
14.	Input quantization error.....	7.27
15.	Coefficient quantization error	7.31
16.	Product quantization error.....	7.32
17.	Limit cycle oscillations	7.34
	Solved Problems	7.36
CHAPTER 8	SPECIAL TOPICS IN DSP.....	8.1 – 8.45
1.	Introduction to random signals.....	8.1
2.	Fundamental of estimation theory	8.5
3.	Cross correlation and autocorrelation.....	8.9
4.	Periodogram	8.17
5.	Introduction to multirate signal processing.....	8.20
6.	Decimation by a factor D.....	8.21
7.	Interpolation by a factor I.....	8.24
8.	Cascade of interpolator and decimator	8.25
9.	FIR filter implementation using sampling rate conversion	8.27
10.	Applications of multirate signal processing.....	8.29
11.	Quadrature mirror filters	8.31
	Solved Problems	8.36
	Model Question Papers

ELECTRIC CIRCUIT THEORY

CONTENTS

CHAPTER 1	Basic Circuit Analysis	1 - 94
1.1	Introduction	1
1.2	Basic Definitions, Symbols and Units	2
1.3	Ohm's Law	7
1.4	Series and Parallel Connection	8
1.5	Basic Terminology in Electric Circuits	24
1.6	Kirchhoff's Law	27
1.7	Mesh Current Analysis	39
1.8	Node Voltage Analysis	41
CHAPTER 2	AC Circuit	95 - 140
2.1	Introduction	97
2.2	Basic Terminology in AC Circuits	98
2.3	Average Value	100
2.4	RMS Value	101
2.5	Inductance and Capacitance	102
2.6	Phasor Representation	106
2.7	AC Through R, L and C	111
2.8	RL Circuit	115
2.9	RC Circuit	118
2.10	RLC Circuit	119
2.11	Power, Energy and Power Factor	120

PRINCIPAL
MUDHAMED SATHAK A.J. COLLEGE OF ENGINEERING
34, Rajiv Gandhi Road (OMR), Siruseri, IT Park
Chennai-603 103.

CHAPTER 3	Network Reductions and Network Theorems	141 - 206
3.1	Introduction	141
3.2	Voltage Division Rule	141
3.3	Current Division Rule	142
3.4	Source Transformation	143
3.5	Thevenin's Theorem	144
3.6	Norton's Theorem	145
3.7	Maximum Power Transfer Theorem	147
3.8	Super Position Theorem	149
3.9	Star Delta Conversion	151
3.10	Reciprocity Theorem	177
3.11	Millman's Theorem	178

CHAPTER 4	Resonance Circuits	207 - 244
4.1	Introduction	207
4.2	Series Resonance	207
4.3	Frequency Response of Series Resonance	212
4.4	Quality Factor and Selectivity	214
4.5	Bandwidth of Series RLC Circuit	216
4.6	Parallel Resonance	218
4.7	Frequency response of parallel resonance	222
4.8	Q Factor of Parallel Resonance	222
4.9	Comparison of Series and Parallel Resonant Circuit	243
4.10	Important Points and Formula	243

 Chennai-603 103.

CHAPTER 5 Coupled Circuits**245 - 270**

5.1	Introduction	253
5.2	Self and Mutual Inductance	253
5.3	Coefficient of Coupling	255
5.4	Concept of Natural Current and Dot Rule	256
5.5	Analysis of Coupled Circuits	257
5.6	Equivalent Inductance of Series and Parallel Connection	258
5.7	Introduction to Tuned Circuits	260
5.8	Single Tuned Circuit	260
5.9	Double Tuned Circuits	262
5.10	Important Points and Formula	265

CHAPTER 6 Transients**271 - 342**

6.1	Introduction	271
6.2	RL - DC Transient	274
6.3	RC - DC Transients	287
6.4	RLC - DC Transient	296
6.5	RL - AC Transient	305
6.6	RC - AC Transient	307
6.7	RLC AC Transient	309
6.8	Exponential Excitation - RL Circuit	312
6.9	Exponential Excitation - RC Circuit	313
6.10	Exponential Excitation - RLC Circuit	314
6.11	Impulse Response	315
6.12	Impulse Response of RL Circuit	317
6.13	Impulse Response of RC Circuit	317
6.14	Impulse Response of RLC Circuit	318

6.15 Natural and Forced Responses	319
6.16 Important Points to Remember	340

CHAPTER 7 Two Port Networks 343 - 398

7.1 Introduction	343
7.2 Network Parameters	346
7.3 Relationship between Parameters of Two Port Network	352
7.4 Inter Connection of Two Ports Networks	359
7.5 Condition of Reciprocity and Symmetry in Two Port Network	361

CHAPTER 8 Three Phase Circuits 399 - 432

8.1 Introduction	399
8.2 Interconnection of Three Phase Sources and Loads	401
8.3 Voltage and Current Relation in Balanced System	403
8.4 Unbalanced load	407
8.5 Power Measurement (Balanced and unbalanced load)	409

CHAPTER 9 Network Topology 443 - 460

9.1 Introduction	433
9.2 Duality	445

ELECTRONIC DEVICES AND CIRCUITS (NTU)

CONTENTS

UNIT I : ELECTRON DYNAMICS AND CRO	1.1 - 1.42
1. Introduction	1.1
2. Basic terminology	1.2
3. Motion of charged particle in an electric field	1.4
4. Motion of charged particle in a magnetostatic field	1.9
5. Electron motion in an axial magnetic field	1.11
6. Deflection of electron beam in CRT	1.12
7. Defects of deflection	1.18
8. Comparison of deflection systems	1.19
9. Motion of an electron under concurrent fields with electric and magnetic field perpendicular to each other	1.20
10. Motion of an electron under concurrent fields with parallel magnetic and electric fields	1.29
11. Cathode Ray Tube	1.30
12. Picture tube	1.35
13. Measurement of voltage, current and frequency	1.38
Review Questions	1.42
UNIT II : JUNCTION DIODE CHARACTERISTICS	2.1 - 2.98
1. Review of semiconductor physics	2.1
2. Energy band in solids	2.4
3. Intrinsic semiconductors	2.9
4. Two types of flow	2.10
5. Doping of a semiconductor	2.10
6. Density distribution of available energy states in semiconductor	2.11
7. Fermi dirac probability function at different temperature	2.12
8. Fermi level in intrinsic semiconductor	2.14
9. The intrinsic concentration or Mass action law	2.17
10. Extrinsic semiconductor	2.17
11. Law of electrical neutrality	2.20

PRINCIPAL
MOHAMMED SATHAK A.J. COLLEGE OF ENGINEERING
34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
34

12. Charge densities in extrinsic semiconductor	2.21
13. Conductivity in extrinsic semiconductor	2.22
14. Mobility and Drift current	2.24
15. Diffusion current	2.25
16. Hall Effect	2.27
17. The continuity equation	2.29
18. Fermi level in extrinsic semiconductor	2.32
19. Electron and hole concentration in extrinsic semiconductor	2.33
20. Theory of PN Junction	2.39
21. Energy band diagram of an open circuit PN junction	2.41
22. Operation of a PN junction / PN junction as rectifier	2.44
23. V-I Characteristics of PN Junction	2.47
24. Diode resistance	2.48
25. Ideal diode and diode approximation	2.49
26. Current components in PN diode	2.51
27. Minority carrier injection and recombination in homogeneous semiconductors	2.55
28. Temperature dependence of diode VI characteristics	2.57
29. Space charge or transition capacitance	2.62
30. Diffusion capacitance	2.68
31. Varactor diode	2.70
32. Breakdown mechanisms in semiconductor diodes	2.73
33. Tunnel diode	2.75
34. Zener diode	2.84
35. Photo diode	2.86
36. Light Emitting Diode (LED)	2.91
37. Liquid Crystal Display (LCD)	2.93
Review Questions	2.97

UNIT III : RECTIFIERS, FILTERS AND REGULATORS 3.1 - 3.68

1. Introduction	3.1
2. Half-Wave Rectifier	3.5
3. Full Wave Rectifier	3.15
4. Comparison of HWR and FWR	3.25
5. Introduction to Filters	3.29
6. Inductor filter	3.29

PRINCIPAL
MOHAMED SATHAK A.J.COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

7.	Capacitor filter	3.36
8.	LC filter	3.43
9.	π section filter	3.48
10.	Multiple LC filters	3.50
11.	Comparison of filters	3.52
12.	Voltage regulators	3.56
13.	Zener diode shunt voltage regulator	3.59
14.	Comparison of series and shunt voltage regulator	3.66
	Review Questions	3.66

UNIT IV : TRANSISTOR AND FET CHARACTERISTICS 4.1 - 4.71

1.	Introduction	4.1
2.	Open circuited transistor or Unbiased transistor	4.2
3.	Operation of PNP Transistor	4.7
4.	Operation of NPN Transistor	4.9
5.	Detailed study of currents in a transistor	4.12
6.	Input and output characteristics of transistor	4.15
7.	Common Base configuration	4.15
8.	Common Emitter configuration	4.20
9.	Common Collector configuration	4.24
10.	Comparison of transistor configuration	4.28
11.	Ebers - Moll model	4.28
12.	Introduction to Junction Field Effect Transistor	4.35
13.	Basic construction of JFET	4.36
14.	Operation of JFET	4.38
15.	Characteristics of JFET	4.40
16.	Expression for pinch off voltage and Drain current	4.43
17.	Comparison between FET and BJT	4.45
18.	JFET parameters	4.46
19.	Comparison of small signal models of BJT and JFET	4.48
20.	Compare the N channel and P channel JFET	4.49
21.	MOSFETS	4.49
22.	Depletion mode MOSFET	4.50
23.	Enhancement - only MOSFET	4.52
24.	Comparison of JFETS and MOSFETS	4.53
25.	Characteristics of depletion mode MOSFET	4.54

PRINCIPAL
MUHAMMAD SATHAK A.J. COLLEGE OF ENGINEERING
 34, Rajiv Gandhi Road (OMR) Siruseri, IT Park
 Chennai-600 080

26. Characteristics of Enhancement - only MOSFET	4.55
27. Handling precautions for MOSFETs	4.56
28. The FET as a Voltage - Variable Resistor (VVR)	4.57
29. Comparison of P channel and N channel MOSFET	4.58
30. Silicon Controlled Rectifier	4.60
31. Unijunction Transistor (UJT)	4.66
Review Questions	4.70

UNIT V : BIASING AND STABILIZATION 5.1 - 5.44

1. Introduction	5.1
2. Need for biasing	5.2
3. DC equivalent model and criteria for fixing "Q-point"	5.3
4. Base resistor method or Fixed bias	5.11
5. Collector to base bias	5.15
6. Self bias	5.21
7. Bias compensation	5.33
8. Heat sink	5.36
9. Transistor Ratings	5.38
10. Thermal Runaway	5.40
Review questions	5.43

UNIT VI : AMPLIFIERS 6.1 - 6.61

1. Introduction	6.1
2. Classification of amplifiers	6.2
3. H-parameters representation of a transistor	6.3
4. Analysis of single stage transistor amplifier using h parameters	6.6
5. Generalised model or Approximate model for a transistor	6.11
6. Parameters conversion	6.16
7. Small signal analysis of CE amplifier	6.31
8. Small signal analysis of CC amplifier or Emitter Follower amplifier	6.38
9. Small signal analysis of CB amplifier	6.43
10. The Hybrid - π equivalent circuit	6.48
11. Concept of f_{α} , f_{β} and f_T	6.52
Review Questions	6.60

PRINCIPAL
MOHAMED SATHAK A.J. COLLEGE OF ENGINEERING
 34 Rajiv Gandhi Road (OMR), Siruseri, IT Park
 Chennai-603 103.

UNIT VII : FEEDBACK AMPLIFIERS

7.1 - 7.36

1. Introduction	7.1
2. General structure of feedback circuit	7.2
3. Performance measures of Negative Feedback Amplifiers	7.4
4. Feedback topologies	7.11
5. Classification of negative feedback amplifier	7.13
6. Voltage series feedback	7.14
7. Voltage shunt feedback	7.17
8. Current series feedback	7.19
9. Current shunt feedback	7.21
10. Comparison of performance measures of feedback amplifier	7.23
11. Voltage series feedback amplifier – Emitter follower	7.23
12. Current series feedback amplifier	7.25
13. Voltage shunt feedback amplifier	7.28
14. Current shunt feedback amplifier	7.30
Review Questions	7.35

UNIT VIII : OSCILLATORS

8.1 – 8.32

1. Introduction	8.1
2. Theory of oscillators	8.3
3. Selection of an oscillator	8.5
4. Stability of an oscillator	8.5
5. Barkhausen criterion	8.7
6. Frequency range of RC and LC oscillator	8.8
7. General form of LC oscillator	8.9
8. Hartley oscillator	8.11
9. Colpits oscillator	8.13
10. Principle of RC oscillators	8.16
11. RC Phase shift oscillator	8.16
12. Wein bridge oscillator	8.21
13. Limitations of LC and RC oscillators	8.25
14. Crystal oscillator	8.26
15. Amplitude stabilization	8.28
Review Questions	8.32

Objective type questions
